Landscape Gardening for Amateurs.

BY B. P. WAGNER.

An excellent treatise on landscape gardening as it applies to beautifying the home grounds. It is written by a thoroughly experienced practitioner and contains many fine illustrations showing the correct methods of treating grounds of all kinds, yard and factory premises. Its low price should insure it a ready sale. Price $1.00, illustrated.

AMERICAN FLORIST CO.,

CUT FLOWER BOXES
EDWARD'S FOLDING BOX CO
MANUFACTURERS
PHILADELPHIA, PA.

Los Angeles, Calif.

Easter trade was very poor. The fleet of warships being here was the cause. Our leading florist said Easter was forgotten entirely. It was hard on the growers, prices being very low. Sweet peas, 60 to 80 in a bunch, are retailing at three cents a bunch; good carnations, 30 cents per 100; violets, four cents, 50 to 75 in a bunch, and other flowers in the same ratio. This has been a poor season for the growers. Many growers (some of them Japs) are not planting for another season. A few large growers are talking of opening a flower market here. Would some of our eastern florists give us a few points how to get started? We are around peddling our stock from store to store, as some of us did in Boston 25 years ago.

Best and safest manure for florists and greenhouse use, absolutely pure, no waste, no danger. Write for circulars and prices.

The Pulverized Manure Co.,
32 Union Stock Yards, Chicago

HELENA, MONT.—Charles Otto Horn is closing out his greenhouse business and is planning to devote himself entirely to vegetable growing. Mrs. Mattie Miller is practically making the same arrangements.

KOKOMO, IND.—W. W. Coles says his retail trade was not as good as last year but wholesale trade was excellent. Lilies and azaleas sold well in pots and carnations and roses as cut flowers. Bulb stock was in poor demand and there was plenty of everything to go around. "Money seems scarce."

NEW CASTLE, IND.—Growers who sent 20,000 roses to the state republican convention for Watson and 5,000 to Connersville for Judge Barnard who was nominated by the republicans of the Sixth district, are preparing to send a large consignment to the Chicago convention, as omens of success for Vice-President Fairbanks.

Iron Reservoir Vases...

Nearly 100 styles and sizes ranging in price from $6.00 to $100.00 each.

These vases are made with a reservoir for water, from which a constant and even supply of moisture is drawn by capillary attraction, and they do not need watering oftener than once in ten or fifteen days. Thousands of Reservoir Vases are in use on lawns and in cemeteries all over the country. Our prices are no higher than those of ordinary vases. Catalogue sent on application. Liberal terms to dealers.

NOTHING DOING.

Now that Easter is past the florists have had quite an easy time, as there is very little doing in the cut flower and decoration line, with the exception of a few weddings here and there. As for the plant business, it is almost over for this season, as the people are now busy packing up to shortly take their departure to cooler climes for the summer. The growers are busy setting out their chrysanthemums for the fall trade. On account of the hot and dry weather some growers had quite bad luck with their cuttings, but, with the copious rains of a few days back, things are looking brighter.

HORTICULTURAL SOCIETY.

The Horticultural Society, May 3, attended the annual dinner tendered it by A. Alost, at his country home, Rose Villa, out on Gentilly road. Among the specially invited guests were Mayor Martin Behrman, who on this occasion was made an honorary member of the society. After partaking of a bountiful repast, toasts became in order, and President Eble appointed, as usual, C. R. Panter, the secretary, as toast-master; he acquitted himself to the satisfaction of all.

THEY HAVE ICE FREE ROOFS.

No gutter to collect the ice—no plate for ice to hang to. The U-Bar with its curved eave is ice and snow free, from ridge to foundation sill. It is the simplest, lightest, strongest, most durable, attractive and productive house built. They also cost less to maintain.

The ideal construction for private estates, parks, public institutions and florists' showrooms

PRICES BETTER.

The dark, cold and rainy weather of the past 10 days had a tendency to shorten the supply of stock and now the grower is beginning to realize something like living prices for his flowers. As usual, in cases of limited supply the shipping trade is picking up and, taking everything into consideration, we have no complaint to make about business. Roses sell fairly well but at greatly reduced prices. Carnations are about equal to the demand with a steady sale at from $1 to $5 per 100. Bulbous stock, with the exception of lilies, is about done for and there is a good call for lilies of all kinds. Peonies and irises have been greatly retarded by the cold weatner and all growers claim there will be a shortage of these, as the cold rains and snow have cut down a great many of the buds. Retail florists are using spirea Reevesii for window decorations and some good effects are produced which do not cost a great deal of money. Sweet peas are good property and daisies sell fairly well. Green goods are none too plentiful and clean up nicely every day. There are a few new ferns to be had but they are very poor in quality and hardly worth mentioning.

NOTES.

R. D. Ruttle and wife, of Covington, Ky., have the sympathy of every florist in this city in the death of their little daughter, which occurred May 9, after a lingering illness. The funeral was held on Tuesday and many beautiful floral offerings sent from the craft in this city were too numerous to describe individually. Mr. and Mrs. Ruttle take this method of expressing their thanks and appreciation for the many favors shown in their bereavement.

Peter Olinger, of the firm of Weiland & Olinger, received a telegram from his partner at New Castle, Ind., that they had acquired the Benthey-Coatsworth plant at that place. Details are lacking, but, this being the case, it will give this firm about 600,000 square feet of glass, the product of which will be handled at their wholesale house in this city.

Ben George, of the firm of George & Allan, was wearing the smile that won't come off last week. It is a little girl, and makes the eighth addition to his family.

J. Goldman, of Middletown, is cutting some exceptionally fine Richmond roses with stems three feet long. S.

Piping for Rose House.

ED. AMERICAN FLORIST:—

We want to change a 21x80-foot carnation house into a rose house. What change will we have to make in the pipe system? There are three batteries of six 2-inch pipes, running the full length of the building under three benches. The house has a 12-foot ridge and will be protected on both sides. To be more explicit about the pipes, there are nine flows and nine returns, the length of the building. At present we can hold the house at 50°, during zero weather, by heavy firing. S. & P.

Nebraska.

Something is evidently wrong with the plant, as there is now sufficient radiation to maintain 60° or even 65° under the conditions mentioned. Whether the trouble is in the size or efficiency of the boiler, or in the arrangement of the piping it is impossible to say. I would suggest that the piping be rearranged, running two flows on each plate and two about three feet below the ridge, with two returns for each flow, placed well up under the benches. Run the flows with a downward slope of one inch in 20 feet and the same with the returns. The connections for the flow pipes with the boiler should be not less than two 3-inch or three 2½-inch pipes, and the same for the return. Were it not for utilizing the pipe now in the house it would be better to use four 2½-inch flows and 12 2-inch returns. L. R. T.

Flower in the crannied wall,
I pluck you out of the crannies;
I hold you here, root and all, in my hand,
Little flower—but if I could understand
What you are, root and all, and all in all,
I should know what God and man is.
—Tennyson.

SUGGESTIONS FOR CUT FLOWER GROWERS.

English Wallflowers.

A sowing of English wallflowers may now be made. Sow thinly in drills in an open sunny piece of ground if outdoor culture is to be relied on, or in flats in a cold frame or greenhouse if doubtful about insects and weeds. The plants are hardy and do just as well outside as in, but cutworms and other troubles are apt to decimate their numbers in the earliest stages. In either case, when the seedlings have got well into the rough leaf, prepare some beds about five feet wide and prick off the plants in rows, six rows to each bed. The soil must be made very firm in order to keep the plants very stocky, rather than excite them to rank growth. Nine inches apart in the rows is a good distance to plant and the soil must be kept free of weeds until the plants cover the ground. Good plants will be produced this way for benching in late fall.

Marguerites for Winter.

Where cuttings were struck as advised recently the plants will now be nice little stock in 2-inch pots and these should be stood outside in an airy, open position, where they will get the full benefit of the sun. After they have filled these pots with roots give a shift into 4-inch and pot very firmly, so that they may stay in these pots until the end of summer without becoming much pot-bound. The idea is to get a good solid growth into the plants and these will be fine stock for planting on the benches in early autumn. Pinch them occasionally and do not allow them to form flowers as they will do if left alone. If no cuttings have been put in it is not too late to get nice stock, but more trouble will be found just now in getting growth cuttings, the points being in most cases full of flower. Strike the cuttings in quite a cool place and as soon as rooted pot up and stand the plants outside in the full sun and treat as advised for earlier specimens. Spray the plants occassionally with tobacco water; this will keep green fly in check and also make the foliage distasteful to the leaf miner. When this pest is noticed remove the affected leaves at once.

Pyrethrums.

Where seedling pyrethrums were raised early, as advised, these will now be strong vigorous plants in 2-inch pots, ready for planting out on good soil. Never let them get hard in the pots before going out, or they will take a long time to get over the shift, while, when planted just at the time they are feeling the pots, they go right ahead without any check. The pyrethrums are fairly strong feeders and the soil for them should be made moderately rich by digging in a quantity of old manure. As the plants are practically hardy it is well to give them plenty of room when growing for cutting from, one foot apart each way being a good distance. The beds may then be kept over for two or three years by covering lightly in winter with litter and leaves. After the seedlings are planted out take good care of them by cultivating the soil frequently and, should very dry weather set in, mulching with short manure. They will commence flowering in August the first season and go on until checked by frost, while each succeeding year they will improve. After the third or fourth year the plants begin to deteriorate and should not generally be kept longer, their place being then taken by young plants. These pyrethrums come fairly true from seed and some of the best colors and forms should be selected each year and seed saved, with a view of working up a good strain.

Lily of the Valley.

Inexperienced growers are often afraid to tackle lily of the valley growing and apparently think there is some secret in its culture that has to be mastered before success can be attained. The only secret, if secret it is, is how to get the best class of pips for the purpose and the grower who runs around selecting the lowest price goods will be left with a lot of rubbish, no good except for planting up for outside beds. As the most important point, then, go to a dealer of repute and pay him the proper price for the best selected pips and this will be a good start. For the benefit of the inexperienced we may say that frames

about 30 inches wide, with three inches of fine sand over a bottom of rougher material is about right. Where forcing has to be carried on, arrangements must be made to be able to provide a bottom heat of 80° or 90°, but with good valves, so that the heat can be shut off entirely when necessary. Close fitting wooden shutters to exclude light entirely are necessary; also some lighter shutters to use later after the pips have started, a thin muslin being suitable for the latter. Having the sand well firmed and thoroughly soaked with water, let the surplus drain away and then begin at one end to plant. Trim the pips just under the wig of roots and lay them ready to hand. With a small straight-edge of suitable length and an old knife cut down a line in the firm sand, throwing it forward as the work proceeds. Then lay the pips in a line about one and a half inches apart and press the sand back against them. The straight-edge is then pressed down on the sand again, and this leaves a firm level surface, as well as marking the position of the next line, which is again cut down with the knife, and so on until all are planted. As soon as one frame is finished give a thorough soaking of water and place the shutters on, quite excluding the light. These will remain on until the growth has made considerable progress and the flower spikes are thrown well up into the leaves, when a chink of light may be admitted by placing a small wedge under the front edge of the shutters. The flower spikes in a couple more days will be well above the leaves and then the light can be increased by degrees, removing the shutters in about a week and covering with the muslin screens until the foliage is quite green and the bells beginning to open, when the plants may have the full light. Many growers do not use the screens at all, but depend upon careful manipulation of the shutters. Bottom heat is not really necessary to the production of lily of the valley, but is used to hasten the crop when required. A bottom heat of 80° will ensure cutting in about 26 days from planting, with the temperature of the house around 60° at night, and this is fast enough for the majority of growers. Never let the sand get dry, but avoid wetting the bells and foliage after they become forward. Unless there is any fungus or other trouble in the sand it is not wise to renew it very often, as old sand packs closer around the roots than new.

Coleus Cordelia.

Wm. Cutbush & Son, London, Eng., are sending out the fine coleus depicted in the accompanying illustration. This lovely variety has been aptly called "the queen of the coleus," as it is unsurpassed for its beauty of color and bold and striking habit. The leaves are a beautiful shade of crimson, tinted brown and mottled with green and gold, their shape being well brought out in the picture. It is a grand variety either for inside decorative work or bedding, for both of which purposes it has been well tried out by the raiser, a private gardener of Surrey. That it has distinctive merits beyond the ordinary is proved by the fact that it has been given an award of merit by the Royal Horticultural Society, and a first class certificate at Richmond rose show, awards that are unusual for plants of this character.

THE RETAIL TRADE

YELLOW SPANISH IRISES, owing to their lasting qualities, are in excellent demand just now.

Preparing for Memorial Day.

Although Memorial day may not lead to the sale of a very high class line of flowers, yet it is a great help to retailers, especially in small towns where there is a demand for stock of a medium priced character. A good stock of flowers that make a big show for the money should be procured and shown prominently. Peonies, for instance, are usually plentiful and cheap around this holiday and they make an excellent show and can be recommended for their lasting character. German irises again are showy and handsome flowers that catch the eye and make a good display for very little money. Any such flowers are sure to sell well and give satisfaction and a customer pleased with an order on an occasion of this kind is likely to become a regular one. It is good business policy at times like these to give patrons as good value for the money as can possibly be done, consistent with a fair profit. It will make regular flower buyers of a class of people that seldom enter a florist's store at other times, while, if they are charged heavily at the time they really need flowers, they are not likely to visit the store again in a hurry.

Coleus Cordelia.

Many retailers, too, have unfortunately an idea that any old stock that is not absolutely falling to pieces is good enough for grave decorations, but a greater error was never made. In preparation for Memorial day always have a good stock of cheap wreaths. A retailer who makes quite a feature of this class of trade always prepares a number of boxwood, galax and magnolia wreaths with a few flowers in each, and for these he finds a ready demand at $1.50, $2 and $3, higher priced ones being made when desired. And it is so little trouble to make neat little wreaths of this kind that every retailer throughout the country should make up at least a few of them and try them out for a season. In almost every case where they have been tried they have been a success. Magnolia, perhaps, even more than galax or box, is especially suitable to the day and is very lasting and attractive.

Following up orders obtained from a distance at such times as these is not sufficiently practiced. It is only reasonable to suppose that a customer who sends an order from a distant town one year, for say the placing of a wreath on, or planting a grave, will be anxious to repeat this order the succeeding year. Where a record of such sales is kept, a reminder on a postal card will often bring a repeat order with no trouble or expense. And, since the collecting of pictorial cards has become such a fad, why not have some printed that are indicative of the store for general use? Something not in the style of a strict advertisement but yet sufficiently indicative of where it has come from to remind the customer. There is ample time now to get to such customers, and a reminder just before the date of Memorial day is far more likely to be successful than one sent a long time in advance. "May we repeat your order of last year?" or a similar sentence is all that is needed; the customer will usually send full instructions.

Bedding plants and roots of herbaceous flowers such as daisies, Golden Glow, summer chrysanthemums or any of the scores of such plants make a good side line at such times as these. Vincas and geraniums are sure to be in demand. Small rose bushes in pots or with good wads of wet soil and moss often find a purchaser when well displayed, while asters, ten week stocks, zinnias and other annuals that may be sold cheaply add considerably to the takings. But avoid a litter of untidy boxes of flats with some plants taken out. Keep the flats that are being sold from in the rear, distinct from those shown to attract custom. Salvias, bright little plants in small pots, are always a safe line. They sell on sight to customers that will not look at plants on which no flower is showing, even though these may be more suitable for the purposes needed. And never be above telling interested customers what to do with the plants. There is a great wave of prosperity coming for the dealers who will supply plants to beautify the home, and why not be in on the ground floor with customers in your own town?

And, most important of all, never forget the flag. Patriotic Americans must have it, must see it on Memorial day, while sojourners from other climes will admire the patriotic spirit shown. A fine flag design worked out in true outlines and good colors will always be a winning card. Again, American Beauty roses tied with the flag form an excellent means of reminding friends of absent ones or of honoring those that have passed away. We know of an

GATES AJAR BY MORRIS GOLDENSON, LOS ANGELES, CALIF.

important retailer that for years has carried out an order from the same customer for this very device, a device that can never grow old or stale. The spirit of the day should always be kept uppermost in all kinds of decorations and nothing can be more apropos than the flag. Circumstances, of course, have to be kept in mind in all these details and each retailer must study out for himself what he thinks the most likely path to a successful day's trade. In a note of this nature we can only suggest; to lay down hard and fast rules would be absurd. But trade in cut flowers the last few weeks has not been any too brisk or profitable to the retailer and it is up to everyone of us to make the best use possible of an occasion such as Memorial day.

Fine Gates Ajar.

The very fine device illustrated herewith is by Morris Goldenson, Los Angeles, Calif., and is in that clever decorator's own unique style. There is a distinctiveness about this piece that is very refreshing and it is free from the objectionable crowding of the flowers so often seen in work of this character.

On the left are marguerites, finely arranged with maidenhair and Boston fern fronds, the opposite side being principally white lilies and carnations with similar ferns and asparagus. In the center is a bunch of purple delphiniums. It is a beautiful piece and a credit to the designer.

The Alpha Floral Co., Kansas City, Mo.

The history of the development of the Alpha Floral Co., Kansas City, Mo., is contemporary with the rise to prominence of Alpha Elberfield, its genial proprietor, who, during the brief period of six years has built up a business doing $100,000 annually, although his initial outlay was less than $150. As a live instance of the great power of advertising judiciously and a tribute to its worth this business stands out prominently, Mr. Elberfield's annual expenditure for newspaper, follow-up letter, bill board, street car and other forms of legitimate advertising reaching the respectable total of $15,000. He is quite a plunger in advertising, in fact, and has none of the fear of many retail florists in regard to printer's ink.

But he does not depend upon printer's ink alone. He knows that whatever tends to create a favorable impression on the mind of the public is advertising in its best and most profitable form and he has evolved, during his business career, many unique and profitable ideas of business expansion. His latest idea was to send to each of the 3,000 customers on his books an elegant assortment of cut flowers worth $1.50 specially delivered free by the company's automobile and followed by a letter thanking the recipient for his or her patronage and loyalty to the house, of which the present was a token, noting also that the continued patronage had helped build the business that was on that day, celebrating its sixth birthday. This letter was followed by another in a few days soliciting the further continued patronage of the customer, noting how the Alpha Floral Co.'s large business enabled it to sell better flowers at less money than they were procurable for elsewhere, "the whole plan and network of our institution being conducive to the exercise of the greatest economy in our every department."

To return to the story of the business: Alpha Elberfield, burdened with the accumulated wealth named above, happened into Kansas City some six years ago and espied a little hole in the wall that looked good to him for a start. On finding that he could become the tenant of this, which was adjoining a popular drug store, for $20 per month he negotiated with the drug store, cut a doorway through and put in a window at the cost of $40 and with his capital so much reduced started his advertising campaign and his store simultaneously and commenced his career. His little bouquets and floral devices were as tasty as his ads and this, combined with the low prices asked for the goods, astonished and delighted his customers and they came back for more.

At first Alpha often found he had stock left over at night and, knowing that this, without proper storage facilities, would be a dead loss, he put his surplus into a basket and long after his competitors were in bed would walk the down-town streets and invade the restaurants until his stock was all sold. Then only would he rest for a short time, to be at his store again in the morning before the drug store was open, having often spent half the night preparing for his next day's business. Alpha had to pay C. O. D. and to put up with his cramped conditions and other inconveniences, but when at the end of six months his partner got cold feet he was able to buy him out for $60, neither of them thinking at that time that a half share in this individual business would, in six years' time, be worth $25,000. All this time he had been advertising, signing up for more space than was used by firms with 1,000 times his capital, yet always managing to meet the collectors and each month increasing his publicity.

A. Elbe field.
Of the Alpha Floral Co., Kansas City, Mo.

All this time, however, he was fighting against terrible odds and when in 1903 the floods visited Kansas City things looked pretty bad. To make matters worse he was summoned to serve on a jury which meant three days' absence from business and—ruin. Closing his door for a few minutes Alpha hot-footed to the courthouse and, after a mighty hard tussle with Judge Teasdale, succeeded in getting excused. An order for a funeral happened along that day and saved the situation and at the end of the day Alpha Elberfield was still in business. And this proved the turning point, after which he went right ahead. A year's business passed and the little hole in the wall at 802 Walnut street was too small. He was making money too and the drug store people, evidently with the best intentions, doubled the rent, at which Alpha kicked and removed to a store at 819 Walnut street at $75 per month. Increased rent, increased advertising and other expenses necessitated more business and he went after it so vigorously by fine displays and a noble front window, also keeping his store open practically day and night, that he got it. Always a keen buyer and always prompt in his payments he had a good standing now with the wholesalers and he always made it a point to have a leader of some kind every day. He also gained the reputation among society people of being able to do the best work at the shortest notice and his business advanced by leaps and bounds, necessitating a stenographer and office force. His business motto, "We strive to please," was everywhere and the store was kept so attractive that almost everyone passing made a purchase.

In December, 1907, the store was moved again to more commodious quarters at 1105 Walnut street, the most expensively rented and finest floral store in the city. An elaborate modern refrigerating plant took the place of the old ice box, the front window in fact being a "refrigerator" window and large enough to hold eight people as well as a fine stock of flowers. Now at rush times 10 clerks are needed to dispose of the orders and the growing of the business from such small beginnings to its present noble proportions is a striking tribute to the energy, pluck, capacity and determination of this remarkable man. This is, in brief, the history of the Alpha Floral Co. to date. Alpha Elberfield is now only 31 years of age and has the best of his life before him. He has a great knack of making people his friends and, justly proud of his own achievements, he never fails to profit by the experience of others whom he meets. Such men connected with any industry are a credit to it and the whole trade is proud of their achievements.

Floral Steamer of Immortelles.

Steamer trade forms no inconsiderable portion of the trade of high class retailers now and as a means of calling the attention of patrons to the fact that this class of work is taken care of a steamer model in the window is good. By far the best example of this class of work we have seen is now being shown in one of the windows at Fleischman's, Jackson boulevard and Michigan avenue, Chicago. This fine model is six and one-half feet long and five feet high from the keel to the top of the masts and has been excellently carried out by Geo. Wienhober. The hull is carried out in white immortelles, these being made in sections and fastened on a wire frame so as to bring out every detail of line. The decks are of red immortelles and the davits, sails and all lines are brought out sharply and well in white and red chenille.

There are two lines of port holes and these, as well as the chenille funnels, are lit with small, frosted electric lights, which give the ship a very fine appearance at night. Boats hang in the falls and the captain's bridge, masts and all details on deck are carried out with great accuracy as to scale. The ocean is well represented by a painted canvas underneath the boat and the whole thing is a very striking and excellent piece of work. The expense of making a boat of this class is considerable, but it is characteristic of this firm to do things well and doubtless the money is well spent. Backed up with palms and otherwise well shown the effect of this model is excellent and it will, no doubt, prove a money maker in drawing business of the kind indicated.

THE tightly packed bunches of apple blossom now seen in the retail stores are anything but an artistic way of showing a pretty flower.

Chicago Parks in Early May.

THE WEST SIDE PARKS.

The new greenhouses at Garfield park are rapidly being put in order and when the plants grow into shape a little they will doubtless attract many visitors. The tulips around the boat house are just at their best and, although they show signs of the very bad weather, there is a very fine show. The north side beds are filled with Cottage Maid, bordered with a variegated variety, which lightens the whole considerably and is continued on the south side, backed with red varieties. The new concrete building is being covered with Ampelopsis Veitchi and the delicate tracery of the stems just breaking into leaf is very pretty just now. All around, the new shrubbery and herbaceous beds are taking shape and the continued rains at least serve to keep the shrubs going. All appear to be making a healthy and satisfactory growth. There are many hundreds of daffodils around the lily ponds that brighten up the edges.

South of Madison street near the band stand there is a grand display of tulips in the large beds. Coleur Cardinal is not quite out, but looks very promising and these beds will be a mass of color in a few days. One immense bed has thousands of Cottage Maid in full beauty, bordered with Yellow Prince, all very level and the flowers of excellent quality. Other large beds are filled with T. Moore, bordered with White Pottebaker, a very effective combination. There is a fine long bed of a rose purple variety on one side of the long walk, and on the other a fine bed of daffodils, while the daffodils planted among the herbaceous plants and roses are very striking and showy and brighten up the beds while the other occupants are coming into line. This fine park will be a great boon to west side people, who will soon be flocking there in hundreds.

At Humboldt park the newly planted rose garden looks well. The plants are making a fine growth and promise a great show of flower. Just now the beds are a mass of yellow daffodils, many thousands having been planted, and these make a very fine show. At the back rhododendrons and Ghent and mollis azaleas are just ready to burst into bloom and they will be a magnificent sight shortly. Planting herbaceous stock is still going on and the plants set out last year look very flourishing. A little later, when they come into flower, this and the neighboring borders at the back of the rose garden will be a mass of flower. Vincas and phloxes are already in flower and later narcissi are pushing up among the stones in a very natural and pleasing way, far prettier really than the more formal beds. Here again the recently planted shrubs are taking to their home with a will. Near the entrance on California avenue Pyrus Japonica is flowering and the herbaceous stock is pushing up strongly, and we are looking forward to a rich display here in the near future.

BEDS OF TULIPS IN GARFIELD PARK, CHICAGO.

WINNIPEG, MAN.—In view of the fact that there is a pressing need for definite lines of work to be undertaken in the improvement of school grounds in the rural districts of the province of Manitoba, the Western Horticultural Society has inaugurated a movement to encourage the holding of horticultural competitions for the purpose of improving existing conditions. Destitute of trees and with no evidence of flowers, many of the schools present a rather dreary appearance. A little work wisely directed and well done would do much to relieve these conditions and make these places much more attractive.

FLORISTS' FERNS.

NEPHROLEPIS AMERPOHLI is highly spoken of in some of the foreign gardening papers.

"NOTHING to beat Whitmani as a market fern," is the opinion of a well known grower.

FERNS are always better repotted or transplanted when just starting into growth than when quite at rest.

ADIANTUM CAPILLUS VENERIS is almost hardy and an excellent species for small made-up devices, easily grown and standing well.

GYMNOGRAMMAS and common pterises are among the "weeds" that are constantly appearing in batches of choice seedling ferns and should be removed early to avoid crowding out better things.

Notes in Season.

The old idea that ferns, more than any other class of plants, need a heavy shade dies hard, whereas the truth is that when in good health they need very little if any more than other green leaved plants. Growers of ferns for cutting know perfectly well that, unless their plants have a fair amount of sunshine and light at all times, the produce is likely to be thin in texture and not lasting enough to be of much use to the retail florist, as it will not keep. Boston ferns again, when grown in heavy shade, do not stand well while even the small, quick growing stock for fern dishes and baskets does not thrive well if grown in a semi-dark position. It is easy, of course, to allow too much sun and fern fronds are easily injured by it, but when plants are damaged by an ordinary amount of sunlight there has been something wrong in their previous treatment.

For instance, many of the adiantums grown for cutting will if placed in a lot of heat and moisture and given heavy shading grow very luxuriantly and green and the inexperienced grower thinks his plants are doing exceptionally well. But when such plants come to be placed in light sunny houses, no matter how well ventilated or no matter how carefully the plants are treated, the fronds suffer. The shading problem is very important just now. There are newly potted or newly planted ferns that must have shade. The roots have been disturbed and are not capable of supplying sufficient moisture to the fronds, in consequence of which they wilt when the sun strikes them. But it is different with plants well established and that can be watered freely. These will stand quite a lot of sunlight and be the better for it. Only such parts of the house then as are needed for propagation or for newly potted plants need be heavily shaded, the other parts should only have just a little shading to break the full force of the sun's rays. Blinds or shades are, of course, more satisfactory than any kind of shading applied to the glass but they are expensive and out of the question in many places.

There is usually a little more room in the fern houses after the Easter plants have been removed and this gives the grower a chance to repot small ferns and to pot up the earliest runners from the propagating benches of Boston and other varieties of nephrolepis. The latter will be growing, of course, and it is well to see that the roots of the other stock are active. Sometimes, owing to having become potbound, young stock will not start freely. In such cases the balls should be broken up a little and the plants laid out on a moist bench for a few days before potting. It will then be easy to see when the little rootlets are becoming active and they can be potted. When quick growth is desired somewhat loose potting and a rough compost containing a fair percentage of peat should be given. If a solid, slower growth is required to build up good specimens let the soil contain more loam and pot more firmly. In either case keep the plants in a rather closer atmosphere than before and water moderately at the roots until re-established.

Benches of adiantum cut over at Easter should be kept a little on the dry side and all small, useless fronds cut away as well as any damaged or decayed parts. A light dusting with old soot is an advantage, or, if this is not at hand, a sprinkling of artificial fertilizer. Spraying is not usually necessary; it is harmful in fact, but the atmosphere must be kept moist by damping around the benches, walls and floors. The growth will soon start up again and then the roots must have more moisture, giving the benches a good soaking and allowing this to dry out before repeating the dose. Keep as much air as possible on the houses where there are well developed fronds fit for market and always cut the plants clean over. It is bad practice to be constantly cutting a few fronds from a plant. Let them alone until the fern is well developed and then cut over as many plants as are needed and take the heads to the packing shed or cellar to be sorted.

HARTFORD, CONN.—The exhibitions of wild flowers commenced last season at the Athanæum have been repeated this year, with very gratifying success so far.

THE CARNATION.

PINCH the young plants so as to produce about four good shoots.

WHEN planting in the field keep the varieties together as far as possible.

WHERE the water has a tendency to slime, move the surface soil occasionally on the young stock.

A FAMOUS hybridizer said it took him 16 years to develop a good habit in a fine seedling he raised.

REMOVE rusted leaves on sight and burn them. Light attacks of this disease may often be checked this way.

THE low prices of the present season may be followed next year by more satisfactory returns, so keep at it. Plant the best varieties.

SLIGHTLY rolling ground is best for field carnations, not so flat that water stands on it or so steep that the soil is disturbed by storm water.

LAWSON is said by experienced growers to be losing its constitution and taking all diseases that may be around in the houses where it is grown.

Notes in Season.

The field space for carnation planting should now be got into condition preparatory for planting out the young stock as quickly as the weather will permit. The most suitable ground for the field culture of carnations, according to our experience, is a medium light soil yet with texture enough for the plant to make a sturdy growth. We do not like to see a carnation plant make long jointed growths while in the field which they have a tendency to do if planted in very light, rich ground. Another very important point to consider is the lay of the land. Carnations should never be planted on low, wet land or ground that is heavily manured. They do best in a soil that drains the water away readily. Places where there is a chance of the ground remaining flooded for any length of time after heavy rain storms should be avoided if possible. When preparing the land, do not get more space ready than the planters can plant each day, planting in freshly worked ground being much less trouble than when it has been standing for a while and had a rain on it. In fact it saves time in this case to rework it if for any reason the planting is not kept up close.

The size of the planting ground and the number of plants to be taken care of will govern to a great extent the distance apart to set the plants and the mode of planting. Where small quantities are grown the bed style of planting can be followed out—that is plant them in beds about four feet wide with a walk between each bed, setting the plants about 10 inches apart in the beds. Cultivating and keeping the weeds down will then have to be taken care of with the hoe. The only way to plant large numbers so that they can be properly cultivated and attended to is to set them in rows 15 inches apart and the plants 10 inches apart in the row. Where plenty of space is at hand and early planting into the houses is followed out the plants can be set 14 inches apart each way which allows for cultivating with a hand cultivator both ways. If planted this way the ground can be marked out with a marker of the required size, allowing for the planting to be done more quickly than when a line is used.

The young stock intended for growing inside all summer should also receive attention. The method that we have been following for the past two seasons is to empty some of the beds where the old plants are about done or containing colors which the demand does not call for very heavily from this time on. After thoroughly cleaning out the benches and giving the insides a good coat of lime wash a very thin layer of well rotted manure is spread over the bottom and then three inches of fresh soil is filled in on top of this. We do not add any manure or bonemeal with the soil at time of filling in but top dress later, after the young plants are growing freely, with pulverized sheep manure giving them a light dusting about every two weeks. The plants are set about four inches apart each way, stock from 2¼ inch pots being used, that from February propagation being preferred. Care is taken not to set the plants too deep and when finished extra caution is exercised in regard to watering the beds. They should be held a little to the dry side, or the plants will run away to soft growth. They will need constant watch-

PALMER'S WAGONS, FROM GREENHOUSES TO BUFFALO STORE, 10 MILES.

ing and caring for regarding pinching back, also keeping them free from insects, and, about every week or so, go over the surface of the beds and loosen up the soil a little with a scratcher.

Our first planting into permanent quarters last season was done June 27. These beds have given us the best results throughout the whole season and are now in fine condition. We find a considerable saving in following this method over carrying the plants in pots which

CARNATION WITH DOUBLE CALYX, FROM W. E. HALL, CLYDE, O.

was one of the big drawbacks against indoor culture. The flowering plants which are expected to do business up to July or later must receive every attention to encourage growth. They will need extra feeding from now on; a dressing of pulverized manure about every two weeks is the best way to apply the stimulant. Watering the beds requires frequent attention at this season, the beds being so thoroughly matted with roots that they dry out very quickly. Disbudding will also have to be kept up closely. If left over for a few days longer than usual the side buds will lengthen out considerably and the main stems become crooked, entailing considerably more work than if done on time.

C. W. JOHNSON.

Carnation with Double Calyx.

ED. AMERICAN FLORIST:—

Under separate cover I am mailing you photographs of a red carnation seedling, which made its appearance with me some time ago. It has a duplex calyx and flower, and it may interest our brother florists and carnation breeders. With my 25 years' experience in growing and breeding the carnation I never saw or heard of one being produced like this. Perhaps others have. If so, I hope this will bring out more about this class of flower and their experience with it.

The size across, under the petals, is 4½ inches, which covers the outer line of the carnation measuring card. The photographs are very poor and do not do justice to the flower. The make-up of flower is not overcrowded with petals, but it has a full center, round and fringed like a double poppy. Measurement over the top of flower, 7½ inches. The depth of flower, three inches; stem 24 inches long; outside calyx, 1x1¼ inches; inside calyx, ⅝x1¼ inches. The lower half of stem is as large as an ordinary lead pencil, the upper half stiff and wiry, holding the flower gracefully. One peculiarity of the calyx is that the stamens come out of the inside and the anthers from the outside calyx. The inner calyx is never seen at any time when the flower is opening or fully developed, and prevents this extra large flower from bursting. The flower with stem weighs 2½ ounces, more than double the weight of the ordinary large carnation.

W. E. HALL.

Palmer's Wagon Train.

From the greenhouses at Lancaster, N. Y., to Buffalo is about 10 miles and, this distance, H. J. Palmer & Son, whose retail store is in the latter city, have to transport the cut flowers and plants grown at their greenhouses. The accompanying illustration shows a train of their delivery wagons which were caught by the camera on a recent morning enroute to the city. The firm is noted for the excellent stock it grows and disposes of and we are glad to show this interesting picture.

BRISTOL, R. I.—Richard H. Dunbar has suffered considerable damage to his glass from the stone throwing nuisance, about $40 worth having been smashed quite recently.

Hydrocyanic Gas for Fumigating.*

The most widely used insecticide for greenhouse fumigation is tobacco in its various forms. In many instances it is without doubt the cheapest and safest insecticide to use against aphides and a few other greenhouse insects. Its effectiveness, however, under the best conditions, is not great, as it requires repeated use at short intervals. Moreover, it may cause serious injury to the plants. In the case of violets it has been found to be of only slight value against aphides working in the bud, and while it may destroy the so-called green aphis when exposed, it is not effective in killing the brown aphis. On the other hand, tobacco may prove injurious to the foliage and flowers, bringing on epidemics of spot. Tobacco is also useless against scale insects in general and mealy bug. The desirability of some insecticide as easily used as tobacco, but more penetrating and effective and less likely to injure plants, was apparent, and became absolutely necessary in our study of the diseases of certain crops.

Hydrocyanic-acid gas, since its introduction by the bureau of entomology in 1886 as a remedy against scale insects of the orange, has proved of great value as an insecticide. Previous to our experiments early in 1895, though it had been occasionally tried in greenhouses, hydrocyanic acid was not recommended, on account of its injurious effects upon plants. As a result of a series of careful experiments we found that as a rule plants were less injured by a short exposure to a relatively large amount of gas than they were by a long exposure to a relatively small amount. On the other hand, a strong dose for a short time was the most effective in killing insects. Different species and varieties of plants, however, were found to vary remarkably in their power of withstanding the poison. This in many cases appeared to depend upon the open or closed condition of the breathing pores as well as upon peculiarities of the cell contents.

*From Circular No. 37 (Revised), issued by the bureau of entomology, Department of Agriculture, Washington, D. C., by Frank Woods.

Fumigation an hour or two after sundown, with the temperature as low as practicable, was found to give the best results. In all cases the foliage must be perfectly dry or it may be injured by the gas. In each case the proper amount of gas to use and the length of exposure must be determined by experiment. It is impossible at present to give a general rule applicable to all plants in all stages of development. When the conditions are once determined they must be strictly followed to insure the greatest success. Methods of experimenting will be described later. The quantity of gas in each case is always given in terms of the potassium cyanide from which it is made, and on a basis of a cubic foot of space, as will be explained more in detail farther on. The cyanide, as well as the gas made from it, is exceedingly poisonous, and both must be used with the greatest care.

SUCCESSFUL EXPERIMENTS.

FERNS.—For Davallia Mooreana infested with a scale insect (Chionaspis sp.), 0.075 gram of 98 per cent potassium cyanide should be used for each cubic foot of space to be fumigated, not deducting the space occupied by the plants. Length of exposure, 20 minutes; 150 to 200 with fronds in all stages of development have been thus treated two or three times each year for the past 13 years with no injury to the plants and almost complete destruction of the insect. They were treated 50 at a time in a fumigating box (fig. 1), described later. Adiantum cuneatum and A. Ballii have been tried on a small scale and were not injured by the treatment.

COLEUS.—Golden Bedder, Verschaffelti, Shylock, and others. Twenty-four thousand plants in pots, badly infested with the white-tailed mealy bug (Orthezia insignis Dougl.). The house contained 15,587 cubic feet of space. Treated at the rate of one-tenth of a gram of 98 per cent cyanide of potassium per cubic foot of space for 20 minutes, one hour after dark. Orthezia all killed and plants not inujred in the least. All other means of destroying the orthezia had been tried without effect. Large numbers of the common mealy bug were also killed by this treatment; but it was not nearly so effective as for the white-tailed variety. All coleus cuttings made by the United States propagating gardens for the past 11 years have been fumigated before being prepared for the cutting bed.

DOUBLE ENGLISH VIOLETS.—Marie Louise, Lady Campbell, and others.—For aphides and general fumigation fifteen-hundredths of a gram of 98 per cent cyanide of potassium for each cubic foot of space is required. The exposure, if made according to directions, will not hurt the plants in any stage of growth. Since the first publication of this circular in 1899 the gas has been used on a large scale by commercial growers in fumigating violets, with the greatest success, only a few treatments during the season being required. Length of exposure, 20 to 30 minutes. Leaf-eating larvæ, slugs, millipedes, cutworms, etc., when exposed are killed as well as aphides. Red spider, however, is not entirely eradicated by the treatment. The foliage of single violets like California and Princess of Wales are sometimes slightly injured by the stronger dose of gas. A weaker dose (one-tenth of a gram of potassium cyanide per cubic foot) should be used when they are to be treated.

OTHER PLANTS.—Other plants on which the gas has been tried on a small scale indicate that it may probably have quite a wide range of usefulness. The gas has been used on the following at the rate of one-tenth gram of cyanide per cubic foot of space for 20 minutes without injury. Further experiment, however, is necessary before the treatment can be recommended for these: Adiantum Ballii; Adiantum cuneatum; Alocasia macrorhiza variegata; Anthurium crystallinum; Aralia filicifolia; Areca lutescens; Cichorium intybus: Cissus discolor; crotons (in variety); Dieffenbachia Jenmani; Eichhornia speciosa; Ficus elastica; Fuchsias (in variety); Hoffmannia refulgens; Jacaranda ovalifolia; marantas (in variety); Nymphæa candidissima, odorata, and rosea; Panax Victoria; Pandanus Veitchii; Phrynium variegatum; Stenanthium Lindeni; Xanthosoma Lindeni.

ROSES.—Perle des Jardins, Catherine Mermet, and Bride.—The young growth on roses is particularly sensitive and has been more or less injured in all our experiments.

CARNATIONS.—Scott, Garfield, Meteor, and McGowan will stand one-tenth of a gram 98 per cent cyanide per cubic foot of space for 15 minutes without material injury. This will kill about 90 per cent of the aphides, but will not kill thrips. The use of the gas for carnations needs to be more carefully investigated before it is recommended. The same is true of chrysanthemums, on which it has been tried with only partial success, the young growth being very sensitive.

GRAPES UNDER GLASS.—The gas has been used with success in New Zealand for mealy bug (Dactylopius adonidum L.) at the rate of one-third of an ounce 98 per cent cyanide to 100 cubic feet. This is equivalent to nine-hundredths gram per cubic foot. The gas is liberated after dark and left in till next morning, when thorough ventilation is given. It largely escapes, however, during the night. The treatment is said not to injure the plants in the least.

TOMATOES.—Dr. Jabez Fisher, in American Gardening, October 29, 1898, reports using the gas for white fly (Aleyrodes vaporariorum Westw.) on tomatoes. The gas from one ounce of pure cyanide of potassium for each 1,000 cubic feet, left in the house over night, killed all the insects without injury to the plants. This method has not yet proved successful with us in any case, but it should nevertheless receive careful trial by other experimenters.

CUBIC CONTENTS OF THE HOUSE.

It is necessary in every case to determine with great care the cubic contents of the house, frame, or box in which the fumigation is to be made. To illustrate: Fig 2 shows cross sections of two styles of greenhouse structures now in general use. At the left is an even span house 100 feet long, 12 feet wide, two feet on the sides, and five feet six inches from the surface of the beds to the ridge, with a walk 14 inches wide and 15 inches deep. To determine accurately the number of cubic feet in this or a house of similar construction: Make a rough drawing showing a cross section of the house; divide the space into triangles and rectangles by drawing a line connecting the two wall plates and one from the ridge at right angles to this; mark on each its respective length in feet and inches; compute the number of cubic feet in each of the rectangles and triangles in accordance with the following method. In the even span house shown at the left the number of cubic feet of space in the walk is found by multiplying the width by the depth by the length, thus: Multiply one foot two inches by one foot three inches by 100 feet; reducing to inches we have 14 inches times 15 inches times 1,200 inches equals 252,000 cubic inches; dividing this result by 1,728, the number of cubic inches contained in a cubic foot, we have 145.83 cubic feet. The rectangle A D G F is computed in the same way, except that in this case it is not necessary to reduce the feet to inches. It would be 12 feet times 2 feet times 100 feet equals 2,400 cubic feet. This brings us to the triangles. The rule generally given for calculating the area of a right-angle triangle is to multiply the base by the perpendicular and divide the product by two. The result multiplied by the length of the house will give the number of cubic feet the triangular portion contains. For example, taking the triangle A C E: Six feet times 3 feet 6 inches, equals 21 feet, divided by two equals 10.5 feet, multiplied by 100 equals 1,050 cubic feet. The area of the triangle E C D and the cubic feet in this part of the house are determined in the same way; or, in this case, since the triangles are equal, the desired result is obtained by multiplying the number of cubic feet in the triangle A C E by two; 1,050 multiplied by two equals 2,100 cubic feet. The contents of this house is therefore 145.83 plus 2,400 plus 2,100 equals 4,645.83 cubic feet; this result multiplied by the required dose per cubic foot of space will give the amount of cyanide of potassium necessary for one fumigation.

FIG. 1.—FUMIGATING BOX, SHOWING TRAYS AND COLEUS CUTTINGS.

Woods, Circular 37, Bureau of Entomology, U. S. Department of Agriculture.

Fig. 2 shows at the right a cross section of a three-quarter span house 100 feet long, 18 feet wide, front wall four feet four inches, back wall six feet four inches, and 11 feet 10 inches to the ridge. The cubic contents of this house is determined in the same manner, except that the two triangles being unequal, each one will have to be calculated separately. The house contains 15,050 cubic feet. It will thus be seen that the cubic contents of a house or frame of any style can be readily determined by simply dividing a cross section of the same into the necessary number of triangles and rectangles and calculating as demonstrated above.

A simpler method of obtaining the cubic contents of a house has been described by Galloway. This consists in

laying off a cross section of the house according to scale, on a piece of paper ruled in squares, each square being equal to a square foot. For example, suppose the squares are one-eighth of an inch to a square foot. The end-section of the house is then accurately laid off on these squares, and by counting the squares and parts of squares the number of square feet of space in the end section can be easily determined. This,

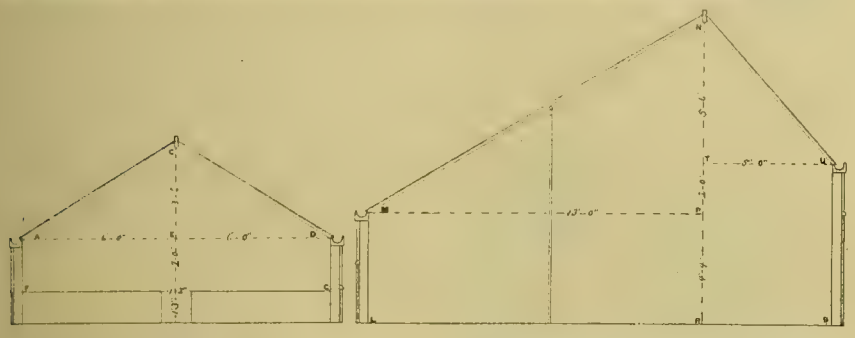

FIG. 2.—SECTION OF SPAN HOUSE AT LEFT AND THREE-QUARTER SPAN AT RIGHT.

Woods, Circular 37, Bureau of Entomology, U. S. Department of Agriculture.

multiplied by the length of the house, will give the cubic contents in cubic feet.

AMOUNT OF POTASSIUM CYANIDE TO USE.

After the number of cubic feet in the space to be fumigated is determined, the amount of cyanide required is found by multiplying the cubic contents by the dose per cubic foot. For example, if single violets are to be fumigated, the dose would be one-tenth of a gram per cubic foot. A dose, therefore, for the even-span house, containing 4,646 cubic feet, would be 4,646 multiplied by .1 equals 464.6 grams. To reduce this to ounces, divide the number of grams by 28.35 (the number of grams in an ounce avoirdupois); 464.6 divided by 28.35 equals 16.38 ounces avoirdupois. It may be necessary to reduce the fraction of ounces to grains; 437.5 (the number of grains in an ounce) multiplied by .38 equals 166 grains.

If double violets are to be fumigated the cubic contents would be multiplied by .15, thus: 4,646 multiplied by .15 equals 696.9 grams, divided by 28.35 equals 24.58 ounces avoirdupois; .58 ounce equals 253 grains. In the case of a small space of less than 150 cubic feet the dose in grams should first be determined, and this, if necessary, can be changed to grains by multiplying the number of grams by 15.43 (grains in a gram), thus: 30 (cubic feet) multiplied by .15 grams equals 4.5 grams, multiplied by 15.43 (grains in a gram) equals 69.435 grains, or approximately 69.5 grains. The reduction to ounces or grains will not be necessary if metric weights are used, which is strongly urged. When the dose for certain plants in a given house, frame, or box is once obtained, it should be carefully recorded on the house or box thus: "Contents: 1,015 cubic feet. Ferns, .075 gram per cubic foot equals 76.1 grams. Violets, double, at .15 gram per cubic foot equals 152.25 grams." If a scale weighing with avoirdupois weights is used, the dose should be recorded in ounces and grains. Care should be taken to select a night when the houses can be ventilated the required time without injury to the plants and when there is no likelihood of rain.

PREPARATION OF THE HOUSE.

On account of the very poisonous nature of the gas, it is necessary to arrange a number of ventilators, the more the better, so that they can be easily opened from the outside. It would be very dangerous to enter the house while it contains the gas. All broken glass should be replaced and holes stopped up; a thoroughly wet piece of newspaper will close a crack effectually or take the place of a broken glass if necessary. It is best not to permit the gas to get into fire pits or engine rooms; these should be cut off from the space to be fumigated.

In case of a large range of houses opening into each other, it is best to separate them into several sections, by tacking up building paper or oiled cloth so that each section may be fumigated separately and at different times. The work may thus be done with great ease and care, and with less danger to the plants. Great care must be exercised to have the foliage of the plants to be fumigated perfectly dry. Leaves or stems which have moisture on them will be injured. The temperature of the houses should be about 60°. The gas is more active and more likely to injure the plants at high temperatures.

METHOD OF MAKING THE GAS.

The materials required are 98 per cent cyanide of potassium, broken into small lumps, best secured in 10 or 25 pound cans at 30 to 40 cents a pound, and commercial sulphuric acid at three to four cents a pound by the carboy.

For an ordinary house or frame, good vessels for liberating the gas are 1½ or 2-gallon earthen jars of as small diameter as possible so as to insure the immersion of the cyanide of potassium when it is dropped into the acid. One jar should be used to about every 25 feet in length of such houses as described, in order that the gas may be quickly distributed when set free. When the jars are placed in position the next step is to arrange to lower paper bags containing the desired amount of cyanide into the jars, from the outside. This is best done by passing a cord through a hook or screw-eye attached to the roof over each jar in such a manner that when the string or strings are loosened from the outside the bags of cyanide will be lowered into their respective jars, as shown in fig. 3. When the strings are ready, divide the amount of cyanide to be used into parts corresponding to the number of jars. Wrap each part up in a single thickness of ordinary newspaper and put in ordinary brown paper bags, and attach the bags to the strings, as shown in fig. 3. While the jars are empty test the arrangement to see if it works satisfactorily. After each bag is suspended in place, the other end of the string securely fastened where it can be reached from the outside, and the arrangement tested, move the suspended bags to one side so they will be out of the way while putting the water and acid in the jars. When this is done, pour into each jar an amount of water about equal to the bulk of the potassium cyanide in the bag. Eight ounces of cyanide will require about half a pint of water. The sulphuric acid should then be poured in until steam rises from the water. This would require for a pint of water about a pint and a half of acid. It is not necessary, however, to measure the acid, as the evolution of steam indicates when the right amount has been poured in. Always put the water in first and then pour in the acid. As soon as this is done place the bags over their respective jars. When all is ready, go out, close the door, and carefully loosen the strings, allowing the bags to settle into the acid.

While the method just described is desirable for a large house or series of houses from which exit would be difficult after dark, it is not necessary to go to the trouble of lowering the cyanide into the acid by strings in most cases. When the jars containing the water and acid are properly placed, the cyanide in the paper sacks, as previously described, may be set beside the jars; then the operator, starting in one end of the house, may carefully drop the bag into the water and acid, coming out the other end of the house. If there are two sets of jars in different paths, it will be necessary for two operators to start, one in each path, working in the same direction, at

FIG. 3.—VIOLET HOUSE PREPARED FOR FUMIGATION.

Woods, Circular 37, Bureau of Entomology, U. S Department of Agriculture.

about the same rate of speed. In this way the cyanide can be placed very quickly and easily in quite a large series of jars, taking care that no cyanide is placed in a jar in such a way as to cut off the exit from the house of any operator. This method of hand dropping is now the one most largely used. The gas will very soon be given off and fill every portion of the house. It is colorless and smells and tastes like peach pits. A little of it is harmless, but too much will cause death. A small quantity will leak out of the house; avoid positions where it can be smelled.

The time of exposure should be reckoned from the lowering of the cyanide into the jars. When the proper time has elapsed, varying for different plants as previously stated, quickly open the ventilators from the outside, so that the gas can escape as rapidly as possible. It will all be gone from a large house, such as described in this circular, in half or three-quarters of an hour, and the ventilators may then be closed, if necessary. Next morning the material left in the jars should be emptied into a hole and buried. It is nothing but sulphate of potash, sulphuric acid, and water, having a little hydrocyanic acid gas in solution. The latter will soon disappear and the sulphuric acid will unite with lime in the soil, forming gypsum.

FUMIGATING BOXES.

For the purpose of experimenting and where only a few hundred plants are to be treated, a tight box may be made of 30 to 50 cubic feet capacity. The box should be as nearly airtight as possible, with a removable cover and a small door at the bottom for introducing the cyanide of potassium into the bowl containing water and sulphuric acid, as shown in fig. 1.

The wire trays shown in the same illustration are used in fumigating cuttings of coleus or other plants. When desired the trays can be removed and pot plants set in the box and given such fumigation as desired. To prevent injury to the plants they should be so set that the foliage does not come within 18 inches of the bowl near the small door. When the plants are arranged the top is put on securely and a little water is poured into the bowl, and then sulphuric acid is added till steam is formed. The necessary amount of cyanide, wrapped in a small piece of newspaper, is then dropped into the bowl and the little door quickly closed. When the desired length of time has elapsed, take off the cover and open the door and retire, so as not to breathe the gas. In a few minutes the gas will have sufficiently escaped so that the plants may be taken out and others treated in the same way. Injury (if there is any) to the plants may not show for two or three days, so, in the case of experimenting, conclusions should not be hastily drawn. The box may be used in the daytime if the work is done in a cool place. For experimental purposes and treating plants on a small scale, a small greenhouse containing 1,000 cubic feet, or less, is better than a box, as the results obtained with it are more reliable and there is less danger of injury to the foliage.

CONDENSED DIRECTIONS.

Carefully determine the cubic contents of the house and the amount of cyanide of potassium to use.

Make the house as tight as possible.

Arrange so that the ventilators can be opened from the outside.

Place the jars and strings in position.

If the potassium cyanide is to be dropped into the jars by hand, place the package beside each jar; then a man for each separate group of jars should start at one end and work towards the end from which quick exit can be made. After proper exposure open ventilators, etc.

After dusk attach the bags containing the cyanide to strings, as described, and find if they work correctly.

Hang the bags to one side and put water and acid into the jars; arrange protection and put the bags in place again.

When all is ready lower the bags into jars by loosening the strings from outside.

After the proper exposure open the ventilators from outside, leaving them open from 30-45 minutes before entering the house.

Next morning bury contents of the jars.

The foliage must be perfectly dry.

CAUTION.

It should be remembered that hydrocyanic-acid gas is one of the deadliest poisons known, fatal to human beings and plants, as well as to insects. Greenhouses which are within 50 to 75 feet of dwellings should not be fumigated unless the windows and doors of the latter on the side next to the greenhouse can be closed during the operation.

It is essential that the exact proportion of cyanide be used at the rate designated for each cubic foot of space and that the exposure should not exceed the limit ascertained by experiments as appropriate to the plants to be fumigated. A greater strength of gas or a longer exposure than specified is apt to result in injury to the plants. It is best to use this method at first experimentally on a small scale before attempting the fumigation of an entire greenhouse, and a preliminary test should always be made in case plants of a species or variety not previously fumigated are to be treated.

To Be Done Now.

IN THE GREENHOUSES.

Get the chrysanthemum benches ready before the young plants get hard in the pots.

Pot up bouvardias from late struck cuttings and harden off the older plants preparatory to planting outside.

That beautiful vine Cissus discolor must have plenty of heat, light and moisture to bring out the color in the foliage.

Pot up cut back coleuses and pinch the young stock to produce a bushy habit.

Propagate winter flowering geraniums. The old F. V. Rasfail is still one of the best scarlets.

Keep Odontoglossum grande a little on the dry side now and do not repot until the young growth starts and is about to start rooting.

Keep cobeas, maurandias, thunbergias and other vines well apart and pinch if necessary to prevent their running into each other.

Propagate the best forms of double primula by hilling up and division now.

Stop the shoots of double petunias occasionally and do not allow them to flower until a good foundation for a bushy plant has been laid.

IN THE STORE.

Look up details of last year's Decoration day trade to get an idea of what will be needed.

Advertise the fact that you are able to take care of graves and provide fresh flowers or plants for the purpose. As a side line at a quiet time this work is not to be despised.

Purple iris and bronze galax leaves are fine in combination for funeral designs.

Show good bedding plants, if any; a few untidy boxes of plants littered about and often dried up are a poor recommendation.

Give customers the benefit of cheap stock when possible, but do not be in too much hurry to mark up low prices.

Good peonies attractively arranged are among the most showy and satisfactory flowers for a display now.

OUTDOORS.

Plant out young hollyhocks in rich, well cultivated soil, giving them ample room.

Make notes of the tulips and other bulbs that made the most satisfactory display, for reference in autumn.

Plant tritomas in good, well manured quarters, both for cutting and for a display in the border.

Thin the early beets and transplant thinnings where necessary to complete the rows.

Echeverias and the hardiest of the bedding stock may be planted now, but leave the tender varieties until June 1.

Sow English wallflowers and Alyssum saxatile in drills so that the young plants can be kept free of weeds.

Propagate primroses and forgetmenots by division as soon as the flowers are past their best.

Plant out dahlias in a sheltered position where protection can be given if necessary.

Use great care in pricking up the borders devoted to herbaceous plants. Much damage is often done to the young shoots by careless help.

Twenty Years Ago.

MAY, 1888.

All that was needed to grow roses, it was said, were good soil and intelligent attention 60 minutes an hour for 365 days in the year by skilled men.

An "international" pansy test was made by Denys Zirngiebel, of Needham, Mass.

Dr. Talmage was preaching about "The Good in Fowers," saying they were almost human.

Spring was much later than usual.

The Himalayan greenhouse rhododendrons were becoming popular.

Oiling the inside of heating pipes by putting a gallon of oil in the feed tank and drawing off the water was recommended by an old boiler maker.

"Bill Nye" was writing delicious humorous skits on gardening and the seed trade in the New York World.

"Twenty-five cents worth of smilax to decorate a church" was one of the orders received by a Canadian florist at Easter.

"Floral Guide and package of flower seeds containing 500 varieties" was the offer made by a Pennsylvania seedsman to all who sent two cents.

Black spot in roses was obtaining a good deal of attention at Purdue university the results of the experiments being published in the AMERICAN FLORIST.

Corsage bouquets for wear on the street were not considered good form in New York.

Papier mache vases for lawn decorations were in demand for garden parties.

Dishonest post office employes were responsible for much trouble to Chicago florists.

Palms from the tropics were interfering with the trade in domestic and European produce.

Prize Money Dispute

An English contemporary reports that the Leeds Paxton Society was recently sued by an exhibitor at one of its shows for the sum of £3 1s. 6d., being the amount of prize money which had been awarded to him at the show for an exhibit of cauliflowers, but which the society withheld on the ground that the exhibit had been disqualified on the ground that the produce shown had not been grown by the plaintiff. A clause in the rules of the society was that if any matters arise not dealt with in these rules the committee has full power to deal with same, their decision to be final. Counsel for the defense raised a legal point, urging that this rule put the case outside his honor's jurisdiction. The plaintiff had had his trial—before the committee. His honor upheld the objection, and a verdict was given for the defendants.

OBITUARY.

James J. Rogan.

James J. Rogan died May 15, aged 73 years. The deceased at the time of his death was in the employ of the Robt. Craig Co., Philadelphia, Pa. where for the past eight years he had charge of the propagating department. He was born at Bandon, County Cork, Ireland, in 1844, and came to America in 1870, first working at John Dick's nursery and greenhouses, Philadelphia. Eight years later he started in business for himself at Tenth and Federal streets. After 10 years he sold out and was foreman for John Shellem, leaving the latter place to engage with the Robt. Craig Co. Mr. Rogan was of kind and genial disposition, a man beloved by all his associates. He was well up in the business, being a most careful and successful propagator.

K.

Howard L. Courtney.

Howard L. Courtney, one of the directors of the Dingee & Conard Co., West Grove, Pa., died May 10 at the age of 35 years. His death followed a lingering illness of consumption, from which he suffered many months, gradually growing weaker, until death came when surrounded by his relatives and family. Hoping to recover his health and by the advice of his physician he had spent the late winter months at Asheville, N. C., but growing no better returned to West Grove in March. Since then he had not resumed his active duties.

Deceased had been a resident of West Grove for 16 years and entered the employ of the above firm in 1902. He always took a deep interest in public affairs and was greatly esteemed by all of whatever creed or political opinion. He was also a prominent Mason, and the interment of his body was carried out at Union Hill under Masonic ritual. There was a large number of beautiful wreaths and other floral devices.

William Scott.

Wm. Scott, the oldest florist in Buffalo, N. Y., in point of years in the business, died at his home in that city May 19. He had been poorly in health for some considerable time, but it was not until May 8 that his illness became very serious. Mr. Scott was born July 31, 1844, at Leigh Park, Hampshire, Eng., and attended a private school until he started work soon after his thirteenth year. Progress in his chosen profession was so rapid that he had charge of several greenhouses when he was 15 years of age. Later he was engaged with his father at Chichester, in the nursery and seed business, and also with W. H. Rogers, of Southampton.

In 1868, with his brother, David, and E. I. Mepsted, now of Ottawa, Ont., he embarked for America. After investigating different parts of Ontario he came to Buffalo, and was engaged by Geo. Bailey, who then had a large private place, and remained with him until 1876, when he rented the premises and conducted a general florist business until he bought the present location of the Wm. Scott Co., where he built up one of the largest floral establishments in Buffalo, embracing floriculture in every branch from rose and carnation growing to the culture of bedding stock and store work in every detail. His increasing business compelled him to seek a larger place for the greenhouses, and about 10 years ago he bought the property in Corfu, N. Y., about 25 miles from Buffalo, where he built a number of modern houses to supply the city trade.

Mr. Scott was not only a florist and grower of everything in the flower line, but was one of the most versatile and voluminous floricultural writers in this country, his best work in this line appearing in the earlier volumes of the AMERICAN FLORIST. His "Seasonable Hints" epitomized in the American Florist Co.'s Trade Directory of 1896, have been freely plagiarized, but it is always easy to distinguish between the original and the imitation. He had an inexhaustible fund of humor and this was used freely in all his writings and addresses, for he was a brilliant and fluent speaker.

Mr. Scott was a member of the different trade organizations and held the office of president of the Society of American Florists in 1896. He was an ex-president of the American Carnation Society, Buffalo Florists' Club and many kindred associations. In 1871 Mr. Scott married Miss Christina Slick, who was his greatest aid in the early years of his business career. He is survived by Mrs. Scott and six sons, all of whom are engaged in the business of the Wm. Scott Co., and one daughter, Miss Helen Scott.

The Late William Scott.

Mr. Scott had never taken an active part in politics, but was always interested in the welfare of Buffalo. His appointment as superintendent of horticulture of the Pan-American exposition was one of numerous indications of the high esteem in which he was held by his many friends. His loss to Buffalo and the community at large is irreparable, and horticulture has lost one of its most brilliant exponents.

Telegram From President Traendly.

It is with deep regret that I learn of the death of our late ex-president, Wm. Scott. It was such men whose contributions in an educational as well as a social way made the Society of American Florists the great horticultural society it is today.

From Ex-President Robt. Craig.

Sad news, indeed, from Buffalo today. Wm. Scott has passed away, the once bright light in horticulture has gone out. What a fine all around knowledge of his business he had and what an able and attractive way he had of imparting his knowledge, honest, manly, frank, candid, generous, gifted Wm. Scott.

From Ex-President Wm. F. Gude.

One of the ablest men that ever graced our calling.

From Ex-President E. G. Hill

The trade has lost one of its most brilliant minds, and one of its best beloved members. Everybody liked Wm. Scott and it was his happy lot to look into smiling faces, the reflection of the good humor in his own. Since his illness we have missed him from our gatherings, and with deep regret we realize that he is gone from earth; he will live long in the memory of the present generation of florists.

European Horticulture.

FROM THE GERMAN TRADE PAPERS.

AMERICAN CARNATIONS ABROAD.—Germany seems to be taking a course of instruction from across the channel in the culture of American carnations. The subject is treated in a proficient manner along practical lines in a series of articles written by a grower in England. If so far German carnationists found themselves unable to attain that degree of success in their efforts to grow the American carnation that marked its advance in Great Britain, want of interest in what is taking place has not been the cause. But it seems unlikely that they would ever draw nearer to success with these varieties by adhering to modes of cultivation practiced for generations in growing their own kinds. On the other hand, owing to climatic conditions prevailing in Germany, the necessity of modification in cultural methods, as employed by English and American growers, becomes obvious. The author in his treatise, well aware of this handicap, comes to the assistance of his German brethren by pointing to ways adopted with best results by growers in various sections of Europe placed at disadvantages not unlike theirs. He suggests early propagation, pot culture in preference to benching, all indoor instead of partial field culture and moderation in the application of stimulating aids in any form during winter. At some length he describes the kinds of soils used and the benches as constructed in America for the growing of carnations under glass, expressing his doubts as to the practical value of sub-irrigation, as there practiced, believing it to be merely another instance of playful amusement frequently indulged in by American millionaire cut-flower growers.

CALLAS IN RUSSIA.—A distinguishing trait of all classes of people throughout the Russian empire is an ardent love for flowers and floral display. Owing to a remarkable predilection for callas these pseudo-lilies rank foremost among high grade cut flowers. Formerly florists depended for their supplies in this particular line on regular shipments from distant districts beyond the border. Considering the high duty on all imports of this character, the great specific weight of calla flowers and how easily they are damaged in transit, it is not to be wondered at that efforts were being made of late by Russian growers to meet the demand by home production. But it seems strange that they should have failed in their object by the adoption of modern methods, as now universally employed in mass cultures, while, on the other hand, a return to primitive ways, reluctantly resorted to in a last hope of accomplishing their end, appears to have brought them much nearer the coveted mark, as latest reports from St. Petersburg seem to imply. Calla roots are planted out in the field, grown into sturdy plants by the middle of September, and are then potted up, placed in frames, kept close for a fortnight and finally removed to sash-houses before frosts occur. Here in a temperature of about 50° the plants flower continually from October until April From then on water is afforded more sparingly but is never entirely withheld to prevent dying of leaves and shrinking of roots. Their being again planted in the open marks the beginning of a new cycle, repeated from year to year.

THE AMERICAN FLORIST

Onions as Irrigators.

While it is unquestionably true that irrigation water in general must come from wooded mountain slopes, it appears this is not absolutely the only source. A farmer in Ohio has made a discovery that will be of vast importance to farmers during a dry season. He has found that when onions and potatoes are planted in the same field in alternate rows the onions, being so strong, bring tears to the eyes of the potatoes in such volumes that the roots of the vines are kept moist and a big crop is raised in spite of the drought.

A RESTING period is probably natural for Asparagus plumosus.

"STOPURKICKEN," is the prosperity motto of the national grocer's association.

THE old ground or Clifton ivy (Nepeta Glechoma) is a pretty basket plant when well grown.

THE activity of the horticultural inspector and sprayer is a healthy sign of the times.

WHY Anglo-American carnations when referring to varieties raised in the United States?

IT is cheaper to build a shed than a greenhouse and greenhouses need not be used for potting sheds.

A FLOWER show is to be held in August under the auspices of the Horticultural Society at Calgary, Alberta.

WHITING and starch, in the proportion of three to one is recommended as a good basis for making liquid shading.

ROOF GARDENS as playgrounds for the children in the west side schools at Chicago are suggested by the board of education.

IF Wizard Burbank would achieve immortality let him graft the constitution of the dandelion on some useful but tender vegetable.—Chicago Tribune.

PRICES for greenhouse glass still rule low, and glass jobbers say that those who contemplate building can do no better than to buy quick, as prices may go up any time.

WM. SCOTT, of Buffalo, N. Y., one of the foremost in building up the great industry of American floriculture, passed away at his home May 19, as recorded in the obituary column in this issue.

THE prominence being given to the Arbor day movement in the schools all over the United States cannot fail to be of benefit to horticulture, and florists and nurserymen should aid all they can.

W. A. HASTINGS, representing A. H. Hews & Co., Inc., has visited Ohio, Missouri, Iowa, Michigan, Illinois, Wisconsin, Minnesota, Indiana and Kentucky since January 1, and reports the trade in those sections as universally interested in the National Flower Show and already planning to attend same.

THE frequent warnings now appearing in the press respecting the destruction of the trailing arbutus and other beautiful wild flowers should have a good effect, but, owing to its habit, the beautiful Mayflower is doomed unless stringent regulations are made to protect it by property owners.

THE SANDERS LIBRARY.—The Horticultural Society of Chicago and the Florists' Club of that city, both of which were offered the valuable horticultural section of the library of the late Edgar Sanders, missed a golden opportunity in not accepting what is believed to be the best private library of this character now in existence on the American continent. When Mrs. Victor, daughter of Mr. Sanders, found that neither of these organizations would accept the books they were presented to the John Crerar library at Chicago, where we understand they will be housed hereafter.

National Council of Horticulture.

We have received the ninth and tenth installments of the press service of the National Council of Horticulture, distributed by J. H. Burdett, One-hundred-and-fourth place, Chicago. As usual the articles are of a varied and useful character, the titles of which follow: Ninth installment, "Bellwort," "Salsify," "Deutzias," "Kale." Tenth installment, "Hardy Chrysanthemums," "The Mulberry," "Hybrid Perpetual Roses."

Society of American Florists.

CENSUS COMMITTEE.

President Traendly has appointed P. O'Mara Jersey City, N. J., J. A. Valentine, Denver, Colo., and Albert T. Hey, Springfield, Ill., as a committee to co-operate and advise with the census department regarding matters relating to ornamental horticulture in the approaching U. S. census.

STATE VICE-PRESIDENT.

President Traendly has appointed John L. Parker, of Birmingham, Ala., as state vice-president for his state.

W. N. RUDD, Sec'y.

Number of Persons in the Trade.

In a recent issue of the Crop Reporter, which is published by the authority of the secretary of agriculture, there is a report on the number of persons engaged in the chief agricultural pursuits from 1870 to 1900, from which we find that in 1870 the gardeners, florists, nurserymen, etc., numbered 33,632; 1880, 56,032; 1890, 72,601; 1900, 61,788. The report goes on to say:

"The figures of the census show a continuous increase from 1870 to 1890 and a decrease between 1890 and 1900. The explanation is that in the census of 1900 wage laborers employed in gardens, nurseries, etc., when returned as 'gardeners,' 'florists,' 'nurserymen,' etc., were not set down as such, but were assigned to the category of laborers, whereas in the previous censuses their description of themselves as 'gardeners,' 'florists,' etc., appears to have been accepted."

Various Classes of Roses.

ED. AMERICAN FLORIST:—

Please define a tea rose, a hybrid tea and a hybrid perpetual. How often do the different classes flower in a season? X. Y. Z.

The teas are a class of more or less dwarf roses that, owing to the resemblance, real or fancied, of their fragrance to tea were called "tea-scented" roses and this has been abbreviated to "tea." They are an extremely free flowering race that continues to bloom right along from side shoots and stems springing from the base. Well known examples of this section are Bride, Bridesmaid and Safrano. Hybrid teas are roses that have been originated by crossing teas with other classes of roses. Madame Testout is a well known example. Hybrid perpetuals usually flower upon the apex of growth only, though some varieties flower with comparative freedom from side shoots. They are not so constant as the classes with which we are comparing them but make a grand show outside in June and July. They were formerly much grown for cutting, but the teas and hybrid teas have taken their place. General Jacqueminot, Ulrich Brunner, Paul Neyron and Frau Karl Druschki are well known examples of this class. G.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—Single man, good grower of roses, carnations and general stock. Retail place preferred. Key 545, care American Florist.

Situation Wanted—By German, married, 36; capable of taking charge of any size private or commercial place. H. GRAUE, 418 N. Perry St., Johnstown, N. Y.

Situation Wanted—By young man 19 years old 2 years' experience in growing carnations and bedding plants. Texas or Oklahoma preferred. CARLISLE GORMAN, 681 N. Broughton St., Sherman Texas.

Situation Wanted—By sober industrious young man with five years' experience would like position as carnation grower; references furnished; address A. M. MYHRE, Drawer O, Hastings, Minn.

Situation Wanted—By young German; good designer and decorator; Wisconsin or other western state preferred; steady and reliable; good references. J. S., care American Florist, 1133 Broadway, New York.

Situation Wanted—By a first-class German florist, designer and decorator; London and New York experience; best references; state in first letter, wages and particulars. Address Key 537, care American Florist.

Situation Wanted—By all-around greenhouse and storeman; expert grower designer decorator. 18 years' experience; 6 years in last place as foreman. Don't use liquor; west preferred; state wages. Key 544, care American Florist.

Situation Wanted—As working foreman as grower of roses, carnations, 'mums, violets, bulbs and general stock; has a thorough knowledge of the business in all branches; has 40 years' experience in England and America; age 54, single. GEO. MORRIS, Hudson, N. Y.

Situation Wanted—Working foreman and manager, 35 years of age, German single, hustler strictly sober, intelligent, good education, 22 years' practical and theoretical experience in roses, carnations, ferns, 'mums, violets, bulbs, bedding plants, fancy Xmas, and Easter plants, design, decorating, landscape; good references as working foreman; disengaged June 1; good wages expected. Key 501, care American Florist.

Situation Wanted—As working foreman in commercial or private place by good practical experienced grower and propagater of roses, carnations, 'mums all cut flowers and every line of pot and bedding plants; designer, decorator, landscape gardening, vegetable grower, etc.; sober, steady, not afraid to work; 29 years' experience in America and Germany; German, married, age 43, best of references, please state particulars in first letter. Address Key 532, care American Florist.

Help Wanted—A man to work in rose sections; state wages without board. Apply COLE BROS., Peoria, Ill.

Help Wanted—A rose grower at once; wages $15.00 per week; also helper wanted. WM. DITTMANN, New Castle, Ind.

Help Wanted—Man for rose section; man for carnation section and one good 'mum grower. Address WILL BROTHERS, P. O. Box 29, Minneapolis, Minn.

Help Wanted—Good grower of general greenhouse stock and bedding out plants; German preferred; apply at once; state wages with board in first letter. Address Key 541, care American Florist.

Help Wanted—Young man as working foreman to take an interest in an established greenhouse business. Only small capital required. Correspondence invited. Address Key 530, care American Florist.

Help Wanted—A first-class designer, decorator and storeman; state reference and salary expected; permanent position and chance for advancement to right person; location middle West Address Key 540, care American Florist.

Help Wanted—At once, working foreman with good general knowledge of 'mums, greens and bedding stock to take charge and run 25,000 feet of glass; married man preferred. Must have experience and be capable of producing results. Address with full particulars. A fine chance for the right party. A. M. CAMPBELL' Swarthmore, Pa.

Help Wanted—A young man as farm manager, who has had experience in seed-growing and the growing of bulbs, hardy perennials, etc.; a good opportunity for a man who is willing to start in a reasonable way with a view to future development and advancement. Give full particulars, naming references and previous experience. Address P. O. Box 330, Richmond Va.

Partner Wanted—Florist with $5,000 cash, more or less; can become part owner of established modern greenhouse business. Address G. F. MORRIS, 310 Ashland Block, Chicago.

For Sale—An elegant 8-foot florists' refrigerator; good as new; will sacrifice if sold soon. E. J. PERRY, Greensburg, Pa.

For Sale—27,000 feet of glass; filled with first-class stock; located in one of Chicago's suburbs; low price. Address FLORIST, 4016 N. Clark St., Chicago.

For Sale—A bargain for a good florist stand and store opposite Woodland Cemetery; with full line of confectionery; also greenhouses of 10,000 feet of glass; offered after July 1, for $1,500. HENRY EICHOFF, 6818 Woodland Ave. S. E., Cleveland, O.

For Sale—Greenhouses and stock; about 20,000 feet of glass, well stocked with all kinds of bedding plants, ferns, palms and cut flowers; for terms inquire of Mrs Hugo Book, College street, Worcester, Mass., or L. Midgley, Worcester Conservatories, Worcester, Mass.

Pittsburg.

MARKET OVERSTOCKED.

After a very nice spurt of business which lasted about two weeks the market has again quieted and the big lot of stock coming in seems difficult to move. Carnations of fine quality go begging for buyers, roses being in somewhat better demand. Lilies are again moving nicely but there are not very many of these on the market at present. Blushing Bride gladiolus is a pleasing addition to the market. Peonies are still scarce and of poor quality although the indications are that we will have plenty of them for Memorial day. Nearly all the carnations are in the field now.

A dinner was tendered former Superintendent Hamilton of the Allegheny parks at McCartneys May 20, the local florists having charge.

Elmer Jolliff of the Florists Exchange was away most of the week attending the funeral of his cousin at Morgantown.

W. B. Ague has opened a store at Penn and Negly avenue, and W. L. Davis has opened on Homewood avenue.

The McKeesport Floral Co. had a grand opening May 16 giving away thousands of roses and carnations.

Special Offer for 10 Days

Nice fancy **FERNS** 85c per 1000. Good **Dagger Ferns** $1.00 per 1000. Perfumes From Plants.

Many perfumes and flavorings that were once obtained from flowers, fruits or leaves are now made by the chemist in his laboratory, says the American Botanist, but we have not entirely given up the vegetable world as a cheap and convenient source of stimulants to our senses of taste and smell. Of such products we still import several million dollars worth each year. Some of the most familiar plants used for perfume are almond, caraway, fennel, jasmine, citron, lavender, lemon, orange, rosemary, rose, thyme, violet, geranium, acacia and tuberose. There are four principal ways of obtaining the perfume depending upon the kind of plant used. For those with abundant oil, such as the orange, the fragrant part may be obtained by pressure. Others, like peppermint, birch, sassafras and wintergreen require distillation. Maceration consists in immersing the plant parts, usually flowers, in melted grease, while enfleurage, the most delicate of all, is carried on by placing the flowers on sheets of glass which have been covered with a thin layer of grease.

The characteristic odor of any of our fragrant species may be brought out by one of these four methods. In general the essential oils are obtained by distillation and the more delicate odors of flowers by maceration or enfleurage. Anyone with an experimental turn of mind can easily make a still and derive considerable pleasure from the distillation of various plant oils. All that is needed is some kind of a boiler and a few feet of pipe for the worm through which the vapor from the boiling plants is led until it condenses. The worm is kept cool by a constant flow of cold water over it. Among our native plants from which perfumes and oils have been extracted may be mentioned sweet golden-rod (Solidago odora) Canada ginger (Asarum Canadense) magnolia, birch, wintergreen, sassafras and bergamot.

San Francisco.

STOCK OVER PLENTIFUL.

Since my last report, there has been no improvement in the condition of business in this city. Those who had anticipated a rush during the arrival and stay of the fleet in our harbor have been greatly disappointed. If anything, business has been more unsettled. With the exception of several elaborate breakfast and dinner decorations given in its honor very little has been going on. One of the best decorations seen in the city for a long time was for the breakfast in honor of Secretary Metcalf. The red room in the San Francisco hotel was turned into a tropical scene, waving bamboo hiding the walls. Dozens of canaries were singing in the recesses. The flowers used on the table were Anthurium Scherzerianum, exclusively. The general color scheme of the decorations was red and yellow. The firm of Sievers & Jacques planned and executed the decorations. Flowers at present are over plentiful; good roses and carnations can be bought at any price and the prices for all the other flowers are accordingly low. The season for sweet peas is now at its best and they are being disposed of in large quantities.

NOTES.

The decorations during the week of the arrival of the fleet have been largely of a patriotic nature. Flags, shields and the general display were done in the national colors. Quite a number of the stores had battleships in their windows some of which were quite a work of art. Undoubtedly the best of them all, was the one by the Art Floral Co., Van Ness avenue. It had taken days to make, Cape flowers in different colors being used. It was brilliantly lit up with incandescent lights. The waves were imitated with Asparagus tenuissimus.

J. Groves at Melrose is getting ready to build another large house for carnations. Hutchings & James in Elmhurst are constructing one for ferns, and F. Simmons has enlarged his rose houses considerably. At Clarke Bros., Fruitvale, the carnations were looking still in fine condition and Mr. Clark stated that they had been having them better all through the season.

During a recent visit across the bay we found everything looking prosperous in the different nurseries and every one reporting the past season as good. Carnations and roses had suffered considerably from the hot dry winds a few weeks ago and were consequently not at their best.

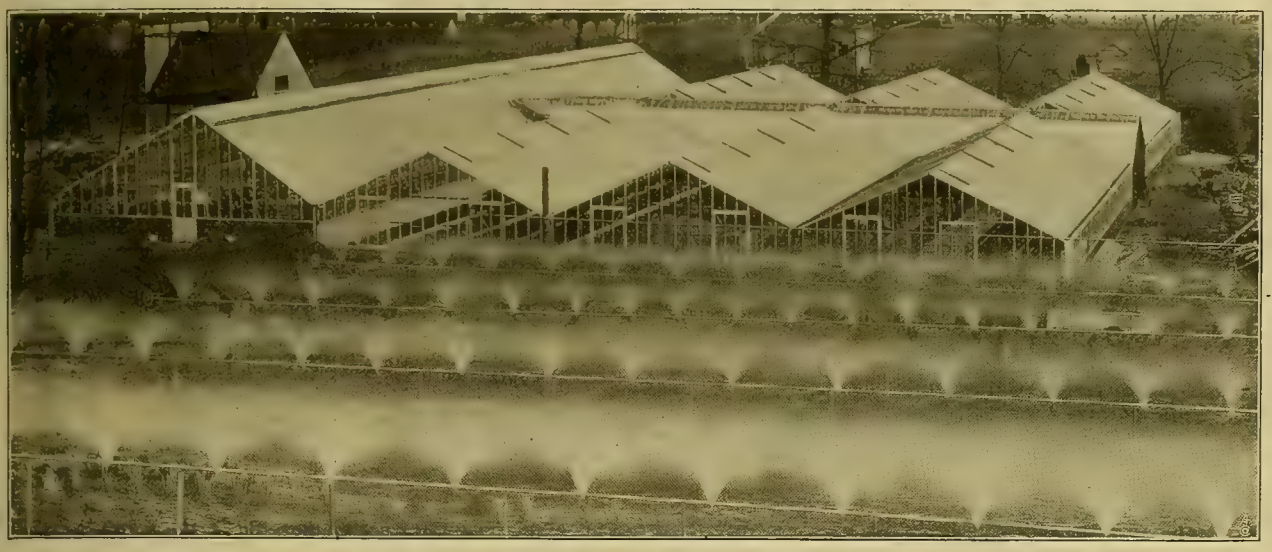
The Sievers Floral Co. opened its new store on Sutter street near Van Ness avenue May 4. The firm has gone to a great deal of expense in making it one of the finest stores in the city. The decorations for the opening day were very elaborate.

The floral contest between E. Matraia and S. Lundy has been postponed owing to a disagreement over the rules governing the contest.

S. Clack has left Menlo Park and has bought himself a place near Mayfield, where he will erect several houses this summer. P.

The Wittbold Watering System

For Greenhouse and Field Watering.



What It Is and How It Works:

It consists of pipes and nozzles so arranged that a **continuous sheet of water** the full length of the line can be supplied, and at the will of the operator can be directed upwards from underneath the plants, downward from above the plants, or parallel with a bench so that only the soil in the bench is watered. It can be used for syringing or watering. An entire house can be watered or syringed in only a few minutes. It is a permanent asset after being once installed, as it will never wear out, is inexpensive and will save its cost in hose and labor in the first six months.

Can be Seen in Use at

Vaughan's Greenhouses, Western Springs, Ill.; Geo. Wittbold Co., Chicago; A. Ahten, New Orleans; South Bend Floral Co., South Bend, Ind.; Davis Bros., Morrison, Ill.; W. B. Davis & Co., Aurora, Ill.; Stephen Hyde,, Carthage, Mo.; A. C. Oelchig & Son, Savannah, Ga.; Chamberlain & Bunker, Fremont, Mich.; R. T. Donnell, Springfield, Ill ; Wm. Edlefsen, Milwaukee, Wis.; Klehm's Nurseries, Arlington Heights, Ill.; Lincoln Park, Chicago, and many other places.

A swivel wheel and 20 nozzles which will cost $5.00 will be the best investment a florist or vegetable grower can make and will show exactly what the system will do. Send for same today.

E. H. HUNT, Sales Agent 76-78 Wabash Ave., CHICAGO.

Botanical Congress.

The third International Botanical Congress is to be held at Brussels from May 14 to May 22, 1910. Owing to the death of Professor L. Errera, who was appointed joint president of the organizing committee held at Vienna in 1905, and also of his successor, Count O. de Kerchove de Dentergem, Baron de Moreau and M. Th. Durand are now the presidents. At the close of 1907 the newly-constituted executive convoked a meeting of the principal Belgian botanists; this meeting, held at Brussels, after an exchange of views, adopted the following among other regulations for the said congress: Membership of the congress shall be conditional upon subscribing to its regulations and a payment of fifteen francs ($2.88). Any language may be used in the discussions, but French will be the official language of the congress. Papers on various questions affecting theoretical or applied botany—apart from those specified in the agenda of the special sections—may be submitted to the organizing committee, who shall decide as to the discussion of the same and their inclusion in the minutes of the congress. These papers may be written in German, English, Spanish, Flemish, Dutch, French, Italian or Portuguese; they should, whenever possible, be accompanied by a translation of their summing-up in either German, English, or French. All communications relating to the congress should be addressed as follows: Dr. E. De Wildeman, General Secretary of the Organizing Committee, Jardin Botanique de l'Etat, Brussels, Belgium.

COLUMBUS, O.—A chrysanthemum show is to be held in Franklyn park this year.

TRENTON, N. J.—Sealed proposals for building and erecting a greenhouse at Cadwallader park will be received at the office of the Board of Park Commissioners at the Mansion House, in the park, at 3 p. m., June 5, 1908. The work to be performed shall be of the design and dimensions shown upon the plans on file in the office of the superintendent of the park, No. 4 East State street, and in accordance with specifications and requirements accompanying the same. Each proposal must be accompanied by a satisfactory bond, with at least two sureties, in the sum of $500, conditioned that if the proposal be accepted the person or persons making it will execute the contract required to be executed and furnish the bond required to be furnished within five days after the acceptance of the proposal. The Board of Park Commissioners reserves the right to reject any or all proposals.

Chicago.

PRICES CONTINUE TO RULE LOW.

The market the past week has seen very heavy receipts of stock and the local trade has been exceedingly slow due not only to the large supplies to be drawn upon, but as well to the many rainy days which shut off transient business for the retailers. On the other hand the weather has been responsible for a vast proportion of the stock going soft, and during the fore part of the present week at least the good shipping stock was getting down toward the proportions of the demand existing for such flowers as would carry well and still appear to advantage. There are plenty of very good American Beauty roses, Bride and Bridesmaid roses, too were plentiful, but the most of them showed the effects of the soft weather. Richmond seems to be holding its quality better. Chatenay, Uncle John, Mrs. Potter Palmer, Mrs. Marshall Field, Kate Moulton and others are received in good quantities and a very good proportion of them are excellent stock. Last week and the early part of this week saw a heavy glut of carnations, the weather having brought the flowers along much faster than was desirable and threatening to create a shortage for Decoration day. Much of this stock is inferior, but where there is so much to choose from some good, fine material may be found. Right now interest seems to center on the peony. The demand now is about equal to the supply, but the general report on the market is that peonies will be scarce for Decoration day, the recent frost having played havoc with the crop. Lilac is now coming in very heavily and selling at low prices. Cape jasmines are coming in in quantities and it is hard to clean up on them. There are plenty of lilies, but they are not what they should be in quality. Outdoor lily of the valley is a feature on the market now.

A TWENTY-FIFTH WEDDING ANNIVERSARY.

Peter Reinberg and wife on Thursday of this week celebrate the twenty-fifth anniversary of their marriage, the ceremony being performed at 10 o'clock in the morning at St. Gregory's church by the Rev. A. J. Thiele, who married the couple in St. Henry's church a quarter of a century ago. In the evening a reception will be held in the Reinberg home, 3465 N. Robey street. Both church and house will be elaborately decorated, Mrs. Marshall Field roses being used, together with palms, furnished by the Geo. Wittbold Co., and Asparagus plumosus. Henry Hansen, of Rose Hill, will have charge of the decorative features.

A NEW BURDEN FOR THE GROWERS.

The wholesale florists, growers and commission men on Tuesday received notice from the various express companies that an extra charge of 40 cents per 100 pounds for cartage of empty boxes would go into effect on May 20. This would amount to a very considerable figure to the entire market, and as much to some large individual growers, it is said, as $2,000 per year. On Wednesday afternoon there was a representative gathering in the office of E. C. Amling and a private expressman was found who would handle these empty boxes at from three to five cents per box, according to size.

NOTES.

Otto Greuter, a brother-in-law of Alois Frey, head gardener at Lincoln park, is this week beginning the erection at Crown Point, Ind. of two greenhouses, 28x200 feet, and a leanto, 10x200 feet. Already a long building, 30x90 feet, has been completed. This is divided into three parts, one a boiler room, one a potting shed and the last Mr. Greuter's living rooms and office. All this is on one corner of a tract of 20 acres acquired some years ago by Mr. Frey. Mr. Greuter comes from Winterthur, Canton Zurich, Switzerland. Besides receiving a thorough training in his father's large greenhouse establishment he has traveled extensively and been employed in various French and English horticultural interests. He will call his place the Rose Lawn Nurseries, starting out next season with a good line of bedding stock.

J. B. O'Neil, of Vaughan's Seed Store, who has been seriously ill at his home in Elgin with a dangerous type of pneumonia for about a month, has passed the worst stage of the disease and is now gaining as rapidly as can be expected.

Growers who took time by the forelock and fumigated their rose houses were wise; others awoke this week to the destructive possibilities of a bad case of thrips. Several in this vicinity were sufferers.

The E. H. Hunt corporation reports a good sale of the Wittbold patents, particularly the cement bench clamp, and the watering system which is especially timely now.

The trade in bedding plants is reported good by the leading dealers, but good pansy plants are scarce and geraniums are hardly up to their usual standard.

C. W. McKellar left the evening of May 14 to attend the funeral of his younger brother, Arthur, who died at his home in Chillicothe, O., May 13.

Wietor Bros. are well supplied with roses for Decoration day. Kate Moulton is a favorite here this season from its beautiful form and color.

Geo. R. Scott, who has been in the cut flower department of the E. F. Winterson Co. for some years, left that place last week.

CONTINUED FROM PAGE 888.

Miss Hertha Tonner is showing some very fine carnations, including Winsor, Rose Pink Enchantress, Beacon, Victory and other new and standard varieties. Miss Tonner has conducted her stand in the Flower Growers' Market for something over five years, being in fact one of those who started in business on the same day the "exchange" was opened to the public. She has handled in that time the stock of her brother, Walter Tonner (one of the market's stockholders), and other successful growers entirely on a commission basis and a gradual and satisfactory increase in the business has been noted each year. Miss Tonner handles not only carnations, but practically all the spring flowers on the market.

Vaughan's Seed Store on Monday exhibited blooms from several new tulips growing this spring in the trial grounds at Western Springs. Among them were Darwin tulip Salmon King, Darwin tulip Glow, Darwin tulip Clara Butt, Gesneriana, Isabella, a specially fine rose colored specimen with long stem, and Bouton d'Or, the best late yellow. A few half standard bay trees have also attracted considerable attention.

The Kennicott Bros. Co. is receiving some fine peonies from the Mattoon and Carbondale districts and E. E. Pieser says they are managing to put a few away in cold storage for Decoration day when it is believed the crop will be unequal to the occasion.

Bassett & Washburn on Monday brought to market a small lot of very fine Red Kaiserin roses which were much admired by callers. This firm has about 1,000 plants of this valuable rose and will propagate as heavily as possible this coming season.

The news of the death of Wm. Scott, of Buffalo, N. Y., has given a tinge of melancholy to conversation in market circles this week.

The J. B. Deamud Co.'s reports from peony growers are encouraging and indicate a good supply for Decoration day.

President Kelly of the Horticultural Society has moved to his place at Oconomowoc, Wis., for the summer.

The E. F. Winterson Co. is handling a large lot of bedding stock.

Visitors: Alpha Elberfield and R. Fraser, Kansas City, Mo.; Mrs. A. G. Glaser, Dubuque, Ia.; Gus. Frederickson, Glen Lord, Mich.; L. L. May, St. Paul, Minn.; Edward Amerpohl, Janesville, Wis.; Miss E. V. Hercules, Pontiac, Ill.

Thompson Carnation Co. Solvent.

The bankruptcy proceedings against the J. D. Thompson Carnation Co., Joliet, Ill., filed at the instance of three small creditors, under false impressions, have been dismissed. The company has been declared solvent, placed in charge of the secretary, and is in shape to fill all orders received.

DANVILLE, ILL.—On a charge of being intoxicated, G. B. Howard, a horticultural inspector for the University of Illinois, was arrested recently, fined, released and within a few hours after being let out of jail was again taken up for drunkenness and again fined. Both times Howard paid with checks drawn in his favor on the university treasurer. Howard's second trip to police headquarters was accompanied by a story which led to his swearing out a warrant for the arrest of Slocum Frankeberger, a brother of a local alderman, charging him with the theft of $50, the balance of the first check which Howard cashed in police court.

St. Louis.

BIG GLUT OF STOCK.

Hot weather is with us and summer dullness in trade appears to have started earlier than usual. On Sunday, May 10, stock was very scarce, but last Tuesday, with bright and warm weather, stock came in and loaded up the commission houses. Trade was so dull that even on Saturday, the day of the charity carnival, after loads of flowers had been donated, the counters were still piled with unsold flowers. Carnations sold for 1 and 1½ cents for prime stock and lots were sold both of roses and carnations at very low figures. Now we must wait for June weddings and school commencements to cause any revival.

THE CHARITY CARNIVAL.

All four of the wholesale houses donated, through the Horticultural Society, boxes of flowers to the great charity carnival at Forest Park Highlands. H. G. Berning had his wagon, also W. C. Smith & Co., hauling flowers at the carnival. C. A. Kuehn and Geo. H. Angermueller made special deliveries. J. Arator had charge of the elaborate decorations put up by Young & Sons.

Mesdames Otto G. Koenig, F. C. Weber, Theo. Miller, Chas. Beyer and others sold flowers. The ladies were in many cases assisted by their children. The Eggeling Floral Co. docorated the German village and other places. This firm donated several large boxes of fancy cut flowers to its many patrons who had booths in the village. The latest reports state that flowers to the value of $250 were sold.

NOTES.

Geo. Ostertag as park superintendent has his hands full these days. They are planting out in all parks. Mr. Ostertag had special invitations for himself and family to the wedding last Wednesday

FOR MAY AND JUNE WEDDINGS we offer extra select Lily of the Valley, Bride and Bridesmaid Roses, and of course a full line of all seasonable Cut Flowers and Greens. Try us. We have the stock and can take care of all orders.

of Philip Scanlan, our park commissioner. The church decorations were very elaborate, consisting of Easter lilies, ferns and palms. Bouquets of lily of the valley and showers of white sweet peas were used for the bride's three attendants.

The Florists' Club met last Thursday, but very few were present. The president and vice-president were too busy to attend and the trustees not having their report finished, the meeting adjourned and all important measures were left over to next meeting.

Robt. Windler has built up a splendid trade at his store on South Grand avenue and is a very large buyer in the wholesale market for all varieties of fancy stock.

The sweet pea growers at Kirkwood have at present quite a glut and much of their stock goes to waste.

The St. Louis Seed Co. is doing a great trade and is especially busy with nursery stock.

W. F.

QUEENS, N. Y.—The friends of Chas. L. Allen, the dean of Long Island horticulturists, are to celebrate his eightieth birthday at his residence, at Queens, on June 13 next.

MARKET VARIABLE.

Conditions in the cut flower market during the past week were almost identical with those of the preceding one, a little stiffening in prices for Monday and dullness that was discouraging, until Saturday when there was something nearer a reasonable clean up. It would seem that most of the growers of roses and carnations are waiting for some other fellows to begin pulling out old plants, and thus profit by it, as there seems to be little decrease in the supply of either of these. Only a few of the best sell for what can be called a decent price. The great bulk are simply unloaded, though it is not quite as bad as when the same unloading process was going on, and back of it the growers were burning coal to keep it up. Lilies continue very cheap but good lily of the valley holds up better than most stocks. There was a marked decrease the last of the week in the quantity of sweet peas and they were really in demand, which is an improvement over a few weeks ago when thousands of them were sold on the streets.

May 18.—This week opens, as one wholesaler tersely puts it, "with enough stock to last till Saturday night," if it would keep, but it is doubtless a blessing that it will not keep. Roses particularly seem to be in great surplus, although some other stocks are not far behind them. Southern gardenias are arriving in very fair condition. Irises are now a feature, as are also gladioli.

THE HORTICULTURAL SOCIETY.

The meeting and accompanying exhibition of this society, held in the Bronx Park museum May 13, was very interesting and enjoyable. It was said to be the best spring exhibition ever held under the auspices of the society. The following exhibits were prominent and noteworthy: Julius Roehrs Co., Rutherford, N. J., collection of flowering orchids and rose, Newport Fairy; Lager & Hurrell, Summit, N. J., collection of flowering orchids; F. R. Pierson Co., Tarrytown-on-Hudson, collection of 75 varieties of flowering trees and shrubs; also a fine collection of flowers of bulbous stock grown outdoors; Joseph A. Manda, West Orange, N. J., collection of flowering orchids; J. T. Butterworth, South Framingham, Mass., flowering orchids; Siebrecht & Son, New Rochelle. collection of stove and greenhouse plants, also orchids and cut roses; Ordonez Bros., Madison, N. J., specimen plants of orchids, recently imported; Clement Moore, Hackensack, N. J., cut orchids; A. M. Kirby, Jersey City, N. J., outdoor flowering bulbous stock; W. McCollum, Islip, flowering trees and shrubs; W. Mille, Elizabeth, N. J., bulbous stock; H. Presby, Montclair, N. J., dwarf alpine iris; Richard C. Schneider, Williamsbridge, collection of wild flowers; Quercus T. Shafer, Carnot, Pa., collection of wild flowers; Gertrude Padroch, Woodside, collection of cacti; Frank Weinberg, Woodside, collection of cacti.

At the business meeting officers were elected. A very pleasing feature of the meeting was the address on "The Violet," illustrated by stereopticon views, by Dr. B. T. Galloway, chief of the bureau of plant industry, Department of Agriculture, Washington, D. C. By the excellent views, the lecture of Dr. Galloway, who is always interesting, was made very plain to his audience.

A very interesting sketch of the New York Botanical Gardens has recently been published by Dr. N. L. Britton, director. Among other interesting items it is stated that the great public greenhouses contain about 8,000 different kinds of plants.

Mention is also made of the Botanical museum which shelters a great collection of the products of plants used in the arts, industries and sciences; and another collection illustrating all the natural families of plants by specimens, photographs, drawings and otherwise and a large collection of fossil plants. The immense herbarium is also noticed, this being a collection of dried specimens of plants from all parts of the world, to which reference is continually made by students from all sections of the country. It is stated that this Botanical museum is the largest in the world.

An enormous amount of planting has been accomplished during the development of the plan and is being continued every spring and fall. This planting has been with a view to educational features as well as park ornamentation; the evergreen trees have been assigned to the region surrounding the public conservatories; the systematic plantations of deciduous trees, those that lose their leaves in the autumn, have been mainly established on the eastern side of the grounds and along the driveways; the systematic collection of shrubs is established on a plain northeast of the museum building, and decorative shrub plantations have been set out in many parts of the grounds. The collections of herbaceous plants are in a beautiful glade east of the public conservatories, the northern portion of this glade being occupied by a collection of economic plants.

Among the most attractive natural features of the grounds are the famous hemlock forest, which exists on the hills along both sides of the Bronx river, the gorge of the Bronx river below the waterfall near the old Lorillard Mansion, and the meadows at the north end of the park through which the Bronx runs as a outlet stream.

The election of officers resulted as follows: James Wood, president; J. Crosby Brown, Dr. Hexamer, G. T. Powell, Spencer Trask and Samuel Thorne, vice-presidents; Leonard Barron, secretary; F. R. Newbold, treasurer; C. L. Allen, F. W. Bruggerhof, J. W. Cromwell, C. F. Dieterich, T. A. Havemeyer, E. S. Miller, John E. Lager, E. H. Roehrs, Julius Roehrs, F. L. Atkins, G. V. Nash, N. L. Britton, W. Nilsson, Patrick O'Mara, C. B. Weathered, H. A. Siebrecht, Joseph A. Manda, J. H. Troy, F. R. Pierson, C. W. Ward and A. L. Willis, members of council.

PROVIDENCE, R. I.—The chrysanthemum show of the Rhode Island Horticultural Society will be held November 11 and 12.

RIVERSIDE, W. VA.—Jeff Hinton, the well known market gardener, was the victim a night or two ago of a most contemptible theft. He had several thousand tomato plants set out and they had started to grow nicely. A night or two age some sneak thief visited his place and carried off over 500 of the growing plants. So far as could be learned there is no clew to the thief, but an investigation is being made.

GRAND RAPIDS, MICH.—The May meeting of the Grand River Valley Horticultural Society was held May 2 at the home of Mrs. Julia L. Fletcher, 23 South College avenue. President Munson was in charge. In a discussion of current events, attention was called by Chas. W. Garfield to the establishing of an experimental spraying station at Douglas, in western Michigan, this spring by the government. Charles W. Wilde, of Walker township, gave a very practical talk on the principles underlying cultivation and the conservation of moisture. He showed how farmers and fruit growers lost fertility as well as moisture from their soils by allowing a crust to form.

TRADE BRIGHTENING UP.

Local trade is quiet so far this spring; the weather has been so cold and so much rain has fallen that most all spring work had to be declared off. For the past few days the weather has been bright and pleasant and as a result we are now rushed with bedding, planting and other outside work.

NOTES.

John Dunbar, assistant superintendent of parks, may well be proud of the excellent display of tulips in the parks of this city. There is no doubt but it is the best show of tulips ever seen here. The cool weather has been very favorable for them.

We see by the trade papers that our old friend Walter Mott has landed a new job. Of course Walter will make good and we wish him success.

A. W. Darling of Reynolds street recently opened a store on West avenue and says that trade has been satisfactory so far.

Callister & Smith Co., of West avenue, report lots of bedding and planting to do. F. W.

JUVENILE MOTHER'S DAY.

The cut flower market is without feature, business moving very sluggishly. It is about normal for the season, however, there being a limited demand for the best flowers in all lines. Sweet peas seem to sell about as well or better than most of the stock and are very plentiful and of good quality, the prices ranging from 30 cents to 75 cents per 100. Carnations are largely in evidence, selling from $1.50 to $3 per 100 and they must be fine for the latter figure. A junior Mother's day was celebrated by the school children, May 18, and cleaned up the white carnation stock nicely. Children are great imitators and when a few started to wear them, they hustled for nickels and fairly stormed the stores in the neighborhood of the schools. One up-town store near a school sold 250 white carnations, one at a time, at a nickel each in an hour, so anxious were the little ones to wear a flower in honor of their mother. We celebrate and do honor to the great national heroes, Washington and Lincoln, on their birthday anniversaries and we also remember the great army of those who fought and bled for their country's good, the essential part of this celebration being the strewing of flowers on their graves. To other national heroes are erected monuments, magnificent testimonials of their worth, and now that at last an opportunity is given to honor and do homage to the memory of the greatest hero of them all, the hero of the home, the one who helps you to fight the daily battles of life and under whose guidance you are sure to come out victorious, let us one and all, keep the anniversary before us and make it with each recurring season the greatest floral event of the year. American Beauty roses have begun to feel the effects of the hot days, the frilling on the edges of the petals becoming more noticeable daily, $1.50 to $2 being the price per dozen. The advance guard of the local peonies, the large red, is here. Some of the southern stock, light pink, arrived last week and sold for 75 cents and $1 per dozen. Snowball, deutzia, spirea and other spring shrubbery are now to be had in quantity and enter largely into the window decorations. Spanish iris, which has been fine this season, is now done. It sold very well and more will be grown next season. The local growers should have a stock of this. The supply this season came, for the most part, from Virginia. The commission houses are making great preparations for Decoration day. Locally the observance of this holiday does not seem to be as general as in many other communities. The out-of-town call is, however, very large and great quantities of all seasonable flowers are shipped to supply this demand.

NOTES.

The unwelcome news of the death of Wm. Scott reached this city May 19. A great and learned man of the profession has passed away, kind and genial, a favorite with all who knew him, the life of every gathering of the craft, a man who loved to be called a gardener and who was never happier than when giving information to his fellow craftsman.

John McIntyre will be right in it on peonies, having the handling of the surplus stock of the Thorn Hedge Nurseries at Newton Square, where is to be seen the finest block of peonies in eastern Pennsylvania. He is also handling shrubbery by the wagonload.

Wm. McKissick says Decoration day business is looming up largely, there being a great demand from his out-of-town customers. He has promise of a large stock of the best peonies and will also carry a splendid stock of roses and carnations.

The Leo Niessen Co., say it is booking large orders and expect a business equal to, if not larger than, last season, which broke its record. The firm is especially strong on American Beauty, tea roses, carnations and peonies.

The retail store of Pennock Bros., 1514 Chestnut street, is one of the show places of that locality, noted for good stock and fine workmanship in designs.

Boston.

FUNERAL WORK HELPS MARKET.

On opening the market Monday morning a buying power met the growers and salesmen, the equal of which has not been seen on an ordinary week day for many months, completely bewildering those who had expected nothing better than the same dismal greetings which had met them of late. Stock of all kinds that had been stacked for ages awaiting a purchaser was quickly lifted at fairly good prices and the outlook was decidedly changed for the better. The cause of this sudden enlivenment was a tremendous quantity of funeral work. Prices rose with great rapidity and held well through the week, but towards the end of the week conditions again assumed a doleful appearance. With Memorial day less than a fortnight away a busy week is expected. The season is considered about two weeks late this year but to offset this some very fine lilac, white and purple, is coming into the local market. This is the first and most important of outside flowers and marks the summer season fully established. Considerable outside planting has been done in the face of a number of severely cold nights within the last two weeks. The rose market is gradually weakening, almost all varieties feeling the heat. Richmond is most noticeably affected and the greater part of the local crop is of second class quality. Killarney has become reduced in size but a satisfactory line of medium goods is available in quantities. American Beauty does not attract much attention. The favorite white rose, Kaiserin, has made its appearance and, because of its superiority at this time over Bride, has met with immediate approval. Carnations have begun to disappear and prices have slightly improved in the ordinary stock while selected blooms maintain their standard figures. An abundance of antirrhinums, gladioli, irises, white and yellow, marguerites and sweet peas of all colors are selling at extremely low figures and the stock is kept moving with difficulty, owing to the vigorous efforts of the salesmen.

NOTES.

The Henry M. Robinson Co. devotes a large part of its establishment to hardy supplies and has had a tremendous run on English boxwood, which is used extensively for Memorial day. It has become necessary to curtail the demand for this green in order to make the limited stock available this year go round.

Welch Bros., who consider Memorial day their third day of importance in a year's business, are looking forward to what now gives evidence of being their record-breaker. Preparations to meet the rush and facilitate deliveries have been planned with their usual care and attention.

Geo. Smith, of the firm of Remick & Smith, South Framingham, market growers, withdraws from the firm June 1. After spending a month's vacation at Halifax, N. S., his old home, he returns to Saxonville, where he will be foreman for Alexander Mackay.

The J. A. Budlong Co. is among the few firms cutting Kaiserin roses at present and their first stock is characteristically superior. This rose is always a prime favorite and when in anything like first class condition gives great satisfaction in summer.

B.

New Bedford, Mass.

At the regular monthly meeting of the Horticultural Society held May 11 in the rooms of the Y. M. C. A. building, Wm. N. Craig, of North Easton, Pa., gave a very interesting talk upon the use of perennial plants. The substitution of perennials for the carpet bedding so much in favor 30 years ago, awakens no feelings of regret in the mind of Mr. Craig, who said that from the appearance of the winter aconite and the crocus, until the first frost cuts down the last rose of summer, a well kept herbaceous border will give a continuous supply of bloom both for ornamental effect and for cutting.

Mr. Craig's ideas of preparation and

W. H. ELLIOTT, BRIGHTON MASS.

cultivation were perhaps a little too elaborate for the means of the amateur, to say nothing of the incidental cost of a number of choice plants and bulbs which are at the present time high. The herbaceous border, the speaker said, should be well trenched and enriched with rotten manure and should have a background of shrubs from which all evergreens should be excluded. The different varieties should be planted in clumps for extensive grounds, but in small gardens the clumps must, of course, be reduced to single plants. Early October is the best time to plant, and considerable pleasure and profit are to be had by experimenting with many plants. By sowing seed in March and in the fall, and by judicious pinching or cutting back and wintering in cold frames, perennial phlox, native asters and several other things are capable of yielding excellent results.

The length of the list of good perennials is limited only by the length of the purse. Mr. Craig recommended the planting of bulbs, especially the Spanish, Japanese and German iris. The Spanish iris in particular lasts three or four years without replanting, and the flowers are equal to many orchids, while German irises must be frequently divided or they will rot. The peony he considered indispensible, but too well known to require discussion. Narcissus and Darwin tulips stand high in the speaker's estimation. The broad petaled Lilium Canadense carries off the palm for outdoor and indoor cultivation. This lily, if for outdoor culture, should be planted one foot deep. Mr. Craig was given a rising vote of thanks.

Wm. F. Turner made a report for the committee appointed on the protection of native wild flowers and evergreens. A meeting of the committee was held two weeks ago, but besides the three members of the Horticultural Society, the two delegates from the Farmers' Club, and Miss Wood, nature teacher in the local schools, representing the Teachers' association, none of the delegates appeared. Secretary Caster will represent the Y. M. C. A., but the Country, Brooks and Pilgrim clubs have not been heard from.

She Missed Her Violets.

They must have been quarreling over something—he and she—the other day, for she was distinctly heard to say: "Oh, very well, then, if you think that way about it—"

He turned on his heel and she left in the opposite direction.

But remorse evidently entered the breast of the young Lothario, for he hesitated a moment, then turned resolutely into one of the florist shops.

"Miss —— prefers violets with lily of the valley," suggested the florist, adroitly, when the young man, who seemed as one in a dream, hesitated in his choice of flowers.

"She does!" he exclaimed sharply, awakening from his lethargy. "How do you know that?"

"How do—how do I know?" faltered the surprised florist, "why—at least that is what most of the other young gentlemen send her."

"Humph! She'll get no violets from me! Send carnations!" and he banged the door.

KEENE, N. H.—Wm. M. Foley's large greenhouse on Armory street, was badly damaged recently by a miniature cyclone which occurred in that vicinity. The wind got into the greenhouse through an open door, raised the roof from its supports, and blew off several ventilating skylights. The loss by broken glass and damaged plants is estimated at about $75.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

BEANS.—Hand-picked White selling at $2.62 and Wardwells at $1.75. Think of it!

EGYPTIAN grown onions have been received and sold well in New Orleans last week. They are hard and firm and better than local or Texas stock.

TEXAS grown Bermuda onions, Yellow and Crystal White Wax, are now on the market in central western cities in full supply at $1.25 to $1.50 per bushel.

BLUE GRASS seed prospects are reported as promising a full average crop though the acreage is probably slightly less than last year. It is said the combine is likely to support the market.

ST. LOUIS, MO.—Few onion sets are grown in this section, a few of the market gardeners raising from one-fourth to two acres yearly, the total area probably aggregating about 15 acres.

L. H. ARCHIAS, of Archias' Seed Store Corp., Sedalia, Mo., and J. C. Archias, of the Barteldes Seed Co., Denver, Colo., will sail from New York June 4 on the S. S. Amerika for a two months' trip.

LOUISVILLE, KY.—Onion seed for sets occupies a little larger area this year than last, but the weather on the whole has not been very favorable for sets up to this time. Prominent growers here expect a larger crop, all things being well.

NEW YORK.—Texas onions are in oversupply here. Crystal White Wax are affected with a smut and sell slowly. Bermuda grown onions are arriving freely and have sold well, but prices are being cut this week. Egyptian sold at double the price of other stocks.

BOSTON, MASS.—John Fottler, Jr., who has been seriously ill at New Haven, is expected home next week. His friends have been very anxious about him.—Fire in the store of the H. E. Fiske Seed Co., May 16, damaged seeds, fertilizers, incubators and other goods to the extent of $1,500.

THE Western Seedsmen's Association, which met at the Auditorium Annex, Chicago, May 16, transacted routine business and seemed to enjoy that social relaxation which the gathering promoted and the passing of the busy seed selling season permitted. Among those present were: H. A. Johns, C. N. Page, L. L. May, J. E. Northrup, F. W. Barteldes, S. F. Leonard, A. Plant, Mel L. Webster, A. J. Brown, W. B. Griswold, H. W. Buckbee, L. H. Vaughan, E. Von Windheim, A. Guttman and T. C. Dorner.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

NEW YORK.—F. W. Bruggerhof, of J. M. Thorburn & Co., is making a California trip.—Hamakichi Suzuki, of the Yokohama Nursery Co., returned from Europe May 16.

AN American consular officer in the West Indies reports that an American commission merchant in the city in which he is located is in a position to handle an agency for American peas and beans. Full particulars may be had on application to the Bureau of Manufactures, Washington, D. C., using file number 2244.

ONION SET crops about Chicago show a good fair stand where the seed is up; south of the city probably 95 per cent of the proposed acreage has been sown; north and northwest of the city on low ground probably one-third of the possible acreage is not yet in the ground, the recent rains having put the land in bad shape.

CHICAGO.—Grass seed contract prices on the board of trade May 19 were noted as follows: Prime Timothy, $4.25 (nominal); choice white clover, $15.—Corn and oats are close to record prices.—Beans were quoted on May 20 at about $2.65.—Visitors: A. T. Ferrell, Saginaw, Mich.; Howard Earl and wife, Philadelphia, Pa.

TOLEDO, O.—The seed and implement business of the late H. C. Hotchkiss has been sold to H. H. Friedly, who was the bookkeeper and confidential man for the last 10 years. The business will be conducted under the name of H. H. Friedly, the partnership being owned by H. H. Friedly and Chas. F. Friedly, of Bedford, Monroe county, Mich.

FREDERICK C. GRAVES, who carries on a mail order seed business, pleaded guilty and has been indicted by the federal grand jury at Des Moines, Ia., for unlawful use of the mails. The government charges that he advertised seeds which he grew himself and filled the orders with seeds purchased at other places. It is alleged that he never paid for most of the seeds he bought.

ONE of our correspondents, who has just made a trip through the Santa Clara valley, states that sweet peas and lettuce will have to move lively to produce a crop. The late rains, however, may cause what looked a bad season six weeks ago to turn out better than expected. Chas. P. Braslan is reported as saying that his crops never looked better, mentioning onion as looking fine.

Erfurt Seed Stocks and Crops.

Stock-taking after the close of the wholesale season can now be undertaken and results turn out roughly something as follows: Very good sales have been made in lettuces, both cos and cabbage sorts; peas, celeries, Savoys, chicory, egg plants and endives, and a satisfactory turnover has resulted in cabbages, kales Brussels sprouts, kohl rabis, vegetable marrows, capsicums, tomatoes, leeks, parsnips, and mangel wurzels; moderate business only has been done in spinach, parsley, carrots and turnips while the sales of onions, cucumbers and beans, especially the latter, have fallen below expectations, says the Horticultural Trade Journal. In cauliflowers the Autumn Giant and Algiers varieties have done well, but others only moderately. Radishes have gone off all right except the autumn and winter kinds, which have rather hung fire. With the exception of sage and thyme, herbs are pretty nearly cleared out.

As to the prospect of the growing crops, it is difficult to say much at present, as everything is so backward. Cabbages appear in good form. Leeks look first rate. Celeries, fairly well. Kohl rabis, fair to poor, while carrots vary in different situations. A full report can hardly be given for three or four weeks, when prospects will have assumed a more definite shape.

Flower seed prospects can perhaps be judged with little more accuracy. The winter has been long, with spasmodic intervals of frost and thaw. Such conditions are generally very trying for our over year crops, but fortunately a fairly good snowfall has acted as a protection against the low temperature. Nearly all kinds of perennials and biennials have come through the winter in good shape, and few shortages are probable, unless May frosts should supervene, which, however, are not frequent in this climate. Pansies, myosotis, single wallflowers, bellis, campanulas, garden carnations, etc., all look healthy though on the small side, while auriculas and primulaceæ generally promise well for seeding. Myosotis may yet suffer by frost during the blooming season, but pansies can take care of themselves better in this respect.

As regards annuals, the autumn sown ones, such as larkspurs, are coming on strongly, but the spring sown kinds are not making much progress. The inclement weather has also checked the development of asters, phloxes and other annuals usually raised in frames, the plants being even now hardly large enough to handle and put out into the fields. Some fine growing weather is now a desideratum, or we shall be badly crowded up in the early weeks of summer.

A Real Chance to Fight Free Seeds.

The democrats in the second Illinois district are willing to support a seedsman candidate against James R. Mann, but the district (four Chicago wards) is ordinarily strongly republican, about two to one. The Chicago Daily Tribune had the following in its issue of May 17:

Something is on the fire out in the Second congressional district which, when taken off, will prove to be the most delicate political confection baked in many years in Chicago. J. C. Vaughan, president of Vaughan's Seed Store, is requested to become the democratic candidate for congress against Congressman James R. Mann, republican, who is widely known as the most distinguished horticultural congressman ever produced in the ten Cook county districts.

If Mr. Vaughan and Mr. Mann finally get to the mat it is a certainty that the Los Angeles flower show will be made to look like a cluster of dandelions in a back yard.

Horticulture is by no means Mr. Mann's chief claim to fame, but it is his most picturesque. His devotion to petunias, nasturtiums and morning glories is known throughout the length and breadth of the Second district, which includes most of the Sixth ward and the Seventh, Eighth and Thirty-third.

Hyde Park has been made a garden by Mr. Mann's able manipulation of congressional seeds. Mr. Vaughan's reputation in the seed line is too well known to permit of any amplification. A political contest between the two, it is evident, would do more to produce a city beautiful than anything which has been undertaken in many years.

PURE SEED BILL PURE BUNK.

Mr. Mann is not in well with the other seedsmen of the city, which may or may not explain Mr. Vaughan's availability as congressman. Mr. Mann not only is looked upon as a threatening factor in the seed business, owing to the lavishness with which he distributes

seeds gratis, but he increased his unpopularity in horticultural circles by introducing in congress a pure seed bill, which has been described in professional seed circles as being "pure bunk."

Furthermore, libels and scandalous remarks to the effect that Mr. Mann's congressional seeds refused to grow when planted in the kindly earth have been circulated among his constituents, but it never has been proved beyond all doubt that his petunias and nasturtiums declined to come forth and blossom according to their species.

It is a fact, however, that Mr. Mann's horticultural tendencies have been viewed with alarm by many horticulturists, and when he established a nursery on a vacant lot in Hyde Park and proceeded to grow young trees for distribution among his constituents this alarm became a positive panic.

It is apparent if Mr. Vaughan and Mr. Mann come to extremities in a congressional fight that Ald. Peter Reinberg and his horticultural campaigns for the city council will become as nothing. The Mann-Vaughan contest will become the big flower show.

Imports.

During the week ending May 16 imports were received at New York as follows:

McHutchison & Co.: 154 tubs laurel trees, 12 cases plants.

Frank H. Darrow: 90 tubs laurel trees, 36 cases plants.

John Scheepers & Co.: 43 cases plants, two tubs laurel trees.

Vaughan's Seed Store; 22 cases plants, two tubs laurel trees.

Chas. F. Meyer: 20 cases plants, 12 tubs laurel trees.

J. M. Thorburn & Co.: five bags grass seed.

To others; 270 tubs laurel trees, 130 pkgs. plants, 66 cases plants, 23 cases orchids. 440 bags seed, 200 bags flower seed, 397 bags clover seed, 200 bbls. clover seed.

Double-Crossed.

The Daffodil.—"Great petals! Rosey, old chap, what happened you? Got the spotted fever?"

The Rose (fiercely).—"I've been Burbanked, that's all."—Puck.

MARKET GARDENS.

Cucumbers and Tomatoes.

The skilful grower aims to get good root action before he expects fruit. To accomplish this, careful watering is most important. The aim should be to compel the young plant to search for food and moisture and not to clog its young system by an over-supply. There is no better method than to use the hoe and weeder, and to supply only enough moisture at any time to produce the proper atmosphere and not enough to settle this top layer of loose earth. A solid bed thus treated will carry the plants along for a month or more, without a single soaking. It will compel the roots to go down and search for their supply, instead of up. Later on, when the fruit forms and a mulch is applied, they will get near the surface quickly enough. The observant grower will soon read the message on the foliage. When the tomato leaves glisten as if dusted with some shining metallic powder, they are coming along all right; if green or yellowish they are too wet. If bluish, too dry.

MARKETMAN.

Hints to Mushroom Growers.

I would remind your readers who are interested in mushroom culture of a few stumbling blocks often overlooked, writes a correspondent of The Country Gentleman. In turning up a portion of a bed maggots may be discovered in the manure. A few may do no perceptible harm, but a large number will eat up the spawn, leaving not even a thread to develop a single mushroom. Many kinds of insects are apt to swarm in warm cellars, together with the egg-laying varieties which cause the maggots, regardless of foul air which may often accumulate and which is an injury to the mushrooms. In each succeeding bed in large cellars insects follow up the new beds and become more vigorous; a high temperature such as we had last fall is conducive to their continued existence in summer garb. A good crop, however, can be secured in spite of them when the houses are kept at all times cool.

When mushrooms are grown in glass houses the return pipes are best run under the walks. In the usual way of heating where the pipes run under the benches, paper placed over the beds will be found beneficial as a protector from excessive heat and drying. With good, vigorous spawn, properly prepared compost and care about the requirements of heat and moisture, a good crop is a positive certainty. There are garden crops equal if not surpassing the mushroom as money makers to the producer, but no one need complain of well-managed mushrooms.

TO THE TRADE

HENRY METTE QUEDLINBURG, GERMANY.

GROWER and EXPORTER on the VERY LARGEST SCALE of all CHOICE VEGETABLE, FLOWER and FARM SEEDS. (Established 1787.)

Lager & Hurrell, Summit, N J

BENNINGTON, VT.—While L. C. Holton of School street was going through a local mill May 5, he opened a door and thinking he was going into an adjoining room stepped into an open elevator shaft. He fell about seven feet, striking on a piece of projecting iron on the top of the elevator which was rapidly coming up. He was taken off almost unconscious and taken home. The physician who examined him stated that he thought three of his ribs were cracked and possibly broken.

OUR IMPORTATION

Will arrive in two weeks time, and prices on cases will be from $45.00 to $50.00 each of 500 strong bulbs or 45 to 50 plants.

The Nursery Trade

American Association of Nurserymen.

J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C. Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June 10-12, 1908.

BOISE, IDAHO.—C. P. Hartley is removing his nursery to Emmett.

VISITED CHICAGO: Jacs. Smits, Naarden, Holland; F. L. Olmsted, Brookline, Mass.

ACCORDING to present indications fruit crops in Utah will be above the average.

WOOSTER, O.—The Wooster Nursery Co. reports a great increase in the sales of ornamental and fruit trees.

TOPEKA, KANS.—R. L. Taylor has purchased the T. M. James farm near North Topeka, paying $9,750 for the property which will be used as a nursery.

VINCA MINOR, or periwinkle, is already flowering freely in sheltered positions in the wild garden, where it is quite at home and very attractive.

POLEMONIUM COERULEUM is one of the prettiest herbaceous subjects of the week, its bright blue flowers and elegant foliage rendering it very attractive.

QUEEN CITY, MO.—Wm. J. Murfin says he has sold his stock down closer this year than ever before. He fears the worst for the fruit crops in his locality.

IT is satisfactory, in view of the immense numbers of herbaceous plants that have been sold this season, that the showery weather has enabled them to get a good hold.

REFUND of duties in the case of United States v. Ouwerkerk referring to evergreen seedlings already noted in our columns, has been ordered by the treasury department.

THE newer varieties of Primula veris are likely to become very popular, for they are hardy yet stand light forcing under glass. They may be propagated freely now by division.

THE Peterson Nursery, Chicago, reports an unprecedented call for herbaceous stock. The landscaping department is obtaining special attention and the firm is sending out its usual list of peonies.

ORLANDO HARRISON, chairman of the national inspection committee of the American Association of Nurserymen, is asking for suggestions in line with the work of his committee.

SPRINGFIELD, O.—The Florists' Club has petitioned the city council for the appointment of a tree committee "to correct many faults in the present haphazard practices of tree planting and result in practical benefits to our city as well as adding materially to beautifying it." The council while not taking any action in the matter as yet appears to be in accord with the proposal.

CHICAGO.—Frederick Law Olmsted arrived here May 14 from a trip in the west, to confer with the members of the South Park commission with regard to several playgrounds in that part of the city, but principally Grant park. Mr. Olmsted's plan for improvement of the lake front will be illustrated by a giant model on which experts have been working the last month in Blackstone hall at the Art Institute, where it will soon be exhibited to the public.

THE trees and shrubs in Jackson park, Chicago, never looked better than at present. The abundant rains and absence of dry harsh winds have produced a green, healthy leafage and the varied spring greens were never better displayed. The lilacs will be at their best in another week while there are many pretty and interesting shrubs in flower. The herbaceous beds, too, are rapidly coming in line and much relabeling has been done, enabling visitors to see the correct names of the plants they admire. We would like to see this extended to the trees and shrubs.

NORTH YAKIMA, WASH.—The Horticultural Union met May 9 and elected the directors for the coming year. Those who served last year were re-elected: M. N. Richards, W. N. Irish, E. Remy, W. L. Wright, E. G. Peck, L. B. Kinyon and J. M. Brown. Manager Samson spoke of taking other fruit for sale, as the union was under a large expense for the men that they hired and for the expenses for cold storage. He stated that he thought that by taking other fruit they could keep all the men busy and thereby make the running expenses about the same, while a larger amount of business was being taken care of. Resolutions were passed commending the management and the directors for the fine work that they had done in the past year.

CONSIDERABLE plantings of locust are reported from various Pennsylvania points.

Polygonum Auberti.

This species, a native of Thibet, is one of the quickest growing of climbing plants, resembling P. Baldschuanicum, but differing from it in the pure white flowers and exceeding it in rapidity of growth and vigor. The plant is thoroughly hardy in this country, and is excellent for clothing arbors, pergolas, and walls, says an English journal. When this plant was first introduced it was stated that it could easily cover an area of 30 square yards in two years, and this statement is perfectly true. P. Auberti is not particular as to soil, and it possesses a graceful habit.

California Privets.

ED. AMERICAN FLORIST:—

Will you please tell me how to take care of California privet? We just planted 2,000 of them the last week in April. They are from three and one-fourth to four feet high, bushy stock, three times transplanted; the roots were very dry, as they came from New York, and must have been on the road about two weeks. We at once watered them thoroughly and planted them in a trench about 20 inches deep and 14 inches wide. A layer of rotted cow manure about three inches was put down; then two inches of soil; then the privets were planted 15 inches deep. We first put in soil about six inches, then fill in water; this gives them a good wet bottom for some time. There are some of them starting to grow. Here and there they come out a little green. How long will it take the others to come? The wood is sound and soft yet. Will the privets grow out very much this summer? How would you trim these? PRIVET.

The privets appear to have been treated all right and the cause of their not starting more regularly is doubtless the long drying they were subjected to. We should not care to plant so deeply as you have done, or use so much manure at first; still, this would probably not account for their not starting well. The best thing to do now is to keep the surface soil moved frequently to admit the air to the roots, and not let them dry out. The privet is a plant that is very easily satisfied once it gets hold, and this your plants will doubtless do this season and will make better growth next year. Trim them in a little at once and next year they can be trimmed in any form desired. Should any plants die out, replace them next season with stock purchased nearer home. Remove also any plants that do not make a reasonable amount of growth this year and replace these also. G.

BOXWOOD.

BOXWOOD.

The plants imported this season are the handsomest ever brought to this country. Prospective purchasers will do well to visit our nurseries and inspect the stock before buying.

Standard Boxwood. 3 ft. diameter, fine specimens, $7.50 each. 2½-ft. diameter, fine specimens, $4.50 each; 2-ft. diameter, fine specimens, $3 each; 18 to 20-in. diameter, fine specimens, $2; 15 to 18-in. diameter, fine specimens, $1.50. Buxus, round shape (perfectly round), 2-ft., $2.50; for hedging, 8-in., $25, $30 and $35 per 1,000; for hedging, 10-in., variegated, $30 per 1,000.

Globe Boxwood. Fine specimens from $2, $3, $4, $5, $10 to $15 each.

Pyramid Boxwood. 5 ft., $4 each; 4 ft., $3.50 each; 3½ ft., $2.50 each; 3 ft., $2 each; 2½ ft., $1.50 each; 2 ft., $1 each; 18 to 24 in., 75 cts. each; 15 to 18 in., 50 cts. each. Pyramids, 5 to 6 ft. high, nicely shaped, per pair, $10 to $15. Special prices on larger sizes.

Bush Boxwood. These are all handsome bushy specimens, adapted for hedges.

To Grow Roses South.

The Dingee & Conard Co., West Grove, Pa., has leased a property near Charlotte, N. C., for the purpose of growing field roses. P. J. Lynch, treasurer, is at present on the ground preparing to plant 75,000 young roses to be shipped from West Grove at once. The soil and climate about Charlotte is very favorable to their growth. It is expected the number planted will be largely increased soon. Edward Hayes, an employe of the firm here, left May 12 for Charlotte to superintend the planting.

ARBOR VITÆ

(Thuya Occidentalis.)

A splendid stock of 3 to 4 ft. and 4 to 5 ft. trees.
Write for descriptions and prices.
THE WM. H. MOON CO.,
Morrisville, Pa.

MANY trees grafted or budded standard high are ruined by reason of the stock not swelling fast enough to take care of the rapidly increasing head. Scoring the bark deeply in vertical lines with a knife has often proved a relief in such cases.

AZALEAS (hardy), Berried Plants, Bleeding Hearts, Blue Spruces, Boxwood, Clematis, Climbing Plants, Coniters, Evergreens, Funkias in sorts, Hydrangea P. G., Japan Maples, Peonies, Pot-grown Plants (Lilacs a specialty), Rhododendrons, Roses, Spireas, Valleys.

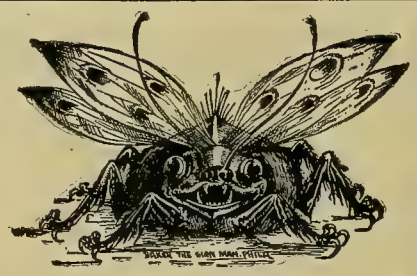
C. EISELE, 11th and Westmoreland Sts **PHILADELPHIA, PA.**

SAN FRANCISCO, CALIF.—In a shipment of 20,000 Chinese lilies consigned to a florist here recently nearly a score of large jet black rats, such as are found only in the orient, were hidden in the bales and when the packing cords were cut broke out. The most of the bales were not opened, and the board of health were notified of the importation of the pests.

LITTLE ROCK, ARK.—Directors of the Arkansas Floral Society met May 6 at the Hotel Marion. The directors present were: J. J. Mandlebaum, William Pollock, P. M. Palez, Bishop John B. Morris, A. Hamberg, Fred Rossner, R. Horrocks and George R. Brown. Homer Wilson was elected a member of the board in place of J. F. Letton, resigned. Fred Rossner was made first vice-president and Mr. Wilson second vice-president. It was announced that there are now 22 entries in the lawn and garden contest.



GERANIUMS.

S. A. Nutt, John Doyle and some pink, 4 in. pots, $7.00 per 100; and mixed varieties.

Begonia Vernon, newest strain, flowers as dark as blood; seeds gathered by myself from specimen plants in Zurich, Switzerland, during my trip to Europe; 4-in. pots, $8.00 per 100; 3-in., $6.00 per 100.

Begonia Erfordi, true; this is one of the best pink varieties known; it is a sight to see a bed of them in bloom; nothing but a mass of flowers. This plant decorates the flower beds of aristocratic people in England, Germany, Switzerland and Paris. Price; 4-in., $8.00 per 100; 3-in., $6.00 per 100.

	Per 100

Everybody Talks About It!

LIKE THE BEE

A Prosperous Florist Is Never Idle.

So is **GODFREY ASCHMANN,** the Philadelphia Hustler.

An immense stock of bedding plants is now ready. Every hole and corner full for immediate shipment.

Ageratum, dwarf, best blue, 4 in., $7.00 per 100; 3-in., $4.00 per 100.

Scarlet Sage or **Salvia,** Clara Bedman or Bonfire. Ours is the true genuine variety so much admired in all the capitals of Europe and America. Deep red, medium tall varieties; free bloomers. Seeds of these famous varieties were gathered by myself in Zurich Switzerland, the home of the Salvias. Price; 4-in., $8.00 per 100. Have 5,000 of these to offer.

Rose Bushes, imported from Europe last fall, 3 feet high, Paul Neyron, Mrs. John Laing, Magna Charta, Jacqueminot, Hermosa, 6 in. pots, 35c; Baby Rambler, 5½-in., 35c.

Clematis, the true Jackmani, 6-in. pots, 3 feet, 35c to 40c.

Don't Forget We Lead the World in

MOONVINES.

Watch and be careful you don't buy Morning Glories for Moonvines.

We grow only the best varieties, hybrid or **Ipomoea Noctiflora,** for which we have had, for the past 20 years, a world-wide reputation. We ship every season, May and June, 20,000 to 25,000 plants into every state and territory in America, and in Cuba and Mexico. This Moonvine is much earlier than any other variety in existence; blooms freely, with very fragrant, pure white waxy flowers, and as large as a saucer. Price: 4-in. pots, nicely staked up, 30 to 36 inches high, $12.00 per 100; 2½-in. pots, $5.00 per 100.

Kentia Belmoreana, 5¼-in. pots, 20 to 25 in. high, 40c to 50c; 4-in. pots 20-in. high, 35c; 6-in., just received from Europe, **Belmoreana** and **Forsteriana,** $1.00 each.

Araucaria Excelsa Glauca, spring importation, 1907; have only specimen plants left, 7-in. pots, 6 years old, 5 tiers 25, 30 35 to 40 in. high, the same in width $1.50, $1.75, $2.00, $2.50, $3.00 to $4.00 each. **Robusta Compacta,** the same.

Have just received from steamer, May 1, from Antwerp a big consignment of about 5,000 **Araucaria Excelsa,** of all sizes. Plants with 3 tiers, 8 to 10 in. high, 40c; 10, 12 to 14 in., 50c; larger sizes, 60c to 75c.

All goods must travel at purchaser's risk only. Cash with order, please.

GODFREY ASCHMANN, 1012 W. Ontario St., **Philadelphia**

Importer, Wholesale Grower and Shipper of Pot Plants.

OLYMPIA, WASH.—E. J. Berneche left May 8 for Portland and Chicago for the purpose of rousing the interest in the display of peonies which he purposes to conduct at the A. Y. P. exposition.

Asparagus Sprengeri 2¼-in. $3.00; 3-in. $5.00.
Cannas, $8.00. **Caladiums,** 15c and 20c each.

Cash or C. O. D.

W. J. & M. S. VESEY,
Fort Wayne, Ind.

GERANIUMS.

One of the best things in the market, the **American Beauty** Geranium, a clear bright cerise just about the color of a good Pink Lawson carnation. The habit is very pleasing, rather dwarf and very stocky. It is a common thing to see 4 to 6 large bunches of flowers on a plant in a 3 to 5-in. pot. Clusters average 4 to 5 inches in diameter. It is a very free bloomer; we think it is freer than any we grow and we grow a great many Geraniums. We grow 8 to 10 varieties. Stock of American Beauty is extra fine but limited as to quantity.

We offer you

2-in Pot Plants at.....$ 6.00 per 100
3-in. " " " ..... 10.00 "
4-in. " " " ..... 18.00 "
5-in. " " " ..... 25.00 "

the 4- and 5-in. pots are very stocky and bushy; have 3 to 5 large flowers on now..

OFFERLE & SCHAAL, Erie, Pa.

STEPHEN CHASE, Nashua, N. H.

Date-Palm Culture.

Under the title of "Progress and Prospects of Date-Palm Culture," the University of Arizona Experiment Station is sending out a leaflet by R. H. Forbes. This says that much experience has been gained since the establishment of the cooperative orchard at Tempe in 1899 and that imported trees are confronted by a changed climate and new insect and animal enemies. Irrigated but not clay soils in the valleys of Arizona rivers are said to be the most suitable and the presence of alkali does not seem to hurt the trees. There are useful cultural data given and also particulars respecting insect and other enemies and their destruction. Six to eight years is the time required for commercial crops, though some fruit is produced at two years after planting the suckers. Propagation by suckers and seeds is discussed and a suggestive note is struck where it says that the date palm is valuable not only for its own products but also for shelter to citrus fruits and certain vegetables.

HYDRANGEAS

CARNATION SPECIALISTS

674 W. Foster Ave., CHICAGO.

CANON CITY, COLO.—The regular meeting of the Fremont County Horticultural Society was held at the court house May 7 and various matters of interest to fruit growers discussed, including the proposition of the Fremont County National bank to send a commission to the western slope to investigate the system of smudging in vogue there to prevent damage from frost.

CALUMET, MICH.—The collection of flower seeds ordered some time ago to be distributed among the students and planted in school yards, window boxes, etc., has been received. The amount of seeds this year greatly surpass that of last year and it is hoped the seeds will be used to an advantage. Approximately 15,000 packages were ordered, all of which have already been disposed of.

SHIPPENSBURG FLORAL CO. Shippensburg, Pa.

Begonia Semperflorens Deutsche Perle.

This variety is so far a giant among semperflorens varieties, reaching a height of eight feet under good cultivation, and when not crowded together has a breadth of the same dimensions, according to Die Gartenwelt. The foliage is bright in tint, and it has a red bordering. The plant is very free in flowering, and its decorative value is enhanced by planting it together with others, particularly with those possessing white flowers. The variety makes an effective pot plant. It is easily increased from cuttings, and these reach considerable dimensions in a short space of time.

ST. LOUIS, MO.—The executive committee of the Horticultural society, at a meeting at the Missouri Athletic club recently, appropriated cash prizes to be offered in connection with the Shaw premiums for the grand fall floral exhibition to be held the first week in November. A committee was appointed to select a hall. Otto G. Koenig reported that a large number of entries were being received for the prizes offered to the persons having the best kept gardens, lawns, window boxes and public schoolroom plants. Attending the meeting were: Henry Young, C. B. Nicholson, Fred C. Weber, C. C. Sanders, A. Meyer, Jr., Theo. Miller, F. H. Meinhardt, Emil Schray, F. W. Brockman and A. Jablonsky.

GRAFTED ROSES.—Novelties.

BASSETT & WASHBURN, Greenhouses: HINSDALE, ILL. Office: 76 Wabash Ave., CHICAGO.

Louisville.

BUSINESS AND STOCK GOOD.

Business conditions the past week were unusually good, a great deal of this being probably due to the good weather. Roses are in very good supply and find a fine demand. The quality is very good. The demand for carnations has been a little slow. The quality and supply are good. Sweet peas are of good quality, plentiful, and find a satisfactory demand. Lily of the valley has a fair demand and are in good supply. Lilies sell well. Peonies are to be had in small quantities and find a satisfactory demand. Smilax continues to be scarce. Other green goods are in good supply. Some of the growers report that they fear the plant business will not be as good as last season. This is probably due to the fact that the weather was very bad until about a week or two ago, and made planting almost impossible.

Anders Rasmussen is kept busy moving the greenhouses he recently purchased from Mrs. M. D. Reimers to New Albany. R. J. Rasmussen is looking after the stock during his absence.

Reynolds & Struck are working hard to get their place in shape.

Jacob Schulz is picking some fine sweet peas.

Wm. Walker is cutting plenty of carnations.

LAST CALL.

If you are short of anything at all in **Soft Wooded Plants** for bedding purposes or Decoration Day, write or wire

GEO. A. KUHL, Pekin, Ill.,

Wholesale Grower of Plants for the Trade. Roses, Ferns, Chrysanthemums, Cannas, Geraniums, etc.

Minneapolis.

PLANT TRADE ACTIVE.

The past week brought a much needed rain, but it remained so cold that it is questionable as to whether it did much good to the vegetation. However, the latter part of the week warmed up and, as a result, the plant business took a sudden spurt. The plant growers began putting in the spring plants the early part of the week, and if the good weather continues will take hold of bedding in real earnest. Roses are plentiful, carnations about equal to the demand. Gladioli are good, but not very plentiful. There is great demand for long stemmed American Beauty roses, which are very scarce.

NOTES.

The Minneapolis Floral Co. is shipping out country plant orders with the usual pre-holiday rush, and orders are coming in thick and fast for lawn planting, and grave decoration.

R. A. Latham put out a fine piece of work consisting of the curtain and proscenium arch of a theater made up of roses, carnations and lilies which formed a very effective design.

O. C. Swanson had a number of good table decorations the past week; he finds stock good and plentiful.

Jas. Souden & Co. had a lot of funeral work the past week, and report business first class.

Miss Whitted finds orders coming in as fast as usual, notwithstanding the bad weather. M.

SAN FRANCISCO, CALIF.—The Sievers Floral Co. has opened a new store at 1258 Sutter street, near Van Ness avenue.

ST. JOSEPH, MO.—Bedding out begun houses are full of choice bedding plants and the display, it is thought, will be finer than usual.

BELLINGHAM, WASH.—The contract for clearing the bulb farm tract of logs, stumps, trees and all wild growth was awarded by the chamber of commerce April 27 to W. H. Cassils. The garden, which contains 10 acres, is already half cleared, so that the contract applies for only five acres. The Griffith tract on which the proposed garden is to be established, is located two miles out of the city on the Marietta road.

GERANIUMS

Good strong stock From 2-in. pots.

Vinca Variegata

We have been headquarters for years for extra large 4-inch Vincas, but our plants this year are better than ever; from 15 to 25 vines to a plant; better plants than most florists sell from 6-inch pots; also a few hundred of the green variety. A sample dozen sent for $1.50.; $12.00 per 100.

BOSTON FERNS A nice stock of 3 and 4-inch plants, ready for a shift, $6.00 and $12.00 per 100.

Elegantissima and Piersoni,
From 2¼-inch pots, 3c; extra fine stock.

Strong 2-inch pot, **COLEUS,** in 12 best bedding and fancy varieties, $2.00 per 100.

W. W. COLES, Kokomo, Ind.

TRITOMA HYBRIDA EXPRESS

This is a new variety, introduced for the first time. It is one of the earliest varieties, blooming from early June until frost, the color ranging from light salmon to dark orange .....$2.50 per doz; $15.00 per 100.

Salvia Zurich **The Ever-blooming Salvia.** Rooted cuttings, $1.75 per 100; 2-in., $3.00 per 100.

PERENNIAL GARDENS CO., Toledo, Ohio.

LARGEST STOCK OF ALL

C. E. DeWEVER,

Kinloch Phone Creve Coeur 69

CLAYTON, St. Louis Co., **MO.**

Worcester, Mass.

Business has held up fairly well and flowers are in good supply. Lange had several large wedding decorations last week and we are looking forward to a large Decoration day trade.

The Worcester County Horticultural Society's show May 8 was not quite as large as usual, but the exhibits were of good quality. The feature of the exhibition was six large plants of Salvia Zurich in full bloom exhibited by H. F. A. Lange. This looks like a good thing. The principal exhibitors were M. J. Whittall, E. W. Breed, H. F. A. Lange, Mrs. A. E. Underwood, Mrs. T. Pollard and W. D. Ross.

Geo. MacWilliam at G. Marston Whitin's, Whitinsville, sails from Boston, June 2, for a six weeks' vacation to bonnie Scotland and everyone wishes him a bonnie voyage.

G. W. Marshall for the past two years at the Worcester Conservatories has accepted a position at Pierce Bros., Waltham. R.

CONCORD JUNCTION, MASS.—Leonard Cousins, Jr., reports an excellent demand for pansies all over the country. The strain which he handles is the result of years of careful and painstaking selection and the flowers are of large size with fine colors.

CHRYSANTHEMUMS.

Novelties and all standard kinds ready for immediate Planting or for late delivery.

My special offer on the single varieties: 100 plants in 10 or more varieties for $8.00.

GRAFTED ROSES

Brides, Maids, Richmond, 4-inch $18.00 per 100. A splendid lot of 4-inch Maids, $7.00 per 100; $60.00 per 1000.

LANSING, MICH.—Flower bed robberies have been increasingly frequent, to the great annoyance of residents. The police are taking especial precautions to arrest and bring the offenders to justice.

COLLINWOOD, O.—After considering a dozen plans for marking the spot of the school fire the council of that village has decided to plant upon the site of Lake View school a mammoth flower bed. In this garden will be planted flowers of many varieties, the school children of the village to have charge of its cultivation. The new building, for the erection of which bonds will be issued May 21, and for which plans have been prepared, will be erected immediately back of the old site. The work of excavating for the new building will begin at once.

SCHENECTADY, N. Y.—Chas. Limmer has removed from Joy street to 321 State street.

HELP PLENTIFUL.

In spite of the great call for the completion of spring planting and the resulting rush, we can say that the spring work is from one to two weeks ahead of last year. This is, to say the least, quite encouraging since it gives promise of a rest that much sooner and by the time the rush is over, all the florists will certainly need a rest. It has been much easier to get men to help out this year, owing to the fact that there are still quite a few out of work. S. A. Nutt geranium still proves to be the popular favorite, thousands being sold in this city this year. Prices range from 75 cents to $1.25 per dozen. There is not much variety in the cut flower line just now, roses and carnations being about the only thing to fall back on. Prices range from 35 to 75 cents for carnations and $1 to $1.50 for roses. Some splendid sweet peas are on the market now, and they are selling as fast as they can be supplied. Salvia Zurich is being given a trial in this city this year. If it does all that is claimed for it, it will almost supersede S. splendens, which is the old standby. Funeral work has been very light during the past week, a fact which is not regretted at this busy time of year.

CARL.

Iron Reservoir Vases...

Nearly 100 styles and sizes ranging in price from $6.00 to $100.00 each.

These vases are made with a reservoir for water, from which a constant and even supply of moisture is drawn by capillary attraction, and they do not need watering oftener than once in ten or fifteen days. Thousands of Reservoir Vases are in use on lawns and in cemeteries all over the country. Our prices are no higher than those of ordinary vases. Catalogue sent on application. Liberal terms to dealers.

For Best Results Advertisers should mail new advertisements and changes so as to reach us on Mondays.

What IT Prevents

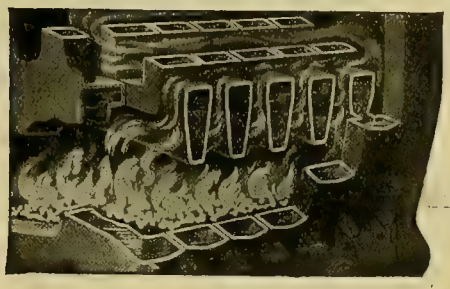
By **it,** we mean that cross fire channel with side flue openings.

First. It prevents diagonal fire travel from front to back.

Second. It makes every section equally efficient.

Third. It pockets and extracts a larger amount of heat from the burning gases when the gases are hottest.

The Burnham burns hard or soft coal. Made in 57 sizes. Send for Catalog.



No other boiler has cross fire channels with side flue openings.

IMPROVED METHOD OF HEATING

Our COMPOUND Vacuum System requires SMALLER STEAM mains and connections, secures BETTER CIRCULATION in distant parts of the system.

And is More FLEXIBLE, ECONOMICAL in fuel, and will give you better SATISFACTION than any other steam or hot water system on the market.

Also have a simple HEAT REGULATION that is easily connected with it if desired.

Write for catalogue and investigate. Don't take our word alone for it.

SIMONDS HEATING & SPECIALTY CO.,

103 Washington Ave., DETROIT, MICH.

WOOSTER, O.—The Wooster Nursery Co., a comparatively new business, has outgrown its original office and store room on South Walnut street. Starting in with a small room, the business, under the management of Thos. B. Ewing, has grown rapidly and the entire lower floor of the Frost building is now occupied. An addition has just been completed at the rear, a sort of emergency greenhouse, where plants and blooms can be kept without danger of wilting or being damaged while on sale or being prepared for shipment. The business of the company this spring has been excellent, the sales in all departments better than ever.

BUSINESS IMPROVING.

Business in all lines has improved considerably, a few good weddings, numerous funerals and a general advance in all branches bringing joy to both the grower and storeman; prices have also picked up. Roses retain their good standard of quality being healthy in color and strong of stem. American Beauty is excellent though Richmond and Killarney sell as readily. Bride and Bridesmaid also find favor. Carnations are mostly of the special classes and find much better sale, which is no doubt greatly helped by the shortening of the bulbous flower season. Sweet peas and lily of the valley are in good demand.

NOTES.

At J. H. Dunlop's the place is in splendid condition; the American Beauty roses are in grand shape and other varieties all in good crop. Kaiserin, on which Mr. Dunlop depends for the summer crop of white, is just coming into bloom and looks well. Carnations are abundant in all varieties; the Easter lilies were good this season and only a few scattered blooms are left. Carnations will be planted into the field at once.

The numerous tulip beds in the parks are looking their best, the arrangement of color having been carefully studied.

Bay trees in quantities are seen in most of the stores. H. G. D.

Albany, N. Y.

The friends of Patrick H. McDonald, alderman from the eighth ward, in the evening of May 11, took advantage of the fact that he occupied his seat in the common council for the first time to send him some floral mementoes. These were in considerable number and of a grade showing excellent taste in selection and design. Perhaps the most conspicuous was a design eight feet high representing the figure 8 surmounted by an eagle. The design was the product of Meaney & Tracey, proprietors of The Rosery, Maiden lane.

A late visitor was C. S. Ford of Philadelphia who was on his way home from his spring trip begun on February 5. Since he left Philadelphia, Mr. Ford has been in 23 states, mostly in the far west. He reports business in that section of the country better than in the middle west and east. The trip he reports to be the best, with one exception, of any spring trip in 12 years. He expects to be in Philadelphia by Memorial day.

The local retailers sold a large number of carnations for Mother's day, May 10. The demand for white varieties was especially heavy. R. D.

Concrete in Greenhouse Construction.

The use of concrete may be considered essential in all greenhouse construction where durability is desired. Concrete walks are by all means the best for greenhouses with the one disadvantage of not retaining the moisture so well as brick. Its use is necessary in the setting of iron posts, of iron pipes and purlin supports, in the flooring of boiler rooms and it is in most cases the most economical material for constructing basement walls and all foundations. It is coming into use both in hollow cast blocks and cast in place for greenhouse walls and it is also being strongly advocated by many for bench legs and for benches complete.

The writer has had no experience with concrete walls for greenhouse construction and would not care to express an opinion further than that if used they should be built hollow. Our own benches are all constructed with ¾-inch pipe legs set in concrete with pecky cypress crosspieces, bottom and sides, and this method of construction has proved so satisfactory in many ways and so durable that we have not felt inclined to change. However, the all concrete, reinforced bench is a perfectly feasible proposition and is so strongly indorsed by many whose opinion should carry great weight that it is not to be condemned. Many are recommending the use of ashes for making concrete. The advisability of this course would seem to depend largely on the quality of the ashes. If they were hard and clinkery probably they would answer the purpose very well, but the writer would certainly not advise the use of hard coal ashes containing, as they do, so much soft powdery material nor of any soft ashes for this purpose. The best material for concrete is undoubtedly good, sharp, clean sand and crushed stone or crushed gravel. Uncrushed gravel if clean, may be also used although from the round nature of the stones' composition it does not make quite so strong a concrete as the crushed gravel. Above all things, any material containing earth or clay is to be avoided. Coarse sand is better than fine and the sharper the sand

THREE REASONS WHY You Should USE OUR MATERIAL.

In the first place, all of our material is very smoothly machined and not rough like some of the greenhouse material you see—this means a saving on paint and on the time required to do the painting.

In the second place, all of our material is cut and fitted at the factory by a special system which others have unsuccessfully tried to imitate, and when you come to put up your house everything will go in its right place without trouble—this means a great saving on the erecting.

Last, but not least, the repair bills are cut in half, as we are so careful in the making and in looking for the defects, that our material stands the test and your greenhouse stands by you.

Isn't it convincing when you know that we get three out of every five jobs we figure on.

SUGGESTIONS FOR PLANT GROWERS.

Cyclamens.

See that the young stock is not allowed to get potbound before giving a shift, but at the same time avoid over potting. The idea is to keep the plants gently moving right along. Cyclamens like plenty of light but cannot stand direct sunlight on the foliage. They do best in small, span roofed houses where there are side benches and a central walk, or on shelves close up to the glass in a larger house. In either case, a light shade is necessary and the atmosphere of the house must be kept moist and moderately cool. The cyclamen is a greenhouse plant, not a stove plant, and when given a lot of heat, especially if not toned down with ample moisture, insects are sure to be troublesome. Always have air on top at the ridge from now on or the foliage will draw up weakly and this is undesirable. Keep the plants well apart and free of insects and the house as noted and there need be no fear as to results.

Stock Plants.

Keeping up a good stock of plants is very necessary and a good stock cannot, in all cases, be obtained from a lot of small unsalable specimens left over late in the season. In many cases, of course, this left over small stock is good property for the purpose but it will not do to depend upon it. Plants sufficient for stock purposes should be selected and placed by themselves before selling begins if possible. They should not be so highly fed as those that are brought to the fullest development for sale as no plant very highly fed is so good for propagating as one more normally grown. With regard to bedding geraniums, especially during the present season when so little time occurred between the Easter rush and the bedding out season, it would be absurd to attempt setting past the earliest and best plants for stock. In short there is plenty of time between now and August to get a good growth into almost anything in the way of a geranium by planting out on good soil. But even here preparations must be made, for when one depends upon the display plants for stock these are just at their best in August, the best propagating month, and one dislikes to destroy the flowers for cuttings. It is a good plan to box or pot a few dozen lobelias now. They are very little trouble to look after during the summer and if cut back hard in August or September they will throw up a great number of splendid shoots, far better than those that come from outdoors.

Hydrangeas.

As recently noted, hydrangeas may be freely propagated from the flowerless shoots that spring between those that have flowered. If stock is scarce the wood that is cut back will also make cuttings, if not too hard or woody, but the flowerless shoots are best. Cut them off about four inches long as this will usually bring them to semi-ripened, solid, but not hard wood and this strikes most readily. If there is plenty of room on the propagating bench they may be struck inside; if not they will root readily in the open ground under handlights or in frames. Take the shoots off below a good joint but do not remove the leaves as usual. When left on, and care taken that the sand closes well around them and the stem, roots form much more quickly than when they are removed, but where room is scarce and the cuttings are struck in the benches break the lower leaves off before inserting them. If the plants are needed to flower on a single stem for Easter, pot them up in 3-inch pots and plunge these in ashes, or in the open beds, but if they are to be grown on for larger plants pinch them and plant them right out in good but not over rich soil. In the former case it is necessary to do everything possible to ripen up a good central spike or bud that will produce a magnificent head of flower. And perhaps the most difficult part of the business is to see that the plants do not get so much rootroom that they grow too fast or so little that the stem and incipient flower head is starved. But these fine single stemmed plants are

good property. They are not much trouble to grow and always sell at a good price for Easter.

Winter Flowering Geraniums.

The old plants that have been flowering all winter and spring will be getting out of cultivation a little now and young vigorous plants from cuttings struck last summer and fall will take their places. Propagation of plants for next winter sales may now be attended to. Place the old plants on a light bench and let them dry out a little; then cut them back to firm but not very hard growth and place them in a frame or light house safe from frost. The cuttings may be inserted in a light sunny bench in sand kept constantly moist. No shading is necessary for this class of propagating. It is an evil, in fact, as the aim of the grower must be to keep the plants quite short and dwarf from the start. If the points of the shoots are used pinch just the extreme end out and when cutting up the lower parts of the stems never cut to a joint that has produced a flower; always one below or one above, as shoots do not start readily from the joints that have flowered. After the old plants have had a short rest they may be shaken out of their pots, the stronger roots cut back a little and repotted into pots a size or two smaller. Scarlet always sells well at Christmas and the old F. V. Rasfail and Improved Rasfail are perhaps the best varieties for winter flowering, as they are very free and of dwarf, stocky habit.

Crotons.

When the demand for bedding crotons is over any plants of good kinds that it is desirable to propagate may be cut over for the purpose and the cuttings inserted. In some places there is no bottom heat from steam or hot water obtainable after this time, and where this is the case it may be well to make up a small, mild hotbed as there is much propagating that may be done within the next few months that will ease the benches later. In any case there should be a bottom heat of about 90° and the sand and foliage should be kept very moist. Croton cuttings may go in fairly close as the leaves upon them at the time of rooting are best kept erect and not allowed to sprawl over the sand. As soon as the cuttings are rooted they should be taken out of the sand and thoroughly sponged. Any scale or other insects that may have been on them when inserted will, owing to the increased moisture, be weak and easily killed and thus a clean start in life for the young plants is assured. At the time the cuttings are taken off, the old plants may be cut into shape a little and then, by the time the former are rooted, these can be potted into 3-inch pots and the old plants shaken out and given a new start in pots slightly smaller than those they have been growing in. Keep all growing along in a light, sunny house and an atmosphere constantly kept moist by syringing and damping. Keep the roots a little on the dry side until growth is again active.

REED CITY, MICH.—The Reed City Floral Co. reports good business and will rebuild several old greenhouses as well as erect two new ones, 28x100 feet, this season.

THE RETAIL TRADE

PUSH steamer business.

PANSIES are always acceptable funeral flowers.

THE Childsi varieties of gladiolus are again proving good sellers.

No need to apologize to customers for low prices on flowers.

NOT size, but quality of flowers and artistic arrangement counts in floral devices.

Bridal Bouquet by H. E. Jaeger, New York.

THE heavier varieties of maidenhair fern are best for associating with cattleyas and similar orchids.

The Art of Selling.

A paper by F. E. Palmer, Brookline, Mass., read before the Boston Gardeners' and Florists' Club, May 19. 1908.

The important, in fact the fundamental, element in a successful sale is that it should be of advantage, or profit, to both parties. This simple proposition has, I fear, an unimportant place in the mind of the average salesman; it is nevertheless true and should be made the basis of every transaction between man and man. Any exchange of services which necessarily involves loss to either party cannot be called legitimate business.

A second basic principle in all commerce, and one that should be understood by both buyer and seller, is that demand precedes supply. In the process of evolution from the simple barter of goods between our forefathers to the complexities of trade in modern civilization, the foregoing two axiomatic truths have become somewhat obscured. Derangements have also crept into the body politic which have aggravated the confusion, and reversed the natural order of things until the man who sells has come to be looked upon as the obsequious servant of him who buys. This attitude has become by custom so much a second nature that we take it for granted the seller is always under obligation to the buyer, and that labor shall forever bow the knee to capital. Volumes have been written, and more doubtless will be, on this important phase of economics before the subject is exhausted, and no more fruitful study could possibly invite the consideration of business men, especially salesmen.

Consistently with the above principles the relationship between buyer and seller should be entirely of a friendly nature, and the appreciation of this fact constitutes the primary lesson in the art of selling. In some simple kinds of trade little is required of the salesman but to hand over the article called for and take the amount determined upon as payment. In such cases little special knowledge is required, and certainly no determination of values. When, however, it comes to the selling of flowers, plants, seeds, shrubs and trees, the supplying of decorative schemes —from the simple bunch destined to cheer a sick friend to the elaborate display for ballroom or dinner table—the simple potted plant or the varied collection for the garden, the mysterious seed package, or equally doubtful dormant tree and shrub, then the salesman comes in touch with one of the higher requirements of humanity and the satisfying of these æsthetic needs becomes indeed a fine art. In such cases how many elements can enter into a sale, possibly every one of which may have to be supplied by the intelligent salesman? Most likely the purchaser has a very vague picture in mind as to what he wants, also an equal uncertainty as to the amount to be expended. Imagine a customer in such a frame of mind, also somewhat fastidious of taste and exacting in requirements, and it will readily be seen that a very different problem is presented than in most other commercial transactions.

Perhaps the first requirement of a salesman will be that delicate tact which makes his patron feel at ease, and will so gracefully convey information—or correct an error—that not the slightest sting of confusion or mortification will be felt. This trait in a salesman, or in fact in any man, is one of the rarest assets. Next to tact comes enthusiasm, that earnest spirit of service which quickly discovers the customer's needs, cheerfully gives information, evinces a willingness to show every flower in the place if necessary and is never tired out. This quality is as rare as tact and generally goes with it, perhaps being born in a man rather than acquired. Add to these the ability to arrange the flowers artistically so that a very common thing may become one of beauty, to deftly and rapidly pack and tie the box in order that the flowers may not suffer, and that time—which up to this point has been used to advantage—may not be wasted on mere details.

It is easy to conceive, as the customer is courteously dismissed, the satisfying effect that all this intelligent effort has upon him. Not only has he been educated and pleased but the value of a simple dozen of roses has been enhanced in his eyes possibly one hundred-fold. In this way a value has been created and credit has redounded both to the house and to the salesman. Stress has been

laid on the philosophical side of the art of selling rather than on its material and technical aspect. This is because of the firm belief that the qualities mentioned, besides conducing to the elevation of the florist's and other kindred businesses, have an immediate and cash value, and that higher ideals will ultimately prevail in trade relations. Indeed the day of the "Deaconing" of the apple barrel, the sanding of sugar, watering of milk, "salting down" of flowers, and general misrepresenting of goods is happily passing away.

Perhaps the following epitome will serve to convey the writer's thoughts in a pointed and more easily remembered form:

It is not such a good practice to "soak" a customer as to satisfy him. It is better to size him up as to his needs rather than as to his ability to pay a big price.

It is more to the advantage of both parties that good, fresh stock be sold than to entertain the delusion that a customer will come oftener if the goods perish quickly. Common decency dictates that equal courtesy be extended to every patron regardless of the size of his pocketbook. Success depends more on absolute reliability than on a glib tongue and a plausible story.

It is taken for granted that a salesman should be well informed on the technical and scientific details of his business, although this knowledge has been lamentably absent in the florist's trade. Selling a certain line of goods at or below cost as a leader to attract the public is not legitimate business, the object being to mislead buyers into the belief that all other goods in the store are equally low priced. Any other action having as its prime object the ruin of a competitor is pernicious. The giving away of flowers is no part of selling and should be charged up to advertising.

Finally, to one desirous of perfecting himself in the art of selling, no better lesson can be learned than from a careful study of his own experiences as a buyer. It is safe to say that he will find himself attracted by the cordial, friendly greeting, especially if his name be remembered, the prompt offer of service, and the manifest truthfulness of all information given.

Memorial Day.

H. R. Hughes, Chicago, has issued a Memorial day folder entitled "A Flower for Memory's Sake" for mailing to his customers in which we find the following reference to the origin of the day:

"We really owe our Memorial day to the southerners. When the war was over in the south in 1865, the widows, mothers and children of the dead soldiers gathered flowers and scattered them over their graves. In doing this they also included the graves of the northern soldiers who had fallen in the south and been buried there. When the news of these beautiful acts of courtesy reached the north it touched the hearts of the people and did much to dispel the sectional feeling that the war had caused, while the example was followed in every community.

"It was not until 1868, however, that any particular date was chosen for floral decoration. In that year Gen. John A. Logan, commander in chief of the Grand Army of the Republic, ordered that every post in the country should engage in fitting ceremonies and scatter tokens of respect over the graves of dead comrades. Later, legislatures took it up, and now almost every state in the Union observes May 30 of each year as a day to express our love and respect, not only for our dead war heroes, but for every loved one who has gone before."

ST. JOSEPH, MO.—McGuire & Haefeli have removed from Francis street to 718 Felix street.

THE ROSE.

DON'T forget—plant firmly.

KEEP a constant look out for suckers on the benches devoted to grafted stock.

THE old plants are the only money makers for some time yet so look after them.

A PALE tint in American Beauty foliage often indicates the presence of red spider.

SOME GOOD WREATHS,

By Henry Morris, Syracuse, N. Y.—See Issue of May 2, Page 717.

Houses for American Beauty.

ED. AMERICAN FLORIST:

As to the type of house and bench we prefer for growing American Beauty, we wish to say that our preference is for large houses, standing alone, of which style, the Floral Exchange, of Edgely, Pa., sister concern of The Florex Gardens, and under the same management, built at Edgely in 1901 a house 54 feet wide by 307 feet long and which may be considered one of the pioneer wide houses. This house created a great deal of discussion at the time and has proved to be a very successful growing house. Since then, the Florex Gardens have built at North Wales, Pa., a house 154 feet wide in a single span by 525 feet long, for the purpose of growing American Beauty. We can state that this so far has come up to our expectations and has proved to be a fine growing house and very easily heated. With the exception of four lines of 1¼-inch pipe on the two side walls, all the heating pipe is hung from the purlins, about 18 inches from the glass.

Concerning the manner of planting the roses, we prefer, if the ground permits and we can use the plough and harrow, as we have done in several houses, to plant the roses directly in the ground, with a narrow strip of lumber to define the walks. When this is not feasible, we put eight inches of good soil on the

ground and plant the roses in beds, using four rows of plants to a bed. We have American Beauty growing on raised benches but think of doing away with these and planting all the roses in the solid ground, as this plan enables us to keep the roses longer in the ground and not replant each year.

THE FLOREX GARDENS.

Notes in Season—Soil.

The soil for the benches should now be kept turned as often as possible in order to have it thoroughly mixed and quite finely pulverized, saving much handling after entering the houses. Keep the pile well pointed up to shed the water and pack firmly on the surface, leaving a gutter at the base of the pile to carry off all surplus water.

American Beauty is usually planted first, for several reasons. One especial reason is that the plants deteriorate after being shifted in anything larger than a 4-inch pot, unless one has room enough to place the pots four or five inches apart, and this would not be practical. Again, if this variety is benched now we can get an early fall cut and another for the Christmas holidays. American Beauty should have at least five inches of firmly packed soil on the benches, and should be planted at least 18 inches apart in the rows and not less than 15 inches between rows for a nice grade of flowers; more room would be an improvement all around. After planting, the soil should be pounded firmly around the plants, leaving a saucer or bowl shaped depression for watering. After the plants have taken hold, the soil should be leveled, and the whole surface gone over and packed carefully, then with a hand rake or scratcher the soil should be lightly scratched on the surface so as to keep the water from running over the surface.

Stake the plants as soon as possible so that they will stand up against syringing and above the stakes running wires should be placed, supported by drop wires from the rafters, and braced to purlin posts, etc. These wires will keep the extra heavy canes later on from swishing about and hanging over the walks. They should be put in position first, as they are easier stretched when the plants are small, and for the stakes use the five or five and one-half-foot galvanized wire stakes, with running wires tied four feet up on the stakes. This allows plenty of room for working around the plants. But be sure, before bringing in any soil, to have the benches neatly and strongly repaired, thoroughly cleansed and whitewashed, using fresh slaked lime, not necessarily thick. Add a generous supply of sulphur when slaking the lime. After planting have all the loose soil removed from under the benches or in the walks and dust air-slaked lime under the tables and in the walks. This should be done once a week until firing starts in the fall, as it is very beneficial in warding off black spot, the worst enemy of this rose.

Summer Roses.

Perhaps there are some growers that are handling Kaiserin. Carnot or other varieties of this type for the first time, after nursing them dormant in solid beds during the winter. As a precaution, do not let them come in with a full crop. Allow only the stronger canes to bloom and nip the short stem growth back quite hard. This will have a tendency to scatter the crop and make continuous cutting. At the same time the check would not be felt half so much as by cutting a full crop back hard on the first growth. Keep the summer roses cultivated frequently and tied regularly. Syringe them early and allow plenty of air day and night.

Keep the potted rose stock shifted in season, as potbound stock is worthless. Remove all raffia ties from grafted stock and stake them with small wooden or wire stakes before the raffia cuts through the bark. Give the young plants lots of room, and keep the weeds down. It may be necessary to scratch the surface of the soil in the pots if this soil has shrunk at the sides of the pots; otherwise they will not receive sufficient water. The old plants being cut from should now receive considerable attention if they are to be kept in for another season, or if kept flowering through May and June they will take plenty of water and air and should have quite a strong manure watering every week. Keep the vent sash opened several inches at night and try to keep the growth as firm as possible. Keep an eye peeled for mildew; in fact it would be good timely advice to keep the sulphur blower handy, and, as a preventive, a little grape dust should be blown over the plants twice a week. Grape dust is a very finely powdered form of sulphur, containing lime and other ingredients that we find does the work better than the plain sulphur for either mildew or black spot.

E.

Holding Over American Beauty.

ED. AMERICAN FLORIST:—

I have a house of American Beauty that was planted September 7 last year in solid benches. The plants have made a good growth of from seven to nine feet and have given an average cut of five flowers. Is this a fair cut, and can I hold the plants over another season?

ROSES.

The cut is very good indeed for roses planted in September. The plants can be held over another season if the soil is removed down to the roots and replaced with good rich compost.

G.

Mildewed Roses.

ED. AMERICAN FLORIST:—

Enclosed are some rose leaves. Please say what is the matter with them and the remedy.

SUBSCRIBER.

The rose leaves are badly affected with mildew, a condition showing that they have been too heavily sprayed in dull weather or the atmosphere kept too cool and moist. To get rid of it make the heating pipes very hot in the evening and apply a good coat of sulphur, after closing the house tightly. The sulphur should be used in the form of paint and applied with brushes. To prepare mix a very little water at first and make a stiff paste, adding more water until of the consistency needed. If much water is used at first the sulphur rises to the surface and is difficult to mix, but by making it into a paste as noted it is easily managed. Cool, damp nights are the best for the purpose and the sulphuring should be repeated as often as necessary. Try and get the mildew all cleaned out before the hot weather starts in, or it will be difficult to keep the temperature low enough in the houses. Never use sulphur unless the temperature can be got below 60° before starting.

PRIZE TABLE DECORATION.

By the Metairie Ridge Nurseries, New Orleans, La.

Roses to Grow With American Beauty.

ED. AMERICAN FLORIST:—

What varieties of tea or hybrid tea roses can I grow on the side benches of a house devoted to American Beauty?

ROSES.

Practically any of the generally grown market varieties such as Bride, Bridesmaid, Richmond, Mme. Chatenay or others.

G.

SOMERSWORTH, N. H.—G. S. Ramsburg reports extra good Memorial day bookings and he has had to secure extra help to take care of the orders.

WITH THE GROWERS

The Joy Floral Co., Nashville, Tenn.

The Joy Floral Co. is one of the most extensive growers in the vicinity of Nashville, Tenn., carrying a general line of cut flower stock, including roses, carnations, lilies, lily of the valley and miscellaneous bulbous material. There is also one large house of asparagus and one of smilax on the establishment. Some idea of this firm's operations may be gleaned from the fact that 24,000 carnations are grown and 12,000 chrysanthemums in leading commercial varieties. The varieties of carnations most known are Enchantress, Rose Pink Enchantress, White Enchantress, White Perfection, Winsor, Victory, Beacon, Aristocrat and Robt. Craig. Mrs. Lawson will be dropped this year. For summer flowering Ethel Crocker, Mrs. Fisher and Kohinoor are grown.

Roses for summer flowering are grown quite extensively, there being four houses of Kaiserin and one of Carnot now started for this purpose. In other varieties the firm will grow this year as follows:

American Beauty	6,000
Richmond	3,000
Killarney	3,000
Bride	3,000
Bridesmaid	3,000
Golden Gate	500
Ivory	500

A considerable variety of miscellaneous plants is carried, including palms, ferns, etc., for decoration. Bulbous stock is grown very extensively and the lilies are in fine shape, there being little evidence of disease among them. The following figures regarding leading items show what quantities of this kind of stock are grown:

Lily of the valley	50,000
Paper White narcissi	40,000
Roman hyacinths	40,000
Lilies	14,000

The plant is now heated by steam and hot water, but it is the intention to dispense with the latter system and use only steam hereafter. The stock in general is in excellent condition, but the yield is not nearly sufficient to meet the home demand. The firm's delivery boys all use bicycles and these machines bear the legend "Joy's Flowers" in conspicuous lettering.

Thorn Hedge Nurs's, Newton Square, Pa.

It is doubtful if in the whole country a finer exhibit of ornamental and flowering shrubs and trees can be found than is to be seen on this place. The greenhouses, where roses are now chiefly grown are no inconsiderable feature of the place, but at this season, it is the outdoor stock that is particularly interesting. The genial proprietor of Thorn Hedge, H. H. Battles, has fixed his home there, and half an hour recently spent with him was well repaid by his entertaining conversation on horticultural matters, he, as is generally known, being a leading Philadelphia retailer as well as a grower and fancier of the best things in horticulture.

When questioned about his land holdings, Mr. Battles modestly acknowledged to having "100 acres or so;" there are plenty of people around Philadelphia, however, that will tell you that could be multiplied by five or six and still there would be a good margin remaining. About the home lawns and grounds everything speaks of fine selection in planting and shows perfect care and attention. What seemed striking and novel is a number of fruit trees, trained to a strongly constructed trellis, which are all in a flourishing condition, in fact there are so many fine features on the place that they cannot all be covered in one brief sketch. A partial list of the outside stock grown, much of which is handled by John McIntyre, the well known wholesaler, comprises over 50 varieties and species all of good, showy, marketable kinds.

Chas. T. Stevens, Plymouth, Mass.

Just about nine years ago Chas. T. Stevens began business at Plymouth, Mass., in a small way and a 10x20-foot house which he attended to at odd times saved from his work as a railroad man and with the aid of his wife. He has now quite a large and very complete establishment largely devoted to carnations, though violets and some plants are grown. Last season the firm, still consisting of Mr. and Mrs. Stevens, built a large and up-to-date carnation house 35x120 feet which has now 4,000 thriving plants in it of the leading commercial kinds. Easter lilies in another house are looking well and the nursery business is also thriving. Mr. Stevens is to be congratulated on his success.

NORTHAMPTON, MASS.— Alexander Parks has bought of the Home Culture clubs, the greenhouse which has been conducted by the clubs on Jewett street.

Schizanthus Wisetonensis "Compacta."

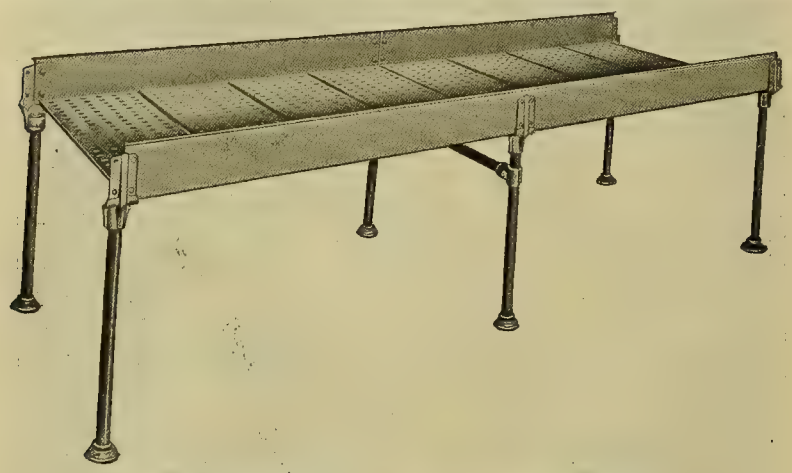
The new plant committee of the Florists' Club of Philadelphia, consisting of President Hahman, Wm. Graham, Robert Craig and J. W. Colflesh visited Girard college recently to inspect the new form or variety of Schizanthus Wisetonensis, illustrated herewith. It originated with Edwin Lonsdale, and is the result of careful selection. Noticing the compact growth of one of a lot of specimens it was set aside and the seed saved. All of this came true and, although there were various shades of color, yet the compact habit of the parent was perpetuated and, as seen in the greenhouse, the plants made a very pretty show. It will doubtless make a very good market plant, provided it holds its flowers. Mr. Lonsdale has named his selection "Compacta." The colors are various shades of light and dark lilac to brown on a light flesh colored ground. As seen here it should prove a very saleable plant for window and table decoration. All through the greenhouses the stock of crotons and other choice bedding plants were in excellent condition. Nothing finer could be seen anywhere. A seedling geranium from Dryden is a distinct improvement over this excellent sort, being much better marked and a brighter shade of pink. The beds of tulips outside were brilliant in the extreme, the pansies set in between being a great addition, and tnese will be at their best when the tulips are over. K.

SCHIZANTHUS WISETONENSIS "COMPACTA."

LINCOLN, NEB.—A new greenhouse is to be built at the Wyuka cemetery.

A New Cast Iron Bench.

The Lord & Burnham Co., of whom it may be said that, any new thing it offers is entitled to consideration on account of its past successes in greenhouse construction, is now putting on the market a greenhouse bench made entirely of cast-iron. Within the past few years the increase in the popularity of the concrete bench has been great and there are doubtless many florists who now have an abiding faith in that form of bench construction and who will have to be "shown," as our Missouri friends put it, before being convinced that there is anything better than a concrete bench.

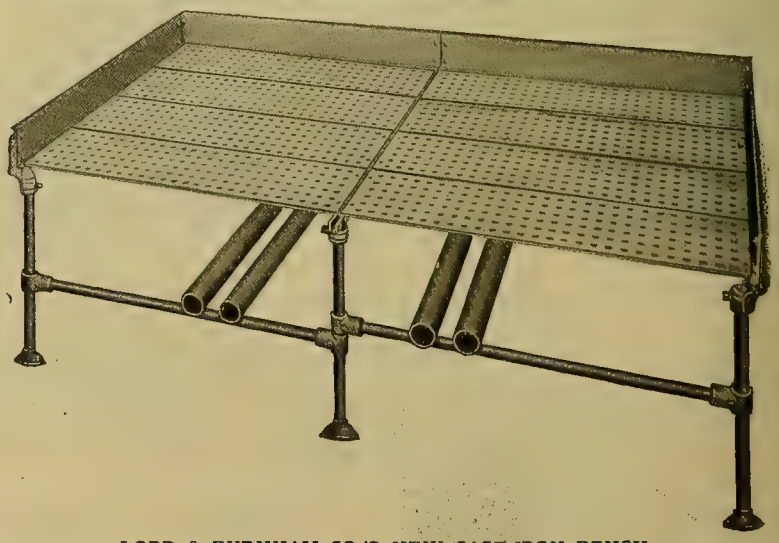


LORD & BURNHAM CO.'S NEW CAST-IRON BENCH.
Two Complete 4-foot 2-inch Units and Cross Brace Necessary in Every Other Leg.

An argument advanced in favor of the cast-iron bench is the rapidity with which it can be erected. It is claimed that two men can erect over 500 feet per day of this new bench, and this proposition alone is entitled to consideration, particularly in cases where the planting of stock has been delayed on account of building new houses or renewing old ones. It is known to all florists, that a few days' delay sometimes entails considerable loss.

Another point made is, that a concrete bench when once installed is there to stay and cannot be changed. For the cast-iron bench it is claimed that were it necessary to take out the center bench and drive a horse and cart through the house it would be a very easy matter to do so. The entire principle of this bench is that of units, or on the principle of the sectional bookcase. The sides are cast in lengths of 4 ft. 2 inches and the ends and bottoms in a series of convenient lengths. To erect the bench, the leg is placed in the main fitting, which is held in position by a set screw; the sides are then bolted to the main fitting, the bottoms secured to the sides, the end bolted on and this process continued till the bench is finished. The bottoms are bolted to a flange extending from the lower edge of the sides. On every other leg there is a cross brace to stiffen the bench, which also serves the additional purpose of being an excellent support for the heating pipes. In side benches, a center leg is necessary, a modified fitting being made to support the cross stay which then becomes necessary, and to which the bottoms are bolted in the same manner as to the sides.

The perforated bottoms of the cast-iron bench, it is claimed, give perfection in drainage. In durability it is claimed that cast-iron scales over with a light rust and remains unchanged for years; on the other hand it is claimed that concrete benches to be lasting and durable, must be erected with great care to be exactly right, otherwise they are liable to crumble and crack and produce generally unsatisfactory conditions. Another point in favor of the cast-iron bench is that the bottom is entirely free from any obstruction to catch the shovel in the removal of soil. It has long been plain to the writer that the wooden bench was doomed. In years gone by, when he trundled a wheelbarrow and handled a shovel, he has often wished that its finish had arrived before his birth. The old wooden bench was a prolific cause of profanity, and a breeding and nesting place for all manner of insects. Both cast-iron and concrete are strictly along the lines of advancement, which now seems to be the watchword of all intelligent florists. As already stated, this new proposition, on account of the many existing monuments to the high order of intelligence and mechanical skill of its authors, deserves careful consideration from the growers.



LORD & BURNHAM CO.'S NEW CAST-IRON BENCH
The 8-foot Pattern Showing Center Leg and Cross Braces to Support Heating Pipes.

The Commission Business in Louisville.

A paper read by Fred L. Schulz before the Kentucky Society of Florists at Louisville, May 5.

Acting upon a request made by our worthy president to draw up a paper explaining the circumstances existing in the commission business in Louisville I wish to say before proceeding that I sincerely hope that no one takes this as meaning him alone or as a personality. I mean to explain the facts just as they are. The relations as they now exist between the grower and commissioner are very deplorable. There seems to be quite a lack of confidence between the two parties. Believe me, gentlemen, that I am treating this matter with all fairness and candor and I certainly intend to give both parties what is justly due them. The grower has the idea in his head that the commissioner is the person to be used just at the time and when he sees fit; in fact, a good thing to be pushed along, a creature who has his place of business open only for his, the grower's personal convenience. To demonstrate this I will say that whenever there is a good demand for flowers the grower forgets all about the commissioner, forgets all the trouble he has had and the hard work he has done to build a trade to sell the flowers grown by the grower, forgets he has to take care of these customers under all circumstances. In fact, the grower forgets everything at that time but his own personal gain, forgets when times are good and the demand for flowers is good that the commissioner would like to share in the business and make a few dollars during said prosperity.

If you will only let me bore a hole in your heads and let me pour a few drops of reason into those holes you will understand that the commissioner's lot is far from being a pleasant one or one of profit. Fifteen per cent commission! Ye gods, gentlemen, think of the amount of spending money the commissioner has after paying his expenses, such as store rent, postage, light, ice, coal, telephones, help hire, and thousands of other incidental expenses. Get out your pencils and figure with me and you will find that a business, no matter how large or small, cannot be conducted on wind. A certain amount must be made for expenses before there is one cent of net profit and I can assure you that on a commision of 15 per cent that after all expenses are paid the amount of net

profit left will be so small that it will require a magnifying glass to see it. And to think, gentlemen, under such conditions that the grower forgets the commissioner during prosperous times and expects him to keep going. Then, when the demand ceases and cut flowers are a glut on the market, he expects him to sell every flower he sends in to him at a good price. He also seems to forget that there are hundreds of growers who at that time have a large surplus of stock. At that time the commissioner's box is full to overflowing and you expect him to sell goods which you were not able to sell. The results of such actions drive the commissioners to desperation and they cease to be a good thing. Results: they go to a foreign market, buy the goods outright, make a fair profit, and thus bring competition into your market against your own product, for which you have no one to blame but yourself. There is no doubt in my mind that there are many in the commission business who are unscrupulous and are always looking for the best end of everything. Those things exist in every business. If you are dealing with such a commissioner and get burned, remember how the burnt child dreads the fire. Stay away from such a man. There are lots of honest commissioners to deal with who will be glad to get your business all the time, but do not want it only sometimes.

The 15 per cent commission is entirely too small. Some arrangement ought to be made whereby the commissioner can get a fair, just and legitimate commission. Remember, gentlemen, that the commissioner is human, his wife needs clothes, his babies shoes, and they all need food, and if he has no wife and babies, it is but perfectly natural for him to expect some day to have both. Now, gentlemen, how on earth could you expect him under such conditions to take care of the wife and babies he has or those he expects some day to get? He likes a dollar as much as you do, and he surely needs it in his business as badly as the grower. Hoping that my efforts in composing and reading this paper will be the means of bringing the grower and commissioner closer together, and of profit to the florists' business in general, I beg to close and thank you for your kind attention.

BEGONIA GLOIRE DE LORRAINE.

Winter Flowering Begonias.

CAREFUL WATERING MOST IMPORTANT.

The following hints will, we think, be helpful to growers of winter flowering begonias, especially B. Gloire de Lorraine and its types. The propagation by leaf-cuttings takes place here from November till January. The stems of single leaves are inserted firmly in the sand bed, about one inch deep, where they remain from six to seven weeks; great care is exercised in watering, and a temperature of 62° to 65° at night is maintained during this period.

In January, or when the leaves are well rooted, they are potted singly into 2-inch pots, in a compost of two parts loam and one part sand; here one must exercise the greatest care in watering, as during continued damp and rainy weather, they are liable to damp and rot off. From this time on, keep night temperature at from 60° to 62°.

About June 1, these should be nice little plants, with several shoots coming up from the center of each and ready to ship, or re-pot into 3 or 4-inch pots; at this time use two parts loam, one part sand, and about 10 per cent of old, well rotted cow manure. They should at all times be moderately shaded; they like some sun, but not too much; too deep a shade does more harm than good. Watering, at all times, must be done carefully, they don't like extremes, neither too wet nor too dry. During the growing season, however, they require an abundance of water, but should be allowed to dry out fairly well every time, then watered through.

The final repotting is done in August, into 6 or 7-inch pots, using two parts loam, one part sand, and one part well rotted cow manure. Allow plenty of space between the pots when placed on the bench. As a preventive of insects, tobacco stems are put between the pots, and this should be changed every four weeks. Do not syringe the plants overhead, at any time. During continued dull or rainy weather, keep plants and greenhouse as dry as possible. In September, begin tying up for training of plants; one stick in the center is quite sufficient. During fall and winter months a temperature of 58° to 60° at night is enough for their well-being.

J. A. PETERSON.

Tropeolum Flore Pleno Darmstadt.

This beautiful double-flowered nasturtium was raised by Herr Henkel, of Darmstadt, and distributed by him last year, according to a correspondent of the Gardeners' Chronicle. The flower is quite double and of an intense yellow color, with scarlet feathering at the base of the petals. A more brilliantly colored flower does not exist, even among such a family as the tropæolums. It has also the great merit of being exceedingly free-blooming, even in recently-rooted cuttings, and the flowers remain a long time in beauty. For covering a trellis during the summer season out of doors I do not know anything more brilliantly beautiful. It can be easily and quickly increased by cuttings, which make roots very readily, and when better known it will be seen in every good collection of ornamental flowering plants.

To Be Done Now.

IN THE GREENHOUSES.

Give all plants a new stand frequently now that growth is active.

Keep all young stock potted on, and where necessary pinched to prevent flowering.

Rake up old loose manure that has dried up from the benches, as it is apt to encourage insects of various kinds.

See that all seed pods are picked off the Indian azaleas before they are stood outside.

Repot young palm stock, giving a light shift and good soil, and make up kentias and arecas in pots as needed.

Remove forced shrubs to the open as ready, repotting any that are to be kept in pots for the summer.

Let the first signs of mildew on the rose benches have attention and this will keep all right.

Never leave plants of any kind to dry up. When they are done with throw them out.

Repot coleuses for growing on loosely in a light rich compost and water freely when started again.

IN THE STORE.

A few box and bay trees around the store have a cool and refreshing appearance now.

A telephone message to good customers telling them when you have good stock to dispose of cheap is often appreciated.

Pansies of varied colors over a solid wreath of pink carnations and lightly arranged with maidenhair fern was the composition of a very artistic though not expensive wreath recently noted.

Memorial day orders satisfactorily carried out will lead to others from the same source.

Call attention to the fact that you are able to carry out steamship orders in the various ports.

Don't have large bunches of lilac half wilted in the window under the impression of making a show.

OUTDOORS.

Look closely after the newly planted herbaceous stock in sudden bursts of bright weather.

Time to clean up all odds and ends of protective material and have everything tidy for the summer.

Plant up tulips and other bulbs that are removed from the beds in some out of the way corner. They may be useful for planting in the borders next season if not dried off too rapidly.

Thin out the hardy annuals to the final distance before they get crowded.

Where fruit trees suffer from sun scald prepare protection for them early.

Either mulch or cultivate regularly the borders where young shrubs are planted to keep the sun from the roots.

After the heavy rains plants are not well rooted as a rule and soon wilt under a bright sun.

Keep the growing points of young vines tied in fairly close or they may be battered about by wind.

Look out for all badly worn places and paths across the lawn and water and feed them regularly, keeping traffic off them.

London.

The Royal Horticultural Society's meeting May 12 was a grand one in ideal weather. Page, of Hampton, and Waters, of Balcombe, were on a level with Burnett, of Guernsey, each gaining a silver Banksian medal for groups of cut carnations of very high merit. In the silver gilt floral awards G. Mount came out on top with grand quality roses, the new variety, Joseph Lowe, being simply at its best. Rochford & Sons, Ltd., had a silver floral medal for pot roses, Hiawatha and Tausendschon being at their best. Wedding Bells, Lady Gay, and Dorothy Perkins were first-class. A white rambler, Sweetheart, and a double sport from Cant's Blush, Gertrude Rochford, were well shown.

In Cannell's silver medal collection a group of Hydrangea hortensis, of fine color, with heads 15 inches across in 4-inch pots were well done. R. H. Bath, Ltd., put up a fine vase of narcissus, a hybrid named Grandeur. This firm is taking good orders from Victoria, B. C., Vancouver, etc., for bulbs. Cheal & Sons staged a very representative group of hardy cut shrubs including Cheal's new Weeping Japanese Cherry, a double free flower, good pink, likely to be of value for both outdoor culture and forcing.

S.

WREATH AT THE FUNERAL OF WM. SCOTT, BUFFALO, N. Y.

By W. J. Palmer & Son.—Lavender Rhododendron, White Lilac and Adiantum Farleyense.

The Crocus Tulip.

One of the brightest of the tulip species is that sometimes called the crocus, or Celsius's, tulip (Tulipa australis, syn. Celsiana), a pretty little plant which has never yet received the due recognition its merits would justify, and which might be more frequently utilised in quantity in the gardens of the many, whereas it is at present only met with in those of the few who are especially devoted to hardy bulbous flowers. It deserves a better appreciation than this, says a correspondent of the Gardeners' Magazine, as it is one of the prettiest and most showy of the really dwarf species, particularly where it is in full sun, when its large flowers spread out almost flat, and resemble some magnified yellow crocus. When the flowers are closed they are interesting also, and the exterior tinting of reddish-brown and green is then well in view. The flowers are smaller than those of some of the more popular species, but they are quite large enough for the stature of the plant, which is from six to eight inches, or even more.

Tulipa australis is one of the stoloniferous species, and where it is happy increases with fair freedom. The crocus tulip is a native of the south of Europe and the shores of the Mediterranean, and in cultivation requires a warm and sunny position in a light and rather sandy soil. Here it should be planted about two inches deep, the bulbs being set about two or three inches from each other if a close clump is desired. It is a charming little tulip for the rock garden, and does pretty well in the border, but it is not sufficiently robust to hold its own well in the grass, which would be its best situation were it amenable to this method of cultivation in our climate. A bright little flower, T. Celsiana is now obtainable at a moderate price in autumn, when it should be planted. It opens in the early days of May, as a rule.

Funeral of the Late William Scott.

The funeral of the late Wm. Scott was held from the family residence May 21, the Rev. Geo. Gavallier of All Saints Episcopal church conducting the services. It was one of the largest funerals held in this city for a long time and showed the high esteem he was held in by the people of Buffalo and surrounding country. The floral offerings were profuse and very handsome. Among the societies and individuals who sent flowers were the following:

The Society of American Florists, a handsome upright wreath of white roses.

Buffalo Florists' Club, casket cross of white roses.

Detroit Florists' Club, design.

Toronto Florists' Club, design.

St. Andrew's Scottish Society, a St. Andrew's cross.

The Corfu employes, an upright wreath.

Employes S. A. Anderson's greenhouses, bunch of American Beauty roses.

President Frank Traendly, New York, a wreath.

Philip Breitmeyer, Detroit, Mich., a wreath of orchids and centaurea.

J. F. Sullivan, Detroit, Mich., a wreath.

J. H. Dunlop, Toronto, Ont., a wreath of cycas and Liberty roses.

Rochester friends, a wreath.

Peter Crowe, Utica, N. Y., a wreath of adiantum and Killarney roses.

Keller Bros., Rochester, N. Y., a wreath.

Ludwig and Burki, Pittsburg, Pa., a wreath.

Harry Balsley, Detroit, Mich., a wreath.

Vaughan's Seed Store, Chicago, a wreath.

E. I. Mepsted, Ottawa, Ont., a wreath.

Every florist in Buffalo sent a design or bunch of the choicest flowers. It is safe to say that a finer lot of flowers and more beautiful arrangements were never seen here.

The honorary pallbearers were Wm. F. Kasting, W. J. Palmer, Peter Crowe, Wm. Belsey, Thos. Stoddart, James Cloudsley, Geo. Troup and David Farquhar, representing the florists and St. Andrew's Scottish Society.

The active pallbearers were W. C. Hewson, L. H. Neubeck, Wm. Waring, David Beveridge, James Nielson and Chas. Sandiford.

The florists of Buffalo turned out in a body at the house and marched to Forest Lawn and paid their last sad tribute to one who they held in the highest esteem and who will be sadly missed. His brother, Alex. Scott, arrived from Baltimore, Md. A. J. Scott, his nephew from the south, could not be present and E. I. Mepsted of Ottawa, Ont., was prevented from attending by illness.

The following were present from Rochester, N. Y.: Chas. Vick, Fred. Vick, A. Salter, J. B. Keller and Geo. B. Hart; Harry Balsley, from Detroit, Mich.; F. G. Lewis and Thos. Mansfield, Lockport, N. Y.; C. F. Christensen and R. E. Boettger, Eggertsville, N. Y.

Dates of Early Autumn and Late Spring Frosts.

ARRANGED FOR READY REFERENCE FROM DATA SUPPLIED BY THE DEPARTMENT OF AGRICULTURE.

The following table shows for the stations of the weather bureau throughout the United States dates of first killing frost in autumn and last killing frost in spring; also the average dates of first killing frost in autumn and of last killing frost in spring. Column A gives date of earliest recorded killing frost in autumn; column B date of latest recorded killing frost in spring; column C average date of first killing frost in autumn; column D average date of last killing frost in spring.

PROTECTION FROM FROST.

Fruit and vegetable growers in rolling and hilly country, or when located on the lee, as regards west to northwest winds, of bodies of water, can, to some extent, so place their earlier and tenderer fruits and crops that they will, in the first instance, avoid the lowlands and valleys, and in the second take advantage of the more moderate and moist air that crosses water surfaces. For further protection the grower must depend upon artificial appliances. These appliances are designed to produce the following effects or results: To prevent a rapid radiation of heat from the earth; to charge the air with moisture; to warm the air; to create artificial drafts, whereby the air is mixed and the cold air is not allowed to settle to the surface of the earth; or to actually cover or roof in plants.

THE AMERICAN FLORIST

1885 TWENTY-THIRD YEAR. 1908

Subscription, United States and Mexico, $1.00 a year; Canada $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From its first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

GREAT interest is now being taken in the irrigation lands of Idaho.

IN renewing subscription one of our readers writes as follows: "With gratitude I pay my subscription for the coming year. The valuable information which the AMERICAN FLORIST gives to its subscribers cannot be considered paid by any amount of subscription."

MONEY can again be had at low rates.

THE builder's advice is usually good advice on greenhouse construction.

CAYENNE PEPPER used with the fumigating material is very effective against thrips.

NEW YORK papers are down on the "foxy" florists for taking advantage of Mother's day.

E. G. HILL has sailed for Europe to exploit the National Flower Show, leaving home May 20.

SELDOM have the parks all through the United States been so attractive as during the last two weeks.

MAKE a note of Mother's day and file it so it will come under notice about May 1 next year or earlier.

WE trust that all who can possibly do so will send us an early report of trade in their vicinity on Memorial day.

STRAIGHT lines may not be ornamental in the flower garden, but they are necessary when planting in the greenhouses.

A COOL rooting medium and plenty of sunlight for the top growth are the conditions that best suit Tropæolum speciosum.

THE NATIONAL FLOWER has not yet been decided on, but preparations for the National Flower Show are going on all right.

THE earliest flowers of Cattleya gigas are in and are very good. A pure white form of this species is reported from England.

REV. J. T. HARGRAVE, Cedarhurst Lodge, Oliver, Va., is reported as asking credit of the horticultural trade and giving unauthorized references.

QUICK rotation of crops, either inside or out, should be studied. It does not pay to have benches or outside quarters doing nothing one-half of the year.

TOMATOES it seems are now to be used in the trimming of the smartest hats of the gay Parisiennes and it is stated that cucumbers and parsnips loom threateningly on the horizon as candidates for similar rank.

MANY advertisers write us when they are quite sold out of various stocks. It is far better to write when the stock of any variety is getting low as orders continue to arrive after the items are taken out and it is better to keep the ads alive.

AUG. HAERENS, of Somergem, Belgium, was awarded five first and two second prizes for azaleas at the recent Ghent quinquennial exhibition. Those who saw Mr. Haerens' plants in these classes say they were remarkable examples of high culture.

VARIOUS guilds and societies for growing truck produce on vacant lots as a means of finding relief work for the unemployed have been formed in many cities. The idea is a good one if not overworked though, unfortunately, it would not appear to touch the winter season much when the relief is even more wanted than in summer.

CHAS. H. KEITSCH, superintendent of the S. A. F. trade exhibition to be held at Niagara Falls next August, is sending out plans of the space available, which includes 20,000 square feet on the ground floor of the Cataract House. Mr. Keitsch writes that he has already received a number of applications for space and he thinks all the space will be taken. Copies of the floor plan can be had on application to Chas. H. Keitsch, 810 Main street, Buffalo, N. Y.

Keeping Bulbs.

ED. AMERICAN FLORIST:—

Please inform me how best to keep bulbs over till fall. I have several hundred left from Easter, namely—Lilium longiflorum, tulips and hyacinths.

B. F. S.

Bulbs, such as named above, with the possible exception of perfectly firm and sound lily-bulbs, are not worth keeping over until next year, if they have been forced and furnished flowers before their natural season of flowering. A number of the tulips and a few of the hyacinths, if dried off and planted in open ground in the fall, will show up and bring short-lived, feeble stemmed blooms next spring. This will be the last effort of nearly all the hyacinths and most of the tulips, but here and there one may reappear the following spring. None of these will repay the grower for making the attempt to force under glass again next winter. Healthy, firm bulbs of Lilium longiflorum, or of any lily not subjected to excessive heat while being forced may now be taken out of their pots, root-balls to remain intact, and be planted or buried in a freshly dug piece of garden ground, the stumps of the cut off flower-stalks with their remaining leaves, if there are any, to be above ground. These lilies, repotted into fresh soil in the fall and afforded the same treatment as newly imported lily bulbs, are usually good for another season's forcing.

X. X.

Meetings Next Week.

Chicago, June 4, 8 p. m.—Chicago Florists' Club, Union restaurant, 111 Randolph street.

Dayton, O., June 4.—Dayton Florists' Club, 37 E. Fifth street.

BUSINESS GOOD.

From almost every source comes the report of a satisfactory state of trade. Out-of-town commencements and those at home have caused a most noticeable demand for good stock. Preparations are being made for a large Decoration day business. There is some evidence, however, of doubt as to any increase in the volume of business that day, but the Easter lesson is one to remember. No one looked for an average business then, but after it was all over it proved to be the most profitable in history. Stock is fairly good and in most cases plentiful. Carnations seem to lose in size and general appearance as the season advances. The same conditions apply to roses. The effects of the frost in the early part of the spring are being plainly felt now that many of the usual early summer varieties of flowers are not to be had. Sweet peas are plentiful but later on they too will be scarce. Gladioli, lily of the valley, Easter lilies and iris are among the offerings of the week. Much hustling about for peonies has been in evidence this season and a great many more found their way to storage than ever before.

NOTES.

The regular monthly meeting of the Missouri Valley Horticultural Society occurred May 15, at the home of L. A. Goodman. Several important subjects were discussed. Jesse B. Tuggle of Shaw's Garden, St. Louis, was among the speakers. A lively discussion pertaining to bedding plants, was indulged in.

Decorators complain of having a very light season. There seems to be a general let up in social affairs, especially weddings, which have been unusually scarce this spring, and none seem willing to place the blame on cupid, either.

E. Ellsworth is one of the busiest fellows in town these days. He says that an unusual interest has been shown in landscape work this season and that orders for plant boxes came faster than he could handle them.

Max Eller has decided to abandon his stand at Twelfth and Main streets, that he may devote more time to his Walnut street store, where a steady growth in business is being enjoyed.

The Wm. L. Rock Flower Co. reports a splendid shipping business. A showing of boxwood and bay trees in mission boxes made in its own shop is the latest.

The latest addition, "The Flower Shop," at Eleventh and Main streets, appears to be making good, judging from the number of patrons seen there.

The Alpha Floral Co. has added an automobile to its delivery equipment. At present this store is making a specialty of dollar flower boxes.

Miss Moseley reports a busy week in Kansas City, Kans., on account of the G. A. R. reunion which was in progress there last week.

A. F. Barbee has made great preparations for a large Decoration day trade at his Elmwood cemetery place.

Geo. M. Kellogg is reported to be slowly recovering from his long illness.

M. E. Chandler has landed a fine large crop of peonies.

Visitors: Warren Spain, Lee's Summit, and Frank Stuppy and wife, St. Joseph.

CROWL FERN CO., Millington, Mass.

St. Louis.

HEAVY GLUT OF POOR STOCK.

The glut during the past week was simply astounding. Box after box arrived at the commission houses and to add to the trouble the quality of the stock is daily becoming more and more inferior and the demand being slow, it becomes a very difficult problem for the commission man to give his grower a respectable showing. In the down-town district the retailers vie with each other to determine who should head the list as to low prices. Carnations at 10 cents and roses at 5 cents per dozen are the signs that meet the public at every corner, but even the public appears disgusted at the low level of the floral market and fails to buy. The only redeeming feature is where retailers have $100 worth of work and can buy flowers enough for $10 to fill the orders. Another bad feature is that the general public will not understand that next Friday and Saturday they will be taxed 50 and 75 cents per dozen for carnations they have been buying for 10 and 15 cents per dozen. Memorial day Saturday, and school closing next month, will, it is hoped, help the market some. In justice to the west end florists, who are a more conservative body, it must be said they do not cut but hold up the prices and endeavor to keep the business at the proper level.

Park Commissioner Scanlan is out with his report. He suggests better attention to the park and an increase of park space befitting a city of this size, also a shelter and refreshment pavilion adjacent to the picnic ground at Forest park.

A severe storm May 24 played havoc at Forest park. Big elm and pine trees were leveled by the heavy wind and the saplings around the World's Fair site suffered severely, being recently planted.

A. C. Brown of Springfield, Ill., is shipping some of the best carnations seen in this market; they show care and attention and deserve better prices.

The opening of the new Third National bank called for large quantities of flowers, almost every florist in the city having orders for the occasion.

It is suggested that the outing to be given by the Florists' Club take place on one of the river excursion boats, by way of a change.

Geo. Waldbart is cutting some very fine peonies from his farm at Clayton. His cut for one day was over 900.

Ostertag Bros. supplied large quantities of flowers at the German village at the recent charity carnival.

The St. Louis Seed Co. is still busy and is out with its new flower pot circular.

FROM THE GERMAN TRADE PAPERS.

SEEDLING ORCHIDS.—At the establishment of Otto Beyrodt, Germany's noted orchid specialist, the rearing of all species from seeds has been carried on with unvarying good results for years. The tendency of the seedlings to revert to original crude forms and types is one of the most serious drawbacks to this class of work, necessitating acute judgment in the selection of flowers and plants destined to play a part in the production of seeds. Any oversight or faultiness here may mean from four to six years of painstaking care and labor wasted in the rearing of colorless, undesirable bloom on utterly worthless plants. In all other respects,—contrary to old time notions,—the work is of a kind not at all difficult to undertake or to be carried to a satisfactory issue by any fairly good cultivator, patience alone being needful in great measure, more than unusual skill. Fertilized specimens, plainly showing that impregnation has taken place, henceforth need the clear light but are only sparingly dealt with as regards moisture, so as not to call forth premature new growth. Should this occur it would be at the expense of the seed-capsule, eventually causing it to dry up before the seeds had fully developed. Under normal conditions it takes the seeds from 12 to 14 months to ripen, indicated by the yellowing of the capsule. A piece of silk paper is then tied around it to prevent the loss of seeds, usually the heaviest and best, by being scattered about in the event of its bursting open. In tightly closed glass tubes, kept on a dry place, the seeds will hold their vitality for over a year, but it is advisable to sow them as soon as gathered. The seeds from such species as lælia, cattleya and a few others are sown in pots, three-fourths filled with moss and polypodium in equal proportion, kept moist from underneath by being placed in vessels with water from time to time. Seeds of oncidium, odontoglossum and like species are started in the live moss about the old pots of their parent plants. The necessary orchid-mycelium is obtained by artificial culture. In case there is not enough of it at hand just when needed, sound roots, cut into minute pieces, spread on a cloth and on these the seeds, answers the purpose as well. The seedlings, after having developed two leaves, are potted up, moss and polypodium being used for nearly all species. In their first stages of growth no intermission in active advancement must take place, a period of rest not being required for the welfare of young seedling orchids. The temperature throughout this time should at night never fall below 55° nor rise on fine days above 75°. An evenly maintained moisture, the frequent use of a fine sprayer and shade during summer are essentials to success with orchids raised from seed and yet in their infancy.

HOT WATER AS AN INSECTICIDE.—Systematically conducted experiments with hot water by Prof. Dr. H. Mayr, chiefly to learn its effects on the living tissue of plants, led to the disclosure of interesting data, submitted to the Bavarian Society of Horticulture at its meeting held in October, 1907, at Munich. The extreme limit in the height of temperature to which water coming in contact with plants, may be heated without causing death or harm to their cells, the professor has found to lie at 125° Farenheit. Water heated to any degree below and up to this point, even if in closest proximity to the danger mark, brought no injury whatever to any part of the most tender of living plants, immersed for several minutes. All species of plants were drawn upon and furnished subjects for thorough-going tests. Neither the rigidly frozen brought in from the hardy plant border and suddenly dipped into the hot fluid and held there for minutes, nor the most fragile of tropical plants from the greenhouse, similarly treated, showed any traces of having even to the smallest extent been harmed thereby. Prof. Mayr states, that, although on being withdrawn from the hot water the plants appeared to be limp and washy as if cooked, they quickly recovered, and while still held in the hand and contemplated with regret by the frightened experimeter, they straightened up and regained their former sprightliness, seemingly much improved in actual vigor by having undergone the unwonted ordeal. Of greater import, however, to practical horticulture is the fact, as established in the course of these tests, that while plants not only survive but apparently seem benefited by being immersed for a couple of minutes in water heated to within 125°, all insect life of whatever species or stage of development, so dealt with, must perish. It was shown that water of a temperature of barely 100° proved instant death to soft bodied insects such as all kinds of aphis, red spider, thrips and caterpillars, their grubs and larvæ, while 10° or 15° higher meant certain destruction to every living insect or its brood belonging to the various tribes of scale and bugs infesting plants. By placing the pot of a plant in hot water for a few moments the warmth thus imparted to the ball of roots, does not injure these in the least, but instantly drives every worm contained in the soil to the surface to meet its doom in the death-dealing flood. Where the dipping of plants or their insect-ridden branches is impracticable, as in the case of large specimens, outdoor trees and shrubs, the syringe becomes a means of sending hot water to every part of such plants and repeated application frees them of the most tenacious of pests. Trees in a leafless or dormant state are not hurt by water heated to a much higher degree than is necessary for the destruction of every insect or its hibernating larvæ.

Roses and Carnations A Specialty.....
WHOLESALE GROWER of **CUT FLOWERS**

Chicago.

MANY ADVANCE MEMORIAL DAY ORDERS.

Stock has not been up to the standard and demand has been exceedingly slow. The only redeeming feature of the market has been the receipts of liberal advance orders for Memorial day. Thrips and hot weather have had a demoralizing influence on flowers. Carnations have been soft and of poor color. Lawson suffered the most, few good colored being seen. It has been almost impossible to ship such flowers to any but comparatively nearby points with any assurance of their arriving in anything like salable condition. Roses were also affected, but it was possible to secure some fairly good material from the great quantities on hand. In both roses and carnations there have been big gluts, but good shipping carnations were in good demand whenever they could be found. Peonies have been coming in more freely than was expected a week ago. Cape jasmine is in good supply with fairly heavy orders on this item for Memorial day. Outdoor lily of the valley is good in quality and in fair demand. Ferns are in better condition and supply than usual at this season of the year. Other green stock is also fairly abundant.

JUNE WEDDINGS AND COMMENCEMENTS.

June weddings and school closings are next in order and already some very satisfactory advance orders have been received for such occasions. Fortunately orchids are in fairly good supply. Cattleya Mossiae is coming in freely and C. gigas has made its appearance. Lily of the valley, both indoor and outdoor, is in good supply and of excellant quality. Green stock, such as Asparagus plumosus and A. Sprengeri, is in good supply and the demand for such occasions is excellent.

THRIVE ON COMPETITION.

In the half mile on Sixty-third street between Wentworth avenue and Halsted street there are no less than four florists, all undoubtedly doing a thriving business and all seeming to relish nearby competition as the life of trade. First comes the store of A. I. Simmons, who is now rapidly improving and expected home within a few days. Wm. Weil, 427 W. Sixty-third street, reports a good season's business in both cut flowers and plants. Geo. Walther, 535 W. Sixty-third street, has glass of his own at 6436 Lowe avenue, where he grows a miscellaneous line of plants for his own trade. Nearer Halsted street (826 W. Sixty-third street) is E. C. Moore's latest branch, and in spite of the established business of other retailers seems to be getting its share of business.

Zech & Mann
Wholesale Florists
Room 218, 51 Wabash Ave., CHICAGO
Telephone, Central 3284.

NOTES.

Among the orders taken by A. Lange last week was one for a 9-foot column, made of white carnations with a garland of Killarney roses and lily of the valley. The base was of green galax, Gladiolus Blushing Bride and Easter lilies.

Fred T. Ewert, formerly connected with J. A. Budlong's sales department, has taken over the store of Clarence Smart at 6321 Cottage Grove avenue. He reports a very good business for the two weeks he has had possession.

The Geo. Wittbold Co. is meeting with a lively call for plants. The nursery at Edgewater has been particularly busy, and now the demand for bedding and decorative stock is exceptionally heavy.

James Bombenger, 446 Sixty-fourth street, appears to be doing a nice business, and the quality of the stock now to be seen in his show and greenhouses amply warrants a good spring trade.

C. Penshorn, 1331 W. Sixty-first street, one of the old landmarks in local floriculture, notes the twenty-fifth anniversary of his location at that place.

H. A. Muir, a brother of J. T. Muir of 3530 Michigan avenue, is manager of J. B. Opitz's branch store just opened at 6643 Cottage Grove avenue.

Frank Oechslin reports a busy season with ferns and bedding stock, having sent out last week from 10,000 to 15,000 plants per day.

C. N. Thomas is back from his Pennsylvania farm to help out during the Decoration day rush at the A. L. Randall Co.

Vaughan & Sperry have a new refrigerator, 8x10 feet and 10 feet high, built by Orr & Lockett.

Wm. E. Fessler reports a good business at his new location, 1603 W. Thirty-fifth street.

C. B. Chase, of 2205 Michigan avenue, says he will open a down-town store next fall.

N. C. Moore & Co. already have indoor asters in bloom.

Chicago Notes.

CONTINUED FROM PAGE 938.

J. C. Wintermeyer's box factory, 750 Throop street, whence many of the wholesale florists have obtained their boxes, was totally destroyed by fire May 21. Mr. Wintermeyer himself was badly injured, having been compelled to jump from a window on the second floor.

There has been a very heavy call for the new red carnation Orland P. Bassett on Decoration day orders, and Bassett & Washburn have had to cut nearly all orders in two. This popular variety will be disseminated next season.

L. Baumann & Co. report having done a big business in Decoration day supplies. Their stock of preserved wreaths and metal designs is now nearly closed out.

Miss L. A. Tonner, manager of the A. L. Randall Co.'s supply department, has been confined to her home with bronchitis.

The Kennicott Bros. Co. is now receiving some exceptionally fine peonies, their quality having greatly improved.

Zech & Mann are handling some exceptionally fancy Enchantress carnations and outdoor lily of the valley.

C. W. McKellar is now receiving some fine Cattleya gigas. C. Mossiæ is also being received in liberal lots.

Chas. J. Strombach, landscape gardener and designer, is now located at 223 Ninth street, Wilmette.

J. A. Jegen is now at 113 Dearborn street.

Visitors: J. J. Soper, wife and daughter, Rockford; Wm. Feniger, Toledo, O.; J. A. Peterson, Cincinnati, O.; R. J. Groves, Adams, Mass.

FINDLAY, O.—Employes of the city are engaged in fixing up Cory park, the popular beauty spot of South Cory street.

Davenport, Ia.

Plant trade is now in full swing, and for the past two weeks the florists have had all they could do. Business is up to last year, and, owing to the very disagreeable weather we have been having, everything has to be done in a very short time, as of course everybody wants their plants out by Decoration day. The boys are having a hard time getting out the stock plants for between showers everybody available is busy waiting on customers. More 4-inch and 5-inch stock is being sold this spring than usual owing perhaps to the lateness of the season. Very few flowers will be in bloom outdoors for Decoration day. Snowballs, spireas, etc., will be done or nearly so and peonies will not be in, so carnations, roses and lilies will have a fair price. Indications point to a banner day May 30.

The May meeting of the Tri-City Florists' Club took place at Turner Hall, Rock Island, on the evening of May 21. Owing to the spring rush a small number were in attendance, nevertheless a very interesting meeting was held. A committee consisting of Henry Gaethje (chairman), A. Andersen and Theo. Ewoldt was appointed to make arrangements for the annual picnic which will be held in the early part of July. The invitation to meet at the home of Ewoldt Bros., in June, was accepted. This will be the annual strawberry feed which Theo. Ewoldt tenders the club. After the evening topic, "Best and Most Profitable Flowers to Grow for the Decoration Day Trade," was discussed the club adjourned to the dining room where a fine luncheon was in waiting for the tired and hungry guests.

Harry Bills who was on the sick list is able to be around again.

Friends of the late Wm. Scott in this city were grieved to learn of his death.

T. E.

Phormium Tenax.

The following report has been prepared by Consul Robert P. Pooley, of Jamestown, St. Helena, for the information of those who might be interested in the establishment of the phormium (New Zealand flax) industry in the United States:

For a successful start in the phormium industry the services of a New Zealand expert should be secured. Plants should be raised from suckers, planted six feet apart, 1,250 to the acre, clear of trees. Plants grown under trees look as good as others, but the fiber is weak. Plenty of sun is necessary. The plants must be fenced against cattle and goats, but sheep do not eat the leaves. Growing from seed is a tedious process, as the young seedlings, being very delicate, require constant care lest they be soon destroyed by grubs.

It is hardly possible to calculate the acreage under phormium in St. Helena. With the exception of about 300 acres planted with suckers in the last two years the plants in the island have existed for the last 30 years. There are probably sufficient mature leaves to supply the government mill, which consumes from 90 to 100 tons monthly, for three or four years, the object being to make this available supply last until the suckers put down last year are fit for reaping. Leaves, under favorable conditions, are ready for reaping four years from the planting of the suckers. In three and one-half years there will be sufficient phormium in St. Helena to supply three mills. A 15-acre drying and bleaching grass field adjoining the mill is necessary. About 35,000 gallons of water, running through the mill, are used daily, as thorough washing, drying and bleaching are essential to obtain good fiber.

FOR MAY AND JUNE WEDDINGS we offer extra select Lily of the Valley, Bride and Bridesmaid Roses, and of course a full line of all seasonable Cut Flowers and Greens. Try us. We have the stock and can take care of all orders.

A GREAT SEASON.

There is promise of plenty of peonies for Decoration day, and the price will be very reasonable. Great numbers of these flowers are disposed of every year at this time, as they make a good showing and are suitable for grave decoration. This will undoubtedly prove to be the greatest spring season in the history of local florists. Every one is busy, and all have one aim, namely, to finish all planting by Decoration day.

NOTES.

Fifth Avenue Floral Co. and Livingston Seed Co. both had very tasty booths at the exhibition at the Auditorium last week. Cut flowers, plants and vases and window boxes combined to make a very pretty display.

Livingston Seed Co. has displayed in the window, a large B. of L. E. monogram of immortelles, in honor of the B. of L. E. convention being held in this city.

CARL.

MANCHESTER, N. H.—Bids for the placing of flowers in the parks and commons of the city have been called for by the street and park commission, contrary to the custom of former years of dividing up the work among the several florists of the city, who had anticipated the same this year. They were surprised, it is said, on receiving the call for bids a few days ago. Several of the florists had gone to the expense and trouble of ordering the plants, expecting they would go right ahead with the work as in former years.

WEATHER HINDERS TRADE.

A week of rain and generally dismal weather has put the cut flower market in a worse condition than ever. The continued dark and wet weather had a bad effect on the quality of stock, sweet peas being particularly hard hit. Bedding out, and consequently the plant trade, has also been seriously interfered with by the excessive rains. Around the markets and plant auction houses there have been good stocks of plants but toward the last of the week selling them was slow work. Considering that there has been practically no sunshine for a week the quantity of stock arriving is large, the weather apparently having had more effect on quality than in cutting down the supply. There are quite a number of peonies coming in but thus far, very few good ones have been seen. Of other outside stocks, the irises, tamarix, deutzias and water lilies are lending variety to the offerings.

May 25.—The dark weather of the past week has had a marked effect on the quality of stock arriving to-day, roses in particular being soft and poor. American Beauty has fallen off in price, lots of 100 or more going at $12 per 100. Sweet peas are very poor in quality and going very slow, and the same is true of peonies.

THE ASSOCIATIONS.

The writer has heretofore refrained from any extended comment on the rumors freely circulating, about associations in the trade. For some time there has been talk of a Growers' Association which is now in existence; a Wholesalers' Protective Association was likewise formed some time ago. The latest rumor is of a Retailers' Association. Anything that by fair means will improve the cut flower situation should be welcomed by all branches of the trade for present conditions are not encouraging; but, if each and every branch of the business is organizing for warfare on its co-ordinate branch, disaster is bound to overtake all. Well managed associations of business men are always in order and proper and the first steps taken by such bodies should be to reform the abuses that exist in their own ranks, then move on the enemy. The stress of hard times has sometimes driven men in all lines of business to do what under better conditions they would never have considered. Let us hope that, throughout this period of depression, worry and turmoil, those most concerned will keep their heads and give serious thought to the causes rather than grow fiercely excited over the effects.

NOTES.

A well known retailer of this city recently called on a Baltimore retailer to fill an order for him in that city of one dozen American Beauty roses. When he received the bill it read: "To one dozen American Beauty roses, $6; to American Beauty ribbon, $3." While some talk has floated around the country about New York grafters, the man who received the above bill does not believe that any of them were ever capable of charging $3 for enough ribbon to tie a bunch of American Beauty roses, and we agree with him.

The Fruit Auction Co., of Franklin and Washington streets, has thus far handled vast quantities of plants at the daily auction sales and has apparently made an unqualified success of its venture in the plant line. The auctions are well attended by representative florists and dealers generally and the company has satisfied its critics that daily sales are needed in the metropolis. From present indications, the sales of foreign bulbs, etc., next autumn will be unprecedented.

Myer, the retailer of Fifty-eighth street and Madison avenue is keeping his large show windows very handsomely decorated. One of his latest is a woodland scene where a rustic summer house has been erected on a hillside thickly studded with evergreens, heather, ferns and wild flowers. At the foot of the hill is a pond where ducklings, turtles and other lovers of the water enjoy themselves.

Geo. Allen, son of J. K. Allen, and Abraham Jacobs, both of whom are salesmen in Mr. Allen's wholesale store, recently acted as best men at the wedding of Samuel Jacobs to Miss Erma Loft. Samuel and Abraham Jacobs are brothers.

The news of the death of Wm. Scott, of Buffalo, came as a shock to many of his friends and acquaintances here. While it was known that he was in poor health the sudden and fatal termination was unexpected.

A. Kakuda, formerly grower for the Hinode Florist Co., Whitestone, L. I., has accepted a position with the Yokohama Nursery Co. as traveling salesman and will make his maiden trip through the south.

A noteworthy feature at H. E. Froment's, in addition to his large regular stock of roses and other greenhouse flowers, is a splendid line of irises.

There will soon be quite an exodus to Newport, and the retailers who also have stores there are making preparations to meet the demands of society.

The New York Cut Flower Co. has posted a notice that after June 1, its day's business will close at 3 p. m.

A. H. Langjahr is handling fine American Beauty roses and is first in the market with water lilies.

A. J. Guttman is getting nicely settled in his large new store in the Volunteer building.

Young & Nugent have a very handsome show window made up of tamarix and iris.

Hartford, Conn.

The regular meeting of the Connecticut Horticultural Society was held in the County building, May 22, President Huss occupying the chair. It was pansy night and the members did well as the display was by far the best ever offered in this locality and the attendance so taxed the capacity of the hall that there was barely standing room. P. Zuger, H. A. Pinney, and C. Peterson were appointed judges and the following awards were made: T. B. Brown, diploma for culture of pansies; J. Gerard and O. F. Gritzmacher, certificate of merit each for collections of pansies; J. T. Huss, A. Reynolds, and E. T. McDermott each received a hearty vote of thanks for their exhibits.

The feature of the evening was a paper read by John Gerard on "The History And Culture of The Pansy," giving the history and origin of the various families, and describing the improvement of this popular spring flower in a most entertaining way. Mr. Gerard is making an enviable record as a pansy specialist and in the course of his remarks gave many cultural hints which were highly appreciated by the members. A magnificent collection of gloxinias was exhibited by J. Chambers, gardener to the Rev. F. Goodwin, which gave every evidence of cultural skill and was awarded a certificate of merit. It was the unanimous opinion of the members present that these were the finest gloxinias ever exhibited by any member of the society. P. Zuger represented the Park Department with a display of Silene pendula, which is used most effectively in the various parks for bedding purposes. A. C.

Buffalo.

LITTLE PLANTING DONE.

Trade the past week has been rather quiet and weather conditions bad, rain falling nearly every day. Outdoor work has been retarded consequently and greenhousemen are not happy, Memorial day coming on and very little planting done so far. The two good days we have had has brought all the people out and they want their veranda boxes filled, lawn vases placed and all their work done in a hurry, so drummers keep away from the greenhouses. Stock in the stores is still plentiful and of fair quality. Outdoor tulips are on sale, but not in quantities, owing to the rainy weather. The first lilacs were brought in on Thursday and were very good. The first week in June gives promise of a very busy time. A number of weddings are scheduled and should keep several of the florists very busy.

A. J. Reichert, Wm. C. Buechi and Collins & Forbach, are rushed now with cemetery work. The number of vases filled by these firms are more than for any other cemetery in the city. The Wm. Scott Co. and D. Newlands & Son and S. A. Anderson have a great many for Forest Lawn, but the number of cemeteries at Pine Hill give the Pine Hill men a monopoly. R. C. Avery at West Seneca is practically alone in that territory and does nearly all the work for Holy Cross cemetery.

The Lenox Flower Shop, the name of J. Roland Cloudsley's new place, opened for business May 23 with a good trade. Roland has fitted up the shop very prettily with several nice mirrors and a good ice box which is an attraction. The conservatory in the rear he expects to have stocked with a fine lot of flowering and decorative plants, such as are called for constantly in a downtown store.

The new office of city forester has been created and under the supervision of the park commissioners there are a number of applications for the position, which will be announced next week. The position is important and we trust a good competent man will get it.

S. S. Skidelsky, of Philadelphia, Pa., was a visitor May 23.

J. F. Cowell was called east May 20.

Botanizing expeditions are the fad here nowadays. The objective point of most of the amateur botanists is Mertensia, a small hamlet on the line of the Auburn road, about seven miles from the city. Here are found in profusion the delicate bluebells, or mertensias, from which flower the village takes its name.

Bluebell Island is situated a half mile northwest of the station, in a most picturesque spot. It is called an island by courtesy, because at its upper end Mud creek separates into two small streams, which encircle that particular four or five acres on which are found myriads of the rare and beautiful blossoms at this, the height of the wildflower season.

Here are wood anemones, trilliums, jacks-in-the-pulpit, and violets in three colors, blue, white and yellow, while ferns of various varieties abound. In short it is a vertiable botanist's paradise, while in the rocks about, geologists find much to interest, and the amateur photographer or the water colorist would be enraptured over the scenery.

CHESWICK, PA.—George McRae, aged 68, died May 15, after a short illness, due to old age. He was born in Scotland and had lived here with his family for the last two years. He leaves a widow and several children.

GOOD SWEET PEAS SCARCE.

The continued wet weather of the past week greatly injured the sweet peas. In many cases, shipments coming in were so badly damaged that they were at once thrown into the waste barrel. As these are quite a staple for the season, many orders had been taken for Saturday sales, for which substitutes had to be sent, as it seemed impossible to get good flowers on that day. The feature of the week was the influx of local peonies which are now here in quantity and are in good demand at from $4 to $6 per 100, with a few imported blooms bringing as high as $1.50 per dozen. American Beauty roses are plentiful and sell well at from $1.50 to $2 per dozen. The commencements are now in season and for several occasions the past week there was quite a demand, American Beauty roses having the preference. Carnations are also very plentiful and it would seem as if there will be enough for all demands for Memorial day. Last season carnations and peonies were at a premium, but it looks now as if peonies will be just at their height for this holiday. All kinds of tea roses are in full supply and the quality is still good. Shrubbery is now to be had in quantity; snowball, weigela and mock orange is coming in by the wagon load and sells very well. The bedding plant men are having a very busy time and believe they will sell out as well as usual, as there is an active demand for all the standard sorts. Geraniums were never finer. The price for 4-inch pot stock is from $7 to $8 per 100. At this writing the hot, sunny weather of the past two days has brought the peonies on with a rush and the commission houses are filling their storage boxes with flowers cut tight and accumulating a stock for the expected holiday demand. Many nice orders were booked on Monday and the outlook is favorable for a good trade.

NOTES.

R. G. Palmer of Doylestown was buried May 23. Deceased carried on business in Doylestown for a number of years, selling his product in the wholesale market of this city of which market he was the first treasurer. Some three years ago he sold his business and engaged with E. Bernheimer of this city, as a salesman, which position he resigned on account of his illness. Mr. Palmer was of a kindly disposition and was popular with the trade. He leaves a wife and three children.

John Shellem has a fine strain of Queen Alexandria daisy. A plant flowering a couple of years ago showed marked superiority over all others in the lot and the plants worked up from this appear to carry twice as many flowers as the original stock. The flowers are also very white and much more double. His peony field being protected on all sides, appears to come in about a week before the other local growers and he has been cutting since May 13, the height of the crop being now on.

The Leo Niessen Co. is expecting and has prepared for a large demand. This firm will handle peonies in 1,000 lots or more and thinks it will be able to supply these as well as all the other staples in quantities.

Wm. McKissick is strong on peonies, American Beauty roses, carnations and sweet peas. Decoration day business from out-of-town customers is coming in nicely. He is fully equipped for a large business.

John McIntyre has added an extra wagon, so as to handle the large shipments of peonies sent him daily from the Thorn Hedge Nurseries. They are of exceptional quality. K.

Boston.

PREPARING FOR MEMORIAL DAY.

The greater part of the past week has been devoted to preparing Memorial day requisites. Very little activity other than in this line of work is noticed. Market conditions insure successful results for shopkeepers provided we have anything like an ordinary season's trade. The usual stock is available in vast quantities and selling at customary prices. Coupled with this considerable outdoor stock is being received, all of which can be used to excellent advantage. Roses have suddenly shortened up except a lot of third-class stock which doesn't even appeal to the street vendors, and goes to the waste pile. Killarney and Richmond alone control the demand and both have advanced sharply in price. A shortage in these two specialties will no doubt be found, but this appears the one singularity of a singular season. An excellent crop of Fair Maid carnations is being cut by the local growers and though far superior to the greater part of the season's best are ridiculously cheap. The superiority of this carnation as a summer product is well known and has never been so well emphasized as now. Few other varieties have any value. White carnations, which are used in great quantities, are plentiful and cheaper than usual. A limited number of Lilium longiflorum and callas are displayed and maintain their standard prices. Gillyflower, feverfew and candytuft, considered indispensable for the requirements of the day, are found on every side and selling for prices which allow of but meager profit even for the growers.

NOTES.

Sydney Hoffman has added to the attractions of his store a handsome easel with an accompanying list of steamers sailing from this port and New York. The amount of flowers delivered to these traveling palaces is astounding and a bulletin of this sort is a decorative necessity with numerous practical advantages.

L. E. Small of Tewksbury is sending to market a distinctive strain of Fair Maid carnations with which variety he has long been identified. He is also distributing an excellent and easily marketable stock of cornflowers.

W. H. Elliott is assuming his position rapidly as the leading grower of Kaiserin in New England and is sending to market a fine assortment of this superb rose, as near perfection as it is possible to conceive.

John McFarland has anticipated the needs of the June market for lily of the valley and is thoroughly prepared for all demands with a magnificent crop. B.

READING, PA.—Irvin H. Anderson has taken charge of the old Brookside greenhouses and is remodeling the place.

GRAFTON, MASS.—Wallace A. Heskey, South street, has been awarded the contract to put Smith P. Burton's lawn and flower garden in good condition.

Rochester, N. Y., Park Notes.

The attendance at Highland Park, Rochester, N. Y., May 24, was estimated at from 20,000 to 30,000. The great drawing card, leaving the beautiful weather out of consideration, was the display of lilacs, which are at the height of their glory. The Highland Park lilac collection has achieved international recognition, and it can be truthfully said that the different individual specimens that comprise the large collection were never before so abundantly loaded down with their handsome floral clusters.

It was in the spring of 1892, that the park board purchased the nucleus of lilac varieties, with many other plants, for the general collections in Highland Park. The number of species and varieties in the collection is about 193, including a few that are now in the park nurseries. Nearly all the new varieties of lilacs are produced in Europe. A few have been raised in England and Germany, but the great majority of the most distinct and beautiful kinds have originated in France. The Lemoines, of Orleans, well known French nurserymen and hybridists, have raised and disseminated all of the handsome variously colored double flowering lilacs that many people are rapturous over. The park board, annually or every other year purchases from this firm what it has to offer in new kinds.

It should be said, however, that what is undoubtedly the second best single white flowering lilac, Princess Alexandra, was raised by a Canadian nurseryman, and the stock was obtained from this source by Ellwanger & Barry many years since. White flowering lilacs are extremely beautiful and are perhaps next to the red, or purple red, the most popular. Madame Legraye is considered by connoisseurs to be the best single white flowering lilac. The large petaled flowers are snowy white and the clusters are more lax than in Princess Alexandra. Madam Moser is a very free flowering single white form, with loose, abundant clusters.

Among double white flowering lilacs, Madame Lemoine is perhaps the most showy, but there are others that are close rivals. Miss Ellen Wilmott, a new variety, promises to be a fine form. Rabelais, Dame Blanche and Madame Casimir Perier are all beautiful. In the dark single flowering shades of lilacs, that is, from red to purple, and violet red, there are a number of beautiful forms. Ludwig Spath has long held sway as the best dark flowering variety, but there are others equally good. Congo has remarkably deep purple red flowers. Among new ones are Pasteur, Uncle Tom, Negro and Toussaint L'Overture, which are all fine forms. Two old varieties still hold their own, Aline Mocquery and President Massart.

There is a shade in lilacs which is somewhat hard to define, but it may be described as varying from rosy to silvery and creamy pink, and it is a fine expres-

sion of delicate and refined colorings. Schermerhorni has creamy pink single flowers and is an old variety purchased from a Long Island nursery many years since. Perhaps the most distinct and beautiful in this range of colors is Lilarosa. Among other single flowering forms are Dr. Regel, Amoena. Furst Lichteinstein and Melide Laurent.

In a class near to the former range of colors, from rosy lilac to pink, are a number of beautiful double varieties. Count de Kerchove, is a handsome form, with a grayish pink effect. Emile Lemoine has the flowers very much imbricated and a delicate flesh rose color. Guizot and Madame Jules Finger are each distinctive. Among lavender and bluish shades there are a great many double flowering varieties. Monument Carnot has lavender bluish flowers with large clusters. President Grevy, Alphonse Lavalle and Michael Buckner are three old varieties that are still in the front. Marc Micheli and Doyen Keteleer have light bluish tints. There are however an immense number of varieties approaching these shades in the collection with slight, but distinct variations. In the single blue flowering lilacs, Colmariensis and Coerulea Superba are old varieties, and still two of the most distinct of this section.

Madison, N. J.

The May meeting of the Morris County Gardeners and Florists' Society was devoted to flowering shrubs, and three large groups of flowers arranged for effect gladdened our eyes. A. Herrington, Wm. Duckham and E. Reagan were the exhibitors; each variety was in a separate vase and the effect was most pleasing. F. & F. Nurseries, Springfield, had hardy azaleas in pots to help us out and John Downing, gardener to Dr. McAlpin of Morris Plains, had Regonia Gloire de Lorraine which had been five months in continuous bloom, in fine condition, just to show its keeping qualities. Arthur Herrington read a paper on "Flowering Shrubs" which was very entertaining and instructive. The next meeting will be the last one before our annual vacation. Frank Eskesen will read a paper on fern decoration, which will be illustrated by filled fern-dishes brought by him and other members. There will be also a display of hardy herbaceous flowers. The schedule for the fall show of October 29, 30 is nearly ready and we expect to put the finishing touches on this week. Three new members were elected. All are expected to work for the success of the show from now on. E. R.

SALISBURY, VT.—Chas. Bingham has purchased Geo. Sheldon's greenhouse and will soon move it to his father's farm.

Providence.

CARNATIONS SCARCE.

The only stock that will be short of the demand for Memorial day is carnations and these will probably sell for $2 to $4 per 100, with a prevailing retail price of 50 or 60 cents per dozen. Roses will be abundant at regular prices or only a slight advance, and will include all colors and such varieties as Bride, Bridesmaid, Killarney, Carnot, and Richmond at $2 to $6 per 100 for very good blooms acceptable for bouquet work. Lilacs will be past and there will be little outside stock. Everything bids fair for a profitable day's business.

NOTES.

T. F. Keller of 188 Mathewson street is opening new quarters further down on the same street in the vicinity of the scenic temple, and will abandon his old stand in the near future. The question of rent is a consideration, as his new place will save him one-half operating expenses, and, being a very compact store, will enable him to preserve a neat and natty appearance. He should do well.

A new retail florist (Young), has opened a store in the old Rice & Hayward block on upper Broad street and is making a bid for lawn work. He also intends doing a regular cut flower business. As there is no immediate competition, he is likely to hold forth and become established. M. N.

TOLEDO, O.—Park Superintendent Moore imagined he was the victim of a would-be joker when a man visited him at the City hall and gave him a half a dollar for a Christmas tree. He said he stole it from a local park nine years ago and explained that he was out of work and had little with which to cheer his two children. He thought a Christmas tree would help make them glad, but had no money to buy one, so he stole one from Ottawa park. Superintendent Moore would not take the money at first, but the visitor said he could now afford it and wanted to leave the place with a clearer conscience. It was then turned over to the city treasury and added to the park fund.

Louisville.

A BAD WEEK.

Business conditions the past week in the cut flower line were the poorest experienced in many a day. The quantities of stock thrown away were enormous. Better things are looked for this week. Roses were simply a glut on the market, and could not be moved at any price. The quality was very high. Carnations of good quality were also too plentiful, and found but little demand. Peonies of good quality find a fair demand and are in good supply. Sweet peas are in good supply and find a satisfactory demand. Irises are plentiful but do not find much demand. Green goods are plentiful with the exception of smilax. The planting season is nearly over much to the satisfaction of the growers.

The regular monthly meeting of the Kentucky Society of Florists will be held June 2 at 8 p. m., at Fred L. Schulz's store, and a good attendance is looked for. Members are requested to report what they have done for the coming show. There will be a lot of other business of importance.

F. L. S.

WILMINGTON, DEL.—The Peninsula Horticultural Society will meet in this city on January 12-15 of next year. The house and social committee of the board of trade will arrange the place of meeting.

PADUCAH, KY.—L. P. Branton, florist at the Union station is busy planting flowers in the depot park. The work was delayed this spring on account of the weather. Mr. Branton says he will have the prettiest park that he has ever had. The local station has received the prize several seasons for having the most attractive park.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

MOVE the surpluses now.

THE pea crop outlook is said to be excellent for this time of the season.

LODI, CAL.—Recent light rains and moderate weather are favorable to the seed crops.

HOLLAND BULBS are looking well, but it is too early to make any prediction with regard to the crop.

VISITED DETROIT: R. J. Irwin, of H. H. Berger & Co., New York; Guy W. Reburn, representing Vaughan's Seed Store, Chicago.

IT would be interesting to learn how many onion sets have been carried over at leading central market points from Ohio to the Missouri river.

WE understand the Brown Bag Filling Machine Co., Fitchburg, Mass., was the lowest bidder and was awarded the contract for packeting, assembling, franking and mailing seeds under the congressional free seed distribution.

LAWRENCE S. PAYN, representing Andre Leroy & Co., Angers, France, is making his annual tour of the American trade. All correspondence addressed to him care of F. B. Vandegrift & Co., 15 Whitehall street, New York, will receive prompt attention.

CHICAGO.—A. H. Goodwin, of the W. W. Barnard Co., is at Asheville, N. C., with Mrs. Goodwin.—Hand picked medium beans were $2.65 here May 27.—Grass seed contract prices on the board of trade May 26 were noted as follows: Prime Timothy, $4.25 (nominal); choice white clover, $15.—Visitor: J. E. Killen, representing Wm. Rennie & Co., Toronto, Ont.

LEADING onion set and onion seed growers say that the acreages planted to those crops in and around Chicago are about the same as last year. The rainy weather of the past fortnight has had the effect of delaying badly the work in the field. According to L. A. Budlong few pickling onions are now grown in this vicinity, the crop probably not reaching 10,000 bushels.

KEOKUK, IA.—Articles of incorporation have been filed by the Gate City Seed Co., a company with $30,000 capital stock in shares of $100 each. The officers are A. M. Davidson, president; W. D. Burt, vice president and H. E. McCoy, secretary and treasurer; these officers also being the directors. The object of the corporation is to be the buying, selling, raising, etc., of seeds and the company's place of business is to be in this city.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

FRENCH BULB crop reports to hand show that Narcissus Paper White Grandiflora will not be in oversupply. The prospects for white Roman hyacinths are good, and while the price is now 70 francs, there are indications that it will decline.

THE seedsmen's hearing on the proposed seed bill, H. R. 13835, before the committee on interstate and foreign commerce, Washington, D. C., April 21, has been printed in full and those interested may secure copies by addressing their congressman. The report makes interesting reading. We printed summaries of the views expressed at the hearing in the seed trade department of our issues of May 9 and 16.

PHILADELPHIA, PA.—Though in the mind of the average interested person the seed season is drawing to a close, there seems to be no close in sight at H. F. Michell's. The impression gained by the average visitor, who drops in about once a month, is that they get busier all the time. If not selling seeds every minute, it is a new lawn mower, garden hose, or some of that great variety of farm and garden implements for which the firm has long been noted. It is safe to state that anything in the line of garden tools not carried by the Michell Co., has not yet been invented.—Herbert Johnson, of the Johnson Seed Co., reports a very satisfactory season and he considers the outlook promising, all of which is borne out by the present appearance of business about the store.

NEW YORK.—The rush of spring business in seeds seems to be about over, but there is still a lively movement in vegetable plants which is bound to continue for at least another week as much land in this vicinity is so wet as to be unfit for planting.—H. Suzuki, managing director of the Yokahama Nursery Co., has returned from a five weeks trip to Europe, much pleased with the business outlook for the interests which he represents. He will leave for his home in Japan, going by Seattle, about June 1.—At Vaughan's Barclay street store C. W. Scott, long time western traveler for the company, has been supervising store and trade correspondence for the past few weeks.—Henry Nungesser returned from Europe last week, this being his forty-fifth voyage. As Mr. Nungesser is not very old he may yet make it 100.—Visitor: J. K. M. L. Farquhar, Boston, Mass.

Nebraska Seed Crops.

The Western Seed & Irrigation Co. reports that it has been favored with a larger share of contract orders this season than for a number of years, the orders running considerably larger, especially for flint and field corn varieties. Owing to the high price of all farm products it has been a difficult matter to get out the increased acreage, but the firm has covered all requirements fairly well on nearly all varieties on the basis of fair average crops. Growers have demanded greatly increased prices. Owing to the large orders for many varieties and the scarcity of good stock seed, this firm does not look for any large surplus crops of sweet or flint corn this season, and believes the prices on these will again rule high next fall. There have been some light scattered showers through eastern and central Nebraska, but nothing like a normal amount of moisture. The past week or 10 days have been more favorable for planting and the growers have finished planting corn in many cases. Nearly all report the corn sprouting and in some cases through the ground. With continued favorable conditions it is believed a good stand will result. Vine seeds will not be planted until the last two weeks in May, with the exception of cucumber, which will be planted from the first to the middle of June.

J. C. Robinson reports as follows: "Very few of our vine seed crops are planted, but corn is pretty well in the ground now. The weather has been unusually fine for securing a good stand of corn and farmers report an almost perfect stand where the corn is up and that planted later sprouting in fine shape. The acreage on contract corn is going to be light. This applies to both flint and sweet varieties. There will be no excess grown this year. Squash and muskmelons are now (May 20) being planted, but none are out of the ground as yet."

C. H. Coy writes: "Vine crops are nearly all planted and have gone into the ground under favorable conditions. Corn is nearly all planted and there is promise of a good stand."

American Seed Trade Association.

Secretary Kendel has issued the following circular to members of the association:

"The topics that will be discussed at the convention at Detroit, Mich., June 23-25, are of interest to all seedsmen. There will be interesting reports from committees in regard to seed legislation, both State and National.

"Thousands of people annually pass through Detroit that do not know they have the right to a 10 days' stopover on their tickets without extra charge. This applies to all tickets to or from any point in the United States or Canada, provided same is within the final limit of said ticket. Passengers desiring this privilege will make application for same to conductor or train auditor, and latter will endorse coupon 'Off at Detroit,' date and sign same, and advise passenger that immediately upon arrival at Detroit the ticket must be deposited with ticket agent at the depot arrived at. The latter will furnish a receipt for ticket.

"There will probably be very low rates offered to the convention of the National Education Association at Cleveland, O., so if any members wish to attend the latter they can use the above stopover privileges to good advantage.

"The management of the Hotel Ponchartrain promise to make us comfortable and would like to hear in advance from as many as intend to engage rooms.

"The rates offered are $2 each for two in a room or $2.50 single, and upwards, without meals. Other hotels are near and eating houses numerous."

The programme as now arranged is as follows: "Theoretical and Practical Seed Breeding," by Dr. W. W. Tracy, Washington, D. C.; "Farm Practice Investigations in Clover Seed Production," by C. B. Smith, Washington, D. C.; "The Use of Forage Plants as Soil Improvers in the South," by Henry W. Wood, Richmond, Va.; "The Use of Forage Plants as Soil Improvers in the North," by J. E. Northrup, Minneapolis, Minn.; "What Effect Does a Commercial Depression Have on the Garden Seed Business," by E. C. Dungan, Philadelphia, Pa.; "Practical Education in Horticulture," by Dr. A. C. True, Washington, D. C.; "The Effect of Low Prices on the Production of High-Grade Stocks," by C. N. Keeney, Le Roy, N. Y.; "Fire Insurance," by Albert McCullough, Cincinnati, O.; Disclaimer discussion led by Leonard H. Vaughan, Chicago, and S. F. Willard, Wethersfield, Conn.; "The American Trade Mark Law and its Importance to Seed Growers and Merchants," by Edward T. Fenwick, Washington, D. C.

The officers of the association are Geo. S. Green, Chicago, president; Marshall H. Duryea, New York, first vice-president; F. W. Bolgiano, Washington, D. C., second vice-president; C. E. Kendel, Cleveland, O., secretary-treasurer; Leonard H. Vaughan, Chicago, assistant secretary.

French Seed Crops.

May 5.—March and April were still cold and nasty here, and one fact worth notice was the heavy fall of snow which occurred on April 25 last. For two hours running it came down fast and heavily, so that the ground was covered a few inches thick during a part of the daytime. Old people say they do not remember having seen such a late fall of snow in their whole lives. Then the thermometer, according to a correspondent of the Horticultural Advertiser, came down as low as three or four degrees below zero (centigrade) during a few nights, so that we felt very anxious about our young plants, and also about cabbages, turnips, swedes, etc., just shooting to seed.

Happily the frosts did not last long enough to do much harm, and we are now enjoying splendid weather; sunshine and now and then a little shower are pushing everything forward, and it is marvelous to see how all plants and trees are growing so speedily. Within a week or so we shall be able to set in our lettuces for seeds; plants are generally looking well. Radishes also will soon be transplanted. A short time ago we have been planting our beets, mangels and carrots, under pretty good conditions; the worst is that plants generally were very scarce and tiny, and therefore acreages planted are much smaller than usual. Of beets specially

French Seed Crops.

CONTINUED FROM PAGE 949.

there is a very big shortage, and even if the crop were to turn out a splendid one, we should still be far short of the quantities we want here every year; and as nearly all stocks have been cleared out last season, no doubt high prices must be expected for next.

Mangels, yellow and white varieties, have been largely planted again this year, but one fact must be noticed, that is, the scarcity of long red Mammoth mangel. Owing to its selling very slowly these past years, most growers had left off growing this variety. But last autumn the demand for it was so big that all stocks were soon cleared out at a good paying price. As there were but very few plants indeed to set in for 1908 crop, no doubt this good old variety will fetch a good price again next season. Yellow varieties do not seem to have moved much in price. White varieties were a big crop last season, and prices dropped very much. However, some large houses bought heavily at the end of the season, and there is not much left over now. But plantations are very large again, and therefore there will not be much chance for an advance in price, unless crop turns out bad.

Carrot plantations are not very large, a good many plants having been destroyed by bad weather, worms, etc., during last winter. Then most of them were very tiny and delicate indeed, owing to their having been sown very late last autumn. Small crop is expected.

Onions have been largely set again this Spring for 1908 crop, and should everything turn out well, a big crop may be expected. Leeks are doing pretty well for the present, although the plants we set in for seeds were very small. Parsnip not much planted; a short crop is expected. Parsley is doing well; winter radishes also.

Cabbages, swedes, and turnips, as stated in my last report, will be a very poor crop indeed; plantations were very reduced, and the late frosts no doubt badly affected the plants, which were just shooting.

The season is now over for clover; the price which this article reached last season is most surprising. We do not remember such big quotations for clover, nor such a small quantity on the market.

Imports.

During the week ending May 23 imports were received at New York as follows:

TO THE TRADE

HENRY METTE QUEDLINBURG, GERMANY.

GROWER and EXPORTER on the VERY LARGEST SCALE of all CHOICE VEGETABLE, FLOWER and FARM SEEDS. (Established 1787.)

Specialties: **Beans**, Beets, Cabbages, **Carrots**, Kohl Rabi, Leek, Lettuces, **Onions**, **Peas**, **Radishes**, Spinach, Turnips, Swedes, **Asters**, Balsams, Begonias, Carnations, Cinerarias, Gloxinias, Larkspurs, Nasturtiums, **Pansies**, Petunias, Phloxes, Primulas, Scabious, **Stocks**, Verbenas, Zinnias, etc. Catalogue free on application.

HENRY METTE'S TRIUMPH OF THE GIANT PANSIES, mixed), the most perfect and most beautiful in the world, $5.00 per oz.; $1.50 per ¼ oz.; 75c per 1-16 oz. Postage paid. Cash with order.

All seeds offered are grown under my personal supervision on my own grounds of more than 3,000 acres, and are warranted true to name, of strongest growth, finest stocks and best quality.

I ALSO GROW LARGELY SEEDS ON CONTRACT.

List of my novelties in flower seeds for 1908 sent on application.

Vegetable Plants.

	Per 100	1000
Cabbage, Wakefield L. I. Second Early, Early Flat Dutch, Early Summer, Winningstadt, and other later varieties, $1.00 per 1000; $8.50 per 10,000.		
Beet, Eclipse, Crosby's and Egyptian	$ .25	$1.25
Lettuce, Boston Market, Tennis Ball, Big Boston and Grand Rapids	.20	1.00
Celery, White Plume and G. S. Blanching	.20	1.00

Cash with order.

R. VINCENT, Jr. & SONS CO.,
WHITE MARSH, MD.

FLORISTS have a splendid opportunity of raising **Mushrooms** by utilizing the **waste space** under the benches, and then utilizing the **waste material** of expended mushroom beds in growing flowers. **Lambert's Pure Culture MUSHROOM SPAWN**, the best spawn in the market, is sold by all leading seedsmen. A fresh sample brick, enough for a trial bed, together with illustrated book on "Mushroom Culture," will be mailed postpaid upon receipt of **40c** in postage stamps. Address **American Spawn Company, St. Paul, Minn.**

MUSHROOM CULTURE

The Most Profitable Outdoor Industry Known.

If you want a really successful crop of

MUSHROOMS

USE ONLY

Johnson's Improved

MUSHROOM SPAWN

Which Is Scientifically Inoculated with Virgin Spawn.

JOHNSON'S, LTD., are thechief makers of Mushroom Spawn and growers of Mushrooms in England, and they recommend this season's improved spawn as being in better condition than ever.

Correspondence invited for OVERSEA ORDERS. Prices and particulars on application.

NOTE THE ADDRESS:

JOHNSON'S, LTD.,
44 Bedford Row, London W. C., Eng.

J. Roehrs & Co.; 40 tubs laurel trees, 18 bls. plants, nine cases plants.

McHutchison & Co.; 32 tubs laurel trees.

Vaughan's Seed Store; 17 cases plants.

Brown & Bros. Co., two bags croton seed.

J. M. Thorburn & Co.; 20 bgs. alfalfa seed, 21 bgs. grass seed, five pkgs. grass seed.

R. F. Lang; one case plants.

To others, 90 cases plants, 620 tubs laurel trees, nine cases lily bulbs, six cases orchid plants, 420 bags seed, 1113 bags clover seed, 443 bags sunflower seed, 100 bags poppy seed, 30 pkgs. seed.

Half Million Calla Bulbs.

Calla Bulbs pay to bloom 40 per cent better than Harrisii. Why you don't have to throw Calla Bulbs away after blooming. (Savvy?)

CALLA ETHIOPICA BULBS.

8 to 10 inch circumference ..... $80.00 per 1000
7 to 8 " " ..... 65.00 " "
5 to 7 " " ..... 40.00 " "
3 to 5 " " ..... 25.00 " "

250 at 1000 rates. Packed in slatted crates. Liberal count. **Safe arrival guaranteed.** I prepay freight at above prices to your city when check is sent with order. Send in your order to-day and cash to reach me June 20th. References: First National and People's Bank, Santa Cruz, Calif., and Dunn's.

A. MITTING, 17 to 23 Kennan St., SANTA CRUZ, CALIF.

MARKET GARDENS.

Protection of Cabbage Seed-Beds.

The following is a summary of Bulletin 301 published by the New York Agricultural Experiment Station by W. J. Schoene:

"This bulletin deals with experiments to test the value of cheesecloth screening for the protection of cabbage seed-beds against injuries by root-maggots.

"Two species attack the underground parts of seedlings, the cabbage-maggot (Pegomaya brassicae Bouché) and the seed-corn maggot (Pegomya fusciceps Zett.). These insects are very destructive to young plants, and are pests which have been very difficult to combat succesfully in seed-beds.

"In the experiments, four large beds were made, the seed being sown respectively on April 29, May 13, May 17 and May 28. Screening was applied to 21 rows of 150 feet in length of the planting of May 13. The remainder of the bed, consisting of 68 rows of equal length, was considered as a check.

"Plants raised under cloth grew faster and reached the desired size for transplanting one week before the seedlings in the check area. The screened sets were seasoned by the removal of the covering 13 days before the time of replanting, and showed no more wilting when transplanted than did the check seedlings.

"The screened bed was entirely free of maggots, and produced 50,000 sets, which were replanted. The check bed, of more than three times the size, yielded only 30,000 desirable plants. The cabbage-maggots were generally very destructive to unprotected seedlings.

"The planting of April 29 was practically destroyed by fleabeetles and maggots. The beds sown on May 17 and 28, owing to the lateness of the season and injuries by maggots, did not produce any plants of the desired size.

"The experiments show that screening entirely protects seedlings from injuries by maggots, and indicate that it is possible to season the plants, by removal of the covering a few days before transplanting, so as to avoid the excessive wilting and losses, which sometimes attend the planting in the field of sets grown in covered frames."

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points May 23, were as follows: New York, cucumbers, No. 1, $2.50 to $4 per box; No. 2, $1.25 to $2 per box; mushrooms, 10 cents to 50 cents per pound. Chicago, mushrooms 35 cents to 65 cents per pound; cucumbers, 40 cents to 60 cents per dozen. Philadelphia, cucumbers, 75 cents to $1.25 per dozen. Cincinnati, cucumbers, 40 to 50 cents per dozen.

THIS IS FISCHER'S GRAND FREESIA PURITY.

The finest Freesia ever offered to the trade and the only one worth growing. The flower heads are of very large size, as can be seen by the cut, and are of glistening whiteness and of thick, heavy substance, making its keeping quality superior to all others. The stems, always stiff, can be grown two feet and over, making this magnificent Freesia one of the finest decorative flowers; it can be used entirely alone in that respect or with other long-stemmed flowers. The greatest care is taken by us to keep this beautiful Freesia pure and free from all danger of mixing by carefully picking off all seed pods, not allowing one to ripen and drop its seed in the ground, where it will surely grow the next season and work disaster, as it does not come true from seed. So beware of buying stock that has been increased from seed. You will always find **Purity** here in all its purity.

Send your orders early, for last year the orders far exceeded the supply. This year we hope to fill all orders and offer first and second grade bulbs for sale.

Send for Price List. Delivery in early July. **RUDOLPH FISCHER, Santa Anita, Calif.**

Surplus Cannas.

	Per 100	1000
King Humbert	$4.00	$35.00
Allemania, David Harum, Giant Crimson, California (orange), Evolution (yellow), Duke of Marlborough	2.50	20.00

THE CONARD & JONES CO., West Grove, Pa.

DAHLIAS.

Now is the time to place your order for Bulbs which will insure you getting named varieties in any quantity; delivery to be made this fall or early spring.

DAVID HERBERT & SON,
Successor to L. K. Peacock, Inc. **ATCO, N.**

The Nursery Trade

American Association of Nurserymen

J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C. Seager, Rochester, N. Y., Sec'y. Thirty-third annual convention to be held Milwaukee, Wis., June 10-12, 1908.

THE Mississippi Valley Apple Growers' Association favors the apple blossom for the national flower.

THE Rosemore Nurseries of Litchfield, Conn., is enlarging its plant and building two new greenhouses this spring.

GLEN ST. MARY, FLA.—The Glen St. Mary Nurseries are preparing to build a large packing house this summer, 70 by 116 feet.

RICHMOND, VA.—T. W. Wood & Son have purchased of T. D. Coghill and S. B. Borkey, 40 acres of land, near Milford, in Carolina county, for a large seed farm for supplying seed for their establishment.

PARK COMMISSIONER SCANLAN'S St. Louis park report of 1907 contains a series of fine views showing the wonderful transformations that have taken place in the World's Fair site in the past six years.

THE Rural New Yorker is advising its readers to deal with reputable established nursery firms and have nothing to do with the "contracting" firms who are at the old game of selling trees and promising big prices for the first year's crops.

MAGNOLIA DAY, usually falling on a fine Sunday about the middle of May, is a Rochester, N. Y., institution, celebrated with a fashionable parade through Oxford street, where fine specimens of Magnolia conspicua and M. obovata are quite numerous.

PONTIAC, ILL.—Professor Graham, president of the State Horticultural Society, says there will be no cherries worth mentioning in this part of the state. Pears are also a practical failure and plums not up to the average. Peaches and apples promise well.

MERIDEN, CONN.—John Nolen, landscape artist, has been called to Madison, Wis., in an advisory capacity for the state, city and university interests. The Boston Herald says "Wisconsin is doing many things as a state which the east needs to know about."

CHASE, ALA.—Plans have been drawn for a union station for the N. C. & St L. and the Southern railroads. The new station is a result of the increased business of the Chase Nursery Co. The building will contain two waiting rooms and a large storage room, in which the Chase Nursery Co. will have a private office. The work of construction has already been begun and the building will be completed in a few weeks.

ROSALIA, WASH.—The Rosalia Nurseries are being doubled in area, with a proportionate increase in the number of fruit and ornamental trees. These nurseries were started as an experiment two years ago. The owner has made arrangements to again double the acreage next season, and will make a specialty of a new pear originated near Rosalia by Charles Astmus and named The Astmus. Special attention will be given the cultivation of fine varieties of cherries.

WENHAM, MASS.—Connolly Bros. have under construction upon the estate of John A. Burnham a rose garden which includes considerable landscape work and the building of walks, pool, etc. The garden was planned by Miss Foote of Marblehead.

PANSIES of different varieties used as carpeting to bulbous plants have rather a bizarre appearance but one variety, of a color that blends well with the daffodils, tulips or whatever other bulb stock is used, has an excellent effect. Some of the slate blue varieties, for instance, under single yellow daffodils, are excellent.

"PLANS OF LAWNS AND GARDENS" is a neat little book sent out by the Wagner Park Conservatories, Sidney, O. It consists of a large number of detailed plans for the planting of home and other grounds and is a good companion to the firm's "Landscape Gardening for Amateurs." Key numbers are given to the specifications and practical instructions on how to plant, and also on how to apply the plans to individual grounds, while on the plans themselves are numbers, keyed to show the most suitable subjects for planting in the various positions. It is an excellent work, carefully prepared.

President J. W. Hill.
American Association of Nurserymen.

MILTON, ORE.—To be able to better handle the growing business of the Milton nurseries, A. Miller & Son have incorporated with a capital stock of $50,000, taking into the new business A. Miller, the original proprietor, S. A. Miller, G. W. Miller and C. B. Miller. The active management will be unchanged, A. Miller retaining the position of business manager of the corporation. The company will add 40 acres of land to that already used by the nurseries, making 150 acres in trees. Two centrifugal pumps, with capacity of 400 gallons per minute each, will be installed to furnish water for irrigating the entire tract used. The land lies along the Tumalum river, about one mile from this place, and every acre can be readily irrigated. The flood in March did considerable damage to young trees and an effort will now be made to prevent any recurrence of such a disaster.

President J. W. Hill.

J. W. Hill, who was elected president of the American Association of Nurserymen at the Detroit convention last year, is 49 years of age, having been born in the south and reared on a plantation there. In 1884 he removed to Des Moines, Ia., and became identified with the Des Moines Nursery Co., of which corporation he has been president for six years.

Mr. Hill is a busy man as, besides his interest in the nursery business, he is engaged in grain, telephone, canning and banking enterprises. Besides these he is president of the Iowa State Traveling Men's Association, and is identified with most other kindred affairs in the city.

In civic affairs Mr. Hill has long taken a great interest and he is now very prominent. He is at the head of a committee of 300 business men who are endeavoring to secure an improved form of city government to be known as the "Des Moines plan." This has been framed along similar lines to the "Galveston plan" or government by commission. Mr. Hill has been a member of the American Association of Nurserymen for many years and two years ago held the office of vice-president. Doubtless the association chose their president wisely, and the members are to be congratulated upon having secured so capable a man and one of such extended business and practical experience for their president.

American Association of Nurserymen.

The programme of the thirty-third annual meeting of the American Association of Nurserymen, to be held at the Plankinton House, Milwaukee, Wis., June 10-12, is as follows:

WEDNESDAY, JUNE 10, 9:30 A. M.

Calling to order, President J. W. Hill, Des Moines, Iowa.

Address of welcome, Mayor D. S. Rose, Milwaukee, Wis.

Response, Geo. S. Josselyn, Fredonia, N. Y.

President's Annual Address, J. W. Hill, Des Moines, Iowa.

Announcement of arrangements for selection of state vice-presidents and for meeting of vice-presidents.

Reports of secretary and treasurer.

Reports of standing committees; Transportation, F. H. Stannard, Ottawa Kans.; Tariff, Irving Rouse, Rochester, N. Y.; Legislation, Wm. Pitkin, Rochester, N. Y.; National Inspection Law, Orlando Harrison, Berlin, Md.; Publicity, J. M. Irvine, St. Joseph, Mo.; Exhibits, Thos. B. Meehan, Dreshertown, Pa.; Editing Report, J. H. McFarland, Harrisburg, Pa.; Mutual Fire Insurance, Peter Youngers, Geneva, Neb.; Entomology, C. L. Watrous, De Moines, Ia.

THURSDAY, JUNE 11, 9 A. M.

Roll call of states; naming vice-presidents; report of vice-presidents.

Election of officers; selection of next place of meeting.

Paper: "How Can the Nurseryman Best Assist in the Civic Improvement Movement?" J. Horace McFarland, Harrisburg, Pa.

Paper: "Is it Good Policy on the Part of the Nurserymen to Send out Cheap Lists at the End of the Season?" J. M. Pitkin, Newark, N. Y.

Paper: "A few points on Improvements," Judge Eugene Stark, Louisiana, Mo.

Paper (Subject not yet announced), Prof. L. R. Taft, East Lansing, Mich.

Paper: "Semi-Tropical Thoughts for Nurserymen," H. H. Hume, Glen St. Mary, Fla.

FRIDAY, JUNE 12, 9 A. M.

Paper: "The Great Southwest," J. S. Kerr, Sherman, Tex.

BOXWOOD.

BOXWOOD.

The plants imported this season are the handsomest ever brought to this country. Prospective purchasers will do well to visit our nurseries and inspect the stock before buying.

Standard Boxwood. 3 ft. diameter, fine specimens, $7.50 each. 2½-ft. diameter, fine specimens, $4.50 each; 2-ft. diameter, fine specimens, $3 each; 18 to 20-in. diameter, fine specimens, $2; 15 to 18-in. diameter, fine specimens, $1.50. Buxus, round shape (perfectly round), 2-ft., $2.50; for hedging, 8-in., $25, $30 and $35 per 1,000; for hedging, 10-in., variegated, $30 per 1,000.

Globe Boxwood. Fine specimens from $2, $3, $4, $5, $10 to $15 each.

Pyramid Boxwood. 5 ft., $4 each; 4 ft., $3.50 each; 3½ ft., $2.50 each; 3 ft., $2 each; 2½ ft., $1.50 each; 2 ft., $1 each; 18 to 24 in., 75 cts. each; 15 to 18 in., 50 cts. each. Pyramids, 5 to 6 ft. high, nicely shaped, per pair, $10 to $15. Special prices on larger sizes.

Bush Boxwood. These are all handsome bushy specimens, adapted for hedges.

	Each	doz.
10 to 12 in.	$0.25	$2.50
12 to 16 in.	.35	3.50
16 to 20 in.	.50	5.00
20 to 24 in.	.75	8.50
24 to 28 in.	1.25	12.00
28 to 36 in.	2.50	25.00
36 to 42 in.	3.50	36.00
42 to 48 in.	4.50	48.00

Clipped Boxwood. We have a fine collection in a variety of forms. Shall be pleased to have prospective buyers call and inspect the stock. Prices on application.

BAY TREES.

Our collection of Bay Trees consists of all sizes, in standard, pyramid, column and other forms. We have upwards of 2,000 trees, from which to select any stock you may desire. Special prices given. Write for prices.

An immense stock of hardy herbaceous plants, ornamental evergreens, shade trees, fruit trees, etc.

BOBBINK & ATKINS, Rutherford, N. J.

Paper: "Cost of Growing Stock," H. L. Bird, Benton Harbor, Mich.

Paper: "The Pecan," H. D. Simpson, Vincennes, Ind.

Paper: "Elements of Success in the Nursery Business," J. B. Pilkington, Portland, Ore.

Paper: "List of Desirable Fruits for My State and Recommended to the Planter," C. M. Hobbs, Bridgeport, Ind.; J. Van Lindley, Pomono, N. C.; Geo. H. Whiting, Yankton, S. D.; C. J. Maloy, Rochester, N. Y.; A. Willis, Ottawa, Kans.; E. W. Chattin, Winchester, Tenn.; W. F. Heikes, Huntsville, Ala.; Peter Youngers, Geneva, Neb., and F. A. Weber, Nursery, Mo.

QUESTION BOX.

The following list of questions has been prepared and will be taken up as the disposition of the programme throughout the three days' permits. Members are requested to avail themselves of gaining information by handing questions to the secretary at any time during the meeting.

Question No. 1—Would it be advisable to have a law for the patenting or trade marking of various varieties of fruits?

Question No. 2—Does not the average nurseryman import nursery stock that can be grown at home? If so, why?

Question No. 3—Has any nurseryman succeeded in preventing apple crown gall and hairy root?

Question No. 4—Is there enough cooperation among nurserymen?

Question No. 5—Is the demand for ornamentals increasing?

Question No. 6—What class of nurserymen are able to manage a business and make a profit under present conditions?

Question No. 7—How should pecans be graded?

Question No. 8—Are the large orchardists still getting the benefit of the wholesale prices?

Question No. 9—Are foreign houses careful enough in grading and sorting seedlings?

Question No. 10—The need of a better class of labor and how can we get it?

Question No. 11—Why should growing nursery stock be taxed as personal property any more than wheat, corn, etc?

Question No. 12—Could not the apple orchard interests be improved by more stringent laws regarding the labeling of pure apple cider vinegar?

Question No. 13—Is the Kiefer pear responsible for the limited sale of pear trees at the present time?

Badges will be delivered to members by the secretary on registration at the convention.

Ladies in attendance will be supplied with badges on application to the secretary.

Trade Directory for 1908

THE AMERICAN FLORIST COMPANY'S Trade Directory for 1908, fully revised to date, with thousands of new names and changes of address, is now ready for distribution. It contains 509 pages, including complete lists of the Florists, Seedsmen and Nurserymen of the United States and Canada, arranged both by states and towns and all names alphabetically. Also lists of Foreign Merchants, Firms which issue catalogues, Horticultural Supply Concerns, Parks, Cemeteries, Landscape Architects, Experiment Station Horticulturists, Botanical Gardens, and much other conveniently indexed and invaluable trade information.

PUBLISHED BY THE

American Florist Company

324 Dearborn Street, CHICAGO, ILL., U. S. A.

Contains 509 Pages NOW READY. Price $3.00 Postpaid

Announcement will be made during the first session of the time and place for meetings of the various Protective Associations, if information is placed in the hands of the secretary.

In order to give members opportunity for ample social and business intercourse the above programme provides for one session daily. It is hoped that this arrangement will result in the attendance of every member at each of the three sessions.

RAILROAD RATES.

The railroads, after long consideration, finally declined under date of April 29, to grant the usual reduced fares on the certificate plan and suggested "That your people be referred to the summer tourist fares which will be in effect to Milwaukee at the time of your meeting. Full details of the summer tourist fares may be obtained upon application to the representatives of the several lines."

STOPOVER IN CHICAGO.

Benjamin E. Gage, of the Chicago committee, advises that good arrangements have been made with the Great Northern hotel for accommodations for members who may wish to stop over in Chicago on their way to the convention. This hotel is centrally located and good rates are assured.

Fruit Tree Inspection in Utah.

Horticultural Inspector Sorenson filed his monthly report with the board of county commissioners May 1. "In the month of April 74,246 trees were fumigated and inspected for planting, besides 300,000 which were already fumigated, inspected and stored away in frost-proof houses or heeled in the ground for future delivery. Fifty-five boxes and bundles, containing about 15,700 trees, were imported, and 2974 were condemned and burned for being diseased.

"The deputy inspectors, except one, who had nursery as well as orchard work to attend, have been on half-time this month, making a total of 87½ days work, and have filed the following report: Orchards cleaned this spring, 559; orchards pruned, 468; orchards winter sprayed, 60; old trees cut down, 860; pear trees cut out for blight, 3220; young trees planted, 23,513; orchards visited, 646. In one district southwest of Jordan six large California spray pumps, costing over $60 apiece, have been bought and started to work, and many farmers intend to take hold of fruit raising in a manner to produce results. Our worst plague in the older districts is the old pest-breeding orchards, good for nothing, and still not bad enough to be lawfully condemned."

Two Important Vines.

Amongst choice hardy vines, Hydrangea petiolaris, and Schizophragma hydrangeoides, are unique in many respects. Throughout the milder parts of the northeastern states, and New England, there are no other vines that convey the same ornamental conceptions. Anyone who succeeds in growing either of them, to look as luxuriantly as the one shown in the illustration, has certainly something to be proud of.

There has been in past times considerable confusion about these two vines, and undoubtedly they have been badly mixed up; that is Hydrangea petiolaris has been found in cultivation under the name of Schizophragma hydrangeoides, and vice versa. There are obvious differences in the flowers of the two species, but the accompanying illustration shows plainly the difference between the two in the outline of the leaves. Hydrangea petiolaris has the leaves finely and closely toothed, and Schizophragma hydrangeoides always with the leaves coarsely and widely toothed. With those distinctions understood, they can be easily identified.

They should be planted in sheltered situations, in rich cool soil. For covering walls and old tree stems, they are admirable. They need attention and encouragement for a few years to get established, as otherwise they may trail aimlessly on the ground. In Long Island, throughout the Connecticut valley, and in various sections of the milder parts of the New England states, occasional fine examples of both may be seen. We are not aware that any good examples are established anywhere in western New York. JOHN DUNBAR.

Leaves of Schizophragma hydrangeoides (left) and Hydrangea petiolaris.

Flowering Shrubs.

In a paper read before the Morris County Gardeners' and Florists' Society recently Arthur Herrington of Florham Farms, Madison, N. J., made a strong appeal for the planting of flowering shrubs. No place, said he, is so small but that it can be adorned with a choice selection of a few flowering shrubs suitably disposed as specimens, whilst in places of larger area, groups and masses are indispensable not alone for their merit of flowering but to soften hard lines, and give variety and detail to the planting scheme. Hydrangea paniculata came in for mention as a shrub freely planted on account of the publicity given to it by advertising and the lecturer thought that there were many other shrubs that could be pushed with advantage. Forsythia was noted as one of the first shrubs to open its flowers. It is an old garden shrub, a native of China and Japan and named after Wm. Forsyth, gardener to a former King of England. Fothergillia alnifolia was noted as a choice, early, white flowering, native shrub flowering before the leaves appear.

The spireas he described as a great and most important family, with representatives scattered all over the northern hemisphere and comprising the most important flowering shrubs. The first to flower is S. Thunbergi a native of Japan with white flowers borne in myriads enwreathing the shoots in snowy plumes followed by the graceful feathery foliage. In succession to it comes the double plum leaved S. prunifolia, a native of China and Japan, a showy and profuse bloomer, in fact, quite one of the best shrubs for any garden, small or large. S. Van Houttei comes next in succession, but for American gardens it may be considered the best of all the spireas, so full and graceful in bloom, having the additional attractiveness of developed leafage at the time of its flowering. Its tall, wand-like shoots are borne outwards and drooping with the weight of blosom so that the bushes become veritable fountains of flowers. It is a hybrid between two other species and of garden origin.

S. Cantoniensis, a Chinese species, perhaps better known in gardens as S. Reevesi, is also a first rate kind and there are both single and double flowered forms of it. Another section of the spirea family which carries on the flowering through June, July and August includes S. Japonica and Bumalda, of which the variety Anthony Waterer is one of the very best, being dwarf and free and a persistent bloomer. A third section blooming from summer on into early fall is characterized by having flowers in crowded, plumy spikes, terminating slender, upright shoots, as in our native hardhack, S. tomentosa. It would be a large plantation to adequately represent the decorative possibilities of spireas alone. Cydonia Japonica, the Japanese quince, called also the fire bush because of the brilliant color of some of its red flowered forms, is a host in itself. It has been in cultivation nearly 100 years and is very prolific in varieties. Lilacs, philadelphus, deutzias, exochorda, viburnums and weigelas all come in for more or less notice and the lecturer also called attention to the value of the magnolia, judas tree, dogwood, halesia and the many varieties of apple, peach, pear, plum and cherry, not as shrubs but as useful trees.

HYDRANGEA PETIOLARIS AT NORTHAMPTON, MASS.

BOX TREES.

Beautiful shapely plants in fine condition and in nice green tubs.

To Improve Blackberries.

Professor H. Ness of the horticultural department of the Agricultural College, College Station, Tex., is making a series of tests to improve blackberries and dewberries by hybridizing and selection. He plans to interbreed erect blackberries with the prostrate dewberries so as to secure erect growing hybrids that will retain the excellency of flavor of the dewberry, and at the same time possess the stockiness of stem which characterizes the blackberry. The plants from which our present breeds of blackberries and dewberries are derived are usually picked up in the woods and afterward subjected to cultivation. There are a great number of varieties of dewberries and blackberries even in Texas. Prof. Ness plans to combine only the best and to develop a type that will be both commercially a success and also suited to this particular climate. He requests all persons interested in the development of this class of fruit to send him cuttings of promising plants. He further suggests that these plants be marked now and sent here in the winter. There is a wide field for investigation in the case of these two berries because so little has been done in the matter, and for the further reason of the multitude of varieties of both berries that exist in Texas.

CONVENTION OF THE

American Association of Nurserymen

Milwaukee, Wis., June 10-12.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York.

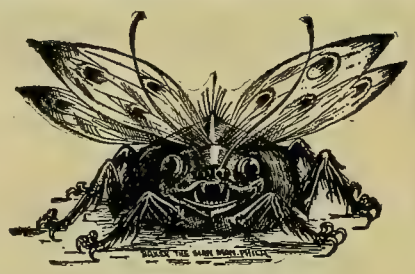
Uses of the Prickly Pear.

Consul-General Orlando H. Baker, of Sydney, New South Wales, furnishes information concerning the prickly pear in Australia and the counter opinions prevailing as to whether it should be eradicated as a pest or cultivated for its commercial uses:

The invasion of the prickly pear, which has rendered thousands upon thousands of acres of good pastoral and agricultural land in New South Wales and the adjoining states useless, is a problem that has been brought more to the front of late by the big bonus offered by the Queensland government for an effective means of eradicating the pest on a wholesale scale. At the same time, there is a question of whether this seeming pest has not its commercial uses. Regarding the subject from this point of view, a Brisbane chemist has, as a result of experiments, accumulated quite a number of means of turning the prickly pear to useful and highly remunerative account. He sees in this despised plant commercial possibilities quite alluring, and calculated rather to encourage its cultivation than its ruthless destruction.

In his report the Brisbane chemist gives a number of uses to which the prickly pear may be put. Among them he names alcohol, tests showing that seven gallons could be secured from a ton of prickly pear; feed cake for stock feeding; strawboard and paper; and pulp, which may be pressed by hydraulic force into household articles, floorcloth, etc. Prickly pear also contains much saccharine matter which makes an excellent sugar. The most practical use yet found for the prickly pear of the southern portion of the United States has been for stock feeding. The Department of Agriculture is encouraging the employment of a plumber's torch to scorch off the spines; when this is done it makes such an excellent food for cattle that they may be sustained on it alone, without other food or water, for many months through a dry season.

BOONE, IA.—Martin J. Lockard has commenced work on the erection of greenhouses at Sixteenth and Story street and the work will be pushed as rapidly as possible until the structures are completed. The houses when completed will be as modern and up-to-date as possible. Mr. Lockard stated that he hoped to have the greenhouses completed by this time next month and plants started. He has secured the services of an expert grower, who will be here shortly to take charge of the plant.



GERANIUMS.

S. A. Nutt, John Doyle and some pink, 4 in. pots, $7.00 per 100; and mixed varieties.

Begonia Vernon, newest strain, flowers as dark as blood: seeds gathered by myself from specimen plants in Zurich, Switzerland, during my trip to Europe; 4-in. pots, $8.00 per 100; 3-in., $6.00 per 100.

Begonia Erfordi, true: this is one of the best pink varieties known: it is a sight to see a bed of them in bloom: nothing but a mass of flowers. This plant decorates the flower beds of aristocratic people in England Germany, Switzerland and Paris. Price: 4-in., $8 00 per 100; 3-in., $6.00 per 100.

Everybody Talks About It!

LIKE THE BEE

A Prosperous Florist Is Never Idle.

So is **GODFREY ASCHMANN,** the Philadelphia Hustler.

An immense stock of bedding plants is now ready. Every hole and corner full for immediate shipment.

Ageratum, dwarf, best blue, 4 in., $7.00 per 100: 3-in., $4.00 per 100.

Scarlet Sage or **Salvia,** Clara Bedman or Bonfire. Ours is the true genuine variety so much admired in all the capitals of Europe and America. Deep red medium tall varieties; free bloomers. Seeds of these famous varieties were gathered by myself in Zurich Switzerland the home of the Salvias. Price; 4-in., $8 00 per 100. Have 5,000 of these to offer.

Rose Bushes, imported from Europe last fall, 3 feet high, Paul Neyron, Mrs. John Laing, Magna Charta, Jacqueminot, Hermosa, 6 in. pots, 35c; Baby Rambler, 5½-in., 35c.

Clematis, the true Jackmani, 6-in. pots, 3 feet, 35c to 40c.

Don't Forget We Lead the World in

MOONVINES.

Watch and be careful you don't buy Morning Glories for Moonvines.

We grow only the best varieties, hybrid or **Ipomoea Noctiflora,** for which we have had, for the past 20 years, a world-wide reputation. We ship every season, May and June, 20 000 to 25.000 plants into every state and territory in America, and in Cuba and Mexico. This Moonvine is much earlier than any other variety in existence; blooms freely, with very fragrant, pure white waxy flowers, and as large as a saucer. Price: 4-in. pots, nicely staked up, 30 to 36 inches high, $12.00 per 100; 2½-in. pots $5 00 per 100.

Kentia Belmoreana, 5¼-in. pots, 20 to 25 in. high, 40c to 50c; 4-in. pots 20-in. high, 35c; 6-in., just received from Europe, **Belmoreana** and **Forsteriana,** $1.00 each.

Araucaria Excelsa Glauca, spring importation, 1907: have only specimen plants left. 7-in. pots, 6 years old, 5 tiers 25, 30, 35 to 40 in. high, the same in width $1.50, $1.75, $2 00 $2.50, $3.00 to $4.00 each. **Robusta Compacta,** the same.

Have just received from steamer, May 1, from Antwerp, a big consignment of about 5,000 **Araucaria Excelsa,** of all sizes. Plants with 3 tiers, 8 to 10 in. high, 40c; 10, 12 to 14 in., 50c; larger sizes, 60c to 75c.

All goods must travel at purchaser's risk only. Cash with order, please.

GODFREY ASCHMANN, 1012 W. Ontario St., Philadelphia

Importer, Wholesale Grower and Shipper of Pot Plants.

PASADENA, CALIF.—Professor R. Hamilton Mohler, a well known landscape artist, will conduct a party of South Pasadena artists on a trip to the desert, where they will study nature as she appears on the arid wastes.

San Francisco.

SPRING FLOWER SHOW.

The following report of the spring flower show May 15-16, was given by the Pacific Coast Horticultural Society and the California State Floral Society. "Although not a financial success, this was one of the best shows ever held here. The competition for nearly all the prizes offered was very keen, especially for the field-grown roses, carnations, sweet peas, and the floral designs. The amateur classes were also well filled by exhibits from a number of the ladies belonging to the California State Floral Society" The following were awarded prizes:

Ferrari Bros. received first prizes for best vase of American Beauty roses, best vase of Winsor carnations, best vase of lilies, best collection of iris.

John H. Sievers & Co. carried off first prizes for largest and best collection of carnations, also for best collection of pelargoniums.

J. A. Carbone received first prize for a fine vase of Mrs. John Laing roses grown outdoors.

Domoto Bros. received first prizes for best three vases of roses grown under glass different varieties, for best vase of iris, and second prize for collection of carnations.

Wm. Munro, superintendent for the Crocker estate, had the first prize for a fine vase of Richmond roses.

Clees, Jacobsen and Fick, who each have an equal interest in a new yellow seedling carnation, received the highest award for it. It promises to be a great carnation for the future, very large flower, good calyx, long stiff stem, good clear yellow color and seems to be free blooming.

E. Gill carried off first prizes for best collection of field-grown roses and for best collection of rhododendrons.

F. Ludemann received second prizes for collection of field-grown roses and collection of rhododendrons.

E. Hutchinson, gardener for A. Taylor, Menlo Park, was awarded first prize for an excellent vase of Ulrich Brunner roses grown outdoors.

Wm. Kettlewell, gardener to Geo. A. Pope, Burlingame, carried off first prizes for the following: Best collection of annuals, best collection of perennials and best 12 vases of sweet peas, different varieties; also a silver medal for best new seedling rose; second prizes for vase of outdoor roses, collection of outdoor pelargoniums, peonies and pansies.

C. C. Morse & Co. were awarded first prize for a grand collection of sweet peas, amongst which were some very fine new seedlings, for one of which they received a silver medal.

Chas. Ehrlich, gardener to S. E. Slade, Menlo Park, received prizes for field-grown roses, sweet peas; also a special prize for some very fine indoor cucumbers.

Chas. Fick received second prize for a vase of lilies.

F. Redmayne of San Rafael, was awarded prizes for collections of shrubs and annuals.

H. Plath carried off the first prizes for best collection of decorative plants, best collection of ferns and best fern dish; also special prizes for specimen ferns.

Chas. Abraham received first prizes for specimen decorative plants and specimen fern.

Pelicano Rossi & Co. were awarded first prize for the most artistically arranged basket.

The keenest competition was for the best floral design—not funeral. Seven of the most prominent retailers entered as many different designs, all of which were very elaborate and well done and some of them very original. The first prize was awarded to the Art Floral Co. for a design of the battleship Connecticut made out of Cape flowers and immortelles. The first prize is a handsome silver vase offered by the growers to the florists. The second prize, a gold medal, was awarded the Belmont Florist for a very original and artistic piece—an old fashioned well with buckets and windlass. This was made out of ferns, lycopodium and different colored foliage. The third prize, a silver medal, was awarded to the Forrest Floral Co. for an American flag, made out of carnations, cornflowers and asparagus. A fine collection of California wild flowers, consisting of over 200 different varieties exhibited by Mrs. Chandler, received a gold medal.

The following were judges for cut flowers and plants: John MacLaren, T. Wood and N. Peterson; for the floral designs, V. Podesta, N. Peterson and Mrs. Chandler.

The J. B. Boland Co., which was burned out May 4 with a total loss, has again opened a store at 60 Kearny street.

CARNATION SPECIALISTS

674 W. Foster Ave., CHICAGO.

RICHMOND, IND.—E. G. Hill left May 20 for Europe, where he will tell the many interested horticulturists about our coming National Flower Show, to be held at Chicago, November 6-15. Incidentally he will officiate as judge at a Paris rose show.

LITTLETON, COLO.—Another new institution has been started by an old time citizen, S. T. Culp, who is laying the walls for a greenhouse, 40x80 feet. A modern system of heating by hot water is being installed and the work will be pushed. The cost of the building and heating apparatus will be about $3,500.

ROCHESTER, N. Y.—While driving along the turnpike just outside the city limits, May 19, H. W. Fuller of Springboro, Crawford county, Pa., a traveler for a nursery concern in this city, was held up by a stranger who walked into the middle of the road and, without saying a word, drew a revolver and fired at Fuller while he was only 20 feet away. The bullet struck the side of the carriage, and glancing, penetrated Fuller's side. When Fuller toppled over, the highwayman turned and ran. His wound is not serious.

Pure Apple Juice.

A leading European manufacturer of a nonalcoholic beverage from sterilized pure apple juice has furnished Consul-General Hugh Pitcairn, of Hamburg, with the following information regarding the difficulty of securing American dried apples of uniform quality:

"My experience has taught me that the difficult problem in connection with this industry, namely, to obtain in Europe a good, uniform product from American apples, often fails for the reason that the apple shipments vary too largely in regard to quality. If the apples are dried and pressed properly, an excellent beverage can be made therefrom. As it is impossible for the European manufacturer to buy apples direct from the producer, but is dependent upon the jobbers or commission merchants who buy up the goods in various places from various producers, the quality, while often good, is frequently very poor. Without payment in advance the European manufacturers cannot obtain their supply, and must, therefore, rely entirely upon the American jobbers with whom they have to deal, and, I am sorry to say, the users of my patent in Europe complain very much about the quality of American shipments received by them.

"The jobbers, however, are not wholly to blame, for the reason that the drying of apples in the United States is usually done on small farms or other agricultural establishments devoted to the raising of apples, and by the most primitive process. It would under no circumstances be advisable, as it would not be remunerative, to manufacture such beverages from fresh fruit. It being impossible to purchase in Europe large quantities of cheap, uniform fruit, if a company could be formed in the United States which would buy and furnish the supply of dried apples to the European manufacturers, it would accomplish great good in this direction." The names of five European factories making the apple juice referred to are listed at the bureau of manufactures.

GEO. A. KUHL,

Wholesale Grower, PEKIN, ILL.

Memphis, Tenn.

NO MEMORIAL DAY BUSINESS HERE.

Memorial day is not of any value to the florists of this city. The only observance of the day is at the National cemetery, six miles away, where 15,000 boys in blue lie in their last sleep. The local G. A. R. holds exercises in the morning, the colored G. A. R. in the afternoon. Magnolias, cape jasmine and field flowers are strewn on all the graves and addresses made, but the florists derive no benefit from the day. The Confederate Memorial day is June 3 and again the florists are given the go-by. The plant season is about over in this section and on the whole it has proved better than we expected. This is partially accounted for by the mild and favorable spring weather since March 1. Usually we jump from winter to summer, no spring season. Sweet peas are plentiful in our gardens now. Peonies are done for this season.

No building is projected here that we know of but the six carnation houses for the Memphis Floral Co., are now planted, making ten 100-foot houses this season against two last season devoted to this stock. Six 100-foot houses are now being planted to stock roses of the garden varieties and six houses for cut roses in four varieties. Twenty thousand chrysanthemum plants for cut blooms fill up all the available room at this place.

Chas. Botto, the popular attache of the office of the Memphis Floral Co. has a new four-cylinder automobile. Charley was always a favorite of the fair sex and is now doubly so on account of this new "Buzz" wagon.

Vacation talk is prevalent among the craft and dates are being set when this one leaves to let some one else have a chance. The owners and bosses are making dates as usual, but will they materialize?

No further sign of life in the erstwhile East End Floral Co. It is reported that Chas. Hammer, former manager and owner, is in Europe. H.

GERANIUMS

Good strong stock From 2-in. pots.

	Per 100	1000

JOS. P. HAUCK, Bell Phone 137 CARRICK, - PA

Plectranthus Crassus.

From central Africa we have, within the last decade or so, received several pretty flowering members of the labiate family. One of them, Coleus thyrsoideus, has for a long time been an established favorite owing to the flowers being of such a charming rich shade of blue. A second species, C. Shirensis, of more recent introduction, is decidedly pretty, but scarcely likely to attain the popularity of the older kind. The blue of the flowers is not so striking, though the habit of the plant is good. To these two African labiates may be added Plectranthus crassus, which well merits extended cultivation. It is a stout-growing plant, reaching a height of 18 inches to two feet or more, the stems being clothed with ovate leaves about four inches long and half as much in width. In color they are of a pale green. The flowers, which are borne in narrow terminal spikes, are arranged in whorls, which develop for a considerable time, and thus maintain a succession of bloom. In color they are of a lavender-blue tint, certainly less showy than Coleus thyrsoideus, but decidedly useful in the depth of winter. The shoots, even if the tops are pinched out, do not branch very freely, hence this plectranthus is seen to better advantage when three plants are disposed triangularwise in one pot rather than grown singly. When one remembers how readily the different coleus intercross with each other, and how quickly a great number of foliage varieties made their appearance after the introduction of two or three kinds with handsome leafage, it is almost a matter for surprise that Coleus thyrsoideus and its near relatives have not been taken in hand by the hybridist.—Gardeners' Magazine.

The Smoke Nuisance.

When in Chicago recently Frederick Law Olmsted made some very pertinent remarks about the best methods of beautifying that and other cities. He talked of a number of municipal improvements, giving particular attention, naturally, to the scheme for building up a fringe of parks and boulevards along Chicago's lake front, beyond that long line of fenced-off railroad, with its rumbling cars and puffing engines, which used to completely shut off Chicago's business section from Lake Michigan.

Mr. Olmsted did not underestimate the value of this tremendous improvement when he said that after all there is one thing that is even more important than parks and boulevards in making Chicago a beautiful city—the getting rid of the smoke nuisance. Chicago is not the only American city, says the Cincinnati Times-Star, whose greatest blemish is its smoke. Every city in the middle west has its smoke problem. The combination of soft coal and carelessness in stoking and in the construction of heat and power plants has done its work. We cannot get along without soft coal—but we can get along, and that perfectly well, without the other part of the combination.

The production of smoke on the scale in which it has been, and still is, produced in Cincinnati, Pittsburg, Chicago and St. Louis is merely a very bad habit. Bad habits are proverbially hard to break—but they should not be allowed to go on unchallenged on that account. This is a period of municipal improvement in America. In the first place this was a beautiful country. Then the white man's frontier pushed out into the west; the conquest of the wilderness was sharp and decisive, but civilization was too busy cutting down trees and building houses and railroads and factories to think much of beauty.

Now we are passing out of the stage of purely material progress. The American is awakening to the fact that his cities still have a good deal of the old frontier ugliness about them. He is trying to make things better. The natural advantages are here—but man has not yet done his part. Paris became a beautiful city in eight years under Napoleon III. In America, where autocrats are not in fashion, the change will not come so quickly. But it is coming. And of all the old allies of ugliness, the smoke nuisance, which is an enemy not only of beauty but of public health and even public morals as well, should be the first to go.

OUR IMPORTATION

Will arrive in two weeks time, and prices on cases will be from $45.00 to $50.00 each of 500 strong bulbs or 45 to 50 plants.

In order to help our customers we give **Special Sale for Fifteen Days:**

C. Trianae

Established plants from 7 to 10 bulbs with no less than two new growths, $1.00 each; 10 to 15; $1.50.

C. Gaskelliana

15 to 25 bulbs, $2.00 each.

I. N. KRAMER & SON, CEDAR RAPIDS IOWA.

BOSTON, MASS.—Thos. F. Galvin has returned from his European trip. He does not consider the European florists as enterprising as those of this country and says the floral displays in Paris and Brussels cannot compare with those of New York and Boston. He speaks highly of a new carnation on which he has secured an option of a number of plants.

GLEN COVE, N. Y.—The Nassau County Horticultural Society is to give an exhibition of roses at its June meeting, which occurs on the second Wednesday in June. The place of meeting has not yet been decided upon. The Oriental hotel parlors, where the regular meetings have been held, are not large enough for such an exhibition, and the choice of a meeting place has been placed in the hands of a committee. The last regular meeting of the society was held at Roslyn. An interesting point system has been installed for the year, with prizes of suitable medals for the best record at its close.

CHRYSANTHEMUMS.

Novelties and all standard kinds ready for immediate Planting or for late delivery.

My special offer on the single varieties: 100 plants in 10 or more varieties for $8.00.

GRAFTED ROSES

FRESH WATER

WITHOUT STORAGE—DIRECT FROM the source of supply, throughout the nursery, by using the Perry Pneumatic water system. A new and simple solution of the water problem. Write for particulars.

UNITED PUMP & POWER CO.
Old Colony Building, CHICAGO.

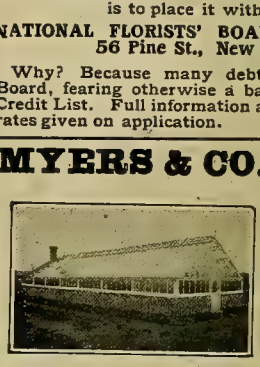
THE BEST WAY TO COLLECT AN ACCOUNT

is to place it with the

NATIONAL FLORISTS' BOARD OF TRADE
56 Pine St., New York.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

MYERS & CO. BUILDERS OF Modern Greenhouses



HEATING BOILERS.

PHILA., PA.

SAVE

FUEL, WATER, REPAIRS
HOW?
By Installing a
MOREHEAD TRAP

Write us for a 30 days' trial. We will place a trap in your heating system and will abide by your decision whether it pays or not. We know once you install a MOREHEAD you will never be without one—Investigate it.

Landscape Gardening for Amateurs.

BY B. P. WAGNER.

An excellent treatise on landscape gardening as it applies to beautifying the home grounds. It is written by a thoroughly experienced practitioner and contains many fine illustrations showing the correct methods of treating grounds of all kinds, yard and factory premises. Its low price should insure it a ready sale. Price $1.00, illustrated.

Iron Reservoir Vases...

Nearly 100 styles and sizes ranging in price from $6.00 to $100.00 each.

These vases are made with a reservoir for water, from which a constant and even supply of moisture is drawn by capillary attraction, and they do not need watering oftener than once in ten or fifteen days. Thousands of Reservoir Vases are in use on lawns and in cemeteries all over the country. Our prices are no higher than those of ordinary vases. Catalogue sent on application. Liberal terms to dealers.

WALBRIDGE & CO.,

BUFFALO, N. Y.

Worcester, Mass.

The exhibition of the Worcester County Horticultural Society in Horticultural Hall, May 22, was large for the time of the year and was visited by many people. The feature of the exhibition was the yellow calla exhibited by George MacWilliam, gardener for Mrs. G. Marston Whitin, of Whitinsville. Mr. MacWilliam also showed outdoor lily of the valley. The awards were as follows:

Cut flowers.—A. W. Hixon, first; J. W. Seddon, second; Mrs. A. E. Underwood, third; Mrs. S. E. Fisher, fourth.

Azalea mollis.—A. L. Bemis, first.

Pansies.—Mrs. A. E. Hartshorn, first; H. B. Watts, second; Mrs. P. G. Forbes, third; Mrs. W. A. Sargent, fourth.

Zonale geranium.—M. J. Whittall, first; E. W. Breed, second; A. W. Hixon, third; Mrs. P. G. Forbes, fourth.

Other prizes.—Pauline Wilder, painted trillium; Mrs. E. J. Whitney, tulips; G. E. Bennett, narcissus; C. E. Boyden, wild flowers; Hazel Maynard, wild flowers; J. W. Seddon, Canterbury bells; Mrs. L. P. Kennicutt, Cattleya Mendelii; J. W. Seddon, basket; Mrs. F. J. Reed, sweet peas. The committee of arrangements had a meeting at 3:30 p. m. and voted to have W. MacAllister of Whitinsville take George MacWilliam's place as judge during the latter's absence abroad. R.

Cleveland.

CAR STRIKE CHECKS TRADE.

Weather conditions were splendid last week, and had it not been for the street car strike in this city, most of the outdoor planting would have been well under way, but as it was, the people were not able to ride on the street cars without endangering their lives. Consequently the greater majority of people did not get around to the greenhouses to pick out their plants or leave their order. Instead of the past week being one of the busiest for the trade it was one of no work but plenty of worry, for it was hard to say just how long the strike would last. A great deal of hustling will have to be done in order to catch up with the work for Memorial day. The prospects for this eventful day are very bright, especially in the cut flower line. Although roses are shortening up somewhat, peonies will be in full swing by Saturday and it is doubtful whether the shortage of roses will even be noticed. Of carnations, sweet peas, daisies and other seasonable flowers there will be a good supply. It is very evident though that the prices will not be as high as last year. FORESTER.

ELIZABETH, N. J.—John Walsh, aged 75 years, a gardener of this city, died in the General hospital May 18, where he had been for some weeks. He boarded at 776 Third avenue with his daughter, Mrs. Crocker. Since he went to the hospital no trace of her can be found. It is thought she has left the city for parts unknown. He had no other relatives living here.

TROY, O.—The Miami Horticultural Society met in Grange hall May 7. The coming fruit crop was discussed and the opinion obtained that there is a very fair promise of a good one. Blight is attacking some trees causing the green fruit to fall and some leaves are infested with insects; still a good yield is expected. The society will meet with Darius Ross next month, when fruit and flowers will be displayed.

SIMONDS HEATING & SPECIALTY CO.,
103 Washington Ave., DETROIT, MICH.

Albany, N. Y.

Commissioner Wallace Greenalch of the department of public works has announced the appointment of Philip Bender, a member of the board of assessors, superintendent of parks to succeed Wm. S. Egerton. The appointment will take effect upon June 1. Mr. Bender has been a local republican leader for some time and personally is very popular. Commissioner Greenalch declined to accept the resignation tendered by Egerton, but removed him on May 18 for alleged irregularities in handling the pay rolls of the bureau of parks.

Harry G. Eyres spent last week in the Adirondacks fishing for trout with a congenial party of friends. The members met with considerable success.

The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

A DESCRIPTION and illustration of a new iron bench for greenhouses put on the market by the Lord & Burnham Co., will be found on page 930 of this issue.

Wood Preservation for Horticulturists.

During the coming year the government will extend its experiments in wood preservation to cover an entirely new field—the work of treating greenhouse timbers. Decay takes place very rapidly under the conditions of high humidity always found in greenhouses and horticultural buildings. The timber at present employed in the construction of such buildings consists for the most part of the naturally durable and relatively expensive kinds, such as select cypress and white pine. By a preservation treatment other cheaper and less durable species can probably be successfully substituted for them, and this can be done at a low cost.

In the treatment of greenhouse timbers several problems must be solved. For instance, it is desirable that the wood used in greenhouse construction be painted white in order that it will reflect as much light as possible. Consequently, a preservative must be used which will allow the treated timbers to hold a coat of white paint. Again, no preservative can be used which will in any degree affect the growing plants. It is probable, however, that these difficulties can be overcome, and the completion of the investigation will be watched with interest.

The investigations in wood preservation by the use of creosote, which is nothing more than the dead oil of coal tar and of zinc chlorid, is considered of such importance by the government that one branch of a bureau in the United States Department of Agriculture—the office of wood preservation in the Forest Service—is given over entirely to the work of experiments in co-operation with railroad companies, mining corporations and individuals who desire to prolong the life of the timber which they use. Advice and practical assistance are furnished all who request it of the forester at Washington.

BROOKLYN, N. Y.—In the Weir dispute, Surrogate Ketcham held that the executor had properly acted in deciding that the money and book accounts of the firm were firm assets in which the widow was entitled to share, instead of the decedent's estate.

THEY ARE SPEEDILY ERECTED

No complicated structural parts to take extra time, no delays in erecting the frame work, for every member is accurately cut, drilled and fitted for instant erection when it reaches your grounds.

They are the simplest, lightest, strongest, most enduring, attractive and productive houses built, and they also cost less to maintain.

SUGGESTIONS FOR CUT FLOWER GROWERS.

Sweet Williams.

In growing sweet williams, the most important point is to obtain a good selection of seed, as the cheaper, common strains are almost useless as cut flowers, indistinct in outline and poor in color. But a good strain, especially of the auricula eyed section, will produce very fine showy flowers that are always appreciated. The seed should be sown thinly at once in drills on a piece of clean ground or in frames and the seedlings transplanted when large enough. When these are being pricked out it is not well to select the largest and best seedlings, for, as often as not, the weaker looking plants are they that produce the best flowers. Grow the plants on a firm soil right along and keep them clean by frequent hoeing.

Calanthe Veitchi.

Where the old bulbs were cut up as advised recently the pieces or sets will now have made some growth and will be fit for potting separately. If no roots have started from near the base of the new shoots this is a comparatively easy matter but if they have then considerable care is necessary or the roots will be damaged and the plants checked. The best compost for this calanthe is a mixture of good sound loam and chopped sphagnum moss with a tenth part of old dried cow manure broken in rough lumps. In potting see that the point of root emission is kept just below the surface of the soil. If rooting, a little moisture will be needed right from the start but if no roots are present it is useless watering the soil. Just keep the plants in a warm and very moist atmosphere. The flowering bulbs potted some time ago are growing and rooting freely now and must be kept moist at the roots. A little later these will be fed with light doses of liquid manure but not until the roots have taken a good hold of the soil. Keep the plants growing freely and keep an eye lifting for red spider and the soft brown scale that affects these orchids. Just sufficient shading to prevent injury to the foliage is all that is needed.

Perennials.

Where there are still pot or frame plants of gaillardias get them planted out on good soil without further delay. The gaillardia thrives in an open sunny position, but the flowers must be cut early in such places or the sun takes the color out of them. Nothing is easier to grow than these popular and beautiful plants and they are worthy of all care. Boltonias may also be planted out if not already done. These are useful for cutting, but take up considerable room. Shasta daisies and other of the hardy chrysanthemums must also go out now if not already done, as, if kept in pots they get hard and start badly. Good young stock of all these fine perennials is far superior to old, worn-out clumps for cutting from and a constant succession of these should be kept up by sowing or otherwise propagating annually.

Forget-Me-Nots.

There is a certain amount of sale for forget-me-nots (myosotis) in early spring and it pays to grow a bench of them, especially when there is a retail store in connection with the greenhouses, as such flowers must be fresh to be at all attractive. Where there is a good stock that keeps clean it is good policy to divide this up, but when the stock is diseased it is better to throw this away and raise new from seed. In about two years of selection one can fix a strain of the true dissitiflora, that keeps dwarf and compact, yet produces fine flowers. Sow seed at once in flats in a frame or thinly in drills in the open air and prick out the plants in nursery beds when ready. The forget-me-not likes a cool, airy, but, if possible, lightly shaded position and preferably where the hose can be used over the foliage several times during the growing season. If the old plants are to be divided up reject all hard, woody, old shoots and plant out only healthy, stubby side shoots, each with a few young roots, nine inches apart each way, and treat as advised for seedlings. The best time to propagate in this way is when the flowers are just going over.

Dahlias.

Plant out all stock at once in good but not over rich soil, depending more upon surface feeding later if anything extra in this way is needed. The distance to plant when growing simply for cut flowers depends a little upon the variety but 30 to 36 inches apart in the rows and the rows five to six feet apart will usually be sufficient. In planting let the soil dish a little to the stem and, after planting and watering thoroughly and the water has drained away, place a ring of soot and lime around each plant to keep slugs at bay or use protectors of some kind. The plants soon get established and when they have a good hold use the hoe around them freely in preference to watering. Later in the season, when the flowers are forming and the soil is warmer, frequent waterings and feeding with liquid manure are in order. It is well to be in front with trapping earwigs and although there are numerous traps supposed to be good for the purpose the old plan of filling small flower pots with dry moss and placing them on stakes or otherwise around the plants is as good as any. A boy can be detailed to go over the traps daily and the plants will be kept free with very little trouble. See to staking the plants directly they are set out or the sudden winds that rise at this season will snap off many of the best plants.

Sweet Peas.

No plant pays for careful attention better than the sweet pea, yet often the seeds are sown and some kind of support given them and that is all that is done in the matter. The rows that are taking to their supports now should be carefully cultivated and the later rows thinned where necessary. Very often a light shade is an advantage and the old fashioned way of staking with brushwood was a great help in this way. Although the sweet pea likes ample light the scorching sun in summer takes the life out of the plants and the color out of the flowers. Rows running northeast and southwest do not suffer so much as others running directly north and south or east and west. The sun does not shine on one part of the row so long at mid-day and one row shades the next. The flowers are so valuable that any assistance possible along these lines ought to be given. Also when cutting the flowers care is necessary not to break the vines as this will cause them to give way quicker than anything. Except in rows specially saved for seed the flowers should be kept closely gathered as seed production, or even carrying the flowers to the fading stage, is a great strain on the vines and should be avoided.

Rose Rust.

The report of the Connecticut Agricultural Experiment Station, after mentioning the rose rust, Phragmidium speciosum says: "Sturgis, in his report for 1893, p. 86, mentioned injury to cultivated roses by another species of rust, P. subcorticium, but this is the first note in the station's reports of the above species. It was found on cultivated roses in Westville, causing considerable injury to the stems, to which it was limited. As usual, only the III stage appeared on the infected stems, forming small, hard, black pustules, usually occurring in clusters."

THE ROSE.

KEEP the shoots moderately thin on Bride and Bridesmaid now and admit all the air possible.

LOOK out for green fly, especially on the young plants of Richmond and similar leaved varieties.

INSECTS can be seen on the upper surface of the leaves; it is underneath where they are dangerous and must be looked out for when spraying.

Jottings on Rose Culture.

THE COMPOST HEAP.

When making up our compost heap we place first a layer of sod one foot thick, then a 6-inch layer of cow manure, with a good sprinkle of air slacked lime over the latter, repeating this as often as necessary and topping off with from four to six inches of fine soil that has fallen from the sod in handling and over all put a thin coat of wood ashes, about one barrel to each 40 square feet of surface. We build in the fall and let the heap stand until wanted for use, then handle in the usual way. We find this mixture gives the best results for all roses.

PLANTING.

The best time for planting roses is from May 1 until the end of June. See that the benches are in good repair for another season and give them a good hot lime washing. In filling the benches use the rougher part of the compost for the bottom and the finer for the top; fill the benches water level and plant 15 inches each way; alternate in the rows. Plant firmly and then give a thoroughly good watering that will reach the bottom. After this keep the soil evenly moist with an occasional watering to reach the bottom of the bench. Stake and tie the young plants at once in order that they can be syringed without breaking or making a crooked, ugly growth.

TIEING.

After commencing to cut regularly and as the cooler weather comes on, keep all blind wood well tied up and only tie such flower canes as will not stand alone. If possible tie these below where the cut will be and probably the break from this will be straight and able to take care of itself. Plants so treated get a better circulation of air about them and produce better flowers and more of them than plants that are neglected as to tieing.

CUTTING THE FLOWERS.

The first flowers after planting will not amount to a great deal, though we do get some fair stock from the start. Aim to cut the stems to produce a bush with, on an average, four good eyes to break. After the plants are from 18 to 24 inches high, always cut back to two good eyes and more and better flowers and longer stems will be produced.

MULCHING.

By September the plants will need top dressing, as by this time the soil will have settled down considerably in the bench. For the first dressing we always aim to have enough compost left over as plants do not need a heavy feed; we put on at least a good half an inch and by the middle of October or the beginning

WREATH AT THE FUNERAL OF WM. SCOTT, BUFFALO, N. Y.

By W. J. Palmer & Son.—Galax, Cycas Leaves and Lilac.

of November give a good manure dressing. As this gets washed out we give others as needed which will be on the average about every six weeks until March when, as the days get longer, and brighter, we commence with liquid feed to give quicker results.

VENTILATION.

Careful ventilation is of great importance; during the summer and early fall give all the air possible both night and day to get the plants well hardened and have no soft growth to start in with when bad weather arrives. By paying strict attention to water, air and draughts mildew will be kept in check. After hard weather sets in get the temperature gradually down to about 56° at night. Impress it on the fireman that the more even the temperature is kept the better the quality of the flowers produced. For best results commence to give daylight air at 64° or 65° and gradually increase this as the temperature rises. Allow all the air possible by day consistent with avoiding draughts and maintaining a temperature of 70° to 75°.

WATERING AND SPRAYING.

These are important factors in successful rose growing. Give a hard, vigorous spraying on all bright days, and always spray from the bottom of the plant upwards as the under sides of the leaves are where the pests lodge. This also keeps the pores of the leaves open and the plants in good health. Keep a watch on the bottom of the beds and do not allow this to become dry, for dryness soon stops root action and will soon tell on the quality and quantity of the buds. When the benches need watering, give a thorough moistening that will reach the bottom. Some spots will need more than others, so aim to have all in as even a condition as possible.

WEEDING AND CULTIVATION.

Keep the weeds down as they rob the soil and the top of the soil should be scratched over every two or three weeks. Oftener is better as it lets in the air and keeps the soil sweet. Never allow the soil to cake over the top too long or a scum to form or the effects of it will soon be seen. We always give a dusting of lime over the soil about every two months and after the following watering scratch it over to prevent it hardening to a crust. This is a great help in keeping the soil sweet and gives the plants a good constitution.

STRIKING CUTTINGS.

Get sharp sand with as little as possible or no soil in it. On the cutting bench, after a good coat of hot lime wash, we always place one inch of sifted ashes and on this a good three inches of sand, packing this down firmly. After the cuttings are in the sand give a good thorough watering, one that will go clear through, and on bright days spray frequently and keep well shaded for the first 10 days or two weeks. This will result in 98 per cent of rooted cuttings. For the cuttings select strong, substantial wood, fairly well hardened; take no soft growth and make three eyes, one in the sand and two out. Heel cuttings are always the best, but we cannot have all heel cuttings, so we select the very best wood we can.

HELD OVER PLANTS

We advocate holding over the plants from two to four years, for, with proper care and attention, we get better flowers from these and more of them than from young stock. Such stock needs a period of rest and the wood must be well ripened and all weak wood pruned out. The older the bushes the more feed they will require and thrive with; the color of the flowers is better also the substance in the older stock. I have cut some fine buds from stock as old as eight years in the bench.

SOCIETY OF AMERICAN FLORISTS' WREATH AT WM. SCOTT'S FUNERAL.

Upright Wreath of White Roses, by W. J. Palmer & Son, Buffalo, N. Y.

Good Summer Roses.

ED. AMERICAN FLORIST:—

Is there any good white or pink summer rose, outside of Carnot and Kaiserin, for culture under glass? What about Mme. Testout? ROSES.

Replying to "Roses" we would say that we think it would be a difficult matter to select anything better than Kaiserin or Carnot. Testout is a grand rose; the color is ideal, but it opens quickly and doesn't keep nearly as well as Kaiserin and Carnot. Maman Cochet for a pink and White Cochet are both excellent summer roses, either under glass or outdoors; they are not fragrant but they make up for this in a measure by giving us such large flowers, and perfectly shaped buds. White Cochet being delicately tinted makes it a very desirable rose for all around use. Wellesley, a fine salmon pink variety of the Duchess of Albany type is also an excellent summer rose. But for general purposes, as stated above, we pin our faith to Kaiserin and Carnot. E.

The Nurserymen's Convention City.

MILWAUKEE, WIS., JUNE 10-12.

The origin of the word Milwaukee has long been a matter of dispute. As many meanings have been ascribed to the word as modes of spelling—and these have not been few. The various ways in which Milwaukee has been written and the dates are as follows:

Melleoki—Fathers La Salle and Hennepin, 1679.

Millioki—Father Zenobe Membre, 1679.

Meleki—Old French map of 1684.

Milwarik—John Buisson de St. Cosme, October 7, 1699.

Milwacky—Lieut. James Gorrell, September, 1761.

Milwakie—Col. Arent S. De Peyster, July 4, 1779.

Millewackie—Samuel A. Storrow, September 29, 1817.

Milwahkie—Dr. Jebediah Morse, in summer of 1820.

Milwalky—Maj. Irwin to Col. McKenney, October 6, 1821.

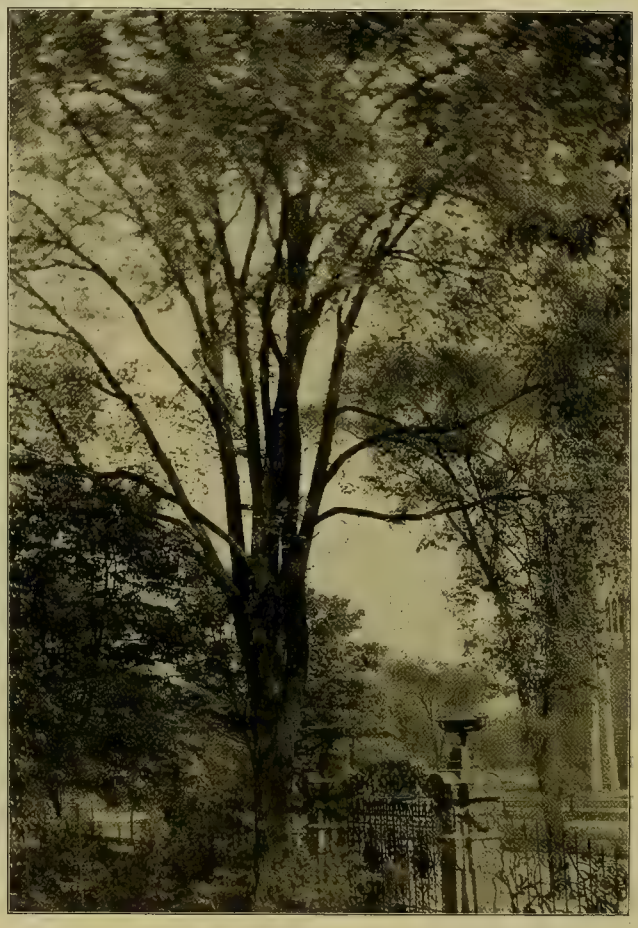
Milwaukie—In headline of the Milwaukee Sentinel to November 30, 1844.

The most generally accepted version of the meaning of Milwaukee is that the original Indian word signified council place, and that here was neutral ground. Old residents say that it is a fact that the Indians regarded the east side of the river as a sort of gathering place, the spot chosen for their councils being the hill that used to exist where the St. Charles hotel now stands.

Three rivers found their way to Lake Michigan between some few hills and a large proportion of elevated land, and draining some extensive valleys, where the Indian hunted and picked wild rice. The low lands have all been raised by filling in with the tops of the hills, so that florists who visit the Cream City (from color of its brick) in June will hardly comprehend the immense amount of labor that has been expended in bringing Milwaukee to its present grade levels. It is still far from a flat town. The Menominee valley, through which flows the small river of the same name, was originally marshy, but has been platted into canals and dockage land for commercial purposes, and all three rivers now empty into the lake at the same place. While these rivers and canals are valuable for marine commerce, they render necessary many bridges. It has been claimed by some who should know, that Milwaukee has twice as many bridges as London, some of the newer structures being very fine.

The sewer system has been a gigantic undertaking, many miles of tunnel having already been finished. The streets are now in fairly good condition. The question of the best pavement remains unsolved to date, and consequently we are using asphalt on the level and hardened brick for the inclines. Some streets for freight traffic are paved with granite blocks which hold out better than any other. All wood pavement has been discarded and through most of the residence portion of the city crushed stone is used.

The almost universal practice of planting street trees will impress the nurserymen, but the evidence of there being no organized effort to protect them will not escape notice. City ordinances relating to public highways cover every part of a street but the trees, in fact, according to law, I believe, street trees might be considered vagrants; at any rate, they are objects of love and charity. The practical visitor will notice that in almost every case they are planted too close together, and between curbing and walk regardless of how narrow this space may be or how extensively covered with airtight pavement. Appreciation in these days appears to have taken the form of light gratification in immediate effect, without the commonsense reasoning of the arboriculturist.



VIEW FROM THE DEUTSCHER CLUB, MILWAUKEE.

Our ornamental horticulturists will also notice the barren character of most of our school yards, which are very scant of "elbow room" and show hardly any play-ground worthy of the name. Through the commendable efforts of the lady members of the Park and Outdoor Art Association for the last two years, much improvement has been made. But our park board contributes nothing towards the school yards and actually charged the ladies $3.50 not long ago for time of a man who called at one of the schools to give some professional instructions. One may go through our largest park some days and meet a dozen people enjoying the surroundings and about the same time pass a school with 400 scholars trying to get some recreation out of clay bank 100x150 feet.

Milwaukee's water department is a decided success, strange as it may seem to some. While abundance of water is distributed at very low rates, there is a large profit annually to the city. The large lake-like reservoir, at the top of a high hill in Kilbourn park, will be of interest to many, while the pumping works on the lake shore are well worth a visit. The public museum and library building will be admired, first as a structure and then for its appointments, but most of all for the use it is being put to for the benefit of our schools. The attitude of our museum and library board toward the schools is in marked contrast with that of our park board.

The city hall is very well architecturally, and we want visitors to look it over and keep time with the toll of the monster bell that rings out from the tower, but we are not proud to tell strangers that we went into debt something like a $1,000,000 for it. The Layton art gallery we are truly proud of, also of our much respected citizen, Fred. Layton, who gave it to the city. Both are above criticism. The fire department ranks high, and the fire tug service upon the rivers is quite powerful and efficient. There are about 25 fire companies, and the amount of property they protect is enormous. Among a large number of industries Milwaukee is the world's largest producer of leather, machinery and beer. The police force is remarkably small for the population as compared with other cities. Street car service is excellent, with good cars to all points. Transfers are issued from one line to another provided they are requested on payment of fare.

In the environment of Milwaukee, according to a recent writer, there is still that pervasive influence and charm that inspired those who christened it "Bright Spot," and which from that day to this has fixed the affections and insured the loyalty of its inhabitants, which still appeal to the wayfarer, the passing traveler and the sojourner within its gates. On the one hand, with its fleets of ships, lies broad Lake Michigan, and, like a great crescent, the nearer bay, rivaled by few, perhaps excelled only by that one of which the poet sings,

> Where high rocks throw,
> Through deeps below,
> A duplicated golden glow.

On the other hand, and stretching away from the very limits of the city, lies the most charming and picturesque region of the west, known as the "Lake Region of Wisconsin." There are many low, rounded hills, covered to the very top with virgin forest. There are rivers large and rivers small, chief among them the noble Wisconsin, which at Kilbourn pours its mighty flood through nine miles of narrow gorge known as the "Dells," whose high walls are pierced with many a picturesque ravine and grotto. There are broad interlying valleys and countless intersecting lakes, whose names are in-

SOME VIEWS IN MILWAUKEE, THE NURSERYMEN'S CONVENTION CITY, JUNE 10-12.

digenous to the land and to a race long since dispersed. At the very threshold of the city lie

Oconomowoc and Waukesha,
Pewaukee and Nashota,
Nemahbin and Waubena,
Nagawicka and Minocqua.

In these names of world-wide reputation, familiar to thousands of health and pleasure seekers, and in the name of the city where a supplanting people now gathers in council, have these first occupants of the land left imperishable memorials of themselves and their time.

Verily, the auspices which were in the ascendant at its discovery, which during the years have charged the ether, impregnated the soil and influenced the builders, still reign, and if these surroundings and present conditions, these associations with an origin and history that shall yet be written of as a classic, do not supply an inspiration by the aid of which the student shall more deeply consider and reflect, the politician become more honest, the logician more accurate, the philosopher more profound, the orator more eloquent, and all men in their deliberations wiser, better, more thoughtful and sincere, where then may the council wigwam be established, and where shall Utopia be found?

Cyclamens and Primulas for Seed.

In our issue of April 4 we called attention to the important work in breeding cyclamens and primulas at the fine establishment of the St. Georges Nursery Co., Harlington, England, and we now present our readers with a good portrait of L. M. Graves, the head of the firm, and several illustrations from photographs taken in the houses where these plants are grown for seeding. In the house of primulas Mr. Graves is fertilizing the flowers, this being carried out by hand in all cases with the aid of a camel hair brush. The whole of the work at this place in fact is carried out upon a thorough and systematic basis, all crosses being recorded and noted, and the utmost care being taken to prevent any error. The trade of the firm in ordinary market plants enables it to profitably dispose of any plants not quite up to the high standard needed for their seed bearers. Only the principal tiers or whorls of flowers are fertilized thus ensuring fine flowers for the purpose. Giant White, Salmon Pink, Crimson King and Royal Purple being the varieties most grown.

Cyclamens are the firm's principal specialty and the experience of the growers and the firm, which is of over 40 years' standing, is sufficient guarantee that not one out of the 20,000 or so plants that are grown for seed will be unhealthy or of poor type. There are just about 20,000 plants in the house of seedlings shown in the illustration and each one of these has to be carefully scrutinized before being used either as a seed or pollen bearer. All others are weeded out and sold as indicated above. Good, well marked foliage, flowers of good size and clear, bright color, with stiff stems are the characteristics looked for in the parents of all crosses and though the amount of seed produced under this strict regime is necessarily much less than would be the case were looser methods practiced, the quality of that saved is of the highest.

Self fertilization is guarded against by pollenizing the flowers on each plant early with pollen from another one of the same variety and by this means both vigor and truth to name are insured as far as this is humanly possible. For the mixed varieties the same care is taken to avoid self fertilization, but here the plants are crossed, not indiscriminately exactly, but crosses are made between varieties of good quality and of characteristics which it is desirable to perpetuate. In the illustration showing the house of cyclamens in flower for seeding there would be many more flowers showing, but for the reason that most of the stems are bearing seed pods and these bend the stems over by their weight. It is a true picture of the best methods of producing seeds of the highest grade.

Among the varieties of cyclamen, that named Ourown takes a very high position, being well known among Covent Garden salesmen. It is an immense type of flower after the style of Salmon Queen and is the result of many years of careful selection and re-selection. Seed of it, so far, is scarce, and comparatively high in price, owing to the rigid selection of the parent plants. Picturatum, Grandiflora Alba, Mont Blanc, Sunray, Prince of Wales, Princess of Wales, Duke of Connaught, Rosy Morn, Brilliant and Crimson King are other leaders. All are of the true giganteum strain and most of them have been awarded certificates by the Royal Horticultural or Royal Botanic Societies.

Senior Member of St. Georges Nursery Co.

Decoration Day in Chicago.

Retailers in Chicago are very well pleased with their business for Decoration day. In former years there has often been a scarcity of good outdoor and other cheap flowers that help out with the kind of decoration specially called for at this holiday, but this year there was plenty of all kinds of outdoor stock, while the indoor flowers, owing to the comparatively cool weather, were also of good quality and plentiful. Peonies, as we anticipated some time ago in this column, are in excellent shape and only where they are cut too tight have we heard of any complaints.

John Mangel has been and still continues very busy and he sold clean out of all cut flowers on Decoration day. He disposed of a quantity of large box and bay trees up to $50 each and all classes of plants sold well. We noted some very fresh and well grown Adiantum Farleyense in his store and all classes of cut flowers in the very best of order. Nine weddings in one day is a fair trade, and this was Mr. Mangel's share on June 3. At a large wedding in the city he used over 5,000 peonies and 1,000 American Beauty roses, besides a large amount of other stock. Funeral work has also been good and altogether trade in this popular store is exceedingly flourishing.

A. Lange reports an excellent trade, funeral work helping here, as well as a fine Decoration day business. One casket cover made took over 2,000 lily of the valley, besides a number of choice orchids. The dollar boxes of flowers are still going strong and a remarkable lot of stock is disposed of, keeping the 19 employes on the jump to keep things right. Manager Fred Sprail is just getting over his exertions of night and day work during the rush, but does not appear unhappy over it. Fleischman's report trade as excellent in every particular, but Decoration day does not affect this store so much as some others.

Hauswirth, Florist, reports an excellent trade right along and Mrs. Hauswirth says there are plenty of good wedding and other orders in sight. Prominent funerals still continue to use up large quantities of stock and for Decoration day choice roses and orchids were the leaders. Mrs. Hauswirth had just received an excellent small portrait in

AT THE ST. GEORGES NURSERY, HARLINGTON, ENG.
House Containing 20,000 Seedling Cyclamens.

oils of her late husband, the lamented Phil. It is a splendid likeness, which she will doubtless highly prize, and we were glad to see it. Harry Rowe, the Eaton Flower Shop and others of the principal stores visited all did a rushing trade on Decoration day, and on the whole it may be considered one well above the average.

CHRYSANTHEMUMS

PLANTING time.

MAJOR BONNAFFON keeps its position as a good midseason yellow.

WATCH for the natural break and pinch the flower and at least one leading shoot out.

Notes in Season.

No plant is more responsive to good treatment in the matter of soil than the chrysanthemum, but as it is easily grown in soil of a poor character, this is too often given it. Soil that has done duty in the rose, carnation or other benches, sometimes even without the addition of any fertilizer, is used and growers wonder why, though the plants apparently make a good start, the flowers are poor and lacking in substance. It is often impossible to provide good new soil for all the benches of chrysanthemums, but at least the old soil should be livened up with a little new loam and manure, also a good sprinkling of bonemeal. In such soil the plants will hold out better, the foliage will be stronger and the flowers of better quality. Soil, too, that has been stacked outside through the winter after being used and has been well weathered is far better than that taken direct from the benches devoted to other crops.

The growing season of the chrysanthemum, after being planted on the benches, is short and careful preparation of the soil and planting will be well repaid. Often at this time there are various batches of plants—some well rooted and vigorous stock ready to go out, others small and poor and it is wrong to plant this up indiscriminately. The plants should be selected or graded, the best kept by themselves and planted earliest. The smaller, badly rooted or weak plants should be given good care until they become better established before being planted. Not only do the latter take longer to obtain a hold on the soil than is desirable but the better plants get away much quicker, overgrowing their smaller neighbors and appropriating their share of the food in the soil, and the last state of the weaklings is worse than the first. It is also very difficult to properly water benches irregularly planted as the big plants dry out much more quickly than the small ones and require twice as much water.

The soil should be placed loosely on the benches about five or six inches thick to facilitate planting but when planting use the rammer or potting stick and get the soil well firmed around the roots. If the plants are at all potbound, spread out the roots a little but do not break the ball up more than is necessary as the snapping of the principal roots severely checks the plants. Get the soil as regularly firm as possible around the plants and when finished scratch the surface over with the rake to prevent the water running off. Give one thorough soaking of water and allow the benches to dry out fairly well before repeating the dose. Some growers appear to think that all that is necessary to produce good growth and flowers is feeding and they commence feeding soon after planting, before the roots have taken proper hold of the soil, let alone used up the nutriment in it. The result is soon seen in pale colored foliage, becoming almost yellow at the top of the plant and a general unhealthy condition. Chrysanthemums like plenty of feeding but the roots must first of all be in a condition to make use of the stimulants which they cannot be until they have obtained a good hold of the soil. As a rule the plants will be some 15 or 18 inches high and strong in proportion before any feeding is necessary and they will not need it then unless the soil was poor at the start.

Insects must be carefully kept down now. Often at this time green or black fly makes its appearance in the points of the plants, and, if this is allowed to make headway the latter will soon be ruined. A little pinch of tobacco powder may keep the insects in check for a time but, if they get ahead, either spraying with some of the nicotine preparations or fumigating will be needed. Red spider occasionally appears at this time but if the weather keeps bright and frequent sprayings with cold water are given this insect will be made too uncomfortable to stay long. But avoid heavy spraying in damp dull weather or anything likely to result in a very soft condition of the foliage.

The Evolution of the Greenhouse.

HITCHINGS & CO., ELIZABETH, N. J.

Though it is altogether improbable that perfection in greenhouse building has yet been reached, those of us whose memories can hark back for 30 years will readily agree that the greenhouse builders have reached that stage in the race which is tersely designated as "going some." The primitive man, who with flint and fire laboriously wrought a something that would float him and his scant belongings over the water, was far behind our modern constructors of battleships and ocean greyhounds, but he had an idea. Improved upon and enlarged—cross-fertilized let us say—the idea of the dugout, like many other crude ideas, has been carried forward to splendid accomplishments.

Considering that scientists and historians have handed it down to us that the world is old, it is but a short time (1699) since Duilhies published his book on "Fruit Walls Improved." The practice of growing fruit against walls as a protection against wind and for the heat retained by the masonry, had long been in vogue. Duilhies thought it would be an improvement to incline these walls so as to better receive the sun's rays. The plan was not particularly successful, but

it aroused other ideas, one of which was to put glass in front of the walls and over the grape vines. Another thought was to build a flue behind the wall and thus supply heat. All this, it will be observed, was evolution, even if it was little more than a pastime for the rich.

ESTABLISHMENT OF HITCHINGS & CO., ELIZABETH, N. J.
Exterior View of Foundry.

While all this was happening in England and the countries of Europe, the American pioneers had not yet reached that stage of prosperity where even fruit walls were much to be considered. Thus it has happened that at a comparatively recent date we have had greenhouses improved from hotbed sash, flue houses and houses built in installments, each one a trifle better than its predecessor, but all crude. It is therefore a satisfaction to those interested in the mechanical appliances that in the past 25 years they have done much to place American horticulture and floriculture on the high plane they now occupy, to visit an up-to-date factory where greenhouses and boilers are constructed on a perfected system, by which, on very short notice, a thoroughly equipped range can be placed at the disposal of the grower, designed in every detail to meet the various requirements of his business.

Such a plant has recently been established at Elizabeth, N. J., by Hitchings & Co., and as this city is less than 30 minutes by rail from New York, doubtless many florists and private owners who are taken to the metropolis by the demands of business will take time to visit this interesting city and what should be to them the doubly interesting industry of Hitchings & Co. It seems unnecessary to go into all the details of construction as it is carried on at this plant, for it is now generally known that in the modern greenhouse factory only up-to-date machinery is used in the preparation of both iron and wood. From a power house equipped with high-pressure boilers ample power is furnished to operate a large foundry, a wood and iron construction shop and machine and blacksmith shops. There are also storehouses for the finished greenhouse material and boiler sections and minor storerooms for the convenient handling of all the lighter equipments of the greenhouse. A commodious office building is occupied on the ground floor by General Manager Sefton and his staff and on the upper floor by a force of draughtsmen.

If we were required to particularize as to interesting features about the place, a powerful machine for bending the iron frames might be mentioned. In the foundry, the rapid distribution of the molten metal for casting the boiler sections is noteworthy. Following these sections to the machine shop, we see them smoothed and drilled with similar dispatch. Sometimes in traveling we see "factory sites for sale," and from the general surroundings we get the impression that they are thus offered because considered by the owners unfit for any other purpose. In contrast to such, the Hitchings factory is finely located in a dry and level tract of 28 acres, 15 acres of which have been already utilized, and besides the buildings, necessary improvements in roads and walks have been made. As already stated, the object of this sketch is not so much to describe a modern greenhouse factory as to call attention to the evolution of greenhouse building.

Co-Operation of Wholesaler and Retailer.

A paper read by Arthur Niessen, Philadelphia, Pa., before the Florists' Club of Philadelphia, June 2:

The title of this paper is "Co-operation Between Wholesaler and Retailer in Times of Over-production." Why it has been added to the title "in Time of Over-production," is more than I can understand. If we cannot work hand in hand when the market is about evenly balanced between supply and demand, we certainly cannot expect to do so when the commission man is at the mercy of the retailer. We always have had, and will have, at certain times of the season a glut of some sort. This does not only apply to our trade, but to every other line as well. In our line it is due to unavoidable over-production; in other lines, probably due to an over-estimated demand. I would like to ask the retailers present, "Are you doing anything, or are you making any effort whatever to relieve the market of its over-production?" Beyond finding fault with the manner in which the commission man is trying to meet this serious problem, the majority are doing nothing.

How to find a market for this over-production is a problem worthy of a genius. It has been our experience that, although we offer flowers to the retailers at what would seem ridiculously low prices, they will not buy any more than they positively need. The thought how they could handle this stock, and in some way increase their sales, never enters the minds of the majority. I am quite sure, if the retailer were situated the same as the commission man during a glut, that if he had to take the stock regardless of having an immediate outlet for it, he would find ways and means to make it profitable for him to handle it. Necessity is the mother of invention, and it is wonderful what we can do when we must.

It is very evident that to a certain degree the conditions of the market during a glut could be improved upon by co-operation, but in that direction progress seems extremely slow. The feeling towards the commission man by many of the retailers is decidedly antagonistic. It is indeed surprising that by many retailers the commission man is considered a necessary evil, whose sole reason for existence is to oppress the retailer by extorting exorbitant prices, and imposing all sorts of hardships. These retailers will, without hesitation, make the state-

ment, that they will favor the grower who peddled his stock every time. The commission man is called upon only during a scarcity to supply that which the grower could not possibly supply. Coming to the commission man under such conditions, and being asked a fair price, for the goods wanted, he assails the commission man for the seemingly unjust treatment, and he is classed with the pirates and daylight robbers. Just as soon as we can overcome the feeling of the retailer, as described above, towards the commission man, we are one point closer to co-operation.

We cannot dispose of our surplus to the five and ten cent stores; there is only one outlet left to us, and that is to put the flowers on the street. The street fakir by most retailers is looked upon as a demoralizer of the flower business. The commission man is solely blamed for his existence, but let me tell you, that, with many of the growers who peddle their own stock, their last stopping place is the curb, and they will take anything to relieve the load and will sell the ware at a price so low that the buyer is pledged to secrecy. They are ashamed to have the price known. Can you imagine what conditions would be if the growers were depending entirely on their own efforts to dispose of their products? Some of the fakirs undoubtedly have what may be termed "nerve." One will buy 5,000 carnations that are almost asleep, take them on the sunny side of Market street, in a temperature of about 90°, and take what he calls a chance. How many retailers at the same price would take the same chances?

I do not wish to be misunderstood, that I am here to speak for the fakir. There is not a commission man, who would not gladly dispense with him, if there were any possible way of doing so. With few exceptions, they are not a desirable lot.

When you see the street fairly flooded with flowers you should always bear in mind the fact that the commission man has offered the stock to you first, that he has exhausted all the known science of salesmanship to induce you to buy it. Many retailers will advance the argument, that if there were no flowers on the street they could sell double the stock they are using. That is the very thing they should do, buy it and keep it off the street. "Give us the same chances you give the street fakir," is another time-worn saying. Let any of the retailers try it, and the results will startle them. Let them start out some morning and ask the commission man "What will you take for the shelf," and if you mean business the shelf is yours. The tendency today is just in the opposite direction. Many of the retail stores may justly be called sample stores. They do not carry any stock, the commission man is carrying it for them. The demands are sometimes startling. Ten minutes after the goods are ordered they are supposed to be delivered. The excellent service brought about by live competition is sadly misused. In that direction co-operation would do much to overcome existing unpleasant conditions.

The commission man has, after years of persistent efforts, gained the confidence of the growers. They are working hand in hand; the grower will consult the commission man about his crops for a coming season, he seeks his advice, and the trade has benefited greatly by this mutual interest feeling existing between the grower and commission man. That feeling does not prevail as much between the retailer and commission man as it should.

There is one feature which in my estimation curtails the sale of flowers, and that is, many of the retailers do not keep their prices consistent with the prevailing wholesale prices. American Beauty roses bought at $1.50 per dozen are sold at three and four times the purchase price. For illustration I will cite an instance of a grower who entered a retail store and priced his own mignonette on sale there, and he was informed $3 per dozen was the price. He then wondered why he was getting only $6 per 100 for it. To overcome a glut the retailers should aim to make large sales and small profits, instead of small sales and large profits. The ultimate results would be the same as far as profit is concerned, although a larger quantity of flowers has reached the consumer. There is too vast a difference in the price of flowers from the grower to the public. We should aim to reduce the cost of handling the stock from the time it leaves the greenhouses until it reaches the public. It seems some of the retail stores located on the main thoroughfares could dispose of large quantities of flowers by offering them at a reduced price. This they could do by eliminating all such expenses as deliveries of sales less than a certain amount, and by doing a cash business. This need not apply to all their trade, only to special sales, which may be called bargain for a certain day or time. The advertisement of bargains by the department stores is an almost infallible bait to the public.

A department store in a small town was selling carnations at 25 cents per dozen on Fridays and Saturdays. A retailer in the same town thought of meeting this price, and bought several thousand carnations to be put on sale the same days the department stores were offering theirs. The retailer did this, not expecting to make a profit on the sales, but principally to meet the price of the department store. Making inquiry, he was offered carnations at $10 per 1,000 and he felt that he was being favored, but to put it more correctly, he was doing the commission man a great favor in buying the carnations. Selling them at 25 cents per dozen, he disposed of as many as 5,000 on a Saturday. It is needless to say that beyond his expectation it turned out to be a very profitable business for him. There are ways and means of selling large quantities of flowers, and surely our retailers are energetic and enterprising enough to find them without having someone in another line of business to show them how.

Ninety per cent of the public are lovers of flowers, and 60 per cent of them do not buy them because their means will not allow it. Why not, during a glut when flowers are cheap and plentiful, cater to the great masses, and give them all an opportunity to enjoy the beauties of nature. That would cultivate a public taste for flowers. Many prospective buyers hesitate to enter your store, because they have only a small sum to spend. It is indeed a fact that by some retailers the 25 cent customer is considered a nuisance. That is a very sad mistake.

Many retailers hesitate to reduce the prices of flowers for fear that they could not get a better price when the glut is over. They claim that their customers cannot understand why the prices of flowers should vary. I am sure we all know why the price of strawberries varies, and we know it simply because the public man has been educated along those lines. Not many of us can afford them in January, but there is a time in the year when we can buy them, no matter how humble our circumstances may be. The same can be said about flowers; during a glut sell them at a price so that they may find their way into every home. But don't let the street fakir do it for you.

Another feature which is good for the business is to run special sales. There is hardly a time in the year when some stock is not more plentiful than others, which can be bought cheap. Advertise. How many florists do it? Some of the small local papers would be a good advertising medium in certain sections. A special sale will bring the crowd; the people will get into the habit of frequenting your store; you are advertising your business. In my estimation, the flower business today has reached such large proportions that the advancement of the trade can only be accomplished by catering to the great masses, and not so much to the few.

Co-operation properly applied is indeed a fine thing; in fact, it is only then practical when both or all parties concerned derive a benefit from their combined efforts. The definition of the word "co-operation," according to Webster, is "to operate jointly to the same end." The end in this case is mutual benefit, and without that there is no co-operation. Through co-operation is brought about a combined effort, which is much greater than the individual effort. Everyone concerned derives from such a combination, not a share of its strength and benefits, but all its force and good. If, in striving to advance our own position, we aim to advance that of the trade as well, we have true co-operation.

A man who toils solely for his own personal gain, who must make every transaction pay, regardless of the means to arrive at that point, is a menace to the trade in general. If each one of us would do a little something to better existing conditions, and do it with the feeling that the advancement of our profession is depending on our own individual effort, prompted by an unselfish interest, we would soon arrive at a better understanding, which would reap its own reward.

There is only one way that a man can help his trade, and that is by having faith in it, and confidence in those engaged in the same line of business. It is a terrible thing when we get so that we find fault with everything and everybody. We all know of some men who do this. There is not an honest man anywhere. That is all wrong. Ours is a good profession to the man who is trying to better it. If we all had our shoulders to the wheel, lifting with all our might, there would be no time to see who else is lifting. It is all depending on individual effort to produce one great force. I would advocate co-operation, not only during the time of an overproduction, but for every day in the year.

OBITUARY.

George F. Chandler.

Early in the morning of Memorial day passed away George F. Chandler of South Lancaster, perhaps the oldest florist and nurseryman in Massachusetts in point of years and experience in the business. For 65 years Mr. Chandler conducted, first a nursery and later a cut flower business, the commencement being in 1843. For the past two years his health had failed but up to almost the last, he was interested in all that was being done, his intellect remaining bright, and it was pleasant to hear him when in a reminiscent mood.

The one surviving son, F. Lincoln Chandler, will continue the business as heretofore, he having been associated with his father since 1887 and of recent years being in full charge.

Thus passes to his rest and reward one who has done good work in his long life, who planted trees in the beginning because he loved to see things grow and lived to see the streets of the town become beautiful and famous through his handiwork. Few of us attain to this, and none deserved it more than G. F. Chandler who was once aptly designated, "One of natures noblemen." E. O. O.

THE AMERICAN FLORIST

1885 TWENTY-THIRD YEAR. 1908

Subscription, United States and Mexico, $1.00 a year; Canada $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

In a Garden.

This is my garden—mine
Green shade and golden light,
That pyramidal pine,
Those pear trees veiled in white.

See where the blossoms' snow
Falls flake by flake, and lies
On the young grass below—
Mine is this paradise.

Lilac, syringa, thorn,
Many and sweet to tell,
Roses that shame the morn
Within my garden dwell.

Come, quiet spirits, ye
Who love green grass and flowers,
Rest here awhile with me,
Nor grudge the idle hours.

Drink peace and quiet here
Unto your hearts' content,
To last you for a year,
Dusty and diligent.

He called her Lily, Pansy, Rose,
And every other flower of spring.
Said she: "I can't be all of those,
So you must Li-lac everything!"
—Answers.

THE May flowering tulips have scored again notwithstanding the dull season.

REMEMBER the stock plants for next season before selling all the bedding geraniums.

TIN FOIL has advanced in price about 50 cents per 100 pounds recently owing to advance in lead.

THE beautiful Lælio-Cattleya, Mrs. H. G. Selfridge is again flowering finely at Lincoln park, Chicago.

THE dated yellow address label on your paper shows when the subscription expires. Please renew promptly.

THE careful grower will avoid sudden changes in temperature in fickle weather by frequent attention to the ventilation.

FAR sighted growers realize that a great amount of time is wasted by the use of poor, worn-out or out-of-date tools.

WATERING at all times must be done carefully, says J. A. Petersen, regarding the growing of Begonia Gloire de Lorraine.

PREVENT the slime in greenhouse walks by breaking them up occasionally and applying a little new ashes and a sprinkling of lime.

THERE will be a grand show of plants, flowers, fruit and vegetables at the Franco-British exhibition, Shepherd's Bush, London Eng., June 24-26.

SWEET PEA EVELYN HEMUS, a very beautiful variety with creamy ground color and picotee edge of bright pink, was figured in a recent issue of The Garden.

THERE is said to be a good opening for a florist at Storm Lake, Ia., a place of 3,000 population, with college attended by 300 students, six churches, three factories and three railroads.

THE schedule for the June exhibition of the Tarrytown Horticultural Society to be held June 12 in the Music hall, Tarrytown, N. Y., is to hand and shows a lot of good prizes. The exhibition is free.

THE paper on the relations between wholesaler and retailer, read by Arthur Niessen on Tuesday at the Florists' Club of Philadelphia and published in this issue should be read carefully by all interested.

AUG. LANGE, Chicago, will move one door west July 1 to a much more commodious store, where he will pay a yearly rental of $8,000, his previous rental having been $4,500. This is just one more summer zephyr to show that the hard times man has lost his job.

American Carnation Society.

CARNATIONS REGISTERED.

By Wa-no-ka Greenhouses, Barneveld, N. Y., Apple Blossom.—Parentage, Enchantress on a white seedling. Color, white delicately blended with pink. Size of flower, average 3¼ inches through season Habit, rapid upright grower, all growth coming from the base, good producer and good keeper on long stiff stems.

By A. E. Boyce, Wellsville, N. Y., Claribel Worth, Parentage Estelle & Maceo; color, scarlet crimson, very rich; size of flower, average 3¼ inches. At its best about Christmas; good stems, non bursting calyx, foliage rich blue, resistant to disease and insects.

ALBERT M. HERR, Sec'y.

St. Louis Horticultural Society.

The St. Louis Horticultural Society wishes through these columns to express its appreciation and thanks to the various growers, wholesalers and retailers for their liberal contributions of choice and fresh cut flowers donated to the floral booth at the charity carnival held May 16, 1908.

OTTO G. KOENIG, Sec'y.

National Council of Horticulture.

The eleventh and twelfth installment of the press service of the National Council of Horticulture have been issued, covering the following subjects: "Beautiful, Easily Grown Vincas," "Cannas," "Growing Strawberries;" "Salvia Splendens;" "Cucumbers;" "Water Lilies in a Tub;" "Japanese Iris" and "More About Deutzias." Florists, seedsmen and nurserymen should urge the editors of their local papers to apply for and use these excellent practical articles. Newspaper editors can secure copies free of charge on application to J. H. Burdett, 1720 West One-Hundred-and-Fourth place, Chicago.

Exposition at Nancy, 1909.

An important horticultural event will be the "International Exposition of the East of France" to be held at Nancy from May to October, 1909. There will be a permanent exposition, to consist of shrubs, perennials, horticultural buildings, implements, landscape and rockery work, etc., and a number of seasonable shows, plants, flowers and fruits, the dates of which will be announced later. Applications for space for plantings to be made in 1908 should be received by July 1; for planting in 1909, by November 1, 1908.

The horticultural shows will be only one division of this important exposition, which will be devoted to the arts and sciences, industry, fine arts, historical exhibits, etc., particularly of Eastern France. M. Crousse is president of the horticultural department.

Newport.

SEASON OPENING.

Active preparations are now being made for the opening of the season, and it is hoped that in six or eight weeks the commercial florists will have their hands full attending to the calls from society people. Even now there is much work being done, particularly by those who grow and sell bedding plants. On the large private estates all is bustle and activity. In many cases, the head gardener and his assistants are reinforced by an army of carpenters, painters and decorators, which, in each instance, is taken to mean that the owners will occupy their homes for at least a part of the summer.

NOTES.

Carl Jurgens has a great stock of American Beauty and other roses coming on for summer flowering and is shipping every day a big cut of lily of the valley. The large expanse of glass in this range and the clean and healthy stock, places it among the leading ranges of the country.

At their Washington square store, Gibson Bros. are carrying a particularly fine stock of all seasonable flowers and business is flowing their way. At their greenhouses and the Bliss road nurseries, they are showing good stocks and everybody is busy.

Joseph G. Leikins, of New York, opened his store here on May 25, his being the first of the branch stores to open. Mr. Leikins was here May 29 and held a pleasant reunion with old friends.

Thomas Galvin's place is noteworthy, not only for the fine stocks of decorative and bedding plants to be seen, but also for the neatness and general air of prosperity that prevails.

Wadley & Smythe opened their store June 1, but at their nurseries business has been active ever since it was warm enough to plant.

F. L. Zeigler, who has two stores, one on Bellvue avenue, the other on Broadway, is doing a good business at both places.

NOTES OF THE ESTATES.

E. J. Berwind's place on which Bruce Butterton is head gardener, is constantly having some new feature added. Much of the work is along the formal lines and appeals more strongly to the devotees of that school, but even for those who are more liberal patrons of the natural in landscape art, there is much to be found to arouse admiration. Noteworthy is the division, or border of rhododendrons that completely encircles the place, and the finely laid out lawn with its appropriate groupings of trees and evergreens, monuments to the skill of Mr. Butterton.

In the area of glass and the variety and quantity of stock grown, there are few private places that excel Elbridge T. Geary's, which is managed by Arthur Griffin. Leading features are the fruit and vegetable houses, where grapes, nectarines, melons, etc., are all grown to perfection. There are a number of fig trees, now growing in the open, which are taken up every fall and returned to the greenhouse, and which show no check from the transplantings, being now loaded with fruit.

The work on the grounds of G. G. King, where Andrew Ramsay is head gardener, is a splendid specimen of the natural style. Covering a large city square, the grounds have just enough slope to make fine lawn work effective. The trees of this place, alone, make it noteworthy, there being a number of magnificent specimens of the various beeches.

Much regret is felt among the gardeners and all others interested in horticulture on account of the removal of David McIntosh, gardener for Mrs. C. M. Bell, who has removed with the family he so ably serves, to Tuxedo Park, N. Y. He paid a visit here during the past week and was warmly greeted by old friends.

So far as landscape features are concerned, this city at this season possesses a charm not exceeded at any other time of the year. The many flowering trees and shrubs and the arbors of wistaria contrast finely with the fresh green landscape.

At J. J. Wysong's place on Ochre Point, which is directed by James Kyle, there are many interesting features, not the least being well stocked conservatories.

Southampton, N. Y.

The regular monthly meeting of the Horticultural Society was held May 21, President Clark in the chair. There were several very interesting discussions, the principal one being that on the value of a certain widely advertised fertilizer. It was decided to hold our flower show August 19 and 20, instead of August 12 and 13, as originally agreed upon. The next regular meeting will be held June 4.

FALL RIVER, MASS.—John Lambert, 72 Jepson street, and his son, William, figured in a runaway accident on Rock street early in the morning of May 23, which resulted in the throwing out of both and the wagon being completely demolished. Mr. Lambert was able to be out again the same day after having necessary medical assistance rendered by Dr. Lowney.

JUNE FLOWERS

Our **Beauties** grown in solid benches are producing the best flowers in this market. The roots do not dry out, but are down in deep soil. The same with our **Miscellaneous Roses,** which, in addition to being planted in solid benches, are all grafted. The flower market is loaded down with quantities of flowers of poor quality. Try our solid bench grown flowers and see the difference.

MARKET BETTER.

The past week the glut continued until Friday and then everything changed and stock became scarce and entirely too high; 3 and 4 cents were asked for carnations whose quality did not warrant the price. Many of the retailers complained, not so much about the prices as about the quality of the stock offered, especially when such stock two days before had been sold at $4 and $5 per 1,000. Sunday everything having been cleaned out there was quite a scramble for stock; everything was scarce except long stemmed American Beauty roses, quite a few of which had been left over. It is possible that the market the coming week will become steadier. School closings, June weddings and some few winding up social events of the season will help to keep things moving and the chances are that the low prices of the past two weeks will end and a more healthy tone prevail. With fine and dry weather planting out will be more in order. It is expected that the late rains have about used up the outdoor common roses.

NOTES.

Quite a stir has been created by Park Commissioner Scanlan refusing to allow any public picnics in Forest park. He claims that the litter and rubbish laying around is detrimental to the walks and drives in the park. Only private parties are allowed; the public picnics are transferred to Fallow and Carondelet parks.

A. W. Murray, Eastern avenue, has renovated his store and greenhouse and they have a very nice appearance being well filled with ferns, palms and other flowering plants. Mr. Murray does a great deal of lodge work.

A special essay written by James Gurney, superintendent of Tower Grove park was published Sunday by the Globe Democrat on "Hardy Shrubs That Thrive in St. Louis"—what to plant—how to plant—where to plant, to get the best effect. It was a very instructive essay and covered an entire page of the paper.

We are glad to announce that R. J. Windler, who has been on the sick list the past 10 days and has undergone an operation, was able to be at the store on Decoration day. His sister, Miss Rose Windler, has carefully taken charge at the store during her brother's absence.

J. W. Dunford was in the market Sunday. He said his retail establishment did a large business Memorial day. He is at present cutting 4,000 carnations daily at his greenhouses at Lackland.

Eggeling Floral Co. expects to add this summer to its greenhouses at Kinlock, where the firm intends growing carnations and roses for its own use and surplus will go to our wholesale market.

Planting out in all the parks is now going on and everything is looking splendid. George Ostertag, our superintendent, is going the rounds daily.

W. F.

Kansas City.

MEMORIAL DAY TRADE GOOD.

As usual, Memorial day came with a rush for the florist, and after taking consensus of opinion a heavy increase is noted in almost every establishment. It was thought beforehand that peonies would be scarce but later in the week the supply increased perceptibly and every one had enough to fill orders. A couple of weeks of dismal weather put the cut flower market in a pretty bad condition. Carnations suffered more than anything else, the supply being considerably short and the flowers most unsatisfactory. Roses were small and knotty and of poor color. Greenhouse men are not very happy at the set back the weather has given them and most of them will be busy several weeks with the spring planting.

Shippers experienced no little amount of trouble last week in getting out goods to points in Oklahoma and southern Texas. Some of the express companies refused shipments altogether while others accepted at owner's risk. Occurring at this time the loss to some will be considerable. Several Chicago shipments enroute to the flood bound district were turned back and found their way in to this market. The effect of the continuous rains of the last few weeks is severely felt at present and the usual supply of material for the Memorial day trade was greatly lessened. The atmospheric conditions, could not have been worse with two or three cold damp days and following a spell of summer-like weather.

NOTES.

The Geo. M. Kellogg store presented a busy appearance on Decoration day. This firm handled an immense quantity of peonies and other stock in spite of the bad weather and the difficulty in making some of the southern shipments. It is reported that Mr. Kellogg is slowly improving which is indeed consolation to the trade.

The Wm. L. Rock Flower Co. handled a large quantity of peonies this season The stock was particularly good, maturing just in time for the heavy demand which allowed the blooms to develop naturally into full size.

Did not the failure of one of our craft, to place himself in the recent municipal government game, come as a disappointment to some of the shopkeepers who favor keeping the lid off all day on the Sabbath?

One of the heavy buyers in the market this year was Mrs. Moseley of Kansas City, Kans. Mrs. Moseley deserves the credit of making the business what it is across the line.

J. E. Rodman was in the city last week looking out for Memorial day stock.

MEMORIAL DAY TRADE SATISFACTORY.

While prices were comparatively low for Memorial day this year, still the results were good and most wholesalers declare themselves satisfied. This may have been partly because of disappointment of large hopes for Easter and a consequent resignation to any fate for this holiday. The best grades of stock were rather hard to obtain and prices held firm, but the market was very badly overloaded with inferior material which was hard to move at any price. Carnations sold from $3 to $5 per 100 for stock that would carry well in shipment, red going the best, because hardest to get. Good Lawson was also a good seller. In the white varieties buyers were extremely discriminating, there being an abundance of stock such as it was. Roses held about as firmly for the best grades, but here, too, there was too much that was inferior. Bride and Bridesmaid were far from being in their usual form and other teas were also soft. Killarney, on the other hand, was of excellent quality as were also Richmond and the so-called summer roses, such as Kaiserin, Carnot, etc. Orchids of the paler shades were in demand for June weddings, lælias and Cattleya Mendelii being the best sellers. There has been a good demand for smilax with a good supply on hand.

PEONIES FOR MEMORIAL DAY.

Contrary to all expectations there was a very great abundance of peonies for Memorial day trade. It was predicted by leading wholesalers here that there would be plenty of peonies after Decoration day, but the soft, hot and showery weather brought every sort of vegetation along faster than usual, and seldom have peonies been known to spring into flower all at the same time over large sections of the country so fast. Beginning on Tuesday or Wednesday of last week fairly large shipments began to pour into this market and they increased until by Saturday all hope was given up of ever moving a large proportion of them at any price. Picking buds that were either underripe or overripe was a large part of the trouble, and poor packing added its woes. One large grower who ought to have known better shipped in bunches containing fully blown flowers and buds so tight they never could open. On the other hand some excellent Festiva Maxima peonies that were picked right and packed right were held by the wholesaler at as much as $1 per dozen. Officinalis Rubra and Officinalis Rosea were two locally grown varieties that give good satisfaction. Early Rose from Elmhurst and Late Rose from Bloomington were seen side by side on one counter. Pachallis, more commonly known as Drop White or the Passover peony is an excellent commercial variety. Whitleyi is one of the best whites known, being liked by the trade for its excellent keeping qualities. Humei and Pottsii were also seen in abundance, but are poor from the commercial florist's standpoint, although they are fine garden varieties. Southern peonies are done for, but numerous growers in this state and Indiana are heavy shippers. The Grove, Major Kennicott's famous peony farm, and Arlington Heights produce the best home grown flowers and Elmhurst is hardly farther away. Bloomington, Mattoon, Willow Ridge, Effingham and Alton, all in this state, and not far from the center of distribution, are big producers. Sarcoxie, Mo., and numerous points in Indiana, including Richmond, New Castle, and other localities, also ship to this market. Carbondale, in this state, sent a product so well grown and so carefully packed that the entire lot, unusually early, went into cold storage for Memorial day.

NOTES.

E. E. Pieser, of the Kennicott Bros. Co., says that in his estimation the local wholesale market sold 33 1/3 per cent more stock for Decoration day this year than last year but that the money receipts were fully 17 per cent less. Several other leading wholesalers corroborated this view. Retailers wanted the stock but did not want to pay the price. Festiva Maxina peonies here are an excellent item.

Scheiden & Schoos in their carnation planting are adding several of the newer popular sorts, such as Aristocrat, Beacon, Victory and White Perfection. They will also plant in benches about 10,000 of their own new red seedling.

Some fine sweet peas are a feature at J. A. Budlong's this season. This is the first year this establishment has grown its own, planting between the carnations in several benches.

Bassett & Washburn report having had a very heavy shipping trade for Memorial day, the Thursday previous to that holiday being one of the banner days of the season.

Herman Goetz, shipping clerk in the A. L. Randall Co.'s supply department, left last Thursday for a visit to his home in Germany.

Sinner Bros. had some of the best Lawson carnations seen on the market last week.

Wietor Bros. had a very heavy call for their Richmond roses for Memorial day.

Chicago Notes.

SCHOOL CHILDREN BUY FLOWERS.

The most picturesque, though probably not the most profitable feature of the Memorial day retail demand was that from school children whose teachers had asked every pupil to bring on the day previous a floral tribute to the nation's fallen heroes. At Martin Solms, 391 W. Madison street, four youngsters appeared. The young lady clerk deftly made up bunches of flowers designed to attract the juvenile eye and meet as well the limited means of childish pocketbooks. When at last she produced a combination of white carnations, pink roses, and a brilliant red peony, tied together with a fern or two, a conference was in order and a purse amounting to a whole quarter of a dollar made up and the bargain was made. A baby girl of six summers, lisping her letters in the kindergarten class, walked into the store of the Ogden Floral Co., asked the price of a dozen carnations and wanted to know if they could be kept for her until half past 12. D. F. Simonds set the flowers aside, and the little girl would have had hers without money and without price had there not been a thousand children from the school just around the corner waiting to rush upon the philanthropic florist. Mr. Simonds says his business increases about one-third each Memorial day.

E. H. Hunt has secured a spray pump, known as "Success," which is operated on a new principle. A few of the pumps have been distributed among three large growers, including Bassett & Washburn of this city. All report it, in fact as in name, a success.

John Felke and wife, of Wilmette, Mrs. Anton Then's parents, celebrated their golden wedding May 26. Mrs. Felke has long been known as "Flower Mary," and has had a stand at the Northwestern depot in this city for the past 30 years.

Frank Lichtenberg, manager of J. W. Wolfskill's retail store, Los Angeles, Calif., passed through the city this week and inspected the principal wholesale and retail stores. Mr. Lichtenberg has been on a tour of the principal eastern cities and is returning by way of Denver, Colo. His firm intends erecting more glass the coming season.

Mrs. P. S. Peterson entertained the forestry class of the Chicago Woman's Club at Peterson's Nursery June 3. The peony fields were the special attraction. Cape jasmine for Memorial day was poor, most of it having been discolored by the heat.

Florists in the neighborhood of the Union Stock Yards complain of thousands of employes being out of work and other thousands being employed only part time.

John H. Miller, 3401 Lincoln street, cut 85,000 carnations last week, the majority of the cut being consigned to E. C. Amling.

A good crop of Mrs. Marshall Field roses of excellent quality was the good fortune of Peter Reinberg for Decoration day.

A. Lange is to move into more commodious quarters at 42 Madison street, one door west of his present location, July 1.

Floral matinees are being given Wednesdays at Powers' theater, sweet peas being the souvenirs this week.

A. W. Meyer, of the Flower Growers' Market had the first outdoor asters of the season Monday.

B. S. Norkowski, 583 Milwaukee avenue, has opened a branch store at 4846 S. Ashland avenue.

The J. B. Deamud Co. is receiving some of the finest peonies seen in this market.

E. B. Washburn spent Decoration day with his father, C. L. Washburn.

The E. F. Winterson Co. reports that the plant trade continues good.

Geo. Reinberg has been cutting some very fine Easter lilies.

Weiland & Risch are in heavy crop with Killarney roses.

Visitors: Wm. Bentzen, the St. Louis wholesale specialist in Christmas green; Harry Balsley, Detroit, Mich; W. H. Troyer, Elkhart, Ind.; W. H. Drake, Kenosha, Wis.; Button, of Button Bros., Lake Geneva, Wis.; F. H. Smith, of Smith & Fetters, Cleveland, O.; Frank Lichtenberg, Mgr. J. W. Wolfskill, Los Angeles, Calif.

Impatiens Oppositifolia.

Seeds of this pretty annual balsam were received at Kew early in 1906 from W. A. Talbot of Matabeleshwar, India, under the name of Impatiens Dalzelli, according to a Gardeners' Magazine correspondent. These germinated freely and the plants were grown in a warm greenhouse under which treatment they flowered profusely during September and October. Specimens were then sent to Sir Joseph Hooker, the acknowledged authority on the genus, who determined it to be I. oppositifolia, a plant known to botanists for many years but not previously in cultivation in England.

The species is of very easy culture and readily forms a large spreading bush, followed by quantities of flowers in late autumn, which are in turn succeeded by abundance of seeds. The plant illustrated was eight months old from seed sowing, and at the time the photograph was taken was carrying many hundreds of flowers. The flowers are one inch in diameter, vary in color considerably in the different seedlings, from pink to rosy-red or rosy-purple, and are borne in clusters in the axils of all the upper leaves. The leaves are opposite and decussate, three to five inches long, lanceolate or elliptic-lanceolate, and of a rich dark green color. Impatiens oppositifolia is a common plant throughout the island of Ceylon, from the sea level to 7,000 feet altitude, and also on the mountains of Malabar, Canara, and the Concan, at altitudes of 3,000 to 5,000 feet.

TRADE DISAPPOINTING.

Decoration day week was a disappointment this year. So much depended on the weather and with the exception of the first two days the week was a steady, cold downpour of rain. Of course, this cut the plant sales in about half, as very few braved the prospects of frost to give their orders for grave decoration. All hopes centered on cut flower sales on Decoration day and when the day arrived with a drizzly rain, groans of discouragement were heard all over. It seemed there never was such a good display of plants in full bloom as was shown this year. Cut flowers were more or less scarce. Roses, carnations and gladioli were about the only stock. The day after Decoration day, which otherwise would have redeemed the day before, was broken into by the laying of the corner stone of the Catholic pro-cathedral and everyone flocked to the parade.

NOTES.

The Minneapolis Floral Co. has something good in the way of tubs of Baby Rambler roses with English ivy forming a handle. Large tubs of hydrangeas are also shown here for lawn decoration.

MEMORIAL DAY DISAPPOINTING.

Memorial day business was rather disappointing, due largely to rain and generally disagreeable weather which prevented thousands of persons from visiting the cemeteries. There was a parade of veterans and memorial services at Grant's tomb where Secretary Taft was the principal speaker, but everything was marred by the rain. Noteworthy, on the vault of the general's tomb was a great bunch of red and white roses, from the Camp of Confederate Veterans, inscribed: "In tender memory from the conquered to the conqueror, than whom none ever met braver or more worthy foe." There were many other flowers left at the tomb. Though in the aggregate a great amount of stock was used up no scarcity was created, there not being even a good clean up. A great amount of stock keeps pouring in and it is now, and will continue to be hard work to keep it moving.

June 1.—The condition of the market has not improved, if quality is considered it is much worse. Between red spider and mildew the condition of many roses arriving is very bad. This applies to all varieties. Richmond is practically going begging, to the peddlers. Lilies and lily of the valley are about the only stocks that show any firmness.

FLORISTS' CLUB LADIES' NIGHT.

Ladies' night was observed by the Florists' Club on the evening of May 27, at its rooms in the Grand Opera House building. The weather was exceedingly warm but despite that fact there was a large attendance. President Weathered on behalf of the club, in a few well chosen words, welcomed the ladies assembled. He then gave way to chairman Wm. C. Rickards of the house committee. The first number on the programme was a soprano solo by Miss Harriet Brown and the hearty encore was good evidence of the appreciation of the audience. Next came a tenor solo by Ray Mullen, who was also recalled with much applause. The third number was a fancy dance by Baby Laning. This dainty little miss of seven gave an exceedingly pretty exhibition of dancing. Master Robert Young followed with an imitation of Harry Lauder, which was heartily received, the young man answering his encore with a Scotch song. Little Baby Laning again appeared in what proved to be the hit of the evening. Dressed in Old Glory, she gave the flag dance in a style which might well be envied by many an older aspirant for dancing honors. When the pianist struck the notes of "Dixie" and Baby Laning threw the folds of her flag high in the air, the audience went wild with enthusiasm. The sixth number was a violin solo, finely executed by Mr. Kreshover. William Cameron and his Scottish dancers, Master Robert Young, Misses Flora Cameron, Jennie Birnie and Maggie Sorlie favored with the Scotch reel and Shan Trebus. The music of the bag pipes and the dancing of the little troupe met with high approval.

At this point chairman Rickards announced refreshments and all retired to the dining hall where there was an abundant spread of good things. The second part of the programme opened with a solo by Mr. Mullen, followed by a soprano solo by Baby Eleanor. Miss Brown and Mr. Child gave a duet. Another imitation of Harry Lauder by Master Young and a dance by the Scottish troupe closed the evening's entertainment. It was the unanimous opinion that Chairman Rickards and his committee, Frank M. Duggan, Joe Fenrich and Joe Manda, had made good.

NOTES.

In these days when many society folk prefer to spend their money in Europe, it is pleasing to note that one woman, whom the newspapers have heretofore delighted to call stingy, is doing something to help the hard-working florists. On the night of May 26, Mrs. Hetty Green gave a dinner at the Hotel Plaza. It is said to be the first social event of the kind ever given by Mrs. Green. The tables were decorated with red carnations and appropriate green. In referring to the decoration Mrs. Green said: "The carnation is a simple flower but beautiful. You remember that it was the flower of McKinley." Mrs. Green is as well informed on horticultural as on all other matters. Her son, Col. Green, a wealthy railroad man who makes his home in Texas, is deeply interested in the business and his portly form is frequently seen at the conventions.

Geo. Saltford is now snugly located in the store at 43 West Twenty-eighth street, formerly occupied by A. J. Guttman. As a florist of lifelong experience in all branches of the trade and as a genial, courteous gentleman, Mr. Saltford should, and doubtless will, be welcomed by the fraternity. His advent, practically brings into Twenty-eighth street every man engaged exclusively in the cut flower commission business, excepting the tenants of the Coogan building.

Louis F. Rossow, formerly manager of Fleischman's Hoffman House store is now with Alfred Van Praeg in his new store, 4 West Fortieth street. The Fleischman store at Forty-third street and Fifth avenue has been closed.

M. Schling, who has a retail store in the Central Market, 1002 Sixth avenue, is handling a great stock of bay and box trees and bedding plants.

Siebrecht & Son will not open a branch store at Newport this season, as they do not consider the prospects warrant such a step.

FREDERICTON, N. B.—John Bebbington & Son write: "Trade has been good for the last month or so past; funeral work, government dinners and receptions at Queens hotel, the governor's headquarters during the session, has kept us hustling. We have also many lawns to grade. The crops are looking all right; owing to favorable weather much better than at this time last year. Tulips are a blaze of bloom just now; the grass is well advanced and we hope this season will be favorable for crops.

JUNE WEDDINGS
and School Closing Exercises.

WE OFFER SOME VERY CHOICE STOCK.

PEONIES.

We have them in white and pink, the quality of them being unexcelled. They come from the famous **Peterson Peony Farm,** which has the reputation of growing the finest collection of Peonies in the United States.

West Collingswood, N. J.

For three days the women here have waged a successful war on a construction gang of the Bell Telephone Co., which has been unsuccessfully endeavoring to plant a line of unsightly poles in front of the most attractive residences.

After one or two had been erected the workmen attacked the property of John Peterson. Mrs. Peterson waited till the workmen had finished digging the first hole. Then she took a rubber plant from her house and calmly deposited it in the hole. A second hole was dug. Mrs. Peterson placed a big fern in it. When a third hole was started Mrs. Peterson called to her neighbors. A lawn bench was placed over the hole and several of the neighbors' wives seated themselves upon it.

To prevent further operations by the workmen Mrs. Peterson then proceeded to dig a trench the entire length of her property, planting a line of calla and dahlia bulbs. The workmen started to dig holes just in front of her new bed of bulbs. But as fast as the workmen dug the women shovelled the earth back into the holes. After similar encounters at three or four more properties, in each of which the women were successful, a truce was called and the workmen went away, taking their tools with them. The men of the town are on guard and they promise to call out the volunteer fire department if the telephone men return.

LEXINGTON, KY.—Honaker, "The Florist," has let contracts for the erection of another large greenhouse 30x150 feet which when completed will be devoted entirely to roses, special attention being given to the culture and care of new varieties.

IMMENSE STOCKS OF PEONIES.

Last week was peony week and no mistake. The very warm weather brought the crop in all at once and the wholesale men had their hands full handling the immense stock. The out-of-town demand took the bulk of the flowers, all hands in the various houses hustling far into the night on Wednesday and Thursday, piling wagon loads of boxes into the express cars until late Friday. At least 50 per cent was added to the express rates on account of the extra ice necessary for the extremely hot weather, which was unusual for the time of the year. Under these conditions the stock was very soft; much of it was unfit for shipping when received, carnations particularly being in bad shape. It was also difficult to get good sweet peas. Peonies, as a rule, were fine but in many cases were received very open. Prices ranged from $3 to $6 and a few fancy at $8 per 100. Carnations ranged from $2 to $4 with a few extra fine a trifle higher. American Beauty rose was high at $2.50, $2 being the moving price for the specials. Sweet peas were high at 75 cents per 100, the bulk bringing 50 to 60 cents. Lily of the valley was plentiful at $3 to $4. All the commission men say they had all they could do, usually winding up with, "if it had not been so hot we would have done much better." It cooled off considerably on Friday but Saturday spoiled the great round-up day of the cemetery florists, as it rained incessantly from early morning until late in the afternoon; just poured, with no let up and drowned many a hundred dollar opportunity. The first week in June promises very well, there being numerous weddings and school commencements for which orders for quantities of flowers are booked. The inside stock is all fast deteriorating, there being a great falling off in quality in the past week. American Beauty rose is commencing to frill badly and the tea roses are either tight buds or wide open flowers. Eastern rose stock will no doubt have an inning for the next few weeks the late spring and early summer cutting from the cooler houses of northern New York and the New England states being much better than that furnished by the local growers.

FLORISTS' CLUB MEETING.

The combined meeting and smoker of the club, June 2, was a success in every way with possibly one exception, which was that just when the discussion of Arthur Niessen's paper had got to an interesting point President Harmon closed the business meeting and the entertainment committee took charge. The paper by Arthur Niessen on "Co-operation Between Wholesaler and Retailer in Times of Overproduction," was an able effort presenting the question fairly and pointing out how it might be possible to relieve the market during the seasons of trial. The smoker was very enjoyable there being songs, recitations and dancing. Joseph Lynch, of West Grove, sang "The Palms" in his usual good style, also made an address on temperance. Master of Ceremonies John Dunn kept the ball rolling and the fun fast and furious. Chairman Grakelow, of the committee, saw that a bounteous lunch was provided and taken altogether it was a great night for the club.

K.

Boston.

GOOD MEMORIAL DAY TRADE.

Now that Memorial day has passed and with it the most tiresome week of the year everybody is relieved and an evident air of satisfaction pervades the market at the results of the holiday trade. Seldom indeed is the report heard of "all that we could attend to" and surprising all the more when we consider the year, as it has been disastrous, to say the least. At the finish everybody was very much used up and not sorry when the time came to close the doors. The hours for length and constant labor are unequalled by that of any other holiday and the weather being very warm and muggy had a telling effect on both stock and workers. The day itself was never more fully observed and all cemeteries gave evidence of generous remembrances of departed friends. Quantities of roses, carnations, lilies, sweet peas, candytuft and gilly flowers were predominating purchases and ably followed up with an unending quantity of cheaper material—feverfew spirea, deutzia, lilac, and a lengthy list of others, all of which found their uses in one way or another. Roses were decidedly cheap and almost every variety was available, all, however, showing the effects of the heat of the previous week. American Beauty was plentiful and received with great favor. From $1 to $3 per dozen an excellent assortment was offered and with satisfactory results for all. Richmond, Killarney and Kaiserin enjoyed the largest demand and from $1 per 100 to $2 per dozen the first named two were dealt out in tremendous quantities. Kaiserin is nearer perfection than any rose on the market and is an excellent value. When seen in its present condition this is without a question, one of the premier roses grown. Few of this variety are procurable at less than $8 per 100 and the major portion bring easily $1.50 and $2 per dozen. Bride and Bridesmaid were available only as third class stock; these varieties are practically through for this season and poor values at any price. A large supply of Easter lilies and callas was available and brought from $4 to $8 per 100. No standards were set for filling in flowers as they were offered at what seemed ludicrous prices and then sales were limited in quantity. Sweet peas in all colors and grades were dealt in extensively bringing in many different ranges from $1 per 1,000 to $10 for the best selections. A great flood of these flowers invaded every corner of the market and heavy consignments were delivered to street venders. Flowering plants did not sell as well as expected due a good deal to the limited assortment available. Outside of hydrangeas, myosotis and geraniums there was but little variety offered, and prices ranged on a sliding scale regulated principally by locations.

Thomas F. Galvin has contracted for numerous decorations the current month; a number of weddings are booked for the coming week which appears to be the favorite week of the matrimonial season. At the Wadleigh and Lock dinners at the Algonquin club this firm conducted the floral decorations which were most elaborate.

The Henry M. Robinson Co. transacted a remarkable holiday business, being far in excess of previous years, and vastly more than anticipated. Tremendous shipments of greens were made to all parts of the country. The cut flower trade was very encouraging.

Houghton and Clark are anticipating an improvement in business with the advent of the June season and began early this week with the Parker-Custas wedding. Memorial day trade greatly pleased this house.

The Waban Rose Conservatories disposed of an immense crop of American Beauty roses to the holiday trade. The stock was in excellent condition.

B.

Pittsburg.

GOOD TRADE AT LOW PRICES.

Among the wholesalers there was a big difference between business this Decoration day and that of last year. Then everything cleaned up at high prices, but although business was good this year, prices were not at all satisfactory. Carnations were the only flowers to clean up and they did not average more than three cents for the best, poorer grades going for much less. In roses, prices did not advance any and those who held or pickled these lost out on the old ones. American Beauty roses were also very abundant with slow sales. Naturally the leader was peonies which sold well but there was nothing like a clean up in them; six cents was the opening figure which soon dropped to three. The demand for lilies was more noticeable owing to the scarcity. Of course the immense quantities of outside flowers which were in bloom this year were largely handled by the retailers; but, excepting peonies, were seldom touched by the wholesalers. This is the first time in many years when there was such a great variety and quantity of outside flowers in bloom for Memorial day. On the whole this state of affairs will probably be a benefit to the trade for future years, as certainly many people carried flowers to the graves this year who have never bought flowers and if we have a late spring next year they surely will be customers for some florist.

NOTES.

The life size horse made solid with white carnations by Faulk Bros. for the resting place of the great plunger "Pittsburg Phil" attracted much attention Memorial day. The Sunday papers all had cuts of it with many comments that were amusing to florists. Edw. Nigel of The Pittsburg Florists' Exchange made the wire frame but the papers had it come from New York.

Marion Morgan, foreman for F. H. Westhoff, DeHaven, is spending his vacation at his old home in Knoxville, Tenn.

GREAT DEMAND ON MEMORIAL DAY.

Never before has the demand for flowers been as great for Memorial day as this year. Despite the fact that there was a big lot of outdoor stock, which some of the more pessimistic retailers thought would hurt trade, everybody connected with the business had all they wanted to do. Carnations were the flowers most in demand and prices ruled very firm accordingly. The very hot weather played havoc with the roses, the quality being very poor, and it was a hard matter for the wholesaler to realize very much out of them. All told, our city was better supplied with stock than on any previous holiday and this combined with a good business made everybody happy and contented.

NOTES.

The warm weather of the past week set the boys to talking about the annual outing the question being: "Where will we go this year?" Our old friend Bob Ruttle of Covington, Ky., wants us to come out to his farm on the Lexington Pike and hold an old fashioned Kentucky barbecue. Bob says he will attend to the burgoo himself and will guarantee all a good time.

Tromey's Flower Shop had a very unique window decoration for Memorial day. A wax figure garbed in the colors and representing Columbia in the act of placing a laurel wreath on a grave, together with a beautiful flag with electric lights, created a great deal of favorable comment and attracted much attention.

Henry Schwarz of Norwood was in town on Decoration day and says he is still very busy with bedding stock and it will take him another 10 days before he will finish planting.

RAIN HINDERS TRADE.

The week preceding Memorial day was a busy one for both the grower and the commission man. The bedding men are shaking hands with each other because they all caught up with their work, though they started to plant a week later than other years. Reports so far show that business on Memorial day was above expectations, but all reports are not in at this writing; by next week we shall be better able to give an account of the volume of business done. All were well prepared to do a large business. Not for several years has there been such large quantities of stock on the market for this time of the year. Although we had occasional sun showers, large crowds of people visited the various cemeteries regardless of the rain. A rush on cut flowers was looked forward to on Sunday, but owing to the gloomy, cold weather, much disappointment was felt by both wholesaler and retailer, the former because he had a large stock on hand and more shipments arriving, the latter because the demand was very light on account of the rain. Some growers still persist in sending in the so-called "pickled" stock in spite of all that has been said about its uselessness. Peonies are having full sway this week, many thousands are coming into the market.

The Cleveland Florists' Exchange was burglarized last Saturday night; entrance was gained by breaking one of the back windows. Some unusual traits characterized the invaders. They showed a preference for American Beauty roses and choice stock. About 150 select long stemmed American Beauties and 300 peonies, select stock, of course, also the cans and pails the flowers were in and several small office articles are missing.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

CHAS. L. ALLEN, Floral Park, N. Y., will celebrate his eightieth birthday June 13.

THE Iowa Seedsmen's Association will hold its annual convention at Des Moines, Ia., June 9.

SEEDSMEN are gradually getting closer together to protect their interests against state and federal legislation of a baneful character.

THE twenty-sixth annual meeting of the American Seed Trade Association will be held at Hotel Ponchartrain, Detroit, Mich., June 23-25.

ROCKY FORD, COLO.—F. W. Brugger-hof, New York, and Burnet Landreth, Bristol, Pa., were the guests of D. V. Burrell on an automobile trip May 20.

LOS ANGELES, CALIF.—F. W. Brugger-hof of New York and Burnet Landreth of Philadelphia, capitalists, registered at Hotel Alexandria today.—Los Angeles Times, May 25.

MARBLEHEAD, MASS.—Jas. J. H. Gregory & Son state that the season has been very cold and backward, but all seed crops have started well. Roots never wintered so well.

THE bureau of manufacturers is in receipt of a communication from a German business man, in which he states that he would like to get in touch with American firms engaged in the exportation of clover and grass seeds.

GARDENA, CALIF.—J. Bodger & Sons' sweet pea farm, consisting of 350 solid acres and covered with 150 varieties is now open to the public for observation, the admittance fee including a ride through the expanse of flowers.

BRASLAN SEED GROWERS CO. writes from San Jose, Calif., May 28: "Lettuce in general will be short on the coast except with growers who have a large acreage planted. Radish very good with us. Carrot, particularly Danvers Half Long, will be short crop with us but we hope to make better deliveries on other varieties. Onion at the present time is looking well and while it will take 60 days to put it out of danger, all kinds except Southport White Globe should show good deliveries.

AT the annual meeting of the Nursery and Seed Trade Association of England, which was held in London, April 27, it was stated that the association had been of great service to the trade, as it had during the last year answered 870 status inquiries and collected accounts amounting to approximately $27,577, principally in small amounts, after members had done all in their power by mail to obtain payment.

THE Hickory Seed Co., Hickory, N. C., was chartered May 23 with $20,000 capital for general seed and grain growing and the sale of seeds of any and all kinds. The incorporators are R. O. Abernathy, W. J. Shuford, L. R. Sticker and A. L. Shuford.

CHICAGO.—Onion set conditions have not improved much. The ground remains water-logged in many fields.—Hand picked medium beans are quoted at $2.65 per bushel.—Grass seed prices on the board of trade June 3 were noted as follows: Prime timothy, $4.25 (nominal); choice white clover, $15.—Visitors: Adolph Kruhm, representing the Barteldes Seed Co., Lawrence, Kans.; L. M. Breit, representing Samson & Sons, Angers, France; H. Suzuki, representing Yokohama Nursery Co., Yokohama, Japan.

PARIS, May 26.—The many American friends of Vilmorin-Andrieux & Co. will be glad to learn that a week ago the present head of the firm, Philippe L. de Vilmorin, was created by the French government a chevalier of the Legion of Honor. Considering that Mr. Vilmorin is only 36 years old this high distinction tends to show that he is following the lead of the four generations of his forefathers.—Recent callers were W. Atlee Burpee and Wm. F. Dreer, Philadelphia, Pa.; Lem W. Bowen, who is just now in Naples, is expected in Paris about June 8.—Parisian.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

French Bulbs.

May 26, 1908.—The French bulb trade seems to be quiet. No sooner were the prices of the Growers' Syndicate fixed several weeks ago than some of the dealers started buying eagerly. Finding, however, that American buyers were either holding back or reducing their orders, the dealers kept on the prudent side by stopping to buy. This, however, has not yet induced the growers to relax, although individual growers may feel inclined to consider reasonable bids.

The crop prospect seems to be as good as last season, with perhaps the exception of Narcissus Paper White Grandiflora, which may fall a little below. Whether the prices will go down in case the American orders will not be of the usual magnitude is a matter of conjecture.

PARISIAN.

French Seed Crops.

PARIS, MAY 26.—The seed trade has just completed another season. From news published in the AMERICAN FLORIST it seems to be evident that the 1907-08 season has been good, from the American seedsman's point of view. The same is true on this side, or at least as far as France and the good seed houses are concerned. At one time we were afraid that some articles, mangels for instance, were not moving as rapidly as during 1907, but sales caught up and at the end showed even an advance over the previous season. First class stocks of many articles, such as beets in nearly all sorts, some cabbages, especially red types, several carrots, particularly field carrots, dandelions, egg plants and onions, all kinds, peppers, leading varieties, radishes Scarlet Globe. Turnip Scarlet, White Tipped, Strasburg, Golden Yellow Oval, Cincinnati Market, Chartier, Vienna, Livingston's Pearl Forcing, White Russia, Scarlet China; turnips White Egg, Cowhorn, Yellow Stone, etc., are entirely exhausted and many other kinds are running very low. Clovers and grasses sold well at remunerative prices, and though it is difficult to satisfy everybody, neither the seedsmen nor the growers have reason for complaint.

As regards next fall's crops it is still too early to anticipate the outcome. Our spring has again been very erratic. March was cold and wet during the first three weeks and rather more wintry than springlike, interfering a good deal with field work and also with the development of vegetation. The latter part of March and the first part of April were mild and seasonable and the growers held the hope that the higher temperature would make up for the backwardness, when suddenly on Easter Sunday and the week following snowstorms, hail and very cold, biting winds swept over France. The thermometer dropped to 23° Fahrenheit, the lowest recorded in the southwest for 30 years at such a late date, damaging a good many fruit trees—almonds, apricots, peaches and grape vines. Fortunately in the northern part of France the trees were not advanced enough to be much injured. Those beets that had been planted previous to the frost were somewhat nipped. After that week of inclement weather the temperature rose until May 27, when from about 75° it dropped again at night to 42° Fahrenheit. We earnestly hope that the present cool weather will be of short duration, as all vegetation is from two to three weeks late.

The seed crops which cause us most anxiety just now are the beets and onions. Of the former article we have now had fully half a dozen short crops and I am sorry to say that according to the general feeling the shortage in the outcome of the new crop on such leading varieties as Detroit, Eclipse, Crosby's Egyptian, Crimson Globe, Half Long Blood, Electric and Lentz will be fully 50 per cent. The presumption just now is that the Edward's and Blood turnip may yield from 60 to 70 per cent of the quantities contracted for, while Strasburg and Covent Garden beets are almost failures. Yearling stocks of onions are totally depleted and we wanted a good supply to fill American contracts. For the reasons pointed out in my notes of last fall, the crop will not be more than from 50 to 75 per cent of an average, and White Globe onion is not expected to yield more than about 30 per cent. Queen and Barletta onions have a better showing. Cabbages will fall below contracts, but enough seed may be saved to go on, except perhaps the Winningstadt. The present condition of the carrots, leeks, celeriacs, dandelions, parsleys, parsnips, winter and summer radishes are encouraging, with a few exceptions. Celery Paris Golden Self-Blanching so far shows a deficit of about 50 per cent of the contracts, but the seed is far from being stalked.

White Vienna kohlrabi is expected to yield about 75 per cent. Mangels Tankard and the Intermediate Barres, a sort very largely grown in France, may fall short in Western France, but the other varieties of mangels show a better stand and will yield enough to cover contracts. The shortages on those turnips which we require most, on account of the stocks being cleared out, such as White Egg, Cowhorn, Purple Top Aberdeen, Yellow Stone, Amber Globe, Scarlet Kashmyr, etc., are very serious, while of the American White and Red Top Strapleaved, Purple Top White Globe, and White Norfolk the prospects are at present more favorable. The latter may also be said of the rutabagas, though the aphis has somewhat preyed on the plants in western France.

Owing to the unfavorable conditions that existed all through the growing season, and to the trying ordeals which our

leading growing district in southern France had to undergo, spinach, pansies and many perennial flower seeds are reported a disappointment by the growers. Favorable weather is much needed. With regard to the annuals, spring radishes, peppers, egg plants, etc., it is altogether too early to know much about the outcome. In many instances the first sowings have been destroyed by the frost and had to be renewed several times. Spring radishes have been transplanted under pretty favorable conditions and the growers are in hopes of a good crop. Some fields have been attacked by the flea, which, however, so far has only slightly damaged the plants.

Imports.

During the week ending May 30 imports were received at New York as follows:

H. F. Darrow, 38 cases plants, 10 tubs laurel trees.

J. Roehrs & Co., 33 cases plants.

Vaughan's Seed Store, two cases plants. To others, 82 cases plants, 34 pkgs. plants, 16 baskets plants, 24 tubs laurel trees, 482 bags clover seed, 24 bags, 48 pkgs. seed.

MARKET GARDENS.

Sweet Potatoes.

CHARACTER OF SOIL.

Sweet potatoes thrive on a moderately fertile sandy loam which does not contain an excess of organic matter. They are frequently grown upon almost pure sand, especially where the subsoil is a yellow clay. Soils containing considerable calcium or underlain with limestone are well adapted to the growing of the crop. Department of Agriculture experiments show the sweet potato is exceptional in that a fairly good crop can be grown upon soils that are too poor for the production of the majority of farm crops. Sweet potatoes yield a fair crop on the wornout tobacco and cotton lands of the south, especially when used in a rotation including some leguminous crop for increasing the humus in the soil. Like many other crops, the sweet potato thrives on newly cleared land, but the crop should not be planted continuously in the same place. With the sweet potato, as with other crops, rotation is the keynote of success.

Good drainage is essential, the original idea of planting upon high ridges being for the purpose of securing better drainage. The surface soil should extend to a depth of six or eight inches, and the subsoil should be of such a nature that it will carry off excessive moisture without leaching away the fertilizers applied to the land. Too great a depth of loose surface soil or an alluvial soil having no subsoil will produce long, irregular potatoes that are undesirable for marketing. Planting upon land having a loose, sandy surface soil underlain by a well-drained clay subsoil will tend to produce the type of rather thick, spindle-formed potato that commands the highest price. The depth of plowing is a prominent factor in the preparation of land for sweet potatoes, and on soils of too great depth before the subsoil is reached very shallow plowing should be practiced, leaving the soil firm beneath, against which the roots must force their way. If the surface soil is of insufficient depth, it should be gradually increased by plowing a little deeper each year or by subsoiling in the furrow behind the regular turning plow.

As already noted, the sweet potato will thrive on soils that are only moderately fertile. The root portion of the plant is the part having the greatest value, though the foliage and vines have some value as food for certain kinds of stock. It has been found that an excessive amount of organic matter in the soil will frequently produce an abundant growth of vines at the expense of the roots. It has also been noted that the potatoes will be small and the yield unsatisfactory on soils that do not contain sufficient organic matter to produce a fair growth of vine.

The use of stable manure as a fertilizer for sweet potatoes is recommended on lands that are deficient in organic matter. Heavy applications of fresh manure shortly before planting the land to sweet potatoes will stimulate not only the growth of weeds but also of the vines at the expense of the roots. Well-rotted stable manure may be used at the rate of 10 to 15 cartloads to the acre, spread broadcast or beneath the ridges and harrowed into the soil, but it is always well to apply the manure with the crop grown the previous season. By this method the manure will become thoroughly incorporated with the soil and become somewhat reduced before the sweet potatoes are planted upon the land.

Stable manure will be found most beneficial on worn-out soils, but on the more fertile soils its use should be restricted and the method of application carefully studied. In some sections where the organic matter in the soil is insufficient all kinds of vegetable matter, including manure, pine needles, corn fodder, straw, and stubble, are turned into the land to bring up the fertility. The sweet potato vines will go a little way toward keeping up the organic matter in the soil, but have a souring tendecy and should be accompanied with a moderate application of lime or plaster.

Leguminous plants grown as cover crops or in the rotation will serve to keep up the organic matter in the soil the same as stable manure. Sweet potato growers are coming to realize the value of crimson clover for use in the rotation in which sweet potatoes are grown. If the land is planted to corn, crimson clover may be sown in the alleys at the time the corn receives its final cultivation. This will provide a covering for the land during the winter and as the crimson clover starts into growth quite early in the spring a heavy crop is produced by the time it is necessary to plow the land for sweet potatoes. In order to secure the best results the crimson clover should be turned under not later than the appearance of the first blooms; if allowed to remain longer the stems become tough and do not decay quickly enough to be of benefit

If You Want a Really Successful Crop of Mushrooms use only

JOHNSON'S

MUSHROOM SPAWN

NOTE THE ADDRESS

JOHNSON'S LTD.,

44 Bedford Row, LONDON, ENGLAND.

FLORISTS have a splendid opportunity of raising Mushrooms by utilizing the waste space under the benches, and then utilizing the waste material of expended mushroom beds in growing flowers. Lambert's Pure Culture MUSHROOM SPAWN, the best spawn in the market, is sold by all leading seedsmen. A fresh sample brick, enough for a trial bed, together with illustrated book on "Mushroom Culture," will be mailed postpaid upon receipt of 40c in postage stamps. Address American Spawn Company, St. Paul, Minn.

to the sweet potato crop which follows.

The sweet potato is one of the few of our crops that thrive equally as well (or better) upon commercial fertilizers as upon stable manure. A fertilizer for use on the majority of sweet potato lands should contain 3 to 6 per cent of nitrogen, 6 or 7 per cent of phosphoric acid, and 8 to 10 per cent of potash. Every grower should make a study of the requirements of his soil and apply the fertilizer that will give the best results. Many growers purchase the ingredients and mix their own special fertilizers, or use a standard fertilizer as a base and increase the percentage of certain elements by adding high-grade elementary ingredients. Some soils require that certain elements should be in a more available form than others; in the case of nitrogen it is often desirable to have a portion of that contained in the fertilizer quickly available and the remainder more slowly in order to feed the plants throughout the season.

Hardwood ashes are desirable for use on sweet potato land and may be applied at the rate of from 1,200 to 2,000 pounds to the acre. The value of wood ashes depends upon how much they have become leached, but hardwood ashes should contain from 6 to 8 per cent of available potash. Wood ashes also contain considerable lime.

Where large quantities of any green crop are plowed into the soil there is a tendency to sourness, and occasional applications of from 1 to 2 tons of lime to the acre are beneficial. The presence of an abundance of lime in soils devoted to the growing of sweet potatoes hastens the maturity of the crop and increases the yield. On poor soils the lime and potash work together to produce potatoes of uniform size and shape, but on rich or alluvial soils the tendency is toward the production of over-large and irregular roots. The lime should be applied the previous season, or at least the autumn before planting the land to sweet potatoes.

PROPAGATION.

The more common varieties of the sweet potato have for a great many years been propagated by cuttings, or sets, taken either from the potatoes themselves or from growing vines, and as a result the plants have ceased to flower and produce seed. The greater portion of the commercial crop is grown from sets, or "draws," produced by sprouting medium-sized potatoes in a warm bed of soil. In the southern states the seed potatoes are frequently cut into pieces in the same manner as Irish potatoes and planted in the row where they are to mature. Where several plants appear in one hill they are thinned, and those removed are used for planting other land. In the south Atlantic and Gulf Coast states the sweet potato is frequently propagated by making vine cuttings. A comparatively small bed of seed potatoes is planted quite early and the sets so produced are used to plant a small patch from which vine cuttings are taken later by the cartload for planting large fields.

FISCHER'S GRAND FREESIA PURITY.

The finest Freesia ever offered to the trade and the only one worth growing. The flower heads are of very large size, and are of glistening whiteness and of thick, heavy substance, making its keeping quality superior to all others. The stems, always stiff, can be grown two feet and over, making this magnificent Freesia one of the finest decorative flowers; it can be used entirely alone in that respect or with other long-stemmed flowers. The greatest care is taken by us to keep this beautiful Freesia pure and free from all danger of mixing by carefully picking off all seed pods, not allowing one to ripen and drop its seed in the ground, where it will surely grow the next season and work disaster, as it does not come true from seed. So beware of buying stock that has been increased from seed. You will always find **Purity** here in all its purity. Send your orders early, for last year the orders far exceeded the supply. This year we hope to fill all orders and offer first and second grade bulbs for sale. Send for Price List. Delivery in early July.

RUDOLPH FISCHER, Santa Anita, Calif.

The Nursery Trade

American Association of Nurserymen.

J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y
Thirty-third annual convention to be held Milwaukee, Wis., June 10-12, 1908.

THE oriental poppy is easily the showiest flower of the week.

ROSA RUGOSA is now at its best and brightest as to the flowers.

THE P. J. Berckmans Co., Augusta, Ga., has many large landscape contracts in different parts of the south.

MANY western people would like to make the rose the flower for Mothers' day as they point out that May is rose month in the west.

AN interesting historical account, with numerous illustrations, of Milwaukee, the convention city, will be found on pages 980-981 of this issue.

WE noted the pretty white squill (Scilla hyacinthoides flowering freely in Lincoln park, Chicago, this week. This fine plant is worthy of greatly extended culture.

BRIDGEWATER, MASS.—The botanical garden which is being laid out for the use of the students at Normal is approaching completion. The site is east of Park avenue beyond the campus and the soil is being thoroughly prepared and trees and shrubs planted.

SPRINGFIELD, MO.—The Greene County Horticultural Society at a recent meeting decided that 60 per cent of the fruit crop had been killed. There will only be about 25 per cent of the Ben Davis apples left and the damage to peaches and other varieties of fruit cannot yet be determined.

THE annual meeting of the Vermont State Horticultural Society will be held in Montpelier in November during the legislature instead of in December as usual. The society will ask for legislation providing for a uniform packing of apples and correct labeling of all packages according to a standard of quality.

NORTH YAKIMA, WASH.—Paul Kruger was found guilty in the federal court here May 23 on three counts of an indictment of using the mails with intent to defraud the Washington Nursery Co. of commissions. He was remanded for sentence. He is said to be a nephew of the late President Oom Paul Kruger, of the Transvaal.

IN nearly every portion of the fruit belt in Georgia there is a heavy crop of peaches and plums. Peaches are already moving in carload lots from the southern part of the state and by the middle of June they will be moving in large quantities. The fruit is, in nearly all sections, comparatively free from curculio and is of good shape, but unfortunately some orchards have more fruit than they can bear and the growers have not taken the precaution to thin, consequently unless the weather continues most favorable there will be a large quantity of very small and unmarketable fruit. In orchards which have been properly thinned the peaches are in a very satisfactory condition at present. B.

DODECATHEON MEADIA is a good instance of a native plant being well adapted to cultivation. During the last two weeks it has been very fine in the herbaceous border.

HANKINSON, N. D.—The Hankinson Nursery Co. has just completed a fine little park of ornamental trees and flowers for the Soo R. R. Co. just east of the depot. This is one of 14 depot parks which the company has contracted to make for the Soo company, some of them as far east as Michigan. The company has just finished a very successful delivery of stock for spring planting at various points in the state and a big force of travelers started out this week to solicit business for fall delivery.

R. D. Underwood.

Secretary Jewell Nursery Co., Lake City, Minn.

Jewell Nursery Co., Lake City, Minn.

The Jewell Nursery Co., Lake City, Minn., is now one of the largest concerns of its kind in the northwest. It cultivates over 1200 acres in one body at Lake City, and ships annually 500 cars. The efforts of this nursery are largely given to the propagation of stock suited to the extreme northern country where hardy stock alone is adapted to the extreme conditions. For this reason The Jewell Nursery Co. takes pride in the fact that it grows practically its entire output of nursery stock. This fact is attested by the pay roll of the nursery force last year which amounted to nearly $75,000. Its business is secured largely through traveling salesmen, of which the firm has more than 600 working as far east as Michigan and as far west as Washington. It also has a growing business in the western provinces of Canada.

R. D. Underwood, secretary of the company, of whom we publish an excellent portrait, was born in Lake City, in 1877, and has been intimately associated with the nursery business all his life. His father, J. M. Underwood was associated with the late Dr. P. A. Jewell in the establishment of the Jewell Nurseries in 1868. In 1884, after Dr. P. A. Jewell's death, a stock company was organized, and in 1899 Mr. Underwood became secretary.

Destruction of Chestnut Trees.

New York papers give particulars, that seem to be well founded on facts, of a very bad state of affairs with the chestnut trees in the metropolis and vicinity. Thousands of trees, amounting in value to millions of dollars, are said to be dying, the victims of the chestnut canker (Diaporte parasitica-Murrill) for which there is no known remedy. Dr. Murrill is reported as saying that this pest means the practical extermination of the chestnut tree in the east, owing to the great fecundity of the fungus and the fact that its spores will enter the slightest abrasion of the bark high up on the trees or low down on the trunk. Speaking of the loss in the Botanical Garden Dr. Murrill said: "A conservative estimate of our loss in the garden will be perhaps $5,000 allowing $10 a tree, which is very low. We have lost many beautiful trees on the lawns and along the roads, large trees which had attained their maturity, which could not be valued at less than $100. We began immediately to plant trees to take the places of the chestnuts on the lawns and in the hemlock woods, where many of the chestnuts are dying. Other trees will grow up to take their place, and we can use the timber of the dead trees for posts, fuel—many things. The loss is not as great to us as it would be under different circumstances. There should be a law to prevent the shipping of our chestnut trees now to other states. I understand they have been shipped recently to California."

Dr. Murrill mentioned generally as the territory now covered by the diseased trees—Long Island as far as Huntington, up through New York to Poughkeepsie, north to Connecticut and Massachusetts, and south to Newark and Trenton, N. J., and Philadelphia. In the garden he pointed out the trees with bare, dead branches, some with the entire top of the tree dead, others having only a few twigs growing out of the lower part of the trunks, and these beginning to wither. The tiny orange spots of the fungus fruit could be seen in the bark, and there was a hollow sound as the bark was tapped. The trees were those which had been fine, healthy ones, some 60 years old and more, with the best of conditions as to location and soil, but hopelessly lost, as the most casual eye could tell. Experiments in the tree fungus are being carried on continually in the garden.

Leaf Blight of Trumpet Creeper.

The leaf blight of Tecoma radicans (Cercospora sordida Sacc.) shows on the under surface of the leaves as small, angular, olive-brown patches, either distinct or more or less run together, according to the report of the Connecticut Agricultural Experiment Station. The spore stage which forms these patches consists of short, dark, olive-brown conidiophores bearing lighter colored spores. The spores vary from linear to linear-obclavate, are smoky tinted, 4—12 septate, straight or somewhat curved, and vary in size. The injury to the leaf first shows on the upper surface as a yellowish discoloration, which in time may change to reddish-brown, but ordinarily it is not very severe. Two other species of cercospora have been described from the United States on this same host, but it is doubtful if all three are distinct.

Viburnum Carlesi.

This beautiful shrub recently received an award of merit from the Royal Horticultural Society of England, when exhibited by Sir Trevor Lawrence's gardener. It comes from Corea and has rounded flower heads of white or pink a good deal like those of Luculia gratissima. These flower heads are four to six inches across, compact, and borne at the ends of stiff, sturdy branches and the flowers give off a delicate fragrance.

Rheum Palmatum and Its Varieties.

It is quite probable we should find far greater use made of the ornamental species of rheum in the best aspects of "free" garden landscape if the genus possessed no economic value in the garden rhubarb. There is in these days less observance of the line that defines the garden of pleasure and the garden of profit; the introduction of the pergola and the herbaceous border into the realm of the kitchen garden has been mainly responsible for this, and in several gardens recently planned there is a distinct trend towards blending the artistic and material values to the advantage of both.

In what I may term "free" garden landscape the rheums can play a very important part, and they have this advantage over many other plants so used: They are ornamental from the first, and they precede practically every other plant, ferulas excepted, in their season of effective display. Distinctly the best rheum to employ in garden landscape is the palmate species and its color forms. These give us elegance of leafage and a greater rigidity of stem than any other, and if there is anything in the comparison to recommend them, they are less like the denizen of the kitchen garden than any other species I happen to know well.

In common with most strong herbs, they enjoy a rich soil: the deep alluvium generally to be found at the margin of natural brooks and ponds is excellent for them, and in such material they attain to tropical luxuriance of flower and foliage that would be impossible to secure by any other means. Their quick growth is greatly in their favor. A tiny seedling will, in the course of two years' growth, develop into a plant 12 feet high and two yards across, and a grouping of several such plants so disposed that their individual outline is well maintained from a distant point of view is one of the best possible features of artistic landscape.

Wherever there is a sheltered recess among common trees and shrubs, a treeless area by waterside or a wild garden in its broadest sense, one can recommend rheums for their many stately and beautiful features. Typical R. palmatum is an old-time plant, but rarely met with in good condition. It forms a clump of handsome leafage two yards across, the petioles lengthy and more than usually strong for a rhubarb; the leaves are palmately cleft, green, with ruddy veining, and there are several minor lobes that add much to the elegant outline of the entire leaf cluster. The stems are greenish and minutely mottled red, the flowers are literally in rope-like culms, clustered in the free, bract-enclosed, verticils characteristic of the common rhubarb, and they persist for many weeks, gradually changing from the creamy-white tint of the perfect flower cluster to the pink tint of the seed cluster. The tall shafts, slender petioles and elegantly lobed leafage convey no impression of the heavy, clubby character of the common rhubarb to my mind. One can, in fact, welcome them in the ideal wild garden where beauty of form and inflorescence, as distinct from that ornate and showy, should be a certificate for admission.

R. palmata flore-roseo is a new form, whose flowers are pink-tinted. It is very beautiful in the early stages of its growth, the leafage being of a deep ruddy hue, and the flower stems are ruddy always. Another form that is probably a garden variation of flore-roseo is that named rubrifolium. This plant excels in its ruby-red coloring always. The first leaf is gloriously colored and the last seed pod is crimson tinted. I have had a group of this plant for some years, and think it should find general favor. The leafage, stems and flowers are those of palmatum, but ruddy tinted throughout. Var. tanghuticum is the stag's-horn-leaved rhubarb. It is simply R. palmatum with the leafage much depauperated.

Seedlings vary a good deal in the coloring of their flowers, some are greenish, others cream-tinted, while many are pink. One or two seedlings may also show ruddy leaf coloring in the younger stages. The flower stems are comparatively slender, and are exceedingly tough, supporting verticils of erect-habited flower clusters that recall cimicifuga or astilbe. I have seen these rheums thriving in the coldest parts of Britain and in practically all kinds of soils. Provided they can have wind shelter and liberal feeding if the nature of the soil demands it, they will be found of great aid to the landscape gardener everywhere, for in them he will find plants that can take care of themselves, and which are ornamental throughout the growing season. —G. B. Mallet in Gardeners' Magazine.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York.

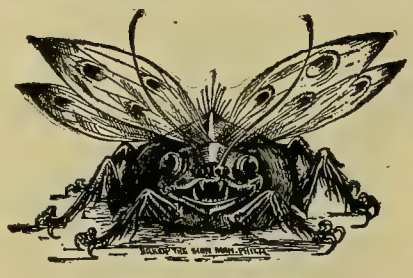
Nashville, Tenn.

TRADE GOOD.

The floral trade for the past few weeks in this city has been excellent. Following close upon each other were the funerals of several prominent citizens which exhausted the entire flower supply at the time. Two prominent physicians, brothers, Doctors Thomas L. and J. W. Maddin died within one week of each other. Both had practiced for many decades in this city and the floral tributes testified to the esteem and love in which they were held by the community. The flower supply has been good. The Ladies' Hermitage Association created quite a sensation by putting on sale on the streets wagon loads of peonies, which the ladies themselves handled. The blossoms were of the greatest perfection. They were cut from plants which had been allowed to grow undisturbed for more than 50 years at the Hermitage, strong, vigorous plants producing large handsome blossoms. From the Hermitage gardens also are obtained quantities of candidum lilies, which like the peonies have been undisturbed for years. The commencement season is on with us and this with the Decoration day creates a brisk demand for flowers. We have two Decoration days in this part of the country. The national Decoration day of May 30 being followed by the confederate Decoration day, June 3, which is the birthday of Jefferson Davis. For both of these occasions the outdoor supply of flowers is used, or contributions made from private gardens. There has been a very abundant supply of all kinds of outdoor flowers, the season being particularly favorable to them. Besides the usual supply of flowers in the floral stores sweet peas and gladioli are now in the market in great profusion. The growers have put out all their garden plants and have had a good season on it. All growers are now preparing for the long hot summer season which will soon be upon us, and the greatest activity is shown in all the different establishments.

M. C. D.

MINNEAPOLIS, MINN.—School gardens, to be planted and cared for by the children, are practically assured, at least in some sections of the city. This is in line with the campaign begun some time ago by the Nature Study and other clubs of the city. Theodore Wirth, superintendent of parks, is an advocate of the social garden plan and has offered to assist and to give suggestions to any who wish them.



Everybody Talks About It!

Salleroi Geraniums, for borders, strong plants	4.00
Summer Chrysanthemums, 3-in. pots	4.00
Ageratum, dwarf, best blue, 3 in.	4.00

Clematis, the true Jackmani, 6-in. pots, 3 feet, 35c to 40c.

Scarlet Sage or **Salvia,** Clara Bedman or Bonfire. Ours is the true genuine variety so much admired in all the capitals of Europe and America. Deep red medium tall varieties; free bloomers. Seeds of these famous varieties were gathered by myself in Zurich, Switzerland, the home of the Salvias. Price: 4-in., $7.00 per 100. Have 5,000 of these to offer.

Don't Forget We Lead the World in

MOONVINES.

Watch and be careful you don't buy Morning Glories for Moonvines.

We grow only the best varieties, hybrid or **Ipomoea Noctiflora,** for which we have had, for the past 20 years, a world-wide reputation. We ship every season, May and June, 20,000 to 25,000 plants into every state and territory in America, and in Cuba and Mexico. This Moonvine is much earlier than any other variety in existence; blooms freely, with very fragrant, pure white waxy flowers, and as large as a saucer. Price: 4-in. pots, nicely staked up, 30 to 36 inches high, $12.00 per 100; 2½-in. pots, $5 00 per 100.

Kentia Belmoreana, 5¼ to 5½-in. pots, 22-25-27 in. high, 50c to 75c; 4-in. 20 to 22 in. high, 35c to 40c. **Forsteriana,** 5 to 5½ in., 50c to 75c. Just received, per steamer Manitou, a consignment of larger **Kentia Forsteriana;** price, $1,00, $1,25, $2.00 to $2.50 each.

Araucaria Excelsa Glauca, spring importation, 1907: have only specimen plants left, 7-in. pots, 6 years old, 5 tiers, 25, 30 35 to 40 in. high, the same in width. $1.50, $1.75, $2.00 $2.50, $3.00 to $4.00 each. **Robusta Compacta,** $1.25 to $1.50 each.

Have just received from steamer, May 1, from Antwerp a big consignment of about 5,000 **Araucaria Excelsa,** of all sizes. Plants with 3 tiers, 8 to 10 in. high, 40c; 10, 12 to 14 in., 50c; larger sizes, 60c to 75c.

Bay Trees, just received, per steamer Manitou, 6 ft. high from top of tub, 30-in. crowns, $12.00 per pair.

All goods must travel at purchaser's risk only. Cash with order, please.

European Horticulture.

FROM THE BRITISH TRADE PAPERS.

A GOOD RHUBARB.—In Covent Garden, Dawe's Champion rhubarb was selling freely at top rates, 3s. per doz. bundles in May. In conversation with W. Poupart, of Twickenham, he speaks very highly of it from the growers' side of the question. The stalks are long, of good dark color, freely produced, and early. Competition, and keen competition, too, is the order of the day, and the above rhubarb is without doubt a leader.

GOLDEN-LEAVED MOCK ORANGE.—This variety of the common mock orange (Philadelphus coronarius) is less in stature than the ordinary form, but its main distinctive feature is that the leaves, when they are first expanded, are of a pleasing shade of soft yellow, which, seen in a mass, is very effective. As the summer advances the leaves gradually become greener, till in color they nearly approach the ordinary form. It is, therefore, evident that it should only be employed where a spring rather than a summer display is desired. The golden-leaved variety of Spiræa opulifolia behaves in a similar manner.

HYDRANGEAS

Fine plants, well flowered, good value in each size from 25c to $4.00 each.

ARAUCARIAS.

We have a specially fine lot of Araucarias—the plants at $1.00 each are extra value for the money.

Stem Rot in Herbaceous Plants.

A serious soil fungus was found last fall in a New Haven nursery doing considerable injury to a variety of herbaceous plants, especially to Valeriana officinalis and Pentstemon barbatus. The mycelium attacks the parts of the plant at or near the surface of the ground, frequently rotting off the stems. In the fall it forms subspherical reddish sclerotia both in the tissues and in the soil nearby. Pure cultures were obtained, says the report of the Connecticut Agricultural Experiment Station, and while the fungus grows luxuriantly, it has never produced a true spore stage. The sclerotia form as swellings at the tips of clustered threads, and are at first whitish, but soon turn reddish-brown on the outside. Their size depends somewhat on the character of the medium used in the cultures. In artificial cultures made from the sclerotia these give rise to similar sclerotia, but what they will produce in the soil has not yet been determined. According to Professor Thaxter, they are probably the sclerotia of some hymenomycetous fungus.

European Horticulture.

FROM THE FRENCH TRADE PAPERS.

RECENT EXPERIMENT WITH CHRYSANTHEMUMS.—E. Poiret showed last season at a French exposition some chrysanthemums showing the successful use of the annular incision. This operation, which is often practiced in grape culture, consists in cutting a ring about the stem of the branch experimented upon, one or two inches from its base, and 15 or 20 days after disbudding. This incision is said to advance the blooming period 15 to 20 days, and to increase the size of the bloom, as was shown by experiments on various branches of the same plant. Incisions were also made near the base of the plant, from which rootlets appeared after about a month; these new roots, covered with soil, were useful in adding new vigor to the plant. Needless to say that these incisions weaken the stems, which must be carefully supported afterward.

ANOTHER CHRYSANTHEMUM JOURNAL.—The French Association chrysanthemum growers have undertaken the publication of a monthly review devoted to the interests of their specialty.

GRAFTED ROSES.—Novelties.
Mrs. Jardine, Rhea Reid, Queen Beatrice.
The above, $6.00 per doz., 50 plants for $18.00 $35.00 per 100.

Cyrtomium Falcatum Mayi.

At the meeting of the Royal Horticultural Society of England held on April 14 last, H. B. May & Sons, Edmonton, exhibited a new crested form of the fern known in gardens as Cyrtomium falcatum, but which is placed by Dr. Christensen in his "Index Filicum" under polystichum. The plant has been the subject of change of nomenclature many times. It is placed by Hooker in his "Synopsis Filicum" under aspidium, and it has also been classed in other genera than those instanced.

Notwithstanding this confusion of names, the fern is a valuable species for garden purposes, and there are few that surpass it for the decoration of dwelling rooms. The species is perfectly hardy in favored parts of England, Wales and Ireland, but when grown outdoors the leaves are shed in the winter. The plant, however, soon recovers when warmer weather prevails, and quickly develops a new crop of its handsome leaves. Besides the new variety Mayi, there are many other forms and varieties of Cyrtomium falcatum.—Gardeners' Chronicle.

C. L. CAMPBELL,
Johnson Ave., SPRINGFIELD, O.

Fruit Growing in Chile.

Consul Alfred A. Winslow, of Valparaiso, reports that fair attention is paid to the growing of fruit in some portions of Chile, and with good success. He adds: "Were the same efforts made here as in the United States there could be equally as fine fruit raised. The climate is exceptionally suitable and a crop is practically sure, as there are no sudden changes in temperature to destroy the buds. There is a good opening here for a nursery, but the best way to make a success of it would be to establish a branch, as the people need instruction, as well as trees." [The names of several fruit growers in Chile are filed for reference in the Bureau of Manufactures.]

GERANIUMS

Good Standard varieties at $2.00 per 100 and up to Novelties at $1.00 each, from 2-in pots. Our collection contains nearly 300 varieties we will send 1000, 50 each of 20 varieties, our selection, for $18 50 this is a splendid collection to stock up on. We have a good assortment in 3-in. pots at $3.50 per 100.

A cordial invitation is extended to all interested in Geraniums to visit us during May and June to inspect our new stock houses, containing over 60,000 plants, and especially to see our new show house. In it there are over 300 varieties in full bloom, a splendid opportunity to compare the newer introductions with the old standards, and to select stock for next season. We will make a very liberal special prices on all orders booked during May and June for December delivery. We are at Cowenton on the B. & O. R. R. and at Chase on the Pennsy. We meet all trains.

PELARGONIUNS. In good varieties, in 3-in. pots $1.50 per dozen; $6.00 per 100.

DAHLIA PLANTS, from 2-in. pots at $2 00 to $10.00 per 100. We will send 1000 in 20 varieties, our selection, of good varieties in Cactus, Decorative or Show for $18.50.

HARDY CHRYSANTHEMUMS

A splendid collection of over 75 kinds. Small flowered or Button $2 00 per 100, Large flowered or Aster type $3.00 per 100.

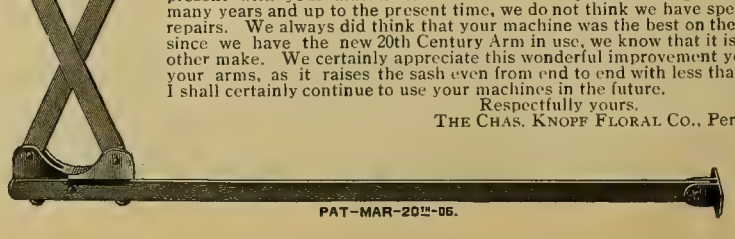
New Idea in a Ventilating Arm.

It has nearly two-thirds more power than the old style elbow arm. It costs no more than the other kind. Then why not use it? This arm will not twist the shafting pin. Write for catalogue and prices to

QUAKER CITY MACHINE CO., Richmond, Ind.



Richmond, Ind., May 27, 1908.

THE QUAKER CITY MACHINE CO., City.

Gentlemen:— We write this to inform you of our experience in the past and present with your machines. We have used your Challenge Machine for a good many years and up to the present time, we do not think we have spent one dollar for repairs. We always did think that your machine was the best on the market and now since we have the new 20th Century Arm in use, we know that it is superior to any other make. We certainly appreciate this wonderful improvement you have made in your arms, as it raises the sash even from end to end with less than half the labor. I shall certainly continue to use your machines in the future.

Respectfully yours,
THE CHAS. KNOPF FLORAL CO., Per Chas. Knopf.

Sweet Pea Damping Off.

During last July, when sweet peas were about one-third to one-half grown, occasional vines showed evidence of trouble by turning yellowish, wilting, and finally drying up entirely, says the report of the Connecticut Agricultural Experiment Station. An examination of such plants showed that they were more or less separated from their roots near the surface of the ground by a reddish-brown rot. Microscopic examination of the injured tissues revealed the presence of fungus, pythium or rhizoctonia, as the cause of the injury. Although the trouble was quite common, usually enough plants escaped to make a fair stand. As manure encourages the growth of such fungi, it should be used with care, especially at the surface of the ground. The cold, backward spring was apparently largely responsible for the unusual amount of damping off this year.

YOUNGSTOWN, O.—Business has been rushing right along, according to John Walker, of the Crab Creek greenhouses.

MELROSE, CALIF.—During June branches of the Juvenile Horticultural Society will be organized in San Francisco, San Leandro, Hayward and San Rafael. The society is increasing its membership rapidly. Branch Melrose alone has a membership of 200. Most of the branches hold weekly meetings at which children are instructed in budding, grafting, planting, transplanting, pruning, making of cuttings, etc. The great interest taken in these meetings by the children, by their parents and by the public in general, has surpassed all expectations and a great many instructors will soon be needed.

French and American "WHITE ROSE" Brand.
2 Hudson St., NEW YORK.

Tarrytown, N. Y.

The regular monthly meeting of the Tarrytown Horticultural Society was held May 29, with President Angus in the chair. The following were elected active members of the society: George Begg, John McGregor and Alexander Mark and one application was received. For this meeting J. W. Lindsay had offered prizes for the best exhibits of cut flowers from shrubs and hardy herbaceous plants. Two fine lots were exhibited by John Woodcock, gardener to General McAlpin, Ossining, and Alexander Maitland, gardener to Carroll Dunham, Irvington, which won in the order named.

The annual June exhibition will be held in the Music hall June 12, and we hope that every member will try to make an exhibit of flowers or plants and help to make this exhibition a success. Exhibition free to all interested. Schedules for this, also the November exhibition, are ready and will be sent to all interested. Apply to Secretary E. W. Neubrand, Tarrytown. Subjects and exhibits for next meeting will be "Shrubs and Hardy Perennials." L. A. M.

PITTSBURG, PA.—The $12,000 mausoleum which George E. Smith or "Pittsburg Phil" built for himself here years before he died was on Memorial day adorned in a most unusual way. William Smith of New York, a brother of the dead man, had a life-size floral horse mounted on his brother's tomb on Friday and dedicated by Mr. Smith and some New York friends on Saturday morning. One of the specifications for the floral horse was that it contain not fewer than 3,000 white carnations.

STOCK PLENTIFUL.

As usual, the lesson learned is that stock is rarely as scarce as predicted, the last day finding enough to do with. Even carnations, so freely prophesied wanting, were in evidence after the rush work was over. Roses were plentiful in all colors, and wholesaled from 2 to 8 cents, although the hot weather made smaller buds which did not make a large show in bouquets. Ten week stocks in pink, red, white and lavender shades were in good wholesale demand at 2 and 2½ cents, and of course made the best possible filling for bunches. Carnations were all prices from 2 to 5 cents wholesale, and the high figures were the cause of light buying on the part of the storemen. The very hot weather gave them a set back, very few flowers lasting at all well. White carnations were most in evidence at 2 cents and kept best of any. Spirea, candytuft and peonies complete the list of stock used. Lilacs were entirely gone.

May 30.—Business was slightly larger than last year, but on Memorial day fell away considerably, although there is no apparent reason for it doing so. This statement applies to cash receipts, most of the bouquet buyers paying cash before delivery, thereby making the day previous the busy one. The weather on Memorial day was inclement, several showers, all day cloudy and close.

BROOKLYN, N. Y.—More than 100 beautiful floral tributes were sent to the funeral of the late Peter F. Dailey, the actor.

EAST LIVERPOOL, O.—The Lake Newell Floral Co. has been renting temporary down-town quarters during the plant season to dispose of its fine stock of geraniums and other bedding stock.

IONIA, MICH.—Our Decoration day trade here was a record breaker. It seems that everything with the sign of a "posy" on it went. Both M. Weterling and D. L. Vincent had an excellent stock of geraniums. M. Weterling had an exceptionally fine lot of perpetual roses in pots, some of them with from 12 to 15 blooms and buds. The cemeteries here are a sight long to be remembered. M.

LOUISIANA RED CYPRESS CO. HIBERNIA BUILDING, **New Orleans, La.**

The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

ELSEWHERE in this issue will be found a very interesting illustrated article on "The Evolution of the Greenhouse."

Now that the time for firing is practically over summarize your season's experience with boilers and compare notes with manufacturers as well as with neighbors.

A New Greenhouse Gutter.

J. H. Rice, of Ashtabula, O., has patented a new greenhouse gutter that appears to be a move in the right direction. Mr. Rice some years ago, being confronted with the erection of a large greenhouse plant, cast about for something original and superior to anything he could find on the market in the construction of the gutters. Durability, stability and the ability to keep snow and ice off the roof were the points he was looking for and also to prevent the ends of the wooden sash bars from being exposed to the heat and moisture. Without going into details fully at this time we may say that according to the drawings and specifications Mr. Rice has submitted to us he appears to have accomplished his end.

There are specifically two gutters, the lower one forming also the plate and both, being exposed to the interior temperature of the house, keep from freezing. The under gutter may be arranged to run into the hollow tubes used to support the roof or all the water may be taken to a point. Being in short sections the expansion and contraction from heat and cold is well arranged for so that no buckling from heat or snapping from cold can take place. The roof of the houses is rendered absolutely drip proof as the culvert in the drip bar is continued in the shoe-like plate which ends the rafter and this carries the water to the inner or lower gutter. These brackets may be removed with ease for painting the rafters thus adding much to the life of the latter and every precaution as to rigidity, ease of fixing glass and absolute effectiveness as a gutter appears to have been taken. We hope to refer to this gutter again, giving fuller particulars, and in the meantime Mr. Rice will be pleased to hear from anyone interested and is prepared to execute any orders that may come his way.

Talks on Greenhouse Material

No. 7.

Did you ever go out to buy a horse from a stranger? You were pretty careful about making a deal weren't you? If you went to some old friend or a man that you knew was honest and he made you the right price you would have bought the horse with a feeling that you were getting your money's worth. And if you didn't get what was right you were pretty sure that it would be made right.

It is about the same kind of a deal when you buy greenhouse material. There are a hundred and one points to be considered and unless you are thoroughly acquainted with greenhouses and an expert judge of cypress you will not know whether you get the right quality of material or not. If you buy from somebody that you don't know you want to be careful. You can't tell a horse until you give him a trial and it's just the same with greenhouse material—you have got to use it for a few years to know whether you got value for your money, unless you are an expert. Why not buy from a firm that is recognized everywhere as a fair concern? We will be honest with you. Our cypress expert knows all the defects and they go into the kindling pile in place of into the greenhouse.

Our 96 page catalog shows many views of ranges that we have furnished in all parts of the country and tells all about our material. Copy of it will be sent anywhere free on request. Get one of these catalogs and then let us talk to you about our way of doing business and about the material which we make.

LUMBER
BARGAIN PRICES.

A wonderful opportunity is offered you to buy lumber and building supplies of every kind at ***Prices that will save you big money.*** Such a chance seldom occurs. Lumber for your house, church, barn, meeting house, crib, store, factory, and in fact, buildings of every kind. We can furnish absolutely everything needed in construction material. Have your carpenter or builder make a complete list of everything you require, including Lumber, Sash Doors, Nails, Roofing, Siding, Ceiling, in fact, anything you may need in building material or merchandise of any kind.

Send us your Lumber Bill for Our Estimate.

We bought at Manufacturers' Sale over 50,000,000 Feet of all kinds of Lumber and Finishing Material. We are making special concessions, to those who buy at once. Even if you have no use for this lumber at once, it will pay you to buy now. Our prices will save you 30 to 50 per cent.

We cheerfully invite inspection of our Lumber stock and will be glad to have you come to our warehouse and yards at Chicago, see the lumber we are offering, and you will recognize that it is all what we say of it; make your own selection and see it loaded. It is not necessary to come to Chicago; we can easily sell you by mail. We can quickly convince you of the wisdom of placing an order with us. Just send us your lumber bill, and we will easily ***"Show You."*** On application we will send copies of letters from customers who have bought. They saved money why can't you? Write us to-day. ***WE PURCHASED EVERY EXPOSITION, INCLUDING THE $60,000,000 ST. LOUIS WORLDS' FAIR*** ASK FOR OUR FREE 500 PAGE CATALOG, No. C. H. 47. IT QUOTES LOW PRICES ON BUILDING MATERIAL, MACHINERY AND FURNITURE.

NOW READY 1908 EDITION **Trade Directory.**

THE AMERICAN FLORIST

America is "the Prow of the Vessel; there may be more comfort Amidships, but we are the first to touch Unknown Seas."

Vol. XXX. **CHICAGO AND NEW YORK, JUNE 13, 1908** **No. 1045**

THE AMERICAN FLORIST

TWENTY-THIRD YEAR.

Copyright 1908, by American Florist Company.

Entered as Second-Class Matter Nov. 11, 1891, at the Post Office at Chicago, Illinois, under Act of March 3rd, 1879.

PUBLISHED EVERY SATURDAY BY

AMERICAN FLORIST COMPANY,

324 Dearborn St., Chicago.

Eastern Office: 1133 Broadway, New York, Philadelphia Pa., Robt. Kift, 1725 Chestnut St.
Registered Cable Address: Amerflo, Chicago.

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from the trade. Volumes half yearly from August 1901.

Address all correspondence, subscriptions, etc., American Florist Co., 324 Dearborn St., Chicago.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

OFFICERS—FRANK H. TRAENDLY, New York, Pres.; W. N. RUDD, Morgan Park, Ill., Secy.; H. B. BEATTY, Pittsburg, Pa., Treas. Next meeting at Niagara Falls, N. Y., August 18-21, 1908.

THE NATIONAL FLOWER SHOW.

CHICAGO, November 6-15, 1908.

Wm. F. Kasting, Buffalo, N. Y., is chairman of the general committee in charge. Chairmen of sub-committees follow:

EXECUTIVE AND FINANCE—Wm. F. Kasting, Buffalo, N. Y.
AMERICAN EXHIBITS—Ph. Breitmeyer, Detroit.
FOREIGN EXHIBITS—E. G. Hill, Richmond, Ind.
PREMIUM LIST—W. N. Rudd, Morgan Park, Ill.
ADVERTISING AND PUBLICITY—Geo. Asmus, Chicago.
LOCAL MANAGEMENT, PRIVILEGES AND CONSESSIONS—J. C. Vaughan, Chicago.
SPECIAL FEATURES—Otto G. Koenig, 6471 Florisant Ave., St. Louis, Mo.
RECEPTION—Aug. Poehlmann, Morton Grove, Ill.
AUDITING—J. A. Valentine, Denver, Colo.
TREASURER—I. C. Bertermann, Indianapolis, Ind.

The above chairmen have power to select their Various committees from the general committee of 50 or the members of the S. A. F. at large.

THE AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

Annual convention at the twin cities, St Paul and Minneapolis, Minn., August 11-14, 1908. JOHN F. COWELL, Buffalo, N. Y., president; F. L. MULFORD, Harrisburg, Pa., secretary-treasurer.

AMERICAN PEONY SOCIETY.

Fifth annual meeting at Ithaca, N. Y., June 19-20, 1908. C. W. WARD, Queens, N. Y., Pres.; A. H. FEWKES, Newton Highlands, Mass., Sec'y.

Danger Still.

Lives of fruit crops all remind us
That till June the frosts may kill,
And when they are left behind us
Bugs may work great mischief still.

SUGGESTIONS FOR PLANT GROWERS.

Dracena Indivsa.

The seedlings will now be fit for potting up and may be attended to as soon as room is made for them. Any good light position either on the benches in the greenhouse or in a frame will suit the young plants and they should be stood pot thick at first. In potting, or rather in standing the plants, keep all the strongest and best by themselves and gradually bring them down to the smallest as in this way watering can be more easily done. Repeat this each time the plants have a new stand during the summer and give them more room as the foliage develops. Shake out and repot any cut back plants and pot up the young ones raised from stem eyes and cuttings and treat them as advised for the seedlings. If any show signs of flowering pinch out the flower stems on sight.

Hardwooded Plants.

The majority of the hardwooded plants such as heaths, boronias, azaleas, metrosideros and others as they go out of flower are trimmed back a little and are now in most cases ready to go outside. The best position for azaleas is one slightly shaded, but the heaths, boronias and cape plants generally like the full sun. But only to the heads; the roots must be carefully protected and the best way to do this is to plunge the pots in plant protectors up to the rims in coal ashes. The rows should not be be arranged due north and south or east and west, but diagonally as in this way each plant gets its full share of sunlight and at various times in the day. The greatest care is necessary in watering this class of plant. One day's drying under a hot sun is fatal to a fine rooted heath but on the other hand a constantly wet sodden condition is to be avoided. Go over the plants carefully daily and water thoroughly those that are beginning to dry out and give enough to thoroughly soak every particle of soil in the pot. When driblets of water are given daily the most experienced plantsman could not tell with any accuracy how the plants are for water.

Oleanders.

The oleander is so frequently seen in a totally neglected condition, lying around in some dry, draughty greenhouse, that we are apt to forget what a fine plant it is when given reasonable attention. Cuttings will root at any time and soon grow into fine plants. All they want is plenty of moisture and a reasonable amount of warmth and the plants when rooted need the same conditions. While it would probably not pay to grow a large number of them, there are always customers who are looking for something a little out of the way of ordinary market plants, also many who like the oleander for association's sake and it is certainly worth trying out on a small scale as a side line. There is plenty of room now in the propagating houses and the present is as good a time as any to select cuttings from flowerless wood.

Primulas.

Neither the Chinese primulas or P. obconica like forcing and they cannot be hastened any by giving great heat, rather the other way round. What they all delight in is a cool, airy atmosphere. with sufficient moisture to prevent a parched, hard condition, and a light shade. By midsummer all the primulas, seedlings and old plants or divided up stock of the doubles, should be out of the houses and exposed in protectors or frames. If in the ordinary glass covered frames, the sash should be raised or removed altogether and a shade of linen stretched above the frames, high enough to be able to work the hose underneath it. We have frequently described the method of preparing the frames for this class of plant, so need only say be careful to stand the plants or flats level to take water and give them plenty of room. The primula, in most of its varieties, is a moisture loving plant and, provided the pots are well drained and an open, well divided compost is used, the plants need a lot of water when growing freely. It is the stunted, checked and badly rooted stock that becomes waterlogged and unhealthy when watered somewhat heavily. Endeavor

then to keep the roots active and the foliage will soon be spreading out and the plants capable of taking a very fair quantity of water. Never allow the plants to be stunted or checked in any way. As soon as the young seedlings are in the rough leaf let them be pricked off carefully with the seed leaves just resting on the surface soil and when watered they will just stand clear. Plants swinging or pricked in so deeply that the soil covers the heart cannot thrive. Although light spraying overhead in fine weather is helpful, this must be gone about with caution. The plants will not stand heavy douches of water. Have a moderate force on the hose, keep the finger tight on the nozzle, and spray freely all around and between the pots several times daily. Look over the plants for water daily about a couple of hours after the first damping and in dull weather keep the hose away from them. Follow up repotting as it becomes necessary by the various batches.

Bougainvilleas.

The cuttings struck recently may be potted up now, and when re-established may go outside in frames or be well spread out on a light bench in a cool house. Cut-back plants repotted recently will by now be making a good growth. Any chance flowers that appear should be picked off and every endeavor made to get a healthy, vigorous growth into the plants early so that this may be well ripened by exposure to the full sun and air later in the season. The young stock should be pinched often enough to produce about four or five good shoots and then allowed to grow at liberty unless a plant produces a shoot that takes an undue lead when this may also be pinched to balance the plants a little. Stock may also be planted out if necessary, but the check it receives in lifting and potting in fall probably outweighs any advantage over keeping the plants in pots. In either case practically outdoor culture is necessary and the growth must be consolidated as it is made and kept free of insects. Pot firmly in a good, sound, loamy compost.

Jerusalem Cherries.

When the plants are well established in 2½-inch pots and before they get hard or potbound, plant them out in a well prepared border. If allowed to get too hard in the pots, they usually commence flowering and then healthy growth is out of the question for a time at least. Growers who have handled these plants for years, have usually a favorite place for growing them, and those who have not should experiment until they find the spot that suits them best. In any case the soil should be in good heart, but not over rich and when planting must be well and firmly trodden to ensure a solid growth. The shoots must be pinched every two weeks until they show signs of flowering and, if dry weather occurs, must be frequently watered and sprayed to keep down insects and maintain a healthy growth. Just at flowering time a slightly drier condition tends to a better set of berries and by September 1 they should be well set. Never plant in a dense shade, but always in an open, sunny spot. The plants will be fit for lifting by the end of September or earlier in localities where early frosts are troublesome.

THE RETAIL TRADE

"BECAUSE a customer is easy and does not mind paying a good price, don't soak the life out of him," says a prominent, successful retailer. "Get a fair profit and give good service and the customer will be retained."

A Pretty Wedding.

A very pretty wedding was that of Miss Joella Holdsworth, of Passaic, N. J., who was married to Richard Irving Outwater, of the same city, June 4. A. Ehmann, of Broadway, New York, had turned the spacious house into a green and floral bower. The color scheme was pink and white, but there was a predominance of fresh green, great boughs of oak leaves giving the rooms a grove-like appearance. The ceremony was performed in the parlor under a large sea-shell bower of lilies and white sweet peas, with many tiny incandescent lights intermingled with the flowers. The bower, from the center of which hung a wedding bell of Bride roses, was flanked on either side with large towering palms, entwined with dainty ferns and foliage. A floral aisle in front of the bower added to the beautiful effect. In the dining room and hall was a profusion of tropical palms, rare ferns and smilax, interspersed with pink carnations and roses, large clusters of hydrangeas and groups of marguerites. All over the house, in every possible nook, were plants and flowers. The decorative effect was charming.

Miss Holdsworth was a charming bride. Her gown was of white chiffon cloth, trimmed with duchesse lace, and her veil was caught up with a wreath of white myrtle and orange blossoms. She carried a bouquet of Bride roses, showered with lily of the valley. Her maid of honor carried a bouquet of Killarney roses, showered with pink sweet peas. The bridal party were preceded by two flower boys, who carried baskets of pink and white sweet peas and strewed the bride's path with flowers.

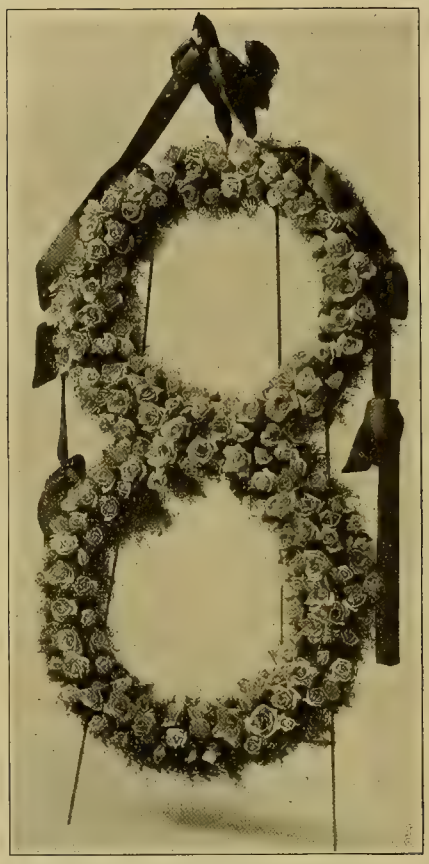

Figure Eight by The Rosery, Albany, N. Y.

Fine Figure of Eight.

The accompanying illustration shows a fine figure of eight made by Meaney & Tracey proprietors of the Rosery, 76 Maiden Lane, Albany, N. Y. It was made of Killarney roses with green satin ribbons, the whole standing on an easel and surmounted by a stuffed game cock; height, eight feet. It was made on order of friends of successful candidate for alderman who was seated after long and stubborn contest in the courts.

R. D.

An Artistic Violet Cross.

The accompanying illustration shows a very pleasing and artistic cross of violets overlaid with other choice flowers, by Carl Oberheitmann, of New York. There is nothing commonplace about this and the artist has departed a little from the usual method of treating such crosses with very good effect. Every flower shown has its natural pose. The cattleyas might be growing there, while the Madonna lilies and the spikes of cymbidium are perfectly natural and consequently graceful. It would be well if decorators would study this natural pose of the flowers they use a little more. They would get far better results.

A Fragrant Affair.

Recently a young man, accompanied by two ladies, blew into Levy's cafe, straight from Chicago, and before consulting the menu asked the head waiter to connect him by 'phone with some flower store, saying that for the hour or two he had been in Los Angeles he had seen at least 100 women with bouquets du corsage of violets, and that he wanted some for his two ladies, who had never before seen such beautiful violets in the middle of winter. He was at once put on to a near-by floral emporium and in a hurry ordered $6 worth. And what was the hilarious surprise of the young tenderfoot and his two companions when the dealer made his appearance with the 60 bunches of violets and the bill for $6. But in the happiest manner the recipient selected two of the prettiest bunches and sent 12 others to Prof. Stark and his soloists, who had just concluded the lovely flower song from Faust, and gave directions that the other 40 bunches should be placed on the tables wherever there were ladies throughout the main dining-room. "Why," said the young fellow, "I have paid $3 a bunch for violets on a winter's day in Chicago many a time, and about the same in London and Paris"—and there never was a trio more elated. And in order to impart a fragrant atmosphere all round Prof. Stark essayed two or three choice flower melodies and the head waiter saw to it that the water in the finger bowls was literally spread with violets and that a boutonnaire of the same modest member of the court of Flora had been artistically attached to the left lapel of the young gentleman's overcoat. It was truly a fragrant affair throughout.—California Tourist.

The Value of the Parks.

Whenever there is a talk of securing comparatively valuable land for park extension in our cities there is usually a bitter outcry against the "wasteful expenditure" by those whose views in life and the world are bordered by their own narrow horizon. It may be that they live in a fairly good neighborhood and within easy distance of a good park or open space where they can go at any time they wish. They never think of the constant creeping out into the surrounding country of the ugly suburbs, or of the untidy, badly drained streets and yards where a great majority of America's working class children have to spend their lives. They do not think of the effect for good upon the health and morals of the coming generation of America's future empire builders these parks and open spaces have. They do not even look upon it from a good business standpoint.

Look at the millions that London and other old world cities are spending now to break up the congested districts and allow the poorest children to run about upon land worth hundreds of dollars a square yard simply because in the days gone by people were too near sighted to see that these towns were growing and that every square inch of available land would soon be covered with houses and factories. Such people look upon parks as a means of exploiting horticultural or gardening interests, whereas there is no single item of civic expenditure that gives so much pleasure to so many people as the parks systems. The horticultural end of it is entirely subservient to the pleasures of visitors. The fine shrubberies and open lawns are there not for the glorification of the gardener but for the public to enjoy and as playgrounds for everybody, young and old and at all seasons of the year.

Just now the horticultural features of the parks all over the United States are at their best. The season has been a very favorable one for the growth of trees, shrubs and herbaceous plants and, although the bedding displays give a great deal of pleasure in their season it is to these perennial beauties that we can turn at all times and in all seasons. From the time that budding spring puts new life into the bark and shoots of the birches, all through the leafy summer season and on into the fall when the fire comes into the oaks and sumachs; even in winter when the grace of the hemlocks and spruces, cedars and other evergreen trees are most noticeable or when a hoar frost shows up the grand outline of the elms and beeches the trees are a constant source of delight.

Just now the deciduous trees and shrubs are at their brightest and best. The limes and basswoods are grand with their large leaves causing inviting shelter from the heat and sunshine and of these fine trees our park superintendents have wisely availed themselves to a very large extent. They are mostly trees of fairly quick growth and soon grow into handsome specimens. Oaks are, of course, slower but are among the finest of American trees for park purposes. The fresh green on these is delightful now while the elms, possibly the finest of all American trees, are grand this season, the rains having suited them well especially on the light and sandy soils that this tree delights in. Coming to dwarfer trees and shrubs we cannot help saying that in far too many cases there is too much mixed planting. A shrub to show its true beauty either as a single specimen or in the mass should not be mixed up with a dozen others. The effect is far better in every way when one kind is planted alone. Nothing can compare with a great mass of rhododendrons either in flower or in good foliage but how often we see a few plants in the middle of other and coarser growing subjects, their beauty to a great extent hidden and their health impaired. And this is true of almost any other shrub. Just lately the white Spirea hypericifolia has been very beautiful but in too many instances it can only be seen in small ineffective patches repeated all over the parks. That fine shrub, the golden leafed elder, if well planted grows into great billowy masses that are beautiful whether seen at a distance or close but as a single specimen stuck in the middle of a lot of green shrubs it looks commonplace. Still we do not wish to carp or unduly criticise the work of our park men who have a difficult task, especially in the northern cities, to keep things alive and growing.

The herbaceous borders are very attractive now and we are glad to see this class of gardening spreading. Although those in charge of many of the parks go in for a collection of species it is usually only the larger and more showy herbaceous subjects that are chosen. The German irises are splendid; planted in large clumps of the various colors and varieties they are a grand feature now everywhere to be closely followed by the peonies, the finest herbaceous plants perhaps in existence. Large showy beds of Papaver orientale are popular with the public the immense showy red flowers being well shown up by the graceful, fernlike foliage. Dictamnus Fraxinella and its white variety, the beautiful green and variegated leaved funkias and a number of choice hardy lilies are also to be seen. Among the smaller subjects now flowering are the pretty Primula Sieboldi, some of the dwarfer lychnises and the beautiful Myosotis palustris. The American cowslips (dodecatheon) are varied in color and pretty and there are dozens of other fine plants flowering early this month and serving to usher in the

ARTISTIC CROSS BY CARL OBERHEITMANN, NEW YORK.
Violets, Orchids, Candidum Lilies, Roses and Foliage.

season of the rose which is rapidly approaching. There is something to be seen at all seasons in short and at no time of the year are the various beauties of the parks more apparent than in leafy June.

Paris Spring Show.

The annual spring show of the National Horticultural Society of France was held May 22-29 in the large greenhouses on the Cours la Reine, Paris. There was a very large schedule, comprising 370 different classes and the display was a most attractive one and well patronized by the Parisian public and numerous visitors to the gay capital at this season of the year.

MAY EXHIBITION OF THE FRENCH HORTICULTURAL SOCIETY.

The show is approached by a large promenade, the entrance to which is just beyond the handsome Alexandre bridge. All the way along the promenade were large numbers of trained fruit trees, beds of hardy flowers, ornamental shrubs and a multitude of garden accessories, such as greenhouses, garden pottery, heating appliances and the like—quite a large exhibition in themselves.

Inside the first large greenhouse there was a grand display of color. We cannot, of course, particularize, for the number of exhibitors and extent of the show were far too great to permit of detail. Roses formed a conspicuous feature, the leading exhibitors being the well known house of Leveque & Son, Ad. Rothberg, M. Geo. Boucher, M. Defresne, and Aug. Nonin. Several of these, besides showing fine plants of the ordinary show types, also had good examples of the polyantha sorts.

Begonias were fine; the tuberous and also the foliage varieties were in most cases done well, M. A. Billard, Férard, Vallerand Freres and E. Cappe staging excellent lots. A magnificent display of Gloire de Lorraine came from Robt. Lebaudy, a sight practically unique in our experience. A lovely display of color was caused by the zonal pelargoniums. The flowers are not shown cut, but only pot plants are staged, and the varieties are massed according to color. M. E. Poirier had a wonderful display in three different beds, arranged on the ground floor. André Charmet and Paul Féron showed novelties. M. Barillet had a good lot of fancy pelargoniums.

Azaleas and rhododendrons came in immense numbers from the two well known firms of Croux & Son and Moser & Son. Some of the latter were gigantic plants, covered in flower in the greatest profusion. Geo. Boucher, a well known grower of clematis, showed a good lot in numerous varieties. Hydrangeas also were in good form, and there were several important collections staged. Orchids were exhibited in two separate side rooms, not in large numbers, but there were some good exhibits from growers of repute like C. Beranek, A. Regnier, Maron & Son, Robt. Lebaudy, etc.

Hardy flowers, such as pansies, Iris Kaempferi, poppies, tulips, lilacs, peonies, anemones, carnations, were staged by many exhibitors. Dinner table decorations and floral compositions by the famous house of Lachaume of the Rue Royale, and E. Devrie. Vilmorin-Andrieux & Co. had a grand display of all kinds of hardy flowers and also a charming water garden, consisting of rockwork and a pool, which lay between two neatly arranged grass lawns, studded with various aquatics and others.

Ch. Molin exhibited water lilies in tanks. Ornamental foliaged plants were shown by A. Nonin, M. Chantrier, who had some fine crotons, M. Emile Morel and Cordonnier & Son. Vegetables were shown in immense variety by Vilmorin-Andrieux & Co. in four huge groups. The Société Mutuelle des Jardiniers also made an excellent display in this line. Fruit, chiefly grapes, peaches and nectarines, came from the Forceries de Somain, the Forceries de la Seine, Alb. Mercier and Cordonnier & Son. Provision was also made for the exhibition of horticultural publications and there was an interesting art gallery of over 400 pictures in oil and water color, principally of fruit and flowers.

P.

Burpee on Paris Flower Shows.

W. Atlee Burpee, who is now in Europe, writes as follows concerning Paris flower shows:

"I was fortunate in spending May 25 in Paris and vicinity. In the morning, M. d'Estienne showed me the exquisitely beautiful Vilmorin Memorial now on exhibition in the Salon, which I trust many another American may have the pleasure of seeing, not only now, but when it is placed permanently in a suitable park location. I then had an unexpected treat in viewing the Cour-La-Reine exposition of the Société d'Horticulture de France. By far the largest of the many fine exhibits and most notable was that of Vilmorin-Andrieux & Co. I could not have believed it possible that any firm would go to so much trouble and expense for an exhibition of one week; in fact, never have I seen at one time and in any one group such a variety and grand display of growing flowers from seed made by any firm, even at a world's fair.

"I am sure that many readers of the AMERICAN FLORIST will agree with me in wishing that we could in America have spring exhibitions, where some of our leading firms would be willing to attempt such educational work in horticulture for the masses. The extent of the Vilmorin exhibits is the more remarkable when it is considered that, having won the grand prize last year, they are not allowed to

MAY EXHIBITION OF THE FRENCH HORTICULTURAL SOCIETY.

VILMORIN-ANDRIEUX & CO.'S EXHIBIT AT THE MAY SHOW OF THE FRENCH HORTICULTURAL SOCIETY.

enter into competition for same again for five years."

The exhibit of Vilmorin-Andrieux & Co., to which Mr. Burpee refers above, occupied a large room, in the central part of which stood a rock covered with such alpines and plants as Erinus alpinus, Dianthus neglectus, gnaphalium, leontopodium (edelweiss) Heuchera sanguinea, Cerastium tomentosum, Asperula odorata, Saxifraga Hibernica, Iberis Gibraltarica, statice, nasturtiums, etc. From the rock rose a spring forming a rivulet (in which grew a few water lilies), winding with little falls through a miniature lawn, on which were interspersed, either solitary or in groups of a few plants, Primula Japonica, Impatiens Holstii, Saponaria Calabrica, Potentilla Pyrenaica, Tritoma ruffa, Centaurea maritima, Lavatera arborea variegata, Nycterinia selaginoides, silene, statice, etc. On the right side of the rock and a little higher up, was a large vase, filled with the imposing flowers of Eremurus Elwesi and E. Himalaicus, the base holding the vase being surrounded by fine groups of the striking, fiery red tulip poppy and Chrysanthemum segetum Etoile d'Or.

Banked up on the right side of the little lawn were arranged most artistically groups of Amaryllis vittata hybrid, of Lilium fulgens atrosanguimeum, L. Thunbergianum biligulatum, L. croceum umbellatum, winter stocks, large flowering bright red, Gilia dichotoma, associated with Centaurea depressa, the large blue flowers of which rose well above the crowded white flowers of the gilia, Nemesia strumosa, scarlet verbenas, single pink pyrethrums, pansies, mimulus, Begonia semperflorens, Leptosyne Stillmanni, very early Parisian asters, etc., the outside being margined with the compact bright yellow flowered Gamolepis Tagetes. The base of the eremurus filled vase on the left side of the rock was hidden by clumps of sweet peas and climbing nasturtiums. Banked up on the side were fine collections of Iris Germanica, hybrids of Aquilegia coerulea, ten-week stocks, Iris Kæmpferi, intermingled with Lilium croceum and L. Hansoni, Venidium calendulaceum, Kaulfussia amelloides, etc.

In front of the little lawn were staged cut flowers of the beautiful Gerbera Jamesoni, the front border being made of the well known French marigold, Légion of Honor. All around the walls or partitions of the room were massed annuals and perennials in the greatest variety, either bamboos or kentias or green trellis being used as background. In the trellis was a little bay with a window case, in which grew some verbenas and climbing nasturtiums.

The collection around the walls included fine specimens of Chrysanthemum segetum Gloria (pure white), C. segetum Etoile d'Or (Golden Star), Papaver umbrosum, Digitalis gloxinioides, Lupinus polyphyllus, Schizanthus papilionaceus, Anchusa Italica, Chrysanthemum coronatum, double white, carinatum Burridgeanum, Polemonium grandiflorum, Centranthus macrosiphon, Venidium calendulaceum, Calendula, double, Petunia Superbissima and Rosy Morn, Cineraria polyantha, hybrid mixed, Shortia Californica, etc., the charming Nycterinia selaginoides and the compact Virginian stock being used as borders.

In the same room Vilmorin staged two large beds of well grown stocks. In other parts of the exhibition he displayed fine lots of cinerarias, calceolarias, petunias, also a large collection of vegetables, including peas, beans, potatoes, peppers, cauliflowers, tomatoes, cabbages, spinach, radishes, kohlrabi, cucumbers, leeks, endives, lettuce and beets.

Paris.

May 26.—Flowers in our market are just now a glut. Roses Caroline Testout and Captain Christy, grown around Paris, are selling at from 30 cents to $1 per dozen; Frau Karl Druschki, Paul Neyron, Ulrich Brunner and Liberty at from 20 cents to 80 cents per dozen; Mme. Abel Chatenay and Kaiserin Augusta Victoria at from 30 to 60 cents. Second season Riviera grown Frau Karl Druschki and Ulrich Brunner sell at from 15 cents to 30 cents per dozen; Marie Van Houtte and Paul Nabonnand at from 5 cents to 10 cents per dozen. Safrano is very cheap. Lilium Harrisii is selling at $1 a dozen, L. longiflorum album and rubrum are a little cheaper. Carnations from the south are worth about 10 cents a dozen. Violets are scarce. Bedding plants on the market are cheap and not selling well on account of the inclement weather.

Among recent novelties is a cineraria, which created quite a sensation at the French National Horticultural Society, at Ghent, and wherever Vilmorin staged it. It is of a bright scarlet color, very different from the usual shades known in cinerarias to date.

PARISIAN.

BROOKLYN, N. Y.—Max O. Jordan and wife, of J. M. Keller Co., this city, sailed for Europe June 3. They expect to be away until September.

CROMWELL, CONN.—The A. N. Pierson Co. has filed a certificate of incorporation. It is capitalized at $200,000, and it will take over the extensive flower business now operated by A. N. Pierson. The incorporators are Andrew N., Margaret G. and Wallace R. Pierson.

CHRYSANTHEMUMS

KEEP the surface soil stirred around the early planted chrysanthemums for exhibition blooms.

NOT the least of the many merits of Ivory is its comparatively small foliage which allows of moderately close planting.

WE would appreciate the favor if growers of experience would inform us what varieties they are planting this season as the information will be valuable to those of less experience.

Early Flowering Varieties.

The main thing in connection with the culture of the early flowering varieties of chrysanthemums is to lay plans so as to be able to select the buds at as early a date as possible which with most of the very early bloomers is somewhere around August 1. To give the plants a chance to produce buds at as early a date as this of sufficient strength to properly mature into perfect blooms. early planting of the stock must be resorted to. It is time this work was receiving attention and all should be in the permanent quarters by June 10 or soon after. Another very important point to bear in mind is that it is necessary, for early varieties particularly, to have as light and airy a place to grow in as can be given them to allow them to properly ripen up their wood early. If they are planted in quarters where a close, damp atmosphere is maintained they take on a long jointed, soft growth which is very difficult to ripen up to produce early flowers.

At one time we had a notion that if we could increase the depth of our benches to allow for more soil better results would be obtained with less work in caring for the plants, but our experience of late years has convinced us that the opposite is the case, therefore our aim now is to use a good stiff, shallow soil confining the roots to as small an area as will properly carry them through the hot weather and with the early flowering sorts we consider that four inches of soil after it is well firmed is ample for the best results. The distance apart for planting the early varieties is governed to a certain extent by the width of the beds. Where an extra row can be added by planting a little closer together across the bench it can be done, but eight inches apart lengthwise of the beds should be the rule. We are not in favor of mixing fresh manure with the soil at time of filling in. A compost prepared last fall comprising one part of manure to three of soil will fill the bill nicely. If, after a thorough mixing, this does not seem sufficiently rich, rather than add extra manure I would advise spreading a thin layer on the bottom of the benches before bringing in the soil.

We are gradually drifting away from applying fertilizer in a liquid form, using in its place the dry pulverized article altogether which puts into the soil a results obtained from early varieties depend mainly on being able to take the buds at the right time. After this we must use good judgment in selecting the kinds to grow and the number of each color. One great drawback we have to contend with is that nearly all of the early pink varieties are not just right in color to sell readily and after the novelty of their early appearance has worn off they are inclined to drag. Good white and yellow are by far the

Peony Rubra Superba.

best sellers but they must be of a high grade order to compete profitably with the aster and other outdoor flowers, particularly in seasons when the early frosts hold off. Figure that plantings of the early kinds are not beyond what can be disposed of before the second earlies

Peony Festiva Maxima.

come in these being generally of a higher order both in color, texture and durability.

C. W. JOHNSON.

GRAND FORKS, N. D.—E. O. Lovell says the florist's business is one line that is constantly growing and for each season and important event the grower and dealer need to make larger preparations. He claims that for the florist there are few dull weeks in the year and these are welcome as affording needed rest.

THE PEONY.

Peonies at the Peterson Nursery, Chicago.

The present is peony week at the Peterson nursery, Chicago, and although about 8,000 flowers had been cut on June 8 the next day there was a grand display of all the fine kinds for which Wm. Peterson is justly famed. We do not aim at giving a complete list of the varieties grown. Mr. Peterson has reduced his collection by constant and ruthless suppression of all varieties that are not distinct or in some way superior to anything he has, consequently the greatest variety of choice flowers can be seen here with the minimum number of varietal names. The earliest flowers were getting past their best, but the later ones were grand when we called. We have on previous occasions noted how carefully the labeling is looked after here and what a lot of trouble and expense is gone to to ensure absolute truth to name in these perfect stocks.

A case in point may be noted now. That beautiful variety, Golden Harvest, is well known as one of the most constant and excellent varieties and an English firm sent out Duchess of Somerset, supposed to be an improvement on it. This has been tested here for several years and although the trials are not exactly complete, there does not, at present, appear to be sufficient distinction between the two to warrant the new comer being added to the collection, and unless this is found to be the case Duchess of Somerset will have to go. These trials of expensive plants over a series of years cost a lot of money and trouble, but that it eventually pays is evident by the class of orders Mr. Peterson is now receiving—not for a dozen or 100 of mixed peonies, but for selected varieties of the choicest and best in each class. Growers have had enough of buying mixed rubbish and varieties not true to name, and they are finding out that it pays them to go where they know they can get what they ask for.

Perhaps the finest sight of all the varieties at the time of our call was a grand breadth of the good old Festiva Maxima, consisting of 500 fine five-year-old plants, every one covered with flowers. For several days previous about 1,500 flowers per day had been cut from this lot of plants, but they were still very fine. Another grand thing from a landscape or border point of view is Gloria. The flowers are pink and very beautiful, but they do not all come double. It is of a sportive character and would not be considered a good florists' variety, but a long line of healthy, vigorous plants covered with the delicate and artistic flowers was a sight to remember, and there are probably few to beat it for a fine display on the plant. Another distinct and pleasing thing is Mikado, a variety with golden yellow petaloid segments in the center, that look like a bunch of stamens, and a bright crimson border. Close by and in marked contrast is the beautiful old Pæonia albiflora, the parent of many of our finest florists' varieties. It is very beautiful, but not, of course, grown much as a cut flower on account of its lack of petalage.

As to the varieties grown here for cutting and for sale to florists and others, they are simply superb. As a fine early pink Sarah Bernhardt holds a high place. It has finely formed, clear colored flowers of large size and deliciously fragrant.

Edulis Superba is a deeper color but also a first class flower and fragrant. M. Jules Elie is in shape like an immense incurved chrysanthemum, with a frill of guard petals, and is a very fine thing for cutting, the flowers a bright effective shade of pink or rose. Marie Lemoine is about the latest white and is not yet at its best and the same may be said of La Tulipe, which has its charming flowers edged with rose. Madame de Verneville is a beauty, the large, pure white flowers very fragrant and showy, a fine seller. Madame Forel is a deep pink of good form and substance, but the palm in the clear pink shades has to be awarded to the variety Livingstone, a grand late variety, very fine and strong growing with fine stems. This is already an exceedingly popular peony and everyone wants it who grows for cut flowers. Lady Bramwell is another grand pink, the color very clear and telling.

Coming to the darker reds are noted Mme. Bucquet, a deep and excellent shade and a fine flower, but by far the deepest colored of all is the rare and beautiful Martin Cahuzac. Probably Mr. Peterson holds the largest stock of this notable kind in America, as there is very little of it in cultivation. The flowers are large and very showy, the color being the deepest, almost black crimson. In striking contrast to this is the old Queen Victoria or Whitleyi, still one of the finest keepers and shippers and well worth a place on all counts, its flowers white with a distinct pale lemon yellow zone in the center. Delicatissima is a lovely clear shade of pink, like Enchantress carnation, and a fine thing for cutting or lawn work. These are only a few of the most striking kinds noted in a hasty run through the plants this week. Many are of necessity omitted that have probably as good points as those mentioned, for nothing is kept long in this famous collection of some 300 varieties if it has not some sterling qualities. Orders for all the best varieties and inquiries are more frequent than ever this year and there is no sign of anything but increased popularity, both as a cut flower and a lawn and border plant, for the herbaceous peony.

Two Notable Peony Farms.

A. KENNICOTT & SON, GLENVIEW, ILL.

It would be hard indeed to imagine a fitter setting for any horticultural undertaking than is that primitive beauty and natural retirement of the Kennicott homestead. Here the great native trees and the clear country skies shut the little colony of dwellers and workers in upon itself with not a suggestion of the big, teeming city life of Chicago which lies so near by as to be within rather easy driving distance.

It was formerly, however, one of the great highways of the Indians, this place having long been known as the Grove portage, because here the Pottawatomies, for so long the only inhabitants of this lonely section, carried their canoes from the north branch of the Chicago river over to the Desplaines. The Kennicotts have always been heartily averse to felling any of the native trees, and the place still appropriately bears the name of The Grove. Away back from the road among the hickories and the burr oaks snuggle the cottages of various members of the family.

Dr. John Kennicott, the friend of Asa Gray and himself a botanist and horticulturist of repute, moved to The Grove in 1836 and acquired his title to the property directly from the government. At first he was only the doctor and the naturalist, traveling on horseback as far as old Fort Dearborn to care for his patients, counting as such not only the sick settlers, but the sick folk of dusky skins as well. Long was he the proud owner and rider of "Old Pottawatomie," an Indian pony presented to him by the tribe of that name.

As the country became better settled Dr. Kennicott started his nursery. The eldest of his sons, the late Maj. Amasa Kennicott, inherited his father's love for flowers, and it was he who practically developed the industry of growing peonies for the cut flower market. Since the major's death a little over a year ago the enterprise has been carried forward in turn by his son, Walter Kennicott. At this time of the year he is assisted by his brother, Ransom, of R. E. Kennicott & Co., Carbondale, Ill. Carbondale being further to the south and the peony crop there coming about three weeks earlier, the two brothers are able to work together at both places.

At the time of our visit (June 5) the peonies were fast coming into just that degree of development that long experience has proved best for cutting for market. This has to be judged to a very great nicety as a large proportion go directly into cold storage, and buds too tight will never open while buds at all open (in fact any more than just showing color) will not keep. Already eight or ten pickers were busy. The blooms here are bunched as they are picked, right in the field, the Kennicott's claiming they can secure greater uniformity in the bunching in this way than by picking buds and open flowers all together and then bunching them in the packing shed. In fact one thing that distinguishes the Kennicott grown stock is the fine regular bunching.

The best leading varieties are grown. The Officinalis group gives some of the best paying commercial flowers grown. Fragrans, Whitleyi, Von Bombach, Col. Kidder, Festiva paschalis (the Passover peony), Festiva Maxima and Dunlap (a dark red), and Col. Kidder (white with lemon center), are also largely grown.

On the Chicago market it is hard to learn from the wholesalers much about the varietal names of the peonies they sell, and the reason is that the growers themselves don't know. Originally the Kennicotts and the Klehm brothers of Arlington Heights secured a large importation of roots together. The Kennicotts carefully recorded where and how they planted the numerous varieties and the book was destroyed in a fire. The Klehms thought to keep track of their varieties by labels put in the ground, and the floods came, or perhaps careless cultivators and pickers, and soon there were no stakes. Consequently there was no record of the origin of any of the older varieties. Then came the long, slow process of trying out the plants that were in the ground. One day Chas. A. Samuelson, the Chicago retailer, saw a pink peony he much admired and found he was able to sell to advantage, and this became known and is yet known on the Chicago market as the Samuelson pink. Another similarly became known as the Smythe pink. The early Officinalis was long known as the Wienhoeber pink. Another popular variety is the Three L Pink, the three l's being large, late and light.

KLEHM'S NURSERIES, ARLINGTON HEIGHTS.

John Klehm, like old Dr. Kennicott, was another pioneer settler who took advantage of an early start in the new country around Chicago to build up a thriving nursery business. In 1856 he bought one acre of land and planted trees and shrubs. Soon, by energy, industry, thrift and economy, he acquired another parcel, and soon again another, until at the present time there are 150 acres under cultivation, planted largely to fruit and shade trees, ornamental shrubs and bulbous stock. Then, too, there are about 40,000 square feet of glass given to the growing of cut flowers. Scattered among all these broad acres are about eight acres of peony gardens, growing almost exclusively for the cut flower trade of the Chicago wholesale market, the Kennicott Bros. Co. and Percy Jones handling the output. Mr.

A BED OF PEONIES.

The crop this year is not a full one judged by the yield of other seasons. While there was a very fine showing of buds, Walter Kennicott estimated his crop at about one-half of what he calls a "good" crop. But there is never a "good" crop at this place, unless there is a record-breaking yield on one or another large patch. This year a frost nipped some of the varieties just as the outside protecting leaves left the buds to the tender mercies of the weather.

Klehm is now 74 years of age and is still hale and hearty, and takes an active interest in the business, though much of the management and work has now devolved upon the sons, George, Charles and Henry. They report having filled 5,000 orders this spring, from small to carload lots.

All told, about 150 kinds of peonies are grown, but the main reliance is on such commercial successes as Whitleyi, Festiva Maxima, Festiva Paschalis, the so-called Sarcoxic Pink, the Dunlap Pink, Early Rose, Late Rose (Beaconfield), Officinalis Rubra, Officinalis Rosea and Major Kennicott's well-known Three L Pink. The crop this season has not been a heavy one. Last season was an exceptionally good year for peonies, and in consequence this season (the alternating one) has seen much blind wood. Peonies, here as elsewhere, were generally slow in starting. Festiva Maxima just beginning to open its buds June 5, but the warm weather following that date brought them on apace, and it was anticipated that about three days would see the main crop off.

House Cleaning.

After taking the old soil from the benches, take a trowel or a wire brush and scratch off all the soil that sticks to the sides and bottom; then sweep off clean with a broom. Scrape the entire surface under the benches clean and take all out to the rubbish pile. Before going farther with the benches go thoroughly over the heating pipes and see that they are in perfect condition for another season. Give the benches a good scrubbing with hose and brush or broom, and when dry carry out any repairs that are necessary. Give the house a thorough fumigating with burning sulphur at night and keep it closed tight all night. The next day spray over the surface under the benches with extract of tobacco; give the benches a good heavy, hot, lime wash, but before doing so, a good coat of crude petroleum or crude oil helps to keep pests away all season.

After the benches are all planted, again scrape clean underneath and give a good sprinkle of air slacked lime under benches and over walks and the house will be rid of pests and clean and sweet. This takes a little more time than some may think is worth while but it pays for itself many times over during the season, for you can smell the difference between a thoroughly clean house and one that is only half done. What is worth doing at all is worth doing well.

Monsieur Abel Chatenay.

American horticulturists who go to Paris during the present summer, and who visit the Salon should not fail to look out for the picture, No. 864, by Leon Armand Hult, entitled "Portrait de M. A. C———." This is a speaking three-quarter length portrait of the highly esteemed M. Abel Chatenay, the secretary general of the National Horticultural Society of France. No one personally acquainted with the gentleman could possibly fail to recognize it, in spite of the anonymous title. P.

A NUMBER of points in Kansas are isolated at present on account of the floods. Conditions in Oklahoma are reported improved somewhat, but the express companies still accept shipments at owners' risk.

To Be Done Now.

IN THE GREENHOUSES.

Shift on young plants of Begonia Gloire de Lorraine and others.

Allow a short rest for smilax benches recently cut down before starting up again.

The flower buds should be forming in the azaleas at the time they are taken to the open air.

Choose cool, moist evenings rather than dry, hot or windy ones for fumigating.

Cineraria seed for the earliest plants may be sown now.

Seedling Jerusalem cherries should have attention regularly. A check now is not easily got over later.

Cuttings of the flowerless shoots of hydrangeas struck now will make good stock for next season.

Continue to strike poinsettia cuttings until sufficient stock is obtained.

Save a number of lobelias in flats or pots to be cut over for stock plants in August.

IN THE STORE.

Ware and sundries of various kinds help to keep the interest going when cut flower sales are quiet.

The gladioli hybrids are fine for the base of large standing or pedestal wreaths.

There is scope for much originality in the making of wedding bells.

The sheaf bouquets of flowers carried on the arm are again popular.

Richmond and other roses should be obtained cut close now or they open out at once.

Gypsophila paniculata is a charming addition to sweet pea bunches or corsage bouquets.

OUTDOORS.

Choice bulbous subjects must not be cut over after flowering but allowed to complete their natural growth.

Thin out the bush honeysuckles a little after flowering, especially where they are crowding other things.

Plant tuberous rooted begonias near shrubs or in some semi-shaded positions rather than in the full sun.

After cutting the narcissi give the plants a mulch of semi-decayed manure to assist them in making a good growth.

Lightly shade newly set out plants. This will be found better than constant waterings.

Sow wallflowers, forget-me-nots, Campanula pyramidalis and other biennials for next year's flowering.

Look well after newly planted evergreens and see that the soil does not crack around them.

Make good celery plants where missed and see they are kept growing freely.

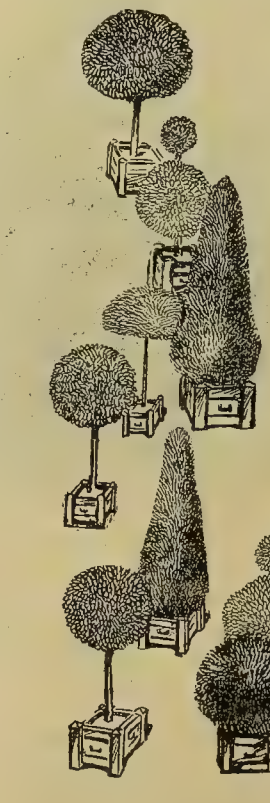
Note the best forms of German and other irises and mark all such for propagation.

London.

Covent Garden Market is being well served with Spirea Queen Alexandra and S. Peach Blossom from Rochford's. Calling upon the veteran grower, J. Sweet, of Whetstone, we saw good batches of both varieties in rude health, which will soon be ready for sale. The first named is given the preference here on account of its dwarf habit, freedom of flowering and good pink color. Peach Blossom is larger in the spike, but less free.

THE TEMPLE SHOW.

In the words of Superintendent S. T. Wright, the recent Temple show of the Royal Horticultural Society was "the best we have ever had." The first day was cool but dry, and great crowds visited the show. The outdoor exhibits were in much better order this year. The second day, from 7 a. m. till noon, was set apart as private view day for the fellows of the society, and by 11 a. m. the crowd was great. Six first class certificates and seven awards of merit were given by the orchid committee, also a botanical certificate and one cultural commendation. Two first class certificates and nine awards of merit was the work of the floral committee. Jas. Carter & Co. had a grand exhibit, great prominence being given to all the special-



--beautify your lawn and porch

after the style of the fashionable Italian and English formal gardens.

SPECIAL SALE

of English Box Trees and Laurus Nobilis (Bay Trees)

We beg to announce the arrival of a fresh importation of these beautiful shrubs and trees which will be placed on SPECIAL SALE, at prices below their value

ties in season by this well known firm. Queen Alexandria purchased a 60-year-old specimen of Larix leptolepus from this firm's collection of Japanese pigmy trees.

Alex. Dickson & Sons, Ltd., showed the new rose, Avoca, in good form, as well as a number of fine tulips. Sutton & Sons had a grand exhibit of vegetables and a number of their specialties in florists' plants. J. Cheal & Son had a miniature rockwork with a great number of fine herbaceous plants. Webb & Son showed calceolarias in fine form. James Veitch & Son had a fine show of flowering trees, shrubs, etc., also greenhouse plants in great variety. W. J. Godfrey, the noted Devonshire grower, had a fine display of oriental poppies, and E. W. King & Co. showed sweet peas in great variety. Hardy gladioli were well shown by Frank Lilley, of Guernsey. Wm. Bull & Sons had a small but important group of foliage plants, while the well known firm of Jackmann & Son as usual had a grand display of clematis, hardy herbaceous plants, etc.

The King's Acre Nurseries made a fine show of florists' flowers, while C. W. Breadmore exhibited grand sweet peas, including Spencer, Primrose Spencer, Mrs. C. W. Breadmore, Countess of Northbrook, Elsie Herbert and Helen Lewis. The Spencer type nearly all carried four flowers to a stem. Irish grown tulips from Hogg & Robertson and Lincolnshire grown ones from A. M. Wilson were interesting. Chas. Turner showed grand roses and trained azaleas, while the mollis and Ghent varieties from R. & G. Cuthbert were fine. J. Peed & Son's caladiums, as usual, were wonderfully grown, while Paul & Son, of Cheshunt, had grand roses. Wm. Cutbush & Son had a large exhibit of clipped trees, carnations and roses, and we noted interesting double-grafted plants of Baby Rambler and Catherine Zeimet. The rockwork and water effects were unusually well carried out. The clematis shown by Richard Smith & Son were, if possible, better than ever and H. Cannell & Son kept up their reputation with a fine group of cacti and cannas, bougainvilleas and rambler and American pillar roses. Geo. Prince had a grand display of roses and the show of tulips from R. H. Bath was excellent. T. Jannoch had grand lily of the valley—Fortins variety—retarded and specially good lilacs.

Hugh Low & Co., W. H. Page, W. C. Waters, A. F. Dutton and Bell & Sheldon showed fine carnations, mostly American varieties, Aristocrat, White Perfection, President, Winsor, Enchantress and Helen Gould being among the most conspicuous. Geo. Mount showed roses, well arranged, including the new Joseph Lowe. H. B. May & Sons had fine ferns, including grand Nephrolepis Scotti, Whitmani, exaltata superba and a choice piece of Amerpohli, as well as a variety of flowering market plants. J. R. Box, J. Laing & Son and T. S. Ware had fine begonias, and ferns from J. Hill & Son were excellent. Among prominent varieties were Todea superba, Davallia Fijiensis elegans, Nephrolepis todeaoides and N. Amerpohli. Laxton's strawberries, Cripps & Sons' and Fromow's beautiful maples and the superb begonias from Blackmore & Langdon were also notable additions to a splendid show.

CYCLAMEN AND PRIMULA SEED.

St. George's Nursery Co. report this as being a full average crop, all that is now wanted being a continuation of the present sunshine. As is well known to the trade many of the later fertilized seed pods, are liable to damp if the season is not good. Unfortunately for the hybridist, the choicer the variety the more shy is the setting, this applying more particularly to the early blooms, the later set being better. S.

OBITUARY.

James Shanley.

James Shanley,, for many years a commercial florist of Brooklyn, N. Y., died on June 4. He had a small place near Greenwood cemetery and his attention was largely devoted to the care of cemetery lots and the growing of bedding plants. Before engaging in business for himself he had been a grower in various commercial ranges. He was about 60 years old and leaves a family. He had long been a member of the Society of American Florists and the New York Florists' Club.

LA CROSSE, WIS.—With a capital stock of $10,000 C. E. Schaefer and W. R. Ellers have incorporated a new scheme and will enter the floral business on a large scale. The La Crosse Floral Co. has been selected as the name of the new organization and the company will enter the wholesale and retail flower business making a specialty of leading cut flowers. Six acres of land have been purchased on Cass street on the Fred Ebner farm and already a large number of workmen have been sent to the site and under the management of Mr. Schaefer two large greenhouses will be erected. Articles of incorporation are now being filed with the secretary of state at Madison. W. R. Ellers will attend to the business end of the company and will officiate as secretary and treasurer, Mr Schaefer being president and manager.

THE English papers, referring to the Temple show, point out how ridiculously inadequate is the area upon which this show is held, an acre or so of tent room being all the authorities can provide. The number of exhibitors having increased, the space alloted to each had to be curtailed.

THE glass market continues weak with no perceptible change.

BULB culture in the fen districts in England is becoming a very important industry.

NEVER let rubbish accumulate under greenhouse benches as it forms a breeding ground for insects.

JUDGING by the reports we have received the present season has been one of the very best on record for the sale of bedding stock.

BLUE FLOWERS are by no means uncommon, but those of Iris Siberica Yale Blue are the most intense that we have seen of this color.

THE Illinois State Corn Exposition has been formed at Springfield, to hold annual corn expositions there, the first occurring this fall.

SOUTH DAKOTA correspondents say that they had to resort to artificial flowers on Decoration day, the supply of cut flowers not being nearly sufficient.

LOBELIA KATHLEEN MALLARD is all that its introducers claimed. The plant flowers most satisfactorily when grown in pots, the pots plunged in the soil at bedding-out time.

WE note that the continental growers of odontoglossums are still taking the honors at British exhibitions. At the recent Temple show the only first class certificates for these plants went to Ch. Vuylsteke, of Loochristi.

To slightly change the words of another writer, we would state that there is more money in a well-worked greenhouse establishment or nursery at home than there is likely to be in the shares of stock in a rubber forest in Brazil, or a coffee plantation in Honduras, or a pineapple grove in Porto Rico. The men who invest your money two or three thousand miles away are liable to forget you, if they do nothing worse.

WE would like to hear from rose growers who have experimented or intend experimenting with sulphuric acid as an antidote to mildew. A formula likely to be safe and effective is one part of commercial sulphuric acid to 1,000 parts of water, used on alternate days. In spraying it is necessary to use a fine spray pump or atomizer in order that the mixture reach every part of the leaves and stems without running down to the benches.

J. LOEHRER, an old time florist located for the past seven years at Boone, Ia., with a lifetime training abroad and in this country, takes exception to what he calls the slanderous advertisement lately printed in a trade journal, reflecting on himself and his business ability. He writes, "I gave the publication in question a piece of my mind and asked that it take back its untruthful statement. I believe I can compel the concern to do me justice."

National Council of Horticulture.

We have received the thirteenth installment of the press service of the National Council of Horticulture consisting of articles on the following subjects: "The Fruit Plantation;" "Beans;" "Honeysuckles;" "Hibiscus and Some Allied Plants." These excellent articles may be obtained free of charge on application to J. H. Burdett, 1720 West One Hundred and Fourth place, Chicago, and all florists, seedsmen and nurserymen should urge the editors of their local papers to apply for and use them.

The Society of American Florists.

THE REDUCED RATES FOR THE CONVENTION.

The Trunk Line Association covering points in the states of New York, Pennsylvania, New Jersey, Delaware, Maryland and part of Virginia and West Virginia has granted a rate of one fare and three-fifths for the round trip on the certificate plan to those desiring to attend the convention. Other associations have not as yet granted any concessions. Other particulars will be announced later.

W. N. RUDD, Sec'y.

Plant Growers' Outing.

The New York and New Jersey Association of Plant Growers held an important meeting at the Hotel St. Denis, Broadway and Eleventh street, New York, June 2, 1908, at which a large gathering was present. The committee appointed at the last meeting to arrange for an outing of the association, which consisted of A. L. Miller, Herman C. Steinhoff, Herman Schoelzel and John Scott, made its report. The association will give its outing June 25, 1908, at Terra Marine Inn, Huguenot park, Staten Island, and the members will meet at the Staten Island ferry, foot of Whitehall street, New York, at 10:30 a. m., on that day, and then proceed by boat, train and automobile, to the place of the outing. The committee has made full arrangements for plenty to eat and drink, music, dancing, games, races, bowling and other sports and pastimes, and it is evident that the association intends to have a day's fun. In order to evade the personal tax upon its capital, which has rapidly increased since its incorporation, the association has decided to furnish each of its members with tickets to its outing gratis. It is expected that all members with their families and friends will attend and thoroughly enjoy themselves.

WM. H. SIEBRECHT, JR., Secy.

Meetings Next Week.

Des Moines, Ia., June 16, 8 p. m.—Des Moines Florists' Club, Iowa Seed Co.'s store.

Detroit, Mich., June 17, 8 p. m.—Detroit Florists' Club, 38 Broadway.

Grand Rapids, Mich., June 15.—Grand Rapids Florists' and Gardeners' Club, Board of Trade rooms, Pearl street.

Hamilton, Ont., June 16, 8 p. m.—Hamilton Gardeners' and Florists' Club, office of member.

Lake Geneva, Wis., June 20, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

BUSINESS QUIET.

Heavenly weather such as the poet sings of is our portion now, and if the business aspect of things was as beautiful as the physical everybody would be as happy and active as the busy bees which are swarming amid the flowers. Unfortunately, the reverse is nearer the truth. Memorial day, never a great florists' event in this latitude, though of late years it has seemed to gain in public appreciation, this year hardly caused more than a ripple in trade circles, and by comparison was even more deficient than the Easter season. Of course, there was a great abundance of outdoor material to be had for the asking, and it is noteworthy that the shrubbery was never more floriferous and perfect, but the stores found almost no demand beyond the ordinary calls for their wares. There have been some June weddings, not so many, probably, as usual, and very few with elaborate floral displays. The commencement season is on, and with the great number of schools of various grades for which this city is famous there has been considerable business, well distributed. From now on there will be the usual midsummer dullness, some fear intensified from the effects of financial stringency, which so far in this latitude has not greatly relaxed, and the usual routine of emptying, filling, replanking and repairing houses. Little new building is going on, but there will be some additions to existing plants. Let us hope that as the new season opens it will bring brighter times and ampler returns for the capital invested and labor bestowed than has met the gardener during the one we have just passed through. Great complaint has been made by the market men as well as the stores during the spring of the paucity of buyers of the inferior grade of stock which was taken up. Lexington market has for many years been noted for the extent, variety and excellence of its floral displays. The displays of plants and flowers have become so abundant and their arrangement and bright colors are so attractive to the public eye that the streets on which the florists' stands are located, the main ones of the market, have taken on rather the character of a public and free show, and thousands of persons make it a Saturday night promenade, passing and repassing, inspecting, admiring, perhaps, but alas! not purchasing a fraction of what formerly made up a satisfactory evening's sales. These crowds are largely representatives from the foreign-born population, most of them engaged at various vocations through the day, and who find pleasant recreation in these promenades at night, absolutely crowding off the real intending purchasers. Not only is this true, it is said, of the stall owners in the market, but the storekeepers themselves find their sales shortened by the passing but not buying crowds. Just in the same way the carnival parades through the retail district became so numerous, noisy and unwieldy that the stores had to board up their windows and give up all attempts to sell goods. Finally the police interfered and the demonstration has been reduced in size and clamor.

NOTES.

Wm. Scott, of Buffalo, former president of the Society of American Florists, was well known here to the trade and a great favorite among its members. In times gone by he was an occasional if not frequent visitor to our city, and everyone who knew him esteemed it a privilege to meet him. His open, frank manner, wholesome enthusiasm, keen wit and ready repartee made him a most agreeable companion, while his thorough knowledge of the methods of cultivation caused him to be looked up to as an authority on gardening. His loss is deeply deplored by all who knew him. Mr. Scott had a brother, Alexander Scott, who has long been engaged in the florist's business in this city. For many years he was manager of the Florists' Exchange. Of late he has withdrawn from active business and has been giving attention to the development of his property in one of our growing suburbs, in which, it is understood, he has been quite successful. He is a man of high character, greatly respected and esteemed in numerous guests.

On Thursday at Blenheim, the handsome country place of Willian Lanahan, a wealthy citizen who has a fondness for horticultural matters, there was an outing of the Gardeners' Club and others interested in flowers and handsome lawns, trees and plants. Jacob Keplinger is the manager of the estate, and he always provides a profuse entertainment for his the community. S. B.

HOUSTON, TEX.—Robert Leupke is enjoying a trip to Germany accompanied by his wife.

EASTER LILIES

We have from 10,000 to 12,000 Lilies that are neither retarded nor forced, but grown as nature intended them to grow. Therefore just right for your use now. Will ship well. None so good on the market.

BEAUTIES.

Our Beauties are grown in solid benches. The roots do not dry out, but are down in deep soil. We have a big cut on and can supply any number at $3.00 per doz. for long stems down to 50c to 75c for short.

CARNATIONS.

Grown right, picked right and packed right, especially for the requirements of our big shipping trade.

ROSES.

We also grow in solid benches and from grafted stock all our **Killarney, Richmond, Kaiserin, Maid, Bride** and **Perle Roses.** If you have been disappointed elsewhere with poor stock, give our solid, bench-grown flowers a trial and see the difference.

Valley, Peonies AND Greens

Also in big supply.

Will give your order our best personal and individual attention. **Write, Phone or Telegraph To-day.**

BASSETT & WASHBURN,

GREENHOUSES: HINSDALE, ILL.

Office: 76-78 Wabash Ave., CHICAGO.

Toronto.

BUSINESS ACTIVE.

There has been decidedly more activity to the retail business; what with the races, June weddings and a number of funerals, all the florists benefited, and quite a lot of stock has been used up. Roses are still in very good shape, though the sun is becoming so strong that the quality will no doubt soon be affected. American Beauty and Richmond have been very plentiful, the majority of the work usually calling for the lighter shades. Carnations are both plentiful and good, though the crop is not nearly so heavy as a few weeks ago, and prices are much firmer. Other varieties of stock are plentiful enough for ordinary requirements.

NOTES.

The visit of the Countess Grey was a boon to trade, bouquets being presented on numerous occasions, and the many private parties all using flowers. Her excellency visited the Dale estate at Brampton and also called on H. G. Dillemuth, with whom she made arrangements for flowers for the tri-centenary at Quebec in July.

A. J. Houle, manager and shareholder of the Bedford Park Floral Co., has severed his connection with that firm and will start in business for himself, having purchased the houses and plant from Robert Abbs on Brock avenue. As a rose grower Mr. Houle is second to none in Canada and his new venture should prove a success.

Home-grown lily of the valley and some well colored cattleyas are part of the product of Grobba & Wandrey. This enterprising firm is up-to-date and always has something out of the ordinary.

Bride gladioli have been coming from R. Jennings, of Brampton, who unfortunately has been confined to his home through illness for the past two weeks.

Myosotis forms a large part of the window displays, J. S. Simmons having a very attractive show of this flower alone. H. G. D.

Montreal.

A GOOD SEASON.

Bedding out is proceeding just now as fast as possible. The demand seems to be as good as in former years with the same prices prevailing. Geraniums retail at $1.50 per dozen, 4-inch size. Petunias, verbenas and Mme. Salleroi geraniums in 3-inch pots sell at 75 cents. Smaller plants out of 2½-inch pots sell at 50 cents and annuals at 25 cents per dozen. More window boxes are filled this year than ever before and rustic stands are demanded more than last year not only for cemetery purposes but also for the front garden and entrances of residences. The landscape gardeners have a number of very large jobs on hand which causes them to neglect the lesser ones. The spring with its planting season has been so very short this year that it was almost impossible to finish planting on time; sodding is favored by frequent rains and the finest grass and lawns in years are to be seen.

Alderman Jas. McKenna, Montreal.

NOTES.

At the last meeting of the Gardeners' and Florists' Club a resolution of condolence was passed to be forwarded to the family of the late Wm. Scott. John Walsh and G. A. Robinson spoke of the great loss our profession had suffered by the death of such a recognized authority on botany, and sociable member of our craft as the late Wm. Scott.

James McKenna had the honor to be elected an alderman of this city. Cote des Neiges being annexed to the city this called for an election and every gardener and florist feels justly proud of Alderman James McKenna.

S. S. Bain has left the hospital cured of pneumonia but is still suffering from rheumatism.

C. A. Smith, Lachine, met with a painful accident by falling through a trap door.

The annual picnic will be held on July 29, at High Gate Springs, Vt.

LUCK.

MADISON, N. J.—The Brant Hentz Floral Co. was incorporated, June 4, with capital stock $2,000. The incorporators are Henry Hentz, Jr., and B. R. Morgan.

J. B. DEAMUD CO.

51 Wabash Ave., CHICAGO.

Chicago.

MARKET GLUTTED, LITTLE DEMAND.

There has been a very heavy supply of stock even for the month of June and comparatively little demand. The warm sun of last Friday, Saturday, Sunday and Monday was just such as to bring the flowers along very fast and especially the peonies. The local crop was on at its heaviest at the end of last week and continuing for three or four days there was no let up. While a very good proportion of them went into cold storage many were too open for that and had to be unloaded immediately upon the market. All this of course aggravated the glut in other lines. The cut of roses has been large. The hot sun had the effect of opening them too fast, and especially on Monday of this week were seen quantities of soft, full blown roses. Some of the large growers have made a specialty of growing American Beauty for summer use, and these are now very good for the season. Richmond and Kaiserin, too, of excellent grade can be obtained, and some very fair Bride and Bridesmaid are also coming in. The supply of carnations has added its usual quota of stock to the market, and the large supplies of other stock and the fact that so many of them lack shipping quality have hammered prices down to their lowest notch. Some very fair material, however, is to be had, and the color is even better than it was a short time back. Lily of the valley of exceptionally high grade is offered by some of the houses and is in good demand for the June weddings. The heat of last week faded many of the sweet peas, but cooler weather having intervened, some very good stock is now to be had. Easter lilies have again sprung into prominence. There has been no particular call for them, but the supply is large and the quality good. There is an abundance of all the greens of the season, including smilax, Asparagus plumosus, A. Sprengeri and adiantum.

FLORISTS' CLUB MEETING.

The last regular club meeting of the season was held the evening of June 4. President Leonard Kill was in the chair and the attendance was good. The club voted to hold its annual picnic at Morton Grove, Sunday, July 19. Several members were called upon to address the club, including J. S. Wilson, who leaves next month to take up his work at Des Moines, Ia.; August Poehlmann, the newly-elected chairman of the Morton Grove village board; the genial Phil Foley, Axel Aggerholm, of Onarga, and Emil Pielke, of Geneva. A vase of peonies from Vaughan's Nursery, Western Springs, was shown and much admired. W. O. Johnson, with the Foley Manufacturing Co., was elected a member, and the name of W. A. Arnold, 341 Balmoral avenue, was proposed for membership. Not the least interesting feature of the meeting was the report of Financial Secretary Jensen that the receipts of the evening amounted to $165. A motion that the regular meetings for July and August be omitted was carried, and adjournment was taken until the first Thursday evening in September, subject to the call of the president for any special occasion that may arise.

THE CLUB PICNIC.

It has now been definitely arranged that the club picnic will be held Sunday, July 19, at Morton Grove. The committee in charge consists of Geo. Asmus, T. E. Waters, Fred Lautenslager and Ed. Enders. Judging from the enthusiasm with which the affair has been taken hold of already, a good time is a certainty, and a record-breaking attendance a strong probability. Suggestions are in order. Push along a good thing.

THE PEONY OUTPUT.

On June 7 A. Kennicott & Son report having cut 2,578 dozen peonies that weighed 6,120 pounds, showing the substance in that firm's flowers. Their entire cut this season to date is 15,000 dozen. They began cutting on May 27 with pink Officinalis the first to be sent to market. The Peterson Nursery began cutting peonies on June 3 with Festiva Maxima the first to flower; 20,000 peonies is the season's cut. The Klehm Nurseries began cutting on May 25, Officinalis Rubra being the first variety to market; 10,000 dozen has been the cut.

NOTES.

Harry Rowe has carte blanche orders for the appointments and decorations at the elaborate wedding festivities to take place June 24, at the summer home (Dowagiac, Mich.), of Fred E. Lee, the wealthy Drexel boulevardan, his daughter the prospective bride.

Wm. K. Kroeschell, of the Kroeschell Bros. Co., left Sunday for Toronto to attend the annual convention of the National Foundrymen's Association. Fred Lautenslager is representing the same firm at the Milwaukee convention of the American Association of Nurserymen.

Visitors: T. Mellstrom, representing Sander & Sons, St. Albans, Eng.; Axel Aggerholm, Onarga; Emile Pielke, Geneva; M. Butterfield, Farmington, Mo.; A. L. Glaser, Dubuque, Ia.; Geo. Kaber, La Porte, Ind.; E. H. Hitchcock, Glenwood, Mich.; A. E. Kundred, Kendallville, Ind.; J. J. Evans, Richmond, Ind.; Eli Cross, Grand Rapids, Mich.

Chicago Notes.

CONTINUED FROM PAGE 1038.

Miss Josepha Then, of the Flower Growers' Market, who handles the stock grown by her father, Anton Then, continues to receive some very fine carnations, including White Lawson which took first prize at the flower show last fall. Bride and Bridesmaid roses are also good.

Ten thousand peonies displayed in large baskets swung from the pillars of the entire main floor was the appropriate decoration of Carson, Pirie, Scott & Co.'s big dry goods store last week. The peonies are said to have come from Elmhurst.

The Kennicott Bros. Co. is receiving fine lots of home-grown peonies and placing a proportion of them in cold storage to meet the demands of the trade after the crop is off.

The A. L. Randall Co. is receiving some of the finest lily of the valley seen on the market, with long, strong stems and well provided with perfectly-shaped bells.

The John C. Moninger Co. reports having filled more orders in April and May of this year than in the corresponding months of any previous year.

The A. Dietsch Co. reports steadily increasing orders for greenhouse material from the far western states, like Montana.

Lake Forest Horticultural Society.

We have received the preliminary premium list of the second annual exhibition of the Lake Forest Horticultural Society to be held at Lake Forest, Ill., in July—no date given. W. C. Egan, E. A. Kanst, W. N. Rudd, Robt. J. Sampson, Axel Johnson and C. J. Reardon are announced as judges. Copies may be had on application to J. W. Sharpenberg, secretary, Lake Forest, Ill.

St. Louis.

LITTLE IMPROVEMENT IN CONDITIONS.

Everything is plentiful and the quality of stock is daily becoming more inferior. June weddings and school closings cause some demand, but otherwise there is little doing. After June 15 summer dullness prevails. A few asters are in and gladioli are becoming more plentiful. A great many sweet peas are mildewed; outdoor stock is now in.

NOTES.

If the bill which passed the council receives a favorable vote in the house, together with the signature of the mayor, no railroad company can operate a steam road in Forest Park or within 1,500 feet of it. Both Park Commissioner Scanlan and City Forester Meyer favor the restriction.

Billy Winters, of Kirkwood, is complaining of mildew on his sweet peas. He also stated that prices this spring were much lower than last year. He is fitting up a new store room and office at his greenhouses.

A bill favored by Mayor Wells will be brought into the house of delegates to purchase the old fair grounds for $700,000 to be used for park purposes. This will be a great boon to the north end.

Shaw's Garden opening June 7, was well attended, everything looking fine. Special efforts were made by Prof. Trelease and Prof. Irish to make the opening a success.

The florists at Belleville, Ill., had a busy week at the Egyptian Hustlers' festival June 5. The flower parade was the feature and the decorations were elaborate.

W. J. & M. S. Vesey, Fort Wayne, Ind., are still sending large consignments to this market. These are not showing the effects of the weather.

It has been decided to have the florists' picnic at Normandy Grove, July 15. Final arrangements will be announced next Thursday at the Florists' Club meeting.

Alex. Waldbart & Sons have been doing a good trade of late. Their neighborhood is fast becoming a business center.

The west end florists in general say trade is dull, but they always manage to be doing something.

Dominic Bova had to hire extra help last week. He had very heavy orders in funeral work.

The Bentzen Floral Co. has the decorations for the Yeitmann high school.

The Mullanphy Floral Co. has the decorations at Central high school.

Julius Koenig has full charge and management at Ostertag Bros.

The Ayres Floral Co. is doing a fine trade.

Visitors: R. A. McPherson, Litchfield, Ill., and H. Ernst, Washington, Mo. W. F.

WEST BERKELEY, CALIF.—Business here was very good for Decoration day but the stringency of money is felt in all parts and May was a very dull month.

NEW ORLEANS, LA.—The Stella Planting Co. has been chartered with $75,000 capital. The directors are J. B. Sinnott, Walter L. Saxon, Paul J. Orchard, Chas. J. Sinnott and Henry Lee Sinnott.

LOUISVILLE, KY.—In a desperate encounter with an alleged chicken thief recently in the rear of the residence of T. B. Rudy, at 1018 First street, three people were badly injured, including Alexander Morton, colored, who is under arrest, charged with chicken stealing and malicious cutting. Mr. Rudy and his son-in-law were each cut on the hand with a pruning knife wielded, it is said, by the negro. Mr. Rudy probably owes his life to his son-in-law, who warded off a stab directed at his back.

OUR CARNATIONS

are still in fine shape due to the fact that the temperature in Milwaukee is low compared to other cities owing to the cool winds from Lake Michigan that blow across our city. Try them and be convinced.

We also have fine **VALLEY** for **June Weddings.**

FROM THE FRENCH TRADE PAPERS.

A NEW CLASS OF DAHLIAS.—A Dutch firm has obtained, by crossing the cactus dahlias with single varieties, a new class, which he calls peony flowered. They are very large, sometimes quite single, but for the most part having several rows of flat petals, more or less wavy or wrinkled, and having a tendency to split. The plants grow from three to six feet high and are said to be very decorative. Several varieties were certificated in Amsterdam in August last, among them Geisha, Bertha von Suttner, Andrew Carnegie, Hugo de Vries.

WITLOOF OR CHICORY.—An excellent authority states that the suburbs of Brussels alone produce thousands of pounds of this delicious salad weekly, and that Belgium exports to the United States 10 tons per week. The demand in Chicago is increasing at a remarkable rate, and it is high time our home growers profited by it.

A MASS OF PRIMULA OBCONICA in mauve, pink and lilac, bordered by Begonia Gloire de Lorraine, was a great success at a Paris show.

HEMEROCALLIS HYBRIDS.—The Revue Horticole notes the beauty and hardiness of the later hybrids of hemerocallis, mostly of English or German origin, which comprise most of the shades of yellow and orange, among them Aureole, very large orange flower; Citrina, freely branching lemon yellow; Sovereign, chrome yellow, very lasting and especially large. For border plants blooming in June and July they are most desirable.

New York.

INDOOR STOCK DETERIORATING.

Nothing unusual happened in the wholesale district during the past week. Flowers were cheap and plentiful and there were not enough buyers to move the surplus. There was the usual amount of grumbling among the dealers. Even the two old bachelors, whom the prophet of Baal had consigned to the "great majority," persisted in keeping healthy and going regularly to their meals. Noteworthy was the great quantity of splendid peonies that arrived. While the wet weather of May put much greenhouse stock in bad condition, it put health and vigor into the peonies. It is true that many of them are going cheap, but it is at all times a pleasure to see good in preference to poor stock. On the other hand, the quality of greenhouse stock has been steadily deteriorating. Though that is to be expected at this season, it is in much worse shape now than at this time last year. American Beauty roses, being in a class by themselves, are not so much subject to criticism, but Richmond is miserable and may as well be taken out of the summer rose class. There are some good lots of Kaiserin coming in, but of other varieties, soft, weak and mildewed stock predominates. Of carnations an immense stock poured in all the week, but it is probable that when the growers get the returns of the week's prices they will begin to pull up and get ready for another planting. There is a movement in lilies and lily of the valley, but the much-heralded June weddings have, up to this time, made no perceptible impression on the market.

June 8.—The week opens with an oversupply and a light demand. Peonies are very plentiful and prices are dropping. The opening of the summer gardens and bedding work makes considerable activity in plants. The weather is warm.

FLORISTS' CLUB MEETING.

The regular monthly meeting of the club was held in the hall in the Grand Opera house building on the night of June 8. As this was the last meeting before the summer vacation there was considerable business to dispose of. Considering the warm weather there was a good attendance. President Weathered occupied the chair. Patrick O'Mara reported for the transportation committee to the convention of the Society of American Florists at Niagara Falls. The Delaware, Lackawanna & Western R. R. was recommended, that road having agreed to make a round-trip rate of $11.67, and furnish a special train providing the delegation numbered 100 persons. The report was accepted and the committee given full power to act. Vice-President Marshall reported for the outing committee that a generous amount of advertising and private donations had been received for the programme, the advertising amounting to $262, the donations, $251.50. The outing programmes were distributed at the meeting. To avoid possible confusion, dinner and ice cream tickets will this year be issued with the outing tickets. The tickets, as heretofore will be $5 per couple. Chairman Marshall expressed the opinion that all that is now needed for a successful outing is good weather.

This will be the eighth annual outing of the club. It will take place on July 1. The Steamer Isabel will leave Thirty-first street and the East river at 10 a. m. for Witzel's Point View Grove, L. I., where the outing will be held.

Chairman Rickards of the house committee reported on the ladies' night meeting, thanking the members for their co-operation. A vote of thanks was tendered chairman Rickards for his very successful arrangements for the entertainment. The following were elected members of the club: Messrs. Chadwick, Millang, Donaldson, Meisen, Hurley and Hogg. J. J. Coan was proposed for membership.

Patrick O'Mara spoke on behalf of a large delegation to the S. A. F. convention at Niagara Falls. An appropriation of $50 was placed at the disposal of the transportation committee to defray necessary expenses. A committee composed of Messrs. O'Mara, Traendly and Butterfield presented resolutions on the death of Mrs. Young, mother of Secretary John Young; the resolutions were adopted. A committee consisting of Messrs. O'Mara, Traendly and Stewart presented resolutions, which were adopted, on the death of Wm. Scott, of Buffalo. Secretary Young reported to the club the death of James Shanley, a member, and a committee consisting of Messrs. Birnie, Sheridan and Donaldson was authorized to send resolutions to the family, and report at the next meeting of the club.

Harry Turner, gardener to Howard Gould, Port Washington, L. I., exhibited Malmaison carnations, Mrs. Trelawney and Calypso; awarded a cultural certificate. A new white peony was exhibited by John Hurley, his object being to have it named. The committee recommended the name of Maximum. He was tendered a vote of thanks. A very interesting feature of the meeting was the lecture by Geo. V. Nash, of the Brown Botanical Gardens, on "Flowering Shrubs for Outdoor Planting." The lecture was illustrated with lantern slides, a great variety of flowering shrubs and plants being shown. The lecturer treated his subjects in four groups, (1) for gardens; (2) water margins; (3) roadways; (4) hedge plants. Mr. Nash was entertaining and instructive throughout and at the close was tendered a vote of thanks. The club adjourned, to meet the second Monday of September.

NOTES.

On June 4, at 10 a. m., five ocean liners backed out of their docks and steamed out of the North river. They were the record-burning Mauretania (Cunard), Celtic (White Star), Amerika (Hamburg-American), Luetsow (North German Lloyd) and Provence (French line). The pessimists in the florist business, who are always seeing disaster ahead, should have been with

the writer, in view of the Mauretania and Celtic as they moved out. Each crowded with passengers, who lined the rails, waving adieus to friends on shore, the scene presented might be aptly termed a floral festival. Hundreds of the women passengers carried enormous bouquets, American Beauty roses predominating, which, in the burst of sentiment which prevails on such occasions, they enthusiastically waved to the accompaniment of cheers, good-byes and "God bless you's." Aside from what were seen on deck, there were on board each ship thousands of dollars' worth of flowers, in even more elaborate arrangements.

Henry Hession, well known as a successful carnation grower of Flatbush, has a new house almost completed in the latest and most improved style of construction executed by the Lord & Burnham Co. The dimensions are 58 feet 6 inches by 200 feet, and 21 feet 6 inches in height. It is of iron frame construction on a concrete foundation, the iron posts being imbedded in three feet of concrete. The posts and rafters were made in separate sections and then securely plated and bolted together. The house is covered with double-thick English glass, in sizes 16x24 and 16x30. It will be heated by the largest size of boiler manufactured by the Lord & Burnham Co.

Geo. Johnston, formerly with the Johnston Heating Co., and a brother to the members of that firm, has been very ill for several weeks with intermittent fever and rheumatism. He is a popular young man, with many friends and associates, and it is hoped he will be speedily restored to health.

A BUSY WEEK.

Evidences of the approaching summer holiday season are already seen in the closing of many of the high class shops at noon on Saturdays, beginning with June. The flower shops will not follow until July when some of them will close at one. Last week was a busy one with school commencements and weddings, there being a good demand for all choice flowers, particularly American Beauty and Killarney roses. Sweet peas and lily of the valley sell fairly well, but the price is low, very little bringing over $3 per 100 and much good stock selling for $2. The quality of the roses and carnations is rapidly deteriorating, the difference between the local and imported New England and Hudson river stock being quite marked. The prices for this fancy stock is, however, almost prohibitive, 18 to 24-inch Killarney being held at $20 per 100, while the best local production is quoted at $6. There are still a few peonies, mostly from cold storage. Prices are quoted even lower now than when they were at their height, which shows there is but little demand and the desire is to work off the stock before the booming of the cannons on the glorious Fourth of July. The growers are now busy with their planting, getting their inside crops started for the market of the coming fall and winter.

NOTES.

The Joseph Heacock Co., which recently purchased a large block of cypripediums, which, when added to its already large stock of the same variety and some hundreds of cattleyas, has taxed the firm's capacity, and an additional structure, to be devoted exclusively to orchids, is going up. This, when completed, will make the firm a factor as there will be stock here that can be counted on when the season of bloom is at hand.

The Robert Craig Co., is clearing out its large carnation range preparatory to planting the carnations to be grown on inside during the summer. Mr. Craig thinks the early start, insuring a good crop in October or November, will more than pay for the few flowers sacrificed at this season. Quite a number of other growers are also of this opinion and the inside culture of the divine flower will be more general than ever.

The paper of Arthur Niessen, read before the Florists' Club last Tuesday evening, has caused much general interest in the trade. It is likely that the discussion that was interrupted by the limited time allowed for this interesting part of the paper will be resumed at the next meeting.

Julius Wolff has largely increased his stock during the last year and is very well satisfied with results, having built up a good store demand in addition to his wholesale trade.

W. K. Harris already has several large houses planted with chrysanthemums and is filling the others, devoted to the culture of his favorite flower, as rapidly as possible.

The popularity of the orchid as a cut flower appears to be increasing in this market and several of the growers hereabouts are adding considerably to their stock of plants. K.

LILIES! LILIES!

No cold storage stock. Large flowers, with long, stiff stems. Try these and you will take no others.

ROSES. Brides, Maids, Richmonds, A1 quality. None better to be had around Chicago.

Carnations. Cool lake breezes and well shaded houses are producing fine flowers of good color; white, too, of superior merit.

AND ALL OTHER SEASONABLE STOCK.

All at Lowest Market Prices.

ZECH & MANN,

51 Wabash Ave., CHICAGO.

Boston.

STOCK OVER PLENTIFUL.

The market is sadly neglected and there is a glut of stock the greater part of which is of such quality that anything like a profitable figure cannot be expected. Carnations and roses are arriving by thousands and are disposed of in bulk at buyers' bids usually accepted without discussion. The business of the day is practically done before 9 a. m. and after that there is a complete suspension of trade. Street venders are doing an immense business as with a market brim full of their specialties and prices well shattered it is possible for them to offer fair goods at the most inducing terms. Half of the stock coming in at present is disposed of in this way. It is seldom that June witnesses so few weddings, and most of those already accomplished were very limited so far as floral decorations are concerned. Roses of all kinds have greatly deteriorated in quality, and a first quality rose other than Kaiserin is scarce. The carnation market is in a wretched condition and a tremendous quantity is coming in. Sweet peas are the principal attraction now and with a few specialties added, such as campanulas, gladioli, etc., the selection of attractive flowers is considerably limited.

NOTES.

The W. W. Edgar Co. has been reorganized, two separate concerns resulting. The two sons, Robert and Frank Edgar, have consolidated and will operate the new plant of the old firm at Waverley and be known as Edgar Bros. The W. W. Edgar Co. will continue business at the original plant with Mrs. W. W. Edgar president and treasurer and Herman Borsch as manager. In Mr. Borsch, who has been identified with the late Mr. Edgar 14 years, the responsibilities of management have been well placed.

The annual rhododendron exhibition of the Massachusetts Horticultural Society was held June 6-7 in the society's hall. The display this year was particularly good, due to the fine weather, and was attended by a large concourse of visitors on both days. Sunday as usual drew the largest crowd and the exhibition was open both day and evening.

William H. Nicholson the well known grower of Framingham left for the south this week where he goes to participate in the wedding of a friend in Virginia. An extended vacation follows including a visit to the leading southern cities and consuming about three weeks. Meanwhile Arthur Harrington will conduct the business at the Park street market.

Mrs. John L. Gardner, the wealthy society leader of this city, has offered a prize of $100 for the best window box shown by and planted by the children of the city. Mrs. Gardner is an enthusiastic horticulturist and also a lover of children and this is one of her ways to bring the two closer to each other.

Daniel Murphy for 34 years in the employ of Wm. E. Doyle, and the greater part of that time manager of the greenhouses, has severed his connection with the firm. After a well-earned vacation Mr. Murphy intends to become connected with one of the larger growers in Philadelphia or New York.

We note the death of Mrs. Jerome Jones, of Brookline, a great lover of flowers and in honor of whom the excellent chrysanthemum bearing her name was registered. Mrs. Jones was also an enthusiastic lover of flowers and was proprietor of one of the most magnificent estates in Brookline. B.

Massachusetts Horticultural Society.

The following are the awards at the Massachusetts Horticultural Society's rhododendron exhibition, June 6-7: Orchids, display of 25 plants arranged for effect with foliage plants—Mrs. J. L. Gardner, first. Rhododendrons, largest and best collection, not less than 15 distinct varieties, six trusses of each—Walter Hunnewell, first; Mrs. J. L. Gardner, second. German irises, 36 vases

Albany, N. Y.

The local trade reports very good business for the week ending with Memorial day.

At the last meeting of the Florists' club, held at the establishment of W. C. King on Madison avenue, 40 members were present. George King, gardener at the executive mansion; J. J. Walsh, gardener to the bureau of parks, Frank Williams and C. H. Lang were elected to membership. A short address on the local state of trade was delivered to the club by Mr. King, the host. Fred A. Danker, chairman of the committee appointed some time ago to get out a special circular upon the care of plants, reported progress and asked for an extension of time, which was granted. During the evening a very enjoyable social time with refreshments was had. Lewis Schaefer entertained with recitations and a competent entertainment committee attended to the wants of all present. Arrangements were perfected for the next meeting, which will be held at the establishment of the president, Fred Goldring, at Slingerlands, on the evening of July 2. The members will leave the city in carryalls at 6 p. m. R. D.

WHOLESALE FLORISTS

222 Oliver Ave. PITTSBURG, PA.

LAWRENCE, MASS.—At the natural history room in the Central building an interesting exhibition of 100 beautifully colored plates of our common wild flowers is now being held. They are the work of A. D. Marble, the city engineer. To flower lovers an opportunity is given of identifying and naming many specimens that may have been known to them by sight, but to which they have not been botanically introduced. To those who appreciate artistic work, Mr. Marble's accuracy of drawing and faithful reproduction of color is especially pleasing.

BANNER JUNE BUSINESS.

Trade for Memorial day was about as usual, nothing startling from the down-town stores. Greenhouses in the immediate vicinity of the cemeteries did a fine business. Weather for the week preceding was fine, consequently all wanted their vases filled. The result was, as usual, some disappointments. June rushed upon us in an ideal florists' way. From two to four weddings daily were the portion of W. J. Palmer & Son and S. A. Anderson, while the other florists were quite busy. It is safe to say that a better week for florists in June has not been recorded in several years. Stock is plentiful but Bridesmaid and Bride roses are getting very small. Carnations are only fair. Peonies are not plentiful, but in good demand. American Beauty roses are plentiful. Lily of the valley and orchids have had a remarkable sale for brides' bunches, corsages and other purposes. The next two weeks will be busy with school commencements, after which the florists, proprietors and employes, will start on their annual vacations. The usual agitation of closing at 6 p. m. during July and August has not started, and it is useless, for some would not close at any price.

Joseph Sangster, who is manager for S. A. Anderson, has opened a flower store on Jefferson street in the Cold Spring district. The location appears to be a good one. Mrs. Sangster will manage the store and Joe will continue with Mr. Anderson.

The attendance at the bowling club has been small, owing to outdoor work and the all around rush of spring trade.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

SOME interesting comments on Paris flower shows will be found elsewhere in this issue.

JEROME B. RICE & Co. have a representative on the Pacific coast looking after the seed crops.

MICHIGAN PEAS have been set back by the cold, wet weather and only half a crop of the wrinkled kinds is expected.

FREIGHT RATES from Japan are to advance July 1, raising cost in America of all Japanese lilies 75 cents and up per case.

NEW YORK.—The Page Seed Co., of which E. L. Page of Greene, N. Y., is president, has increased its capital from $25,000 to $100,000.

MICHIGAN BEANS for the most part are now planted, the weather for the last week or 10 days having been very favorable to that operation.

WAKEMAN, O.—There is a good average stand of all varieties of seed corn. The fields are being hoed and cultivated and they are clean, and in good condition to grow.

CLINTON, WIS.—The L. L. Olds Seed Co., contrary to newspaper reports, is not seeking a new location in Illinois, but will probably move to some other city in this state. Nothing definite has yet been decided.

THERE are millions of acres of jack pine lands in Michigan, Wisconsin and Minnesota that can be used successfully for raising clover seed, according to Farmers' Bulletin 324, just issued by the Department of Agriculture.

CHAS. P. BRASLAN with Mrs. Braslan left Chicago, June 9, for Washington, Rochester and New York and expects to sail for Europe about June 20, touching Mediterranean ports and covering the Italian seed growing districts.

HOLLAND GROWERS report, May 25, that tulip and hyacinth prospects are for a medium crop, but much still depends on the weather. Leading single forcing tulips are selling readily. Darwin and late tulips are more in demand than last year, with somewhat higher prices.

Wood Stubbs & Co., Louisville, Ky.

The accompanying illustration shows Wood, Stubbs & Co.'s new building, 229-231 E. Jefferson street, Louisville, Ky., into which they recently moved. It is one of the best and most modern equipped seed houses in the United States. The building is three stories high with basement, 44x100 feet, and is equipped with modern electric elevators, grain elevators, chutes through from each floor, and so arranged that shipping can be done from the front or rear.

The fixtures are especially modern and up-to-date. In addition to 400 drawers there are 160 bins which are constructed through from the second floor to the first. The upper parts of these bins act as a reservoir for the smaller bins below. They are all filled from the second floor and lead to the lower bins by 3-inch pipes.

The Vilmorin Memorial.
To Which Mr. Burpee Refers on Page 1028 of This Issue.

Thus, instead of having to fill a bin or drawer a good many times during the week, they do not have to be filled more than two or three times in a season.

Hanging balconies extend around the store and office for storing surplus supplies, and besides making a nice display in the store they hold a complete stock of these goods. The entire fixtures are finished in natural pine and mahogany with glass knobs on the drawers and bins which give a very handsome effect. Mounted in the pediment of the building is a 4-foot electric clock which is of great benefit to the gardeners and farmers on the market square which is immediately opposite the building. It is intended to erect, 12 feet back of the building, a warehouse, equipped with machinery for conveying bags, boxes, etc., from one house to another to any floor or the cellar.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

President George S. Green.

Geo. S. Green, president of the American Seed Trade Association, and long before his election a prominent figure at this society's meetings, was born at Hannibal, Mo., in October, 1863. When 18 years of age he entered the employ of D. I. Bushnell, St. Louis, Mo., dealers in field seeds. Four years later he was taken into the firm as a partner, and the connection continued eight years longer. In 1893 Mr. Green removed to Chicago, where for about two years he pursued the field seed business. In 1895, his wife's ill health requiring a change of climate, he began a six years' sojourn in the west, most of this time being spent at Colorado Springs, Colo. It was in 1901 that he became president of the Illinois Seed Co., 240 Johnson street, Chicago, the firm of which he is still the head.

Nebraska Corn and Vine Seeds Suffer.

The Western Seed and Irrigation Co., writes June 8 as follows: "We have been having too much rain throughout eastern Nebraska for the past two weeks, which has caused the low lands to be flooded in many sections and water to stand in the trenches over the corn in many localities. The rains have also prevented the growers from going ahead with their cultivating, and the weeds have in some cases obtained a big start. In most instances the growers have obtained good stands, but it is going to be a serious matter for them to keep ahead of the weeds. The rains have also prevented the growers from finishing planting some of their corn crops, also some of the vine seeds, which will have a tendency to make many of these varieties somewhat late.

"The above applies more particularly to eastern and central Nebraska. Reports from western Nebraska, also western Kansas and Oklahoma, are very unfavorable on account of the prolonged drought, which has prevented plowing and planting of musk and water melon, also all other crops adapted to those localities. The ground is so dry and hard the growers are unable to plow and plant the crops, and even if they could do so, the seed would not germinate from lack of moisture. If they get good rains any time within the next three or four weeks, there will be time for them to get some crops, but we look for quite a serious shortage of melon crops from the western country.

"Taking it as a whole the conditions are not as favorable for seed crops in general as we would like to see them at this time."

Dutch Bulb Growers' Society.

At the meetings of May 4 and 11 the following awards were made by the narcissus committee: First class certificates to Narcissus Alaska, broadly opened trumpet, deep yellow and deep yellow perianth; N. Van Waverens Giant, an enormous flower with deep yellow trumpet and pale sulphur perianth; N. John Pope with deep yellow trumpet and clear yellow perianth; N. President Wentholt, broadly open trumpet, deep yellow, and yellow perianth; N. Robert Sydenham, a strong grower with deep yellow trumpet and pale yellow perianth; N. Incomparabilis Winifred with broad elegant cup and white perianth.

Awards of merit were given to: N. Harry Veitch, a clear yellow trumpet daffodil in the way of Emperor, but larger; N. Cornelia, a self-colored yellow trumpet daffodil; N. Theba, a deep yellow trumpet daffodil of fine form and great substance; N. White Pioneer, pure white trumpet, narrow, tube-shaped and starry-perianth; N. incomparabilis

Louise, pure white trumpet and perianth and lemon yellow cup, a drooping flower of medium size; N. incomparabilis Cristata with peculiar crested crown of yellow color, perianth cream-white. N. poeticus Blanca, pure white very fine round flower; N. poeticus Glory of Lisse, a fine round flower with rather large cup; N. poeticus Verdi, with large crown broadly bordered deep orange. In addition to the awards mentioned above a gold and a silver-gilt medal were given to collections of new narcissi.

A California Report.

June 1.—In regard to the crops, some are good, others indifferent, while nothing is exactly poor. The old story is being repeated in regard to the white onions, the stalks have begun to fall from some trouble at the base of the stalk. How far this will go we cannot say now; if it becomes as bad as it did last year it will take at least half the crop. Lettuce and sweet peas will be short, as will be radish. This is our judgment from what we have seen of the crops in the Santa Clara valley. Onions look good, but the acreage is small.

Just Those Yankees.

It is rather brazen for Connecticut to come along with a ready-cooked-potato plant when its wooden nutmeg bush hasn't yet been listed in the floral catalogues.

CHICAGO.—Grass seed prices on the board of trade June 3 were noted as follows: Prime timothy, $4.15 (nominal); choice white clover, $15.—Vaughan's Seed Store will receive the first shipment of California freesias on June 15.—Visitors: Wm. Corneli and wife, St. Louis; Henry Kallen, representing H. Frank Darrow, New York.

Long Island Seed Crops.

June 8.—Francis Brill says that the prospect is for an average yield of cabbage seed, with a posible shortage of some sorts. With continued good growing weather and favorable conditions at the time of harvest, there will be enough seed for the ordinary demand. The best farmers anticipate an advance in price.

MARKET GARDENS.

THE Texas growers still think their onions will eventually usurp the whole of the eastern trade.

Cheney Farm South Manchester, Conn.

A WELL MANAGED MARKET GARDEN.

Nestling snugly at the foot of New England's dear old hills about nine miles from Hartford and the Connecticut river lies South Manchester, a prosperous town of about 10,000 made famous by Cheney Bros. in the manufacture of silk. There may be a better place to live than here, but it is very doubtful if there is a place possessing more advantages than this section enjoys. Hartford county stands third in productiveness in the counties of the United States. The Connecticut river valley is acknowledged to be the garden spot of New England, and the Cheney Farm is one of the famous institutions of the valley.

The farm lies adjoining the city on the west, and has some 60 acres of nearly level land in the home lot. There is practically no waste land on the farm, and all the acres not under tillage for garden crops yield from four to five tons of hay an acre yearly.

A system of crop rotation is carried on, all the land being of practically the same texture; sod land is plowed for potatoes, which are planted on the same land for two seasons. The land, however, is limed before the second crop is put in; about 10 acres yearly are given to potatoes, the yield being about 400 bushels an acre. For three years following diversified garden crops follow the potatoes, when the land is again seeded and lies five years in grass.

The illustration given at this time shows a vigorous growth of cucumbers. In view No. 1 the outer foliage is shown, said to be finer than anything previously grown here.

So great has become the demand for good vegetable plants that Mr. Cheney is to construct at once a special plant house. This house will be 11x200 feet, with two solid benches each four feet wide. Sashes entirely will cover this house, the object being to insure a per-

FLORISTS have a splendid opportunity of raising **Mushrooms** by utilizing the **waste space** under the benches, and then utilizing the **waste material** of expended mush room beds in growing flowers **Lambert's Pure Culture MUSHROOM SPAWN** the best spawn in the market, is sold by all leading seedsmen. Contains 509 Pages **NOW READY.** Price $3.00 Postpaid

feet system of hardening off without the extra cost of removing the plants to cold frames.

The sashes will be capped and will slide in a groove; it is expected that a great saving in breakage of glass will result in the use of the special plant house. This house will be in use the whole year through, beginning in the fall with head lettuce, following with plants for spring and early summer, and for celery plants needed on the farm.

Mr. Cheney believes in anything that will make the farm more productive and more famous for the quality of the products that are daily put on the market; every kind of machinery that is any good can be found on the Cheney Farm, and of manure and fertilizer there is no end.

The new farm manager, T. L. Brown, is from Grand Rapids, Mich., and his work is showing up in such a way that a new record for maximum crops and receipts is sure to follow.

English Mushroom Spawn.

J. PITHER, LTD., UXBRIDGE.

The largest growers of mushrooms for market know the right kind of spawn to use and J. Pither, Ltd., Uxbridge, Middlesex, not only grows immense quantities of mushrooms but also makes a specialty of spawn making. Although this firm has been in existence for a quarter of a century it is little known outside its own clientele, the largest growers for Covent Garden Market. Calling recently we noted that 15 acres of land are working and the firm is taking in additional ground for the purpose of its business.

The "Virgin Track" for inoculating is now the chief study. In ordinary seasons the "right sort" is not an easy matter to get; in wet seasons there is practically none at all. The firm is about to open a direct trade for America, and for the benefit of AMERICAN FLORIST readers we subjoin a few particulars and figures. There is one lot of pits being only 185 yards short of a mile. Again there are four other batches and two houses measuring 685 yards in length. The material for the spawn brick with its mill driven by the latest apparatus show at once the up-to-date system of this firm. Packing and manure sheds under cover are on a most extensive scale. Mushrooms of the right cut were being packed for the early morning Covent Garden Market. About £40 ($200) per week is the wages bill.

THE CHENEY FARM, SOUTH MANCHESTER, CONN.

Fig 1.—House of Cucumbers.

Chlorosis in Tomatoes.

Last fall in Westville, a writer in the report of the Connecticut Experiment Station saw a large field of tomatoes in which many of the plants showed leaves more or less mottled with yellowish-green. This unhealthy coloring was quite similar to the injury that can be transferred to tomatoes from calicoed tobacco. On inquiry it was found that the tomatoes had been severely injured by the late frosts of May, but had finally recovered and had borne a fair crop. It looked as if this chlorosis of the plant was one of the after effects of the frost, and was of the nature of the so-called calicoed tobacco, but whether or not it was infectious through the juice of the injured plant was not determined. Woods claims that a similar trouble in tomatoes can be produced by a very severe pruning back of the vines, and possibly the frost injury was in effect merely such a pruning.

DAVID HERBERT & SON,
Successor to L. K. Peacock, Inc, ATCO, N. J.

THE northern limit for sweet potato culture is roughly indicated by a line drawn from the border line of Massachusetts and Connecticut on the east coast westward to the northeast corner of Colorado, but the area where it is profitable commercially would be considerably south of this, except in the Mississippi valley, where it extends well into Iowa, Illinois and Indiana.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points June 6 were as follows: New York—Tomatoes, 10 cents per pound; cucumbers, No. 1, $2 to $3 per box; No. 2, $1 to $1.50 per box; mushrooms 25 cents to 75 cents per pound. Chicago—Mushrooms, 50 cents to 65 cents per pound. Cincinnati—Cucumbers, 25 cents to 30 cents per dozen; mushrooms, 50 cents to 60 cents per pound. Philadelphia—Cucumbers, 75 cents to $1.50 per dozen. Boston—Tomatoes, 30 cents to 35 cents per pound; cucumbers, $4.50 to $5 per box.

The Nursery Trade

American Association of Nurserymen.

J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C. Seager, Rochester, N. Y., Sec'y.

Thirty-fourth annual convention to be held at Rochester, N. Y., June, 1909.

THE weigelas are extremely well flowered, as usual, in Jackson park, Chicago, and their fragrance is very marked mornings and evenings.

LILIUM COLCHICUM is a lovely lily and not nearly as much grown as it deserves to be. Its bright yellow, fragrant flowers are among the showiest yet refined and very fragrant.

THE premium list of the fifth annual exhibition of the American Peony Society to be held June 19-20 at Ithaca, N. Y., is now out and copies may be had on application to the secretary, A. H. Fewkes, Newton Highlands, Mass.

PRESIDENT J. HORACE MCFARLAND of the American Civic Association is in Milwaukee this week at the convention. His suggestions as to the best way to beautify the river banks will be of great value to those in charge of the improvements.

PRESIDENT C. W. WARD, of the American Peony Society, passed through Chicago on his way to the nurserymen's convention at Milwaukee. He expressed a doubt as to whether he would be able to attend the convention of the above society in Ithaca, N. Y., June 19-20, owing to other business of an important nature in Michigan.

CHICAGO.—Wm. C. Barry and Chas. J. Maloy, of Ellwanger & Barry, Rochester, N. Y., spent three days here this week visiting the Peterson Nursery, the parks and other horticultural institutions. Additional visitors were Chas. Loechner, of the Yokohama Nursery Co., New York; Herbert Chase, Huntsville, Ala.; Jefferson Thomas, of the McFarland Publicity Service, Harrisburg, Pa.; C. W. Ward, Queens, N. Y., and many others enroute to the Milwaukee convention.

The White Fringe.

No other portion of the north temperate zone is so prolific in choice native trees and shrubs as the North American continent, and their exclusive use in the ornamentation of parks or gardens would, in itself, afford an immense amount of enjoyment, even if no others were available. The white fringe (Chionanthus Virginica) is one of the native choice productions of this country and is found growing in alluvial rich soil and along the banks of streams, from southern Pennsylvania to Texas and Arkansas. It sometimes in its native state attains a height of 20 to 30 feet, but it does not usually exceed a height of 15 to 20 feet in cultivation in the New England states and quite often it is a much branched arborescent shrub from 12 to 18 feet in height.

In a young state the white fringe grows slowly for a number of years, but after it gets to be thoroughly established in congenial conditions, it grows with comparatively much more rapidity. It is a plant of a very vigorous constitution, and although, in its native state, it seems to be partial to a mild climate, it stands without injury the rigors of our severe winters in this part of the world, and has been an important factor in the decoration of ornamental grounds for many years. The leaves are distinctively large, and of a most pleasing, deep green color, and we have never observed them to be attacked by any fungoid diseases or insect pests. Its main defect, if it might be called so, is its late leafage. When almost all other trees and shrubs are in full foliage, the branches of the white fringe are naked and apparently lifeless, and produce for a brief period what perhaps looks like a discordant note in a plantation where it is grouped with other trees and shrubs. This seeming defect, however, is more than overcome by its charming, beautiful flowers, which come into blossom during the first week in June. The long, drooping, panicled clusters of pure white flowers, which droop in papery, thread-like segments, give it a most unique effect in the rich galaxy of flowering trees and shrubs in our parks and gardens. The dark blue oblong fruit, from one to one and one-half inches long, ripens in September and frequently hangs on without loss of color until February, and is quite interesting. The white fringe is one of those choice garden plants which no well considered private estate, large or small, should lack, and it is obtainable in most nurseries.

JOHN DUNBAR.

American Association of Nurserymen.

The thirty-third annual convention of the American Association of Nurserymen opened at the Plankinton House, Milwaukee, Wis., June 10. The meeting was called to order at 9:30 a. m. by President Hill, who was in the chair, after which Mayor Rose delivered a very felicitous address of welcome, which was responded to by Geo. S. Jocelyn, of Fredonia, N. Y. President Hill then delivered his address, which was well received, and the reports of the secretary, treasurer and the various committees followed. The attendance at the opening meeting was excellent and it was estimated that 350 at least were present, crowding the hall to its fullest capacity. The trade exhibition was a complete success, the exhibits being much more varied and extensive than on any previous occasion.

Early in the meeting an invitation was extended by the citizens of Milwaukee to visit Oconomowoc, June 11, but in lieu of this it was decided to accept the invitation as for June 12, forcing the business one day ahead by meeting on Wednesday afternoon, for which the programme provided no business. At this session, Rochester, N. Y., was selected as the place of the society's 1909 meeting instead of Seattle, Wash., where the citizens were anxious, on account of the big exposition, for the society to convene. The election of officers resulted in Chas. J. Brown, Rochester, N. Y., being appointed president and the present vice-president, secretary, and treasurer being re-elected. The afternoon meeting was also very well attended.

Greenhouses and Nurseries: Western Springs, Ill.

Kansas City.

The Missouri Horticultural Society met last week at Mountain Grove for its annual election of officers. The new officers elected are: W. P. Stark, president; R. L. Hitt, first vice president; J. H. Chastin, second vice president; T. H. Todd, treasurer; L. C. Howard, Columbia, secretary. The meeting was in session three days. Among those present were: C. H. Dutcher, Warrensburg; Geo. T. Tippin, Springfield; T. H. Todd, New Franklin; W. P. Stark, Louisiana; R. M. Hitt, Koshkonong; D. G. Thornton, Blackwater; J. C. Evans, Harlem; J. B. Rohrer, Washington; J. J. Riley, Richmoud; Howard A. Gass, Jefferson City; John T. Stinson, Sedalia; Senator Dunlap, Illinois; Fred Perkins, Oswego, Kans.. K. C.

Perennial Phloxes.

To cultivate these beautiful border plants successfully, a partly shaded spot should be selected away from other plants, while a good rich soil, incorporated with some thoroughly decayed manure, is essential for their well being, according to a Gardening World correspondent. To have large and handsome trusses of blooms, thinning out of the weak flowering stems is necessary. Large clumps should be divided in spring, when they have begun active growth, the outer portion of the clumps being selected, and divided to form round, neat plants, as these will produce the finest trusses for two or three years. In the fourth year they are weaker, and the brilliancy of the flowers begins to deteriorate, so it is necessary to divide them at this stage. Being surface-rooting plants and moisture-loving as well, it is beneficial to mulch them in the spring with some good manure, in order to stay evaporation, and to give extra nourishment while they are forming their flowering shoots. A single, well-grown plant is a pretty sight, but to see them at their best they should be grown in clumps or masses of three, four, or more, of one variety and color; by massing various colors along the border they are sure to command attention for their striking beauty.

To propagate by cuttings is best done in April, and if they are taken with a heel so much the better, as they quickly form roots. The branches taken off during the thinning out process will do very well for cuttings; these can be inserted in a shaded frame, and kept close until the cuttings stand erect, when a little ventilation can be given, increasing it daily as growth begins, afterwards entirely removing the lights. To assist rooting a hole should be made with a stick or dibber and filled up with some gritty sand and pressed firm after the cuttings have been inserted. Shade from the hot sun, and see that they never suffer from want of water. In September they can be removed from the frame, and planted out in their permanent quarters for flowering the following season.

Some very fine varieties are to be found amongst the early-flowering kinds, notably Phlox suffruticosa, and among the late-flowering kinds, such as Phlox decussata. A succession of bloom can be obtained for a long period if plants of both varieties are selected.

Preservative Effect of Roadside Trees.

In answer to inquiries from the United States, Consul-General Robert P. Skinner, of Marseille, furnishes the following information relative to the effect of wayside trees on French roads: "It is proposed to plant trees along the roadsides of New York state in order to keep the moisture in the road and prevent raveling, and the question has been raised whether or not the roots of such trees may spread out underneath the road surface and eventually create great damage in a severe climate where there are extremes of heat and cold. While French roads are not always bordered with shade trees, they are so very frequently, and my information is that the trees are planted not only for furnishing shade, but in order to protect the roads themselves against the effects of excessive heat and drought. It is believed that the long dry summer season is much more inimical to roads than severe cold. The chief officer in charge of the public roads in Marseille is of the opinion that, on the whole, New York roads would be benefited if bordered with trees, suggesting, however, that only such should be planted as have vertically descending roots."

F. Birot, civil engineer and former conductor of the bureau of bridges and highways, expresses himself as follows on the subject: "In countries where the climate is damp roadside trees are prejudicial to the maintenance of the highways, as they prevent the circulation of the air and the drying of the soil; in most of the southern French regions such plantations are, on the other hand, very useful in dry weather, as they maintain the roadbed in a state of freshness favorable to its conservation. In general, trees should be selected with high, spreading branches, such as the poplar, the elm and the ash, and they should be planted generally upon the outer edge of the roadbox and at distances of 10 meters (32.80 feet). Each tree should be placed in a hole 1 meter (3.28 feet) deep and 1½ meters (4.92 feet) square, and should be trimmed to a height of 2½ meters (8.20 feet) above the surface. The earth about newly planted trees should be loosened in March and November—in March only after the third year—and thereafter until their permanent growth appears assured; small trenches should be directed toward the foot of the tree, in order to secure the benefit of rains. Finally, the tree itself should be trimmed annually during the first 10 years."

TRADE SATISFACTORY.

With school commencements and weddings flowers were in good demand the past week and a satisfactory business was done. The cool weather at the beginning of the week gave roses and carnations a chance to recover from the scorching hot spell of the previous week, and consequently the wholesaler had some very good stock to offer, which was eagerly sought for by the buyers. Geo. Corbett, as usual, was first in the market with outdoor grown sweet peas, and these were cleaned up; in fact, the majority were ordered in advance. Roses were good property, and the same may be said of lily of the valley and Lilium longiflorum. Carnations are coming to this market from all quarters. Strange to say that for three or four days before Decoration day it seemed as though the plants had stopped blooming for the out-of-town growers, and two days after we get them by the thousand, and then wonder at the increase in crime. Peonies also are a glut. Tom Windram is right in it with a nice cut of Shasta daisies, which easily fetch $1 per 100. Smilax and Asparagus plumosus is good property, while A. Sprengeri is dragging a bit.

NOTES.

What is the matter with the Cincinnati Florists' society? We ought to have our annual meeting and election of officers very soon, but at this writing have received no notice of same. The Society of American Florists may possibly hold its twenty-fifth annual convention in our city in 1909, and it behooves the florists hereabouts to get together and get busy. At the next meeting we must elect a new set of officers, and, incidentally, what is the matter with Peter Olinger for president?

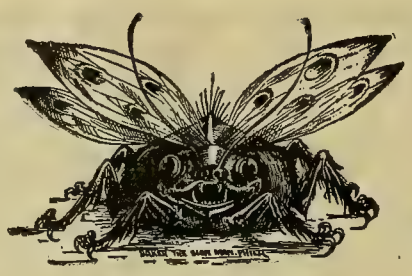
Miss Laura Murphy, the accomplished daughter of Wm. Murphy, has finished her engagement for the season with the Weber & Fields company and at present is doing the office work for her father, while Miss Cora Pherson, the bookkeeper, will take a deserved and much-needed vacation of several weeks.

Miss Alice Kyrk, sister of Edith F. and Louis Kyrk, was quietly married last Wednesday evening at her home to John Reid, of Detroit, Mich. Miss Kyrk was until recently employed in her sister's store, was well liked by the customers and has the best wishes of a host of friends.

Gus. Adrian, out in the beautiful suburb of Clifton, is nearly sold out of bedding plants and says business with him was very good this spring; in fact, fully 25 per cent better than he expected. Gus grows good stock, and plenty of it, and deserves to do a good business.

Arthur Becker, the genial buyer for the Avondale Floral Co., reports business as very satisfactory. He says the confirmation of the boys and girls at the Jewish temple in Avondale and the receptions following the same used up immense quantities of stock.

Wm. H. Gear has leased the store next door west on Fifteenth street and will remodel his present store, making one large room of both stores. When completed Billy will have ample room and one of the best locations in the over-the-Rhine district.



Everybody Talks About It!

LIKE THE BEE

A Prosperous Florist Is Never Idle.

So is **GODFREY ASCHMANN,** the Philadelphia Hustler.

An immense stock of bedding plants is now ready. Every hole and corner full for immediate shipment.

GERANIUMS.

S. A. Nutt, John Doyle and some pink, 4 in. pots, $7.00 per 100; and mixed varieties.

Begonia Vernon, newest strain, flowers as dark as blood; seeds gathered by myself from specimen plants in Zurich, Switzerland, during my trip to Europe; 4-in. pots, $7.00 per 100; 3-in., $5.06 per 100.

Begonia Erfordi, true; this is one of the best pink varieties known; it is a sight to see a bed of them in bloom; nothing but a mass of flowers. This plant decorates the flower beds of aristocratic people in England, Germany, Switzerland and Paris. Price: 4-in., $7.00 per 100; 3-in., $5.00 per 100.

	Per 100
Nasturtiums, dwarf, all shades, 3-in. pots	$3.00
Heliotropes, 3-in. pots	4.00
Fuchsias, best varieties, 4-in. pots	7.00
Fuchsias, best assortment, 2½ to 3 in., in bud	3.00
Cosmos Grandiflora, white, red or pink, 3 plants in a 3 in. pot	4.00
Cannas, French best varieties, about 12 different, distinct varieties by name, 4-in. pots	$7.00 to 8.00
Cobea Scandens, nicely staked up, 4 in.	8c
Petunias, California Giant, 3-in. pots	3.00
Inimitable or dwarf, 2½-in.	3.00
Verbenas, all shades 2½-in.	3.00
Phlox Drummondi, 2½ to 3-in., Grandiflora varieties	3.00
English or **Hardy Ivy,** 3 feet high, 4-in.	10c
Centaurea Gymnocarpa or **Dusty Miller,** 2½-in.	3.00
Lobelia, dwarf or trailing, 2½in. (Crystal Palace)	3.00
Sweet Alyssum, Carpet of Snow or Little Gem, 2½-in	3.00
Torenia Fournieri, 2½-in. pots	3c
Sallerol Geraniums, for borders, strong plants	4.00
Summer Chrysanthemums, 3-in. pots	4.00
Ageratum, dwarf, best blue, 3 in.	4.00

Clematis, the true Jackmani, 6-in. pots, 3 feet, 35c to 40c.

Scarlet Sage or **Salvia,** Clara Bedman or Bon fire. Ours is the true genuine variety so much admired in all the capitals of Europe and America. Deep red medium tall varieties; free bloomers. Seeds of these famous varieties were gathered by myself in Zurich Switzerland, the home of the Salvias. Price: 4-in., $7.00 per 100. Have 5,000 of these to offer.

Don't Forget We Lead the World in

MOONVINES.

Watch and be careful you don't buy Morning Glories for Moonvines.

We grow only the best varieties, hybrid or **Ipomoea Noctiflora,** for which we have had, for the past 20 years, a world wide reputation. We ship every season, May and June, 20 000 to 25,000 plants into every state and territory in America, and in Cuba and Mexico. This Moonvine is much earlier than any other variety in existence; blooms freely, with very fragrant, pure white waxy flowers, and as large as a saucer. Price: 4-in. pots, nicely staked up, 30 to 36 inches high, $12.00 per 100; 2½-in. pots, $5 00 per 100.

Kentia Belmoreana, 5¼ to 5½-in. pots, 22-25-27 in high 50c to 75c; 4-in 20 to 22 in. high 35c to 40c. **Forsteriana,** 5 to 5½ in. 50c to 75c Just received per steamer Manitou, a consignment of larger **Kentia Forsteriana;** price, $1.00, $1.25, $2.00 to $2.50 each.

Araucaria Excelsa Glauca, spring importation 1907; have only specimen plants left 7 in. pots, 6 years old 5 tiers 25, 30 35 to 40 in. high, the same in width $1.50, $1.75, $2.00 $2.50, $3.00 to $4.00 each. **Robusta Compacta,** $1.25 to $1.50 each.

Have just received from steamer, May 1, from Antwerp a big consignment of about 5,000 **Araucaria Excelsa,** of all sizes. Plants with 3 tiers, 8 to 10 in. high, 40c; 10, 12 to 14 in., 50c; larger sizes, 60c to 75c.

Bay Trees, just received, per steamer Manitou, 6 ft. high from top of tub, 30-in. crowns, $12.00 per pair.

All goods must travel at purchaser's risk only Cash with order, please.

Ivy, hardy English, 4-in. pots, $1.50 per dozen $10.00 per 100.

Cash with order please.

C. EISELE, 11th and Westmoreland Sts PHILADELPHIA, PA.

Omaha.

BUSINESS GOOD.

Decoration day business has been the best we ever had. In fact it is hard to tell how much could have been done had we the stock to sell, which we had not. The shipping business was so large that a good many orders had to be turned down. The weather was very favorable until the last day when it turned cool and rainy and this had a considerable influence on the stock. Consequently the prices went up; some carnations sold for $1.25 per dozen; peonies were at their best and sold well, bringing $1 to $1.50 per dozen; American Beauty roses were very scarce and tea roses were not over plentiful. Carnations took the lead. Since Decoration day business has kept up fine. Peonies, especially, sell better than ever before at good prices. More bedding plants were sold this spring than ever before at fair prices. Nearly all the growers are completely sold out.

GRIPPE.

Kansas City.

ROSES PLENTIFUL.

No perceptible change from last week's report is apparent, market conditions remaining about the same. Roses are very good and in sufficient quantities to meet all demands. Carnations show plainly the passing of the summer and the effects of the warm weather. Store trade is not very rushing only for the last of the commencements and a few winding-up social affairs. A change in weather conditions is promised and it is hoped the rainy season, which has been disastrous to outdoor flowers, will end in the next few days.

NOTES.

Geo. M. Kellogg is still showing improvement. According to the physicians, it will be some time before he gains strength enough to attend to his duties. It is hoped that the breakdown will serve as a lesson to Mr. Kellogg, for it has always seemed his contention that every detail around the big plant should receive his own personal supervision, a task too great for any man.

W. J. Barnes believes this has been the greatest season ever experienced in the bedding stock line, notwithstanding the fact that a large amount of cheap work has been done by market gardeners, who have demoralized the price usually paid for good material and workmanship.

Over 500 long-stemmed American Beauty roses were used in the decorations for the occasion of the opening of the National Bank of Commerce last week. Besides a large number of foliage plants and bay trees, there were flowers of all kinds sent in by friends of the bank.

Arthur Newell says he will not move to the room he expected to occupy in the new Baltimore annex, on account of a change made recently in the plans of the building.

M. E. Chandler expects to begin cutting on a big field of gladioli in a couple of weeks, providing the heavy rains do not continue.

George Brackenberry has left the employ of Kellogg's and will return to Emporia to the position he formerly held there.

K. C.

DUBUQUE, IA.—Memorial day trade, says W. A. Harkett, was good, both in flowering plants and cut flowers, being ahead of last year (the banner year here previously). Much of the outdoor stock being damaged by rains helped sales of indoor flowers. About all the good stock sold and some of poor grades. Bad weather made cut flower stock hard to keep and some shipped-in stock was worthless. A severe storm on Friday afternoon (the busy day) drove people to cover for a time.

HYDRANGEAS

Fine plants, well flowered, good value in each size from 25c to $4.00 each.

WOOD BROTHERS
FISHKILL, N. Y.

Newark, N. J.,

J. Crossley, 37 Belleville avenue, has been making improvements in his business by erecting a neat conservatory for plants in the rear of his store, which makes it one of the most convenient and commodious retail stores in the city. He has now good facilities for handling his large business. A striking characteristic of Mr. Crossley and his family is their fondness for dumb animals, every animal on the place being a pet. The latest addition to his collection is a litter of eight bull terrier puppies.

The Cornish Seed & Floral Co.'s store is said to be the oldest seed store in New Jersey. It was founded in 1857 by Grant Thorburn and J. H. Kummerle. When the former removed to New York to associate himself with his brother he was succeeded by Francis Brill, now of Hempstead, N. Y. After the retirement of Mr. Brill the firm was known as J. H. Kummerle & Son. After the death of both members of this firm the present owners acquired the business.

R. Gilkinson, of 750 Summer avenue, who last year erected a greenhouse and opened a retail store, is doing a good business, particularly in planting and gardening work, he having several men steadily employed. He intends to erect, in the near future, a new store and greenhouse.

McDonough, who is located at 376 Belleville avenue, just opposite Mount Pleasant cemetery, has his force very busy with cemetery and other landscape work.

Madden, who has a very nice retail store, with greenhouses, at 98 Broad street, is very busy with landscape and planting-out work.

Isaac Cassidy, the greenhouse builder, is busy, his shop force being engaged on supplies and fittings, for which he has a good demand.

San Francisco.

TRADE QUIET.

Business brightened up a little for Memorial day, but does not compare favorably with that of a year ago. All the florists who other years shipped a great many large orders to the country towns report considerable falling off this time. We are all preparing for a very quiet summer season, and quite a number of the florists are making preparations for prolonged vacations.

NOTES.

Stein & Levin have been very fortunate of late in securing some large funeral orders, notable amongst which was a pall for the funeral of the late Rabbi Vorsanger. The pall was made entirely of orchids and the necessary fern and is said to have cost $500. The designs and flowers used were valued at considerably over $2,000.

J. B. Boland, whose store was recently burned out on one of the temporary wooden structures on Geary street, has opened an up-to-date store in a modern fireproof building at 60 Kearney street. All his friends are wishing him much success in his new venture.

N. Peterson, of Fillmore and Haight streets, is going for several weeks to Lake county, to take a well earned rest.

F. Pelicano, who has been down with rheumatism, is about again.

P.

GEORGE BISCHOFF
ANN ARBOR. MICH.

Columbus, O.

So far there have been quite a few weddings this month, but the number is not quite up to the average of former years, neither are the decorations as lavish as usual. In spite of the general business depression, the amount of spring work was far in excess of former years. Work is now being pushed rapidly in the greenhouses, new benches being put up and all arrangements made for planting chrysanthemums and roses. Poinsettias are now ready to be potted off, and from all indications, a fine crop may be expected next December. The second annual work-horse parade was held in this city last week. Emil Metzmaier, one of our local florists, had an entry in the parade. The turnout was splendid, wagon newly painted and horse well groomed. The Florists' Club will hold its annual picnic at Buckeye lake this summer. No definite date has been fixed as yet, as it depends upon when Mr. Bauman can go to catch some of his whoppers he tells about. CARL.

Orange, N. J.

The regular monthly meeting of the New Jersey Floricultural Society was held June 5 at the society's rooms. It was the last meeting of the season prior to the summer recess and the floral display was confined to the season's flowers and orchids. Peonies from S. and A. Colgate (gardener, William Read), Charles A. Munn (gardener, John Hayes), Stewart Hartshorne (gardener, Arthur T. Caparn); carnations from Chas. Hathaway (gardener, Max Schneider), delphininum and digitalis from Thos. Jones, of Short Hills; orchids from Lager and Hurrell, of Summit, and Orson A. Miller, of East Orange. The topic for the evening, "Flowers for Commercial Uses," was opened by John E. Lager and the discussion participated in by Geo. Smith, A. T. Caparn, John Hayes, Orson A. Miller and President Malcolm MacRorie. Geo. Smith was appointed to convey the sentiments of the society to A. D. Rose who is severely ill at his residence in Montclair.

J. B. D.

WORCESTER, MASS.—The weekly exhibition opened at Horticultural Hall under the auspices of the Worcester County Horticultural Society, June 4, was a very successful one, the flowers being shown in unusual numbers and of excellent quality. Wild flowers were also shown. E. W. Breed was a successful exhibitor.

GERANIUMS

Good Standard varieties at $2.00 per 100 and up to Novelties at $1.00 each, from 2-in. pots. EVANS' IMPROVED CHALLENGE VENTILATING APPARATUS

WRITE FOR ILLUSTRATED CATALOGUE

QUAKER CITY MACHINE WORKS. RICHMOND, IND.

FRESH WATER

WITHOUT STORAGE—DIRECT FROM

the source of supply, throughout the nursery, by using the Perry Pneumatic water system. A new and simple solution of the water problem. Write for particulars.

UNITED PUMP & POWER CO.

Old Colony Building, CHICAGO.

THE BEST WAY TO COLLECT AN ACCOUNT

is to place it with the

NATIONAL FLORISTS' BOARD OF TRADE
56 Pine St., New York.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

SAVE

FUEL, WATER, REPAIRS

HOW?

By Installing a

MOREHEAD TRAP

Write us for a 30 days' trial. We will place a trap in your heating system and will abide by your decision whether it pays or not. We know once you install a **MOREHEAD** you will never be without one—**Investigate it.**

MOREHEAD MFG. CO.

1047 Grand River Avenue
DETROIT, MICH

METROPOLITAN MATERIAL CO.

GREENHOUSE WRECKERS

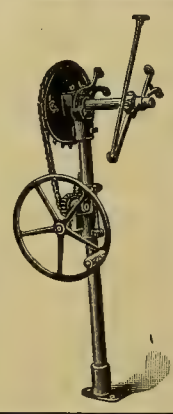
Cypress Material, Hot Bed Sash, Boilers, Fittings, Pipe.

1398-1408 Metropolitan Ave. **Brooklyn, N. Y.**



The Advance Ventilating Apparatus

It is what our line does, the ease with which it does it, its neatness, lasting qualities, all at fair prices, that makes friends of our customers and brings us the orders. Why not give us a trial? Write us about our new pipe couplings. Best thing on the market.

THE ADVANCE CO.
RICHMOND, IND.

FOR WATER SUPPLY

A Standard Pumping Engine

is more reliable than windmills and will furnish a much higher pressure. Catalogue, on request, will tell you more.

THE STANDARD PUMP & ENGINE CO., Cleveland, Ohio

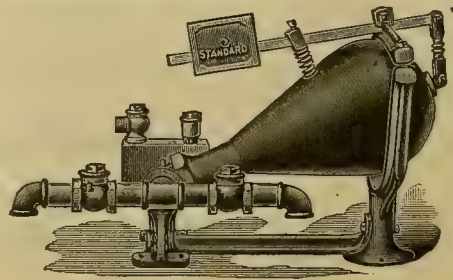
Use our patent Iron Bench Fittings and Roof Supports.

THE JENNINGS IMPROVED IRON GUTTER.

IMPROVED VAPORIZING PANS
For Tobacco Extracts, etc. Send for Circulars.

DILLER, CASKEY & KEEN,
S. W. Corner Sixth and Berk Streets, PHILADELPHIA.

VENTILATING APPARATUS.



The Standard Steam Trap,

Has established a record far above that that of any other trap for Florists; being very simple, durable and easily taken care of.

Catalogues of the **Trap, Duplex Gutter, and Standard Ventilating Machinery,** mailed free upon application.

E. HIPPARD, Youngstown, O.

Iron Reservoir Vases...

Nearly 100 styles and sizes ranging in price from $6.00 to $100.00 each.

These vases are made with a reservoir for water, from which a constant and even supply of moisture is drawn by capillary attraction, and they do not need watering oftener than once in ten or fifteen days. Thousands of Reservoir Vases are in use on lawns and in cemeteries all over the country. Our prices are no higher than those of ordinary vases. Catalogue sent on application. Liberal terms to dealers.

TRADE VARIABLE.

Business conditions the early part of the week were very good, while in the latter part they were very poor. Roses are very plentiful, of good quality, and find a fair demand. Carnations are plentiful but show the effect of the warm weather. The demand is very poor. Sweet peas have had a demand about equal to the supply, but are now more plentiful. The quality is fair; iris and other hardy stock are in great supply, and find some demand. Water lilies are in good supply, but do not find much demand. Fancy greens are very scarce.

NOTES.

August R. Baumer and Miss Jessie Laufer were married June 11 at Trinity English Lutheran church. Good wishes are with the couple.

Wm. Walker is now located in his new store at 342 West Jefferson street. He is cutting plenty of stock.

Jacob Schulz has just received a shipment of orchids to supply the increasing demand for this flower.

Etheridge, who recently opened a store on Fourth avenue, has moved to Jefferson street.

Frank Farney, of A. L. Randall Co., Chicago, was a recent visitor.

Anders Rasmussen is cutting plenty of good roses.

F. L. S.

PETERBORO, ONT. — Mason's Floral Emporium reports larger sales on bedding plants than ever before, a new double lobelia being an especially good seller in 2½-inch pots. Other local men say trade is exceptionally good.

Hardy Greenery.

Although written from a European standpoint there is much that is suggestive and useful in the following notes taken from a recent issue of the Gardening World.

Some flowers, such as tulips in summer and Lenten roses in winter, are self contained in the matter of greenery; others, again, such as chrysanthemums, look tolerably well without any greenery when arranged in vases, etc. but the majority of flowers have their beauty enhanced by having some greenery or other flowers mixed with them when being manipulated for the decoration of the home. Those possessing greenhouses have the inevitable maidenhair fern, asparagus, and smilax. But even for such, an occasional change is refreshing, and those possessing little or no glass must look elsewhere for supply. In the shops there is generally a scarcity of such materials, and the price of those obtainable is prohibitive for many for ordinary purposes. Anyone possessing even a small garden can, by making some use of the following hints, have plenty of such materials for a great part of the year.

THALICTRUM ADIANTIFOLIUM (Poor man's maidenhair).—This border perennial is little behind the maidenhair fern in attractiveness, and is available for a good part of the summer. It can be raised from seed or by division. Its graceful pale yellow flowers can also be utilized in the same way.

ICELAND POPPIES.—The foliage of these will be found excellent for associating with violas and such like.

AQUILEGIAS.—The foliage of some of these is rather heavy, but that of the glandulosa type will be found highly useful; do not cut the leaves in a too young state or they will fade quickly.

IRIS SIBIRICA.—The recurving grassy foliage of the Siberian iris will be found to go well not only with irises in general but also with the late tulips, and being a strong grower, a plant or two will stand a lot of cutting.

ASPERULA ODORATA (Woodruff).—The slender stems of the common woodruff, with their numerous whorls of bright green leaves, will be found to associate well with not a few low-stemmed flowers.

NIGELLAS (Love-in-a-mist).—The finely cut foliage of either N. Damascena or the variety Miss Jekyll, will compare with any greenery from the open air or under glass, and being hardy annuals, their culture is of the easiest.

ASPARAGUS OFFICINALIS (Garden asparagus).—This can hold its own from a decorative point of view with most of the tender species, and for the purpose we are discussing, requires no special treatment beyond being grown in a fairly rich friable soil, in a corner of the vegetable garden. It is available from the end of June till October.

ROSE LEAVES are undoubtedly best for associating with roses.

MAHONIA AQUIFOLIA is, in the writer's opinion, best for associating with Christmas roses. Sweet peas also look best with their own foliage, but the gauze flower (Gypsophila paniculata) and the annual species, G. elegans, are often used for this purpose. Heuchera gracillima and its varieties are useful for our present purpose, and London pride (Saxifraga umbrosa) is not to be despised.

SALEM, ORE.—Carl F. Ruef is building two new greenhouses to be used for carnations and violets.

NICKERSON, KANS.—This place and Hutchinson were visited with a furious hail storm early in the morning of May 31. Peaches, apricots, cherries and other fruits were knocked off the trees. Gardens suffered. I. J. Byers' farm was in the belt, but his loss in glass was light, owing to his protection with lath shutters.—B.

BUSINESS ENCOURAGING.

Memorial day and the week preceding it were certainly very encouraging. Everyone was greatly surprised at the amount of business done and, while prices ruled a trifle lower than last spring, everyone is well satisfied with the result. All establishments had all they could handle. Rush orders from out of town came in late in the week which was an indication that business was good everywhere.

NOTES.

The Grand Rapids Greenhouse Co. reports business far beyond expectations, the 25,000 geraniums of which a specialty was made being entirely sold. The new plant, which was begun April 10, was completed and planted May 28 and the company will begin building another section of 25,000 feet for vegetables; also at once at the florist plant on Anton avenue a cement office and one large show house, 28x130.

Jas. Schols reports trade about the same as last year. Mr. Schols left May 10 for a six months' trip through Europe and the Netherlands, his old home. Jas. Schols, Jr., has charge of the business while he is away.

Henry Smith says that he is well satisfied and will have nothing left after orders are all filled. He also says that he has had a very large lot of funeral work the past week.

H. Danhoff reports not nearly enough to go around. His trade is increasing so fast that it will be necessary to build another house this season.

Eli Cross reports about the same as last year and is well satisfied. He had a fine lot of lilies and hydrangeas for May 30, which sold well.

Wealthy Avenue Floral Co. says it had 40,000 geraniums and about all cleaned out, the largest box and basket trade the firm ever had.

Grand Rapids Floral Co. reports being about sold out, and all hands are at bedding in order to close it out as quickly as possible.

Crabb & Hunter Floral Co. reports the largest spring business ever had, and expects to be through bedding by next week.

Bruinslot & Sons report about sold out; everything went good but the price a trifle lower than last year.

Paul Goeble reports a very satisfactory business and especially in geraniums, of which he had 20,000.

Peter Kunst says they have had the best season so far for several years.

A GOOD DEMAND.

Last week brought peonies in with a rush. They could be bought at any price that suited the purchaser, but this week the cold storage stock had to be tackled in order to get good flowers to supply the great demand, caused by June weddings and commencements. The weather has been very hot and dry for the past week and under these conditions outside stock is suffering more or less. Bride and Bridesmaid roses are very small but of good color; these bring $2 to $5 per 100. Kaiserin proves to be a very desirable summer rose. American Beauty is small and shows evidence of the heat, but it is in brisk demand and brings fair prices. Carnations are good, considering how late it is in the season; however, they are being sold at such ridiculously low prices that much dissatisfaction is expressed by both grower and commission man. Fortunately the growers have commenced to throw out the old plants. Shasta daisies are coming in nicely for weddings, sweet peas are rather soft. Green goods are plentiful.

NOTES.

The Cleveland Cut Flower Co. is handling some exceptionally fine Kaiserin roses from the greenhouses in East Cleveland. This firm has also a good supply of gladioli, which meet with ready sale.

The Cleveland Florists' Exchange has thousands of peonies in cold storage, which were grown by E. A. Reeves at the Lake View nursery.

C. M. Wagner, Euclid avenue, had several large weddings last week. Mr. Wagner reports a very satisfactory Memorial day trade.

C. Merkle & Son are sending in some fine Lilium Harrisii.

GLAZING POINTS
Are positively the best. Last forever. Over 30,000 pounds now in use. A sure preventative of glass slipping. Effective on large or small glass. Easy to drive. Easy to extract. Two sizes ⅝ and ⅞. 40c per lb., by mail 16c extra; 7 lbs, for $2.50 15 lbs. for $5.00 by express. For sale by the trade

RANDOLPH & McCLEMENTS, Successors to Chas. T. Siebert, Baum & Beatty Sts., Pittsburg.

Nashville.

Among the florists in the market house Saturdays are many who grow a great many plants and flowers, but who do not have up-town stores and come into the market to dispose of them. Probably the leading florists of this class are McIntyre Bros., who have one of the largest establishments around the city. They do a general floral business, selling cut flowers, decorating and making designs for funerals and other occasions. They have always been very successful and have a very large trade. This season they put on the market 100,000 plants for bedding and gardens. These they sold very well, but when the trade became slack they put an assorted lot on wagons and sold them on the streets, which method proved very successful. The firm occupies the stall in the market house once used by the late Jacques Barot, which once was a center of trade and is still successful.

W. F. Jocelyn, who has made such a beautiful spot of the Centennial park and under whose care a fine range of greenhouses has been built, has lost his job there owing to the want of funds in the treasury of the park commissioners. He will go to Chattanooga and engage in park work there.

Arnold Schmidt is a successful grower. His principal product, however, is vegetables, and he only grows flowers as a side line. He is very successful with lilies and chrysanthemums, and is a well known figure in the market house.

Louis Haury & Son are enterprising florists, are growing all the time and extending their capacity annually. They have now 20,000 feet of glass. They do a general floral business, and sell a great many bedding plants.

The Mount Olivet Cemetery Co. has sold a large number of plants in the market this season, though the cemetery itself consumes a large lot of bedding plants.

A. F. Clemens has been employed by the Ladies' Hermitage Association to clean up and trim the old fashioned flower garden and get it in good shape.

New Dust-Killing Machine.

Consul-General Robert J. Wynne reports that a new tar-spraying machine, which the makers claim will do away with the dust nuisance, has been tested on the roadway in front of the Horticultural Hall, Westminster, London, before practically the whole of the municipal engineers, a large number of county surveyors and suburban engineers and two representatives appointed by the war office.

After the tar-spraying process a second machine scattered a level layer of granite grit and chips upon the tar, which, when rolled, formed a road with a fine, smooth surface, durable and dustless. A tar macadam road made in this way costs from 3s. 6d. to 4s. (85 to 97 cents) a square yard, as against ordinary macadam, which costs on an average 2s. 6d. (60 cents) a square yard.

HAMILTON, ONT.—Exceptionally good business is reported by the Connon Floral Co. This firm is going in more extensively for plant growing, using some of the houses formerly devoted to cut flowers for the purpose.

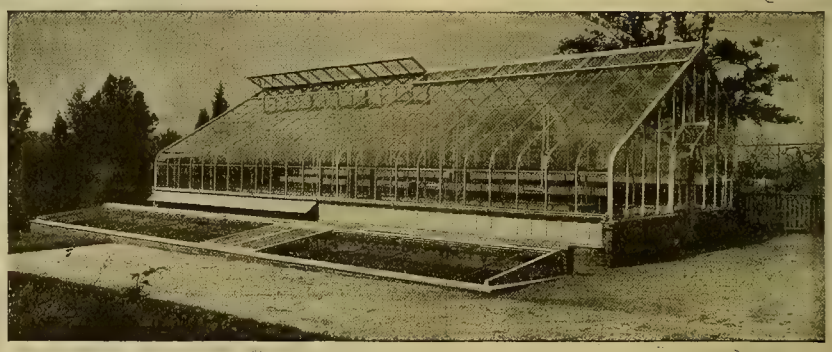
Heating Apparatus Unsatisfactory.

ED. AMERICAN FLORIST:

My hot water heating system has not given satisfactory results. Will you kindly aid me in detecting and removing the difficulty? I have a range of three houses, as in accompanying diagram, each 100 feet long; two are 18 feet wide and one 12 feet; side walls are 3½ feet, no glass in sides. In each of the 18-foot houses there is one 4-inch flow and six 3-inch returns, boiler flues; in the narrow house there is one 2½-inch flow and five 2-inch returns. The expansion tank is near the boiler and there is a good regular fall all the way back to the boiler. The water leaves the boiler by one 4-inch pipe and returns by a similar one. The boiler is a return tubular one, rated at 35 h. p., containing 42 3-inch flues. The return pipe is on a level about one foot lower than the top of the boiler, bottom of boiler being about three feet lower than return pipe, but the return is carried under the boiler before entering boiler. With this system I find it difficult to keep a temperature of 50° in zero weather. Would this boiler, if working to its full capacity, properly heat these houses and another 30x106 feet? I have thought that possibly more piping is needed, but those I now have do not heat as readily as they ought. I have thought also that if the boiler was set lower it would do better, but cannot drain the pit if dug deeper. A.

While the question states that it is difficult to maintain a temperature of 50° in zero weather, it does not tell if that is the temperature desired. If the rating given is correct the boiler can readily heat the present houses and another of the size mentioned to 60° if desired. There may, of course, be some defect in the arrangement of the piping that is not made clear by the data given, but there are at least two things that are mentioned which would account for most of the trouble. The amount of radiation mentioned is sufficient to provide a temperature of 50°, and in the larger houses it should be possible to secure 55°, provided everything else is properly adjusted. One thing that prevents the securing of a good circulation is that the boiler and piping are so nearly of the same level. If it is not possible to lower the boiler it may be that the heating pipes can be raised, which will have the same effect. An elevation of the returns of one foot would have a very marked effect, and the circulation would be benefited if the flows could also be raised from one to three feet. The other respect in which a change is desirable is in the size of the main flow and return pipe. While a 4-inch pipe might answer were the coils considerably elevated or of a smaller sized pipe, it will at best only give a slow circulation in the present radiation. It would be best if the flow and return pipes to each house could be carried to the boiler at full size, but it would probably answer if the main now in use supply the 12-foot and one of the 18-foot houses, and a 3-inch (or, better yet, a 4-inch) flow and return be run from the boiler to the other house. A 4-inch flow and return should be used for the proposed house. For the coils in this house use five 2½-inch flows and ten 2-inch returns if 50° will answer, or six flows and 14 returns if 60° is desired. L. R. T.



They Are Perfectly Ventilated

by an easily operated apparatus that opens the sash at the ridge or the sides under the benches.
Of special superiority is our method of under the bench ventilation, and we will gladly tell you why. Lightness, strength, durability, simplicity, attractiveness, increased productiveness and low cost of maintenance are other points to keep in mind.

SUGGESTIONS FOR CUT FLOWER GROWERS.

Antirrhinums.

Where there is not sufficient stock of these useful flowers, cuttings may still be inserted that will make good plants for flowering late next spring. Continue to pot the earlier raised cuttings as they are rooted and stand the plants outside or in a protector. See that the earliest rooted plants are not allowed to suffer for want of water and if it is seen that the pots they are growing in are not sufficiently large to carry them until the benches are ready for them in September or October, let them have a shift before they get potbound.

Asters.

Too often growers are satisfied to plant out their asters in May and leave them to get along as well as they can without much further attention. But the gain is considerable, both in quality and number of blooms produced, when the soil is carefully cultivated and mulched and the plants watered when necessary. A mulch of about two inches of mixed dry soil and manure should be applied now and, as the buds show, these should be thinned considerably, throwing the strength of the plant into those remaining and insuring large flowers with good stems.

Cypripedium Insigne.

The plants of this useful cypripedium will by now have finished their growth or nearly and if they have been growing in heat they will be better out of it now. When frames have been cleared of bedding plants they should be thoroughly cleaned and a floor of clean ashes put in if needed and the cypripediums stood on this. Before standing them give a good sprinkling of soot and lime and damp the frame thoroughly. A light shade of muslin or some such goods must be used at all times when the sun is on the frames but means must be taken to keep it off the glass so as to allow of a current of air beneath it. Here the plants may remain for the rest of the summer. They must not be dried as, although little apparent growth is going on, the roots are active and the embryo flowers are forming. There is no comparison between the health of plants so treated during the summer and that of others kept in stuffy hot houses, and the same treatment is good for Cœlogyne cristata.

Freesias.

The earliest consignments of freesias will soon be in and if the bulbs are well ripened the sooner they are planted or potted the better. The distance they are placed apart will depend upon the size of the bulbs, but it is best not to crowd them unduly. Two inches apart in the rows and the rows three inches apart is a good distance for strong bulbs in flats or benches, while a similar distance or a little closer will do for those potted. After potting or placing in flats, keep them quite cool, in any shady corner where they may be covered with ashes until established. When planting, the tip of the bulb should just show out of the soil; they do not thrive so well when deeply planted. This early planting is desirable where early flowers are needed, as freesias cannot be successfully forced. They require cool conditions right along.

Peonies.

After the flowers have been cut the plants must not be neglected. Too often they are left quite alone, the growths falling over and the roots starved, yet the plants are expected to do well. Young stock growing on for next season's cutting will not have been cut so hard as the older plants, if at all, and although the apex of growth has been reached, yet much may be done by mulching and cultivating, and even watering and feeding in some instances, to induce the swelling up of fine healthy crowns that will flower abundantly next season. And the same is true of the older plants that have stood the strain of flowering and severe cutting. A stout string or wire, tied to stakes every 10 feet or so and run around the beds, will prevent the falling over of the growth, which is very detrimental, while anything that is going in the way of liquid manure can be used now with benefit to the plants. Label the kinds that are to be most freely propagated owing to their superior qualities as cut flowers and in the meantime prepare the beds with especial care where the divisions have to be planted in September.

Held Over Roses.

Any benches that it is decided to hold over should be dried a little now, not severely, but sufficient to check the growth and bring the plants into a quiescent stage for a few weeks previous to pruning. Although there is no violent hurry for this, yet any benches that are not required may be left to be cut back the earilest, while others that may be producing good flowers may be left longer. Withhold water from those selected by degrees; to suddenly dry the benches would lead to the foliage drying up and the wood shriveling. This is not the object in view and it would be far better to cut them back while still green and growing than to do this. The idea is to gradually bring the plants to a state of rest and, while drying the roots, it is good practice to spray the upper portion of the stems slightly on bright days. This gradual hardening up of the growth will take about three weeks, when all weak and dead wood can be cut clean out and the strong shoots cut back as necessary. The pruning of roses at this time is not easy to describe, though those who have a little experience in it find it easy enough to decide how to cut back. Stout, well ripened shoots with that bronzy appearance that denotes good culture may either be cut back or bent over to break along their entire length; they do well either way. But the sappy, green wood has to be cut back hard or the shoots produced will be pithy and useless. All decayed rubbish and leaves should be removed and, unless the roots are very near the surface, the soil should also be removed for a couple of inches, down to healthy roots, in fact, its place to be taken by a mulch of good soil and manure in equal parts. A liberal sprinkling of bone meal before placing the mulch is also helpful. Give one good soaking of water to settle the soil and afterwards depend more upon frequent spraying to insure a free break, watering the roots but slightly until there is again a good head of foliage on the plants.

Asparagus Filicinus.

This is a slender-stemmed, erect-growing species that is particularly elegant and beautiful. It is bright green, and the growths spread out frond-like. The little leaf-like blades are practically all on one plane, and do not surround the stem, as in A. Sprengeri. The species is Himalayan.

Gold Medal Floral Design.

The accompanying illustration shows the design made by Louis Motroni of San Francisco, Calif., and which was awarded a gold medal at the recent flower show there. It represents an old-fashioned well with windlass and buckets and was carried out principally in ferns, lycopodiums and colored foliage, very few flowers being used.

RETAIL STORE OF HENRY MORRIS, SYRACUSE, N. Y.
Window Display of Peonies.

A Republican Banquet Decoration.

A notable dinner was that given in Chicago on June 8 by the national republican committee in honor of Chas. Dawes. It was given in the Auditorium Annex ball room and the decorations were by Hauswirth. On one side of the room was a formal garden. A bed in the center of a plat of green moss was of pandanus and geraniums, with a boxwood edging. The border of the entire affair was of geraniums and boxwood. Bay trees and festoons of Asparagus plumosus helped out the effect. There were 14 tables, seating eight persons each, besides the speakers' table, at which sat 27 persons. Each table had a center piece of Humei peonies, and the speakers' table carried, as well, several huge urns of the same peonies. These flowers were also strewn loosely on the tables.

THE CARNATION.

CARNATION LADY BOUNTIFUL was well shown at the recent great Temple exhibition in London by W. H. Page, of Hampton, Eng.

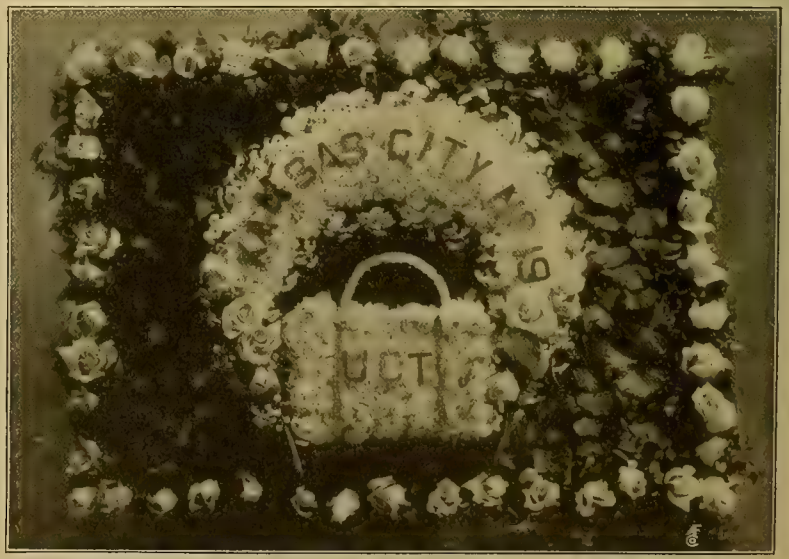
WHEN complaining of the low price of carnations, growers do not, at all times, take into consideration the short time it takes the flowers to develop now.

Notes in Season.

CARNATIONS.

Every year sees an increase in the number of growers who keep at least some of their stock under glass the whole year round. There are some varieties that undoubtedly do better this way than when planted in the field and again disturbed for autumn planting. The one danger of indoor stock is planting in houses that have not been thoroughly cleaned. This cleaning is just as important as with outdoor plants and if it has not been carried out it should be seen to at once, benches, roof, walks and glass coming in for a thorough and systematic cleaning on the lines frequently laid down in these columns.

We advised, earlier in the season, planting in the benches at half distance any plants that were likely to become pot-bound before the time for permanent planting. This allows some at least of the old plants to remain as long as they are profitable and as soon as they are thrown out the benches may be put in order and the plants set out at proper distance. This will vary a little, according to the variety, but rather less room may be allowed than for field grown stock and 10 inches is ample for most kinds. After planting give each a thorough watering, and, as the plants are larger, the roots will need more moisture than small stock. Still it is better not to moisten the whole of the bench at once, so watering individual plants should be the rule for some time after setting them out. Otherwise the culture is not greatly different from that of field grown stock, though naturally the plants, not having large heads to keep going and being, moreover, used to the conditions under glass, will not need so much spraying, shading or artificial moisture. As they become established keep the surface soil stirred



DESIGN BY ALPHA FLORAL CO., KANSAS CITY, MO.

BANQUET OF NATIONAL REPUBLICAN COMMITTEE TO CHAS. DAWES, AT CHICAGO, JUNE 8, 1908,
Partial View of Decorations by Hauswirth, Chicago.

on the benches and by degrees increase the area watered around each plant until the whole bench is watered in the usual way.

The plants in the field look very well this season and it is a pleasure to be among them for the necessary stopping, weeding and soil cultivation. No hard and fast rule can be laid down for topping. It has to be done regularly, as it becomes necessary, until a good plant with plenty of strong, sturdy shoots is obtained. Here again the habit of the variety has to be considered, as the bushy growers make a fine plant naturally with practically no pinching, while there are others that have to be regularly pinched to induce anything like a sturdy, shapely specimen. Frequent hoeing, if the plantation is small, or cultivating if larger, serves to keep down weeds and produces a good tilth which does not dry out rapidly. Watering, at the best, is but a poor makeshift and if the plants can be kept going by good cultivation this is a far better plan.

Remedy for Carnation Rust.

ED. AMERICAN FLORIST:—

Please give me a remedy for rust on carnations. L.

We are not troubled with rust nearly as much as a few years ago. Closer attention to the plants' needs by careful watering during dark weather, providing wholesome, clean surroundings, together with not overloading the soil with fertilizers has reduced the rust problem to a minimum. The variety Victory has been the only one that we have had any trouble with from this cause the past season. Considerable rust developed on this shortly after planting, but we gave the plants a light dusting of sifted lime and sulphur over the affected parts, which quickly dried up the rust spores.

C. W. JOHNSON.

Red Spider on Carnations.

ED. AMERICAN FLORIST:—

What is the best remedy for red spider? During the winter months I fumigated once a week with tobacco stems and have had no trouble with insects, but during the warm spell some weeks ago my Enchantress carnations have become infested with red spider. Victory, grown in the same house, is free from insects. I have kept the ventilators open, damped the ground under the benches and sprayed the foliage on bright days. I have fumigated three nights in succession, but still on the leaves, buds and petals of the blooms, red spider is noticeable. E. H.

The variety Enchantress is one of the varieties of carnations most susceptible to red spider attacks. Being grown in the same house with Victory I am of the opinion that the temperature has been higher than Enchantress cares for. Fumigating with tobacco stems has not proved very effective with us for removing red spider; we use nicoticide for keeping this and other pests down. By painting one of the steam pipes with the preparation about every 10 days we have very little trouble from this source. But if we find spots where the spider has made its appearance we mix a little nicoticide in water, just enough to lightly color it, and spray the affected plants. Spraying with salt water is also a good remedy, but do not use it too strong or it will discolor the petals of the flowers; add just enough salt to the water to make it taste.

C. W. JOHNSON.

Manure for Carnations.

ED. AMERICAN FLORIST:—

Is cow manure more satisfactory for carnations than horse manure?

E. H.

Yes, cow manure is much more satisfactory than horse manure for carnations. Horse manure is quicker in action, but it has not the staying power which cow manure has. C. W. JOHNSON.

WYOMISSING, PA.—Hundreds of people visited the magnificent peony field of Burgess B. H. Farr, on Dauphin avenue. Heck Bros. are doing some elaborate work for Ferdinand Thun, at Reading and Penn avenues.

MADISON, N. J.—The Brant-Hentz Flower Co. has been incorporated under the laws of New Jersey to deal in cut flowers, plants and nursery trees and do decorating and landscape gardening. The company will pay special attention to the wholesale flower trade. Henry Hentz, Jr., will be president of the new company and Elwood Brant, treasurer. The principal office and greenhouses will be in this city. Mr. Hentz is well known for his success as a grower of roses. Mr. Brant is also a successful florist and is the present owner of the property and greenhouses on Shunpike road to be acquired and extensively improved by the company.

THE ROSE.

MADAME CHATENAY is proving a good summer rose in many places this year. Growers should note that the young growth of this variety is very apt to be burnt by bright sun, and a light shade is an advantage in very hot weather.

Notes in Season.

The time is now at hand to do all of the indoor rose planting, and enough extra help should be secured, if necessary, to wind this work up quickly, as it is most essential to have the planting finished by June 30. This will allow the plants sufficient time to grow into sturdy stock by September 1-15. If properly cared for during this time some marketable flowers may be cut by the latter date without reducing the size of the plants materially. It is rather a hard proposition to introduce in these columns any new methods of culture for the indoor roses as the work has been practically the same for a number of years, and the best one can do is to repeat what has been said before in reference to the work, chiefly for the benefit of those that are more or less unfamiliar with modern methods of planting and its essential details.

To begin with the old soil should be taken from the benches, the benches well repaired and the whole house or range thoroughly cleaned, even under the benches after cleaning them so as not to have any of the good soil become mixed with the old soil that has sifted through. If this is done there is no good soil wasted.

Be generous with paint and lime wash and when filling the benches or beds be sure to have the soil evenly mixed and finely pulverized, as it is being wheeled into the houses. It should be turned by hand and the roughest of the soil kept at the bottom. The raised beds should contain from 4½ to 5½ inches of firmly packed soil before beginning to plant, using 5½ inches for grafted stock and 4½ inches for the own-root plants. Bride, Bridesmaid, Golden Gate and Uncle John, grafted plants, should be planted about 16 inches apart in the rows and about 14 inches between rows. Plant all grafted stock with the splice just below the surface of the soil, and be sure to pack the soil firmly around the plants, leaving a saucer shaped depression around the base of each plant, so as to be able to give each one just what water it may require. They are never of one size throughout the whole house, and some will require less water than others and by watering near the plants, the soil between them is kept fresh until the roots reach out for more food. Until then it is not necessary to level up the beds or to fill in around the plants.

We usually prefer to plant Richmond and Killarney somewhat closer in the rows than other varieties, especially Killarney, which has a very upright style of growth, and as Richmond can stand thinning out now and then it will take less room. We find 14 inches between the plants in the rows and 12 inches between the rows—if kept properly tied—will give these two varieties plenty of room. Grafted plants should be staked and tied immediately after planting or many will be broken at the splice in the act of syringing, and although the stocks on own roots may not break off under the water pressure, the foliage soon shows signs of red spider and green fly, if not staked soon after planting. We often receive inquiries in regard to stock being carried over the second year on raised benches or solid beds and we prefer the second year stocks to anv if grown in solid beds or ground beds.

Bride, Bridesmaid and Golden Gate require practically no rest. Prune carefully and remove all dead wood and weak blind growth, but do not cut back hard. If the plants have not sufficient head room they can be bent down and fastened to running wires, bending them over about 12 inches from the soil and distributing the wood evenly over the wires the same as one would train a grape vine over a trellis. This equalizes the flow of sap and often gives better results than letting them grow upright the second year. Remove the surface soil without disturbing the roots and mulch the beds with half fresh loam and half cow manure, mixed evenly, to which may be added some good finely ground bone. Level up the beds with this and tamp the soil firmly level at the surface and water sparingly until the new growth shows vigor and good color.

If one has exceptionally strong plants on the raised benches and wishes to carry them over, the same method as prescribed above can be closely followed with the exception of the amount of new soil added. The bench plants will require at least three inches of the old soil removed filling this space with the mixture mentioned above. Richmond and Killarney we always rest up considerably and prefer to cut them back to good strong wood about a foot from the soil in preference to bending them over. American Beauty, if rested and cut back often, makes fine stock for cutting the second season; it all depends on the skill of the grower. Plants taken from raised benches and transferred or transplanted in fresh soil in solid borders are about the most satisfactory. This system is also economical as it lessens the amount of plants to be propagated annually and is very suitable for the grower with a medium sized range of glass. This, in fact, has become almost universal among the rose growers. To repeat, get the planting done early in June and take great pains with the work, plant firmly and avoid planting any thing but healthy stock even if it has to be bought. No greater mistake can be made than to plant a weak, poorly rooted rose and it is not economical; whatever is done for the rose, let it be done well.

E.

FINE STANDING WREATH BY F. E. BUTLER FLORAL CO., CHICAGO.

Using Violets, Lily of the Valley, Bride Roses, Narcissus, Cycas Leaves and Leucothoe Sprays

F. R. Pierson Co., Scarborough, N. Y.

The Scarborough, N. Y., range of the F. R. Pierson Co., always an interesting place to visit, has in these June days the additional charm of a great display of peonies and other outdoor flowering stock. Among the 60 odd varieties of peonies may be found the best specimens of this splendid family and the daily cut when gathered and ready for shipment is delightful to the eye of the fancier. The 58-acre tract on which a nursery has been established, is being constantly improved along systematic lines, and exceptionally fine lots of blue spruce, maples, beeches, rhododendrons and many other varieties of trees and shrubs may be seen.

When this land came into the possession of the F. R. Pierson Co. it was in an unbroken and neglected condition, but it is now being rapidly placed under a high state of cultivation and still greater improvements are planned. The nursery is on a gentle slope, overlooking the Hudson river, and the scenic beauty is unsurpassed by any other section of that noted region. One of the contemplated improvements is the construction of a drive that will greatly facilitate business and add materially to the beauty of the place.

Though the quality of greenhouse flowers has been waning with the season, carnations, on June 8, at this range made a very creditable showing. As near 50,000 blooms had been cut in the preceding week, it will be readily seen that they were well up to the mark in quantity. Of these a large proportion were Winsor, which proves good in all seasons when anything can be expected of a carnation. Though we have passed through a dull season in cut flowers, no hard times talk is heard at the Pierson range.

In his usual optimistic frame of mind, the genial head of the firm is too busy with the work of the present and plans for the future, to talk hard times. A large stock of young carnation plants is now growing in the field and the houses will soon be cleared of old stock and put in condition for planting. The American Beauty rose section is in fine condition and there are daily shipments of good stock. Both pink and white Killarney will this year be extensively grown in addition to American Beauty.

Cleaning Greenhouses and Boilers.

If the boilers are not as yet cleaned up since last spring, do so on the first rainy day. Boilers should always have a thorough cleaning after firing for the season stops. The old ashes, clinkers and dirt should never lay any length of time to start rust and decay. Clean thoroughly any and all flues, scrape off and take out all clinkers attached to sides of fire box, take out all grate bars and clean them, brush out fire box and ash pit with a good stiff broom or brush. Also take down smoke pipe from boiler to chimney and clean and put away. After all is clean, put the grate bars back in and give all exposed parts of boiler a thorough oiling or greasing, or, if preferred, paint with linseed oil and lamp black. By doing this thoroughly each season we get longer life and better service from the boilers.

PAINTING.

If the houses are old and drippy, they will need painting. First go over them and reglaze all that need it. Have the paint good and heavy, about the consistency of molasses is best for greenhouses on the outside, to fill up all cracks; scrape each bar with a stiff brush or a putty knife to clean off all loose and curled up old paint scums, apply the paint and work it well in by moving brush back and forth two or three times, and be sure to fill up all cracks. At least every two years the outside of the house should have this attention; the inside does not need painting so often. All loose ends of boards, siding or bars that are seen must be fastened at once. A stitch in time saves nine, and if these loose ends are left they soon run into many dollars in repairs. Be sure to scrape and clean all gutters and give them an extra coat of paint. Do not allow dirt or scum to accumulate in either the outside or inside gutters, as it stops the flow of water and starts rot.

TIDY GROUNDS.

Keep the grounds around the greenhouses in somewhat of a tidy shape, also all sheds and outbuildings. The potting shed should always be in good order; it only takes a few minutes at a time to keep things in shape, whereas if let go for a length of time it will take hours to put in shape. An orderly place always looks prosperous, and we all want visitors and others to think we are prosperous. It is not often good stock is grown on an untidy place. B.

GOLD MEDAL DESIGN BY LOUIS MOTRONI, SAN FRANCISCO, CALIF.
Representing a Well with Windlass and Buckets.

Twenty Years Ago.

JUNE, 1888.

The Florists' Hail Association of America celebrated its first birthday June 1.

The price of bedding geraniums was a much-vexed question among growers.

John N. May was advising the use of ventilators opening at the ridge in the way now so popular.

Garfield was a popular carnation.

June rose shows were being advocated and it was noted that the show held in Boston in this month was the most successful in the year.

The various variegated funkias were recommended as subjects for bedding.

A beautiful floral desk of ivy leaves with suitable flowers and inscription was made for the funeral of a young journalist by Mrs. C. B. Whitnall of Milwaukee.

Plant auctions were being successfully carried on in Boston.

The Tri-City Florists' Club was organized at Davenport, Ia., with J. T. Temple as secretary.

"Stinking, sticky things" was Wm. Falconer's opinion of the fraxinellas.

Cape jasmines were sent to the Chicago and New York markets, but there were many complaints of bad packing and gathering the flowers at the wrong season.

ORCHID NOTES.

LAELIA MAJALIS may go outside after the growth is finished.

Cattleya Dowiana.

Cattleya Dowiana is quite distinct from the majority of the labiata section of the genus and its flowers make a welcome change from the rose and white colored forms usually grown. In this pretty species the sepals and petals are a light nankeen yellow, the lip a gorgeous, velvety crimson purple with thread like lines of gold running through it. In the variety aurea, which is better known than the typical C. Dowiana, the lip is even more beautiful on account of the more copious golden yellow markings. Both are lovely orchids and although not always a success under cultivation there is really nothing very difficult about them.

C. Dowiana, C. Dowiana aurea and C. Warscewiczii (gigas) are found probably nearer the equator than the majority of cattleyas and, with the exception of C. superba, they like more heat than any others. These species will not be tied down to any regular seasons of growth, rest and flowering. Very often before the flowers are past new growths will be starting from the base of the flowering pseudobulbs and it would be folly, when this is the case, to endeavor to force the plants to rest. Let them have their own way but always keep them well up in the house where plenty of heat reaches them and where they get the clearest light. Then, when the growths start late, they will have ample time to flower and ripen up before winter, when it is advisable to rest the plants if possible. Still if they persist in growing it is best to let them, not to dry them off or place them in a cool house, for such treatment will only cripple the growths with no corresponding benefit. As a rule, unless the plants are exceptionally strong, these cattleyas like only a moderate amount of rooting space. C. Warscewiczii likes more than any of the Dowiana varieties, as it is much more vigorous in growth. C. Dowiana is best grown in baskets or pots suspended but must be carefully looked after with regard to water during the growing season. When at rest much less moisture is needed but the bulbs should be kept plump. In a somewhat lengthy experience in orchid growing the writer has never yet seen cattleyas of any kind improved by being allowed to shrivel during the resting season. It may be natural to plants growing wild but under cultivation keep them plump.

Very often when weak or poorly established plants throw up flower spikes, the sheath gets so solidly fixed that it will not open owing to a kind of glutinous excretion that appears to be peculiar to this species. Sometimes the sheath is stuck fast to the leaf and at others the top is fast and the lower part bulges out making an unshapely flower spike. Watch for this and when necessary sponge the sheath and leaf to separate them. Sometimes it may even be necessary to split the sheath in order to free the imprisoned flower spikes. A rather pale tint in the foliage is probably natural to C. Dowiana and its varieties and as long as it is not too pronounced is no harm, but the pale tint caused by starvation treatment must not be confounded with this.

Phalaenopsis Amabilis.

The species illustrated, Phalænopsis amabilis (grandiflora) is one of the most lovely orchids in cultivation and an excellent species for cutting. Its chaste white flowers are among the largest in the genus and it has long been a favorite when the requisite heat and moisture for its successful culture can be maintained. It is sad to see the miserable, stunted looking specimens of these lovely moth orchids that one frequently comes across, growing in dry sunny houses, starved for want of the atmospheric moisture that they must have to be at all satisfactory and, as a rule, anything but a credit to the grower. Contrast these with healthy, well grown specimens and no one could recognize them as the same species.

Phalænopsis delight in a warm moist atmosphere always; in summer it is almost impossible to keep the air too moist but in winter less is naturally required, the days being shorter and darker. But the change from summer to winter treatment must be brought about by degrees, not suddenly. Take a plant that has been growing all summer in a warm, moist house and deprive it suddenly of moisture and heat and the probability is that the succeeding spring will see all the best of the leaves drop off. To hold the leaves after they are grown is far more difficult in fact than to grow them as many cultivators have found and this being the case it is necessary to consolidate the growth as it is made, not to rush it along in a high temperature without due regard to ventilation.

When growers realize that natural conditions are best and learn to merge the seasons one into the other rather than to strike a hard dividing line they will be more successful with these beautiful orchids. They are not particular as to the style of house or receptacle they are grown in, but they must have something tangible for the roots to get hold of, something in the way of wood for preference. Wood is a natural holding for them and nothing else is so suitable but, unfortunately, it does not last long in the moist heat of an orchid house and the work of transferring the plants from one block, cylinder or basket to another is fraught with considerable danger. Temperature is an important point and should be kept as regular as possible. There should be a difference, of course, between that kept up in extremely cold weather and when the weather is mild in winter, otherwise so much fire heat would be used as to cause an unhealthy atmosphere but the more regular the heat is the better the plants will thrive. A night temperature of 65° in summer and 60° in winter is sufficiently high, rising, of course, by day with sun heat according to the weather. Shading must be carefully arranged and, although the plants delight in moisture, spraying overhead is seldom necessary or advisable.

CATTLEYA DOWIANA.

COOL treatment for Vanda Kimballiana.

Feeding Orchids.

ED. AMERICAN FLORIST:—

Among the many interesting and instructive subjects, treated in your columns, I wish to express appreciation of the orchid notes in your issue of March 14. "E. O. O.," in "Notes in Season," speaking of moisture at the roots, says: "This should mean food, which should always be present in the water applied." I would feel grateful for some information regarding this subject of food—what form and how best applied; also best materials and how used by successful growers; pots, pans or baskets; moss, peat, leaf soil or osmunda fiber. W. W.

In reply to "W. W." it is admitted that the statement quoted invites explanation. An eminent cultivator was once asked in open discussion, what was a fair estimate of the longevity of an orchid under cultivation. His reply was "from time unto eternity," and the fact that he evidently believed it was sufficient to settle the matter at the time. It is generally admitted that imported orchids, especially cattleyas, do degenerate. Tens of thousands are introduced annually to keep up the demand for plants and cut flowers, and so it will continue until we raise our own; this is within the reach of possibility, even probability, during the years to come of the present generation of gardeners.

We have cattleyas in bloom today that we know have been cultivated for the past 20 years under glass and are vigorous enough to satisfy the expert observer. These, however, are individuals that go on and increase by division, while others that came with them have been reduced to ashes long years ago through the agency of the fire under the boiler. It was the evident fact that some were failing that led to our experimenting with food, stimulant, or whatever term is best to apply. The term stimulant is inappropriate. and yet to see plants, valuable ones. perhaps, dwindle year after year until it is a supreme effort that produces one flower to a growth of cattleya, makes this student of their needs realize that there is a need unsupplied. Hence, sulphate of ammonia and nitrate of soda were used in the water; the quantities were small and, for a time, none of the plants showed benefit. It should be remembered that, previous to this, it was considered necessary to supply any nourishment to epiphytal orchids through the medium of the atmosphere, by damping down with manure water and by the placing of carbonate of ammonia in the structures devoted to orchid culture. The terrestial orchids, such as calanthe, phaius and chysis, were usually fed liberally because their root structure was wholly different. At about this stage in our experiments came Mr. Cookson's statement made publicly in the Orchid Review, that, after instructing his gardener to water certain plants with chemicals in weak solution, he could easily detect the ones so treated without other knowledge than that furnished by the appearance of the plants themselves.

To quote from Orchid Review, Mr. Cookson said: "I may say that, before systematically using the salts referred to, I asked my gardener to use them regularly on a group of plants in each house, without telling me which they were, leaving me to discover them by results. In each case I was soon able easily to pick them out, and everyone who saw them noticed the improvement as compared with the plants not so treated. After this I had no hesitation in regularly using the salts on all growing plants and feel thoroughly satisfied that moderate applications of plant food are an advantage. Manure water I do not believe in for many obvious reasons, but a pure solution of salts is a very different thing." The formula is three ounces potassium nitrate to two ounces ammonium phosphate dissolved in three gallons water, using one ounce fluid to each gallon of water applied to the plants. This will seem an infinitesimal proportion of food to apply but we have proved that where other plants have enjoyed the same, by accident or otherwise, crotons and even roses were surprisingly benefited. And the rule should be "little and always."

During the growing season always water late in the day; the active growing tips of the ærial roots will tell why if examined early the morning following.

The question of "W. W." as to pots, pans or baskets is easily answered; pots always until the plants need anything larger than a 7-inch pot, then perforated pans, or baskets. Some time since we had seedling cattleyas that, to grow them on, were put in half barrels, but this proved a mistake; they should have been divided and kept in smaller receptacles, and this has now been done. The matter of potting material, too, is now simplified because there is but one medium available, namely, osmunda fiber. The best growers in England and some in Belgium are now using it and no further comment is necessary. Moss may be used if it will grow, but it should then be sparingly blended with the surfacing material and cattleyas are better without it. Peat is now unobtainable in good quality for orchid culture, even in England, and leaf mould in this connection is as if it never had been. To sum up the whole of "W. W.'s" questions, one may take orchid seeds, sow them on the fiber of osmunda, water from the start with Cookson's formula and grow them on with no other "food" besides air, light and heat until the plants have from 10 to 15 new growths each, producing two crops of flower a year and will go on doing this literally from "time unto eternity." E. O. O.

PHALÆNOPSIS AMABILIS.

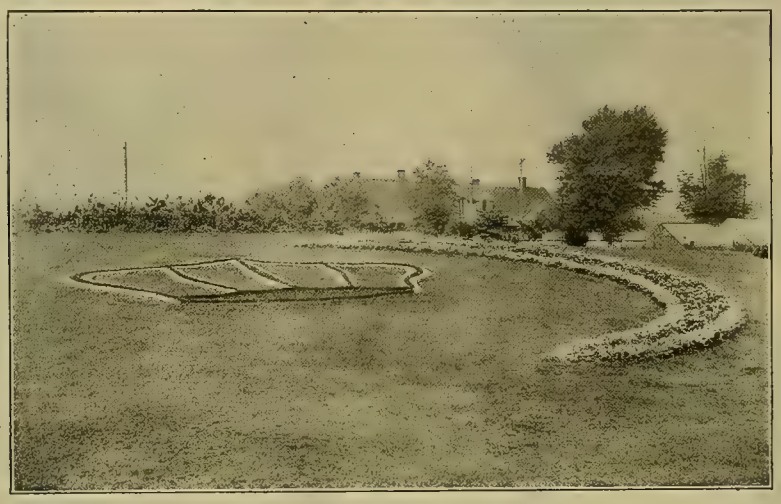
Acacias.

There are several species of acacia that are very useful for decorating both the conservatory and greenhouse, especially where the buildings are lofty and require tall plants. Some of the acacias may be grown as standards on stems of various heights. The species are by no means difficult to grow, and as they can be stood in the open after flowering, through the summer months, they make fine ornamental plants in tubs for decorating the terrace garden even when not in bloom.

Most of the acacias may be readily raised from seed, but there are some that grow well from suckers, which are produced in abundance from the roots. When raised from seed, and it is desired to make standards of them, the leading shoot should be allowed to grow the desired height before it is stopped, and all side shoots should be removed except about half a dozen or so at the top, and when these have grown about six inches long they should have their points taken out to induce them to make lateral growths, and this operation should be repeated until fine bushy heads are formed, after which the shoots ought to be allowed to extend, as it is along those made the previous year that the flowers are produced. Some species have deeply-cut, fern-like foliage, others have their leaves simply entire. The foliage of some is short and stubby, while in others it is long and narrow, making a fine contrast; even when the plants are not in bloom they are most interesting.

Acacia affinis is the best of the deeply-cut-leaved kinds, and flowers more freely than any others of its section, though A. lophantha and dealbata are useful where there is room to grow them; the former makes a fine sub-tropical plant for summer bedding. A. cordata, A. longifolia, and A. grandis are all worthy of a place; so also are A. coccinea and A. Drummondi. The old A. armata is well known to our gardens, as it is one of our most common greenhouse plants. A. affinis grows freely enough from suckers, but it is difficult to get it true.

When plants have become old they may be pruned back to keep them within bounds; they will break freely from the old wood and make fine growths, which will bloom most profusely the following spring. The only pest that seems to trouble them is the scale, but when this is once allowed to get the upper hand it is difficult to get rid of. When the plants are grown in tubs, a light, rich, sandy soil should be used, and abundance of water will be needed during the summer when the weather is dry and the soil is filled with roots. The plants should be stood in a sunny position during the summer to enable them to ripen their wood, but they must be taken under cover before frost sets in, otherwise the young wood will, in all probability, be so injured that the flowers will not develop.—Gardeners' Magazine.



CROWN AND CRESCENT BEDS.

At the Queen & Crescent Route Yards, Lexington, Ky.

Poisoning by Various Plants.

In reference to the recent correspondence on poisoning by poison ivy, Primula obconica and others J. F. Zimmerman sends the following particulars:

Poison ivy contains tannin, fixed oil, wax, mucilage, resin, sugar, albumen, gum, starch, oxalic acid and others. The poisonous properties of the plant seem to be due to a volatile acid resembling both formic and acetic acids. Applied to the skin either in solution or in the state of vapor the acid which escapes producing vesicular eruptions in a few hours after the application; applied to the skin it will in 48 hours produce a blister with severe burning and itching.

Many persons are entirely unsusceptible to its poison and can handle it at will while others are so susceptible to its influence that they will be affected by it by merely coming into its immediate vicinity on account of fumes which escape from the plant especially while the dew is on and the air moist or after a shower of rain. When it is warm and close they are sure to be poisoned. It usually affects the hands and face and July and August appear to be the worst months. The following are remedies for poisoning from this and also Primula obconica:

Sweet or olive oil is an antidote to this as well as to most vegetable and animal poisons. It is to be taken freely internally from a half to a pint or more in a day. At the same time bathe the face, hands and parts affected with the oil and cover with muslin dipped in the oil. If the bowels do not operate after taking the oil give a dose of salts. Repeat the oil next day if necessary. A wash of curd alum is appropriate at all stages before the blisters have fully formed. Bathe the part to relieve itching with a weak solution of ammonia. A solution of bicarbonate soda is good when the blisters are fully formed. A solution of perchloride or persulphate of iron carefully applied to the skin will arrest the progress of the inflammation. Lay cloths over the part affected and keep moist.

Trouble with Geraniums.

ED. AMERICAN FLORIST:—

Please tell me what is the trouble with my geraniums, S. A. Nutt? I give them plenty of ventilation and sprinkle them whenever they need it. They were the same way last summer, 1907, outside in the flower beds. Herewith I enclose a couple of these leaves and will be glad to know of a good remedy for this disease or whatever it is.

N. F.

The injury shown by the geranium leaves does not appear to be due to the attack of any parasitic organism; at least no such organism was found present in the specimens examined. It is possible that the trouble may be located in the roots, but of course to determine this definitely, it will be necessary to make a microscopical examination of specimens of the roots. A similar appearance to that shown on these leaves has heretofore been observed as a result of overwatering or excessively rich soil.

CALADIUM ESCULENTUM, EDGED WITH RED ACHYRANTHES.

At the Queen & Crescent Route Yards, Lexington, Ky.

Soil Fertility as Affected by Manures.

Below is described the method of testing used by Frank D. Gardner of the bureau of soils, Department of Agriculture, Washington, D. C., in his experiments on the "Fertility of Soils as Affected by Manures" as described in his Bulletin 48 under this title:

"The paraffin-pot method, described in Circular No. 18 of this bureau and in the appendix to Farmers' Bulletin No. 257 of the United States Department of Agriculture, was employed in these tests, and while it is not designed to supersede field tests, results obtained with it, when compared with results obtained on the same soils at the agricultural experiment stations in Rhode Island, New York, Ohio, Iowa, Missouri, and North Carolina, show that it will indicate the manurial requirements of soils for general farm crops with a fair degree of accuracy. It is also admirably adapted to an investigation of the character described in the following pages.

"The soil to be tested is thoroughly pulverized by crushing all lumps, and if containing stone or gravel this is removed by sifting. The sample is then thoroughly mixed and equal amounts weighed into granite-ware pans, where they receive their respective applications of manure or fertilizers and are made up to their optimum water content with distilled water. After remaining in the pans for about a week, being occasionally wet with distilled water, and frequently stirred in order to secure a thorough incorporation of the fertilizer and a good soil condition, it is ready to pot and plant. Five small wire-gauze pots are used for each treatment. About 350 grams of soil is then placed in each pot, uniformly packed, and planted with six selected germinated kernels of wheat, after which the pots are dipped in melted paraffin, which not only forms an intimate contact with the soil but makes the pot water tight. The soil is then covered with a thin layer of washed quartz sand and the pot and contents weighed and weight recorded. The pots are next placed in trays and given a favorable exposure in the greenhouse for three or four days or until the plants attain a height of about 1½ inches, at which time the pots are sealed. The sealing consists of covering the tops with paraffined paper disks in which are slits through which the plants grow. The disks are sealed to the sides of the pots by means of melted paraffin. The loss of water by direct evaporation from the soil is in this way reduced to a negligible quantity.

"During the growing of the plants, which usually continues from 18 to 21 days from the date of sealing, the pots are weighed at intervals of two or three days and watered with distilled water in order to retain a favorable moisture content for plant growth. By this method the loss of water or the amount transpired by the plants may be ascertained periodically, and at the end of the experiment the total amount of water given off through the plants of each pot obtained for comparison with the growth and green weight of the plants, which is ascertained by cutting and weighing the plants at the time the experiment is concluded. All conditions of the experiment are so carefully controlled that the average result of five pots rarely differs more than 5 per cent from the average result of any other five pots that have been treated throughout in precisely the same manner. Differences which occur beyond this amount may therefore safely be attributed to the different manurial treatments which have been given. This method has several advantages over the growing of plants in open and porous pots. The method of coating the soil with paraffin prevents any accumulation of roots between the soil and the receptacle, a trouble which is common in pot experiments. The complete sealing up of the soil also enables the experimenter to determine the amount of water which the plant has actually used and transpired in its process of growth, and this, together with the small size of the pots, enables the moisture content and its fluctuations to be carefully controlled.

"On good soils, or as a result of favorable treatment, plants are produced in the little pots in 25 days or less time, the green weight of which sometimes equals or exceeds 1 per cent of the weight of the soil in which they grew. Such plants are approximately 85 per cent water; they have transpired about 100 units of water for each unit of green matter produced, and their dry matter is relatively richer in mineral constituents and nitrogen than that of mature plants. On this basis, an acre foot of soil, weighing 3,500,000 pounds, would produce 35,000 pounds of green matter, requiring for its production the equivalent of 17½ inches of rainfall. This green matter would be equivalent to 5,900 pounds of air-dry material, or about 50 bushels of wheat and 1½ tons of straw to an acre. While the removal of green matter equal to one per cent of the soil in the little pots is somewhat above the average, it serves as an illustration of the heavy draft made upon the soil in a very short time, a draft, as regards moisture and mineral constituents, although part of the latter comes from the seed, greater than that which takes place under field conditions by the removal of a large mature crop, assuming that the removal takes place to a depth not greater than one foot, which for wheat and similar crops would be approximately correct, and providing also the movement of plant food by capillarity from below one foot be ignored."

To Be Done Now.

IN THE GREENHOUSES.

Repot Odontoglossum citrosmum as soon as the flowers are past if this operation is needed.

Keep the cannas that are to flower in pots well apart and feed them when the spikes are forming.

Shake out and repot all stock plants that are to be kept in the greenhouse during the summer.

Look out for red spider in tuberoses and spray them frequently if any insects are seen.

Turn out the old roots of dahlias that have been used for stock and either plant them up or throw them away.

Keep plenty of air in the house when Lilium longiflorum is grown to keep them hard and keep insects away.

Stand the seed primulas and cyclamens well apart and look after them well.

As soon as the early pelargoniums are over stand them outside to harden before cutting the growth back.

Clip the genistas into shape a little with the shears before putting them out for the summer.

IN THE STORE.

Orchids are very beautiful when well arranged but far more difficult to handle than many other flowers.

Wild rush foliage may easily be had now and is useful in many kinds of decoration.

Designs for societies or clubs should be plainly worked out so that the shape of the emblem can be distinctly seen.

Keep the spray going these hot days. It makes the atmosphere of the store more pleasant and helps the flowers and foliage.

There are many ornamental grasses that are very helpful in make-up work.

Cattleya gigas, one of the finest of all orchids is now in and in good order.

OUTDOORS.

English ivy cuttings placed in small pots now and plunged in ashes will make nice plants by the fall.

See that no choice plants on the herbaceous border are being overgrown by the more vigorous subjects.

Cuttings of the semi-ripened shoots of many of the finest flowering shrubs will root freely now.

Lawns that bake up badly in summer should not be too closely cut.

Encourage the growth of young vines by all means possible now and support the growths made until they become self supporting.

Secure the dahlia shoots against wind and insects.

Protect fruit tree stems in localities where sun scald affects them.

Thinning fruit early improves the quality and increases the weight of the crop, besides destroying many insects.

Clear the cabbage beds as early as possible to allow of a crop of fall spinach being taken.

OBITUARY.

Robert B. Graves.

Robert B. Graves, 88 years of age, of Northampton, Mass., died June 5 after a short illness, from old age. Mr. Graves was born in 1820, on the old Clark place, near where the Norwood hotel is now located, and his long life had been spent in Bridge street. Nearly 75 years ago he moved to his present home. He married Miss Maria D. Wright of Huntington and they celebrated their golden wedding a few years ago. The death of Mr. Graves removes one of the oldest residents of Northampton, where he had been a familiar personage upon the streets for many years.

E. Lundburg.

E. Lundburg, who has conducted a retail florist business for the past three years at 616 Wells street, Chicago, was thrown from a buggy while driving with a friend on June 10, a North avenue car running into the vehicle from the rear. The friend, who was driving, was saved by hanging to the lines and being dragged out of the way. Mr. Lundburg was caught under the car and suffered injuries which caused his death early the next morning. He was only 29 years of age, but had built up a very nice business. He was well liked by all his associates. He leaves a wife and one child.

NEW YORK.—John D. Rockefeller is about to begin the erection of an orangery on his estate at Pocantico hills. Mr. Rockefeller takes great interest in the cultivation of oranges and has a great variety of trees bearing this fruit in his gardens.

WARSAW, IND.—A tramp planted a rat, tail upwards, and sold it to a woman here for 50 cents. She did not discover it was a member of the animal instead of the vegetable kingdom until she proceeded to repot the rare "rat tail" plant.

BALTIMORE, MD.—A discussion has been going on here as to the expediency of an Italian garden in Druid Hill park, one of our finest and most natural pleasure grounds, noted for its noble trees and ample lawns. It was proposed to have a space inclosed with stone balustrades and decorated with hedges, plants in boxes and tubs, and interspersed with statuary. A good deal of newspaper and other talk was occasioned, but the park board did not seem to relish the proposition, and finally General Latrobe, its president, put his foot down on it so heavily that it is squelched, at least for the present. It is not unlikely that the project may be renewed, however, but with a different site for the proposed creation.—S. B.

THE AMERICAN FLORIST

1885 TWENTY-THIRD YEAR. 1908

Subscription, United States and Mexico, $1.00 a year; Canada $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From its first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

REPAIRS to the heating apparatus are in order now.

SEE that all benches are well repaired before planting.

CULTIVATE early and late during the next two months.

MONTBRETIAS grown indoors in benches afford an excellent crop of flowers during the latter part of June.

OVER $11,000 has been paid by the Florists' Hail Association for glass broken by hail since August 1, 1907.

WE are at all times glad to receive notes on bowling and other sports from florists' clubs and kindred associations.

IT pays to allow the inside men to come outside for a "breather" these hot days and usually there is work that can be found for such occasions.

IT may not be out of place to again warn growers, especially those inexperienced in such matters, of the deadly nature of many of the poisonous chemicals used in fumigating materials and to urge the greatest care in their use.

THE florist trade generally has certainly suffered to some extent from the general financial depression of the last nine months. This is shown in the numerous cancellations of advance orders as reported by the wholesale trade.

CLOSING empty houses, and drying thoroughly every particle of soil, bench and everything else within them before cleaning, has been recommended as of assistance in destroying fungus and insects. It is worth trying where there is time for it.

IN PHILADELPHIA.—It is pretty slow down here just now in a business way and Johnny Westcott is busy getting ready for his club opening June 19 and the millionaires are oiling up their automobiles. Local option has not yet struck town and the natives still manage to have a little fun to mix with their trials and tribulations.

EPIGAEA REPENS, the mayflower, is well illustrated as a pot plant in a recent issue of the Gardeners' Chronicle, where it is stated that it should be given a rooting medium consisting chiefly of peat, in which no lime or other calcareous material is present. The great botanical garden at Kew claims the excellent specimen illustrated in our contemporary.

THE New England Dahlia Society is out with the schedule for its first annual exhibition which is to be held in the Tremont temple, Boston, Mass., September 17-19. The rules appear straight forward and easily understood and there are over 120 classes for dahlias of all kinds, including those to be competed for by amateur growers, the trade and children. We trust this society will have a good attendance and a successful exhibition in every way at its initial effort. Maurice Fuld, Boston, Mass., is secretary.

WE have received the schedule of prizes offered at the tenth annual exhibition of the Tarrytown Horticultural Society, to be held in the music hall, Tarrytown, N. Y., November 4-6. Several valuable silver cups from leading firms and private patrons of the society, the society's silver medal, and a gold medal from the Lord & Burnham Co. are among the principal prizes and many good money premiums are also offered that should lead to good competition in the various classes. E. W. Neubrand, Tarrytown, is secretary.

The Society of American Florists.

President Traendly has appointed V. E. Lambert, of Atlanta, as state vice-president for the state of Georgia.

W. N. RUDD, Sec'y.

Tribute to the Late Wm. Scott of Buffalo.

The members of the Montreal Gardeners and Florists' Club, having heard with deep regret of the death of Wm. Scott of Buffalo, desire to express their deep sense of the loss to the profession through his decease. It was therefore unanimously resolved that the members of this club deeply deplore his loss and tender the family of the deceased their sympathy and condolence. W. H. H.

The Hartshorne Fund.

We understand that on June 15 Mrs. Hartshorne bought a house and lot for herself and children with the proceeds of the flower booth sales at different exhibitions of the Horticultural Society of Chicago and the funds donated by members of the Society of American Florists during the Dayton convention and at other times. The purchase leaves an unpaid balance of some $400, which it is hoped the friends of the late Jas. Hartshorne will ultimately be able to cover.

National Council of Horticulture.

The fourteenth installment of the press service of the National Council of Horticulture, just to hand, contains the following articles, all concise, practical notes that are very valuable to amateurs: "Plants for Window Boxes"; "Shrubs for a Succession of Bloom"; "The Home Vegetable Garden"; "The Garden's Shady Nooks." We again remind florists, seedsmen and nurserymen of the importance of urging the editors of their local papers to secure and use these excellent and timely articles. They may be obtained free of James H. Burdett, 1720 West One Hundred and Fourth place, Chicago.

The National Flower Show.

TO BE HELD AT CHICAGO, NOV. 6-15, 1908.

Preliminary work of the sub-committees of the first National Flower Show to be held in this country was begun with a meeting of the sub-committee on local management, privileges and concessions at the Union restaurant, Chicago, June 16, there being present Chairman Vaughan, Elmer D. Smith, W. N. Rudd, J. B. Deamud and J. E. Hauswirth. Plans were discussed at length and work assigned to the various members of the committee. Hall, decorations, advertising, posters, souvenir postal cards, badges and buttons, privileges, auxiliary trade exhibition of requisites and supplies and many other important matters were considered. The work in connection with these is now well under way.

This exhibition will be held under the auspices of the Society of American Florists, with the co-operation of the American Carnation Society, American Rose Society, Chrysanthemum Society of America, the Illinois State Florists' Association, The Horticultural Society of Chicago and the Chicago Florists' Club.

E. G. Hill, of Richmond, Ind., who is chairman of the sub-committee on foreign exhibits, sailed for Europe last month and is exploiting the exhibition among the leading plantsmen and horticulturists abroad.

Suggestions are now in order and should be addressed to J. H. Burdett, Secretary of the General Committee of Fifty, 1411 First National Bank Building, Chicago.

Very Well Pleased.

AMERICAN FLORIST Co:—

I am very well pleased with the AMERICAN FLORIST and am also glad to say we have had a good winter's business up to this time, never better.

R. LUTEY.

Ironwood, Mich.

From May Letters.

American Florist Co.—I couldn't do without the AMERICAN FLORIST, as I consider it the best florist paper on the market. J. A. Tapscott, Owensboro, Ky.

American Florist Co.—I am very much pleased with the paper and would miss it very much. R. Pengilly, Toronto, Ont.

Meetings Next Week.

Baltimore, Md., June 22, 8 p. m.—Gardeners' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Cleveland, O., June 22, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit street.

Denver, Colo., June 26, 8 p. m.—Denver Floral Club, 323 Charles Block.

Hartford, Conn., June 26, 8 p. m.—The Connecticut Horticultural Society.

New London, Conn., June 24.—New London County Horticultural Society, Elks' hall.

Florists' Club Outings.

Chicago, July 19.—Annual picnic of Florists' Club at Morton Grove, Ill.

Montreal, Que., July 29.—Annual picnic of Gardeners' and Florists' Club.

New York, July 1.—Annual excursion to Witzel's Point View Grove, L. I.

Pittsburg, Pa., June 25.—Florists' and Gardeners' Club on grounds of the Pittsburg Rose & Carnation Co., Bakerstown.

St. Louis, Mo., July 15.—Annual picnic of Florists' Club at Normandy Grove.

Laurel Festooning, Boxwood, Southern Wild Smilax, Sphagnum and Green Moss, Leucothoe Sprays, etc.

15 Province St. and 9 Chapman Place, BOSTON, MASS.

Milwaukee.

BUSINESS GREATLY IMPROVED.

The continued cool weather has been favorable to the production of good stock in most lines and business has been quite satisfactory since Decoration day. Shipping during the past week has been excellent and stock was well cleaned up last Friday and Saturday. The supply of roses has shortened up very materially, American Beauty being quite scarce. Some fine Richmond and Kaiserin are coming in from Albert Lies, Morton Grove, Ill. Home grown carnations are particularly fine and plentiful, good stock selling freely at $2 per 100. Late peonies are just commencing to arrive and were never finer. Hardy flowers such as gaillardias, Shasta daisies, delphiniums, etc., are now to be had in fairly good quality and quantity.

NOTES.

W. F. Kelsey, New York, and many others attending the nurserymen's convention, called upon the authorities at Mitchell park last week. F. August Gerlach, head gardener, has his planting almost completed for this season and the place looks remarkably well. There will be a fine display of Crimson Rambler roses about July 1, in the sunken garden, where there are about 2,500 plants in excellent condition.

Holton & Hunkel have practically completed their greenhouse plant at Brown Deer for the present, three houses 28x400 feet, and one asparagus house, 32x200 feet. The new place contains 19¼ acres and is within 40 minutes of the city hall. Mr. Hunkel was in Chicago early in the week, looking after stock for these new structures.

F. P. Dilger has a fine bed of Iris Hispanica coming on now, some 17,000. A bench of montbretias at this place is looking well and will be in bloom about June 20. Single blooms of Pyrethrum roseum in variety are going well.

The A. Middlemass Co. reports good plant business this season and cut flower business fair.

Fred Kaiser was at Muskogee lake June 13, getting his craft in shape for summer boating.

The Baumgarten Floral Co. is moving into its new store, Fifth street and Grand avenue.

Wm. Edlefson will build two new houses, each 25x150 feet, this season.

J. M. Fox, Jr., has a new automobile.

Visitors: John A. Evans, Richmond, Ind.; Winfred Rolker, New York; C. F. Dallman, Missoula, Mont.; Chas. Loechner, representing the Yokohama Nursery Co., New York; Horace Cheeseman, Vaughan's Seed Store, Chicago; M. Barker, THE FLORIST representative, and many others attending the nurserymen's convention.

St. Louis.

PRICES HAVE IMPROVED.

The past week, from the growers' standpoint, was much more satisfactory, as prices were better and firmer all around. This can be accounted for because the demand was brisker owing to school closings and weddings, together with a goodly amount of funeral work. Outdoor sweet peas are suffering considerably from the continuous rains and are plentiful, but in most instances of very poor quality. It is expected that the demand will very soon be cut short and then the real summer dullness will be with us; but one thing is certain, that stock of good quality will be in demand all summer and bring fair prices.

NOTES.

The Florists' Club met June 11, about 25 members being present, with Will Young in the chair. The location of the picnic was approved and the trustees will now be busy preparing for it. It is rumored that the retailers will endeavor to get Rube Waddell to pitch for them; anything to beat the wholesalers.

We regret to announce the death of Theo. Faller, an old time florist. His greenhouses and residence are located at 4901 Natural Bridge road. His wife will carry on the business.

Fred Alves went on a visit to Chicago, June 13, to look over market conditions, also to assist the convention in making a good nomination for president.

Poehlmann Bros. Co., Chicago, ship to this market large quantities of good white and pink carnations, which find ready sale.

Miss Myrtle Middleton is now bookkeeper at Geo. H. Angermueller's in place of Miss Myers, who is in Kansas visiting friends.

The Eggeling Floral Co. is still very busy bedding out. This firm has done some of the most artistic work seen in the city.

Ostertag Bros. have the decorations for the colored high school, given at the Century theater. This will be a very large affair.

Heller Bros., of New Castle, Ind., are shipping some fair long stemmed American Beauty roses to this market.

Sydney B. Wertheimer, of the firm of Wertheimer Bros., New York, was a visitor here last week.

Adolph Brix will shortly take a trip to the northern lakes and will be gone four or five weeks.

Wm. C. Smith & Co. are handling large quantities of sweet peas. W. F.

Summer Flowers.

Note our Special Facilities for Supplying Them:

1—**An entire range of over 200,000 feet of glass** devoted exclusively to growing stock that will ship well and keep well in summer.

2—**Roses all planted in solid benches,** so the roots go down deep. The plants are from two to six years old and give flowers of greater substance and strength than can be grown on raised benches.

3—**Our Summer Grown American Beauties** have an established reputation as the best in this market. They are planted in solid benches and as the roots go down deep into rich soil the plants produce very choice flowers.

OUR SUMMER SPECIALTIES.

Giganteum Easter Lilies,
American Beauties,
Kaiserin, Carnot, Killarney,

EASTER LILIES.

We have 15,000 Giganteum Easter Lilies grown cool that are just commencing to bloom. These are exceptionally fine flowers for summer decorations, funerals, etc., as they will stand an immense amount of handling without showing any signs of bruises. They ship and keep for a number of days. **Price** of these Lilies, **$6.00 per 100.**

BUY YOUR FLOWERS DIRECT FROM THE GROWERS, and get the freshest possible stock
Our cooling rooms and shipping facilities are unexcelled.

BASSETT & WASHBURN,

GREENHOUSES: HINSDALE, ILL. **Office and Wholesale Store: 76 Wabash Ave., CHICAGO.**

Baltimore.

BUSINESS DULL.

Fine weather continues, but is accompanied by a dryness which threatens to cut short all early summer crops. Not a drop of rain has fallen for several weeks and the hay crop, which promised to be immense, has begun to shrink, and all gardens are feeling the lack of moisture. June weddings are declining, but once in a while an order for a bouquet or two is received. The commencement season is still on, and the demand for bunches for the sweet girl graduates is as yet unabated. Mortality tables show unprecedented low averages, and the funeral demands are about at the minimum mark. Business otherwise, too, continues dull; the plant trade is practically over, and now comes the unsatisfactory feeling that every product of the gardener's skill, however homely, is in excess of demands.

The reception at Blenheim, the fine estate of William Lanahan, a few miles from the city, on Thursday afternoon, was a great success, it being a day of unalloyed enjoyment to over 100 of those connected with the gardener's calling. The visitors, who comprised many members of the Gardeners' Club and many others interested in allied pursuits, were escorted all over the grounds, through the extensive stables and garage, and were made free of everything to be found in garden, dairy and fruit plantations. Games of all sorts were engaged in, baseball, as usual, being the popular favorite, and was long-continued, one veracious chronicler for the daily press reporting that "when everybody got tired of running the game stopped, when it was learned the scorer had gone to the city for an adding machine!" There were races for boys and adults. In the walking race the contestants were John Donn, Conrad Hess, George S. Kalb and Edward Hermann, the first named being the winner. There ought to have been some system of handicapping, heights running from 5 feet 6 to 6 feet 5, and weights from 100 to 400 pounds.

At 6 o'clock a profuse luncheon was spread on tables set on the main lawn, these being beautifully decorated with flowers, flags and plants, and crowded with good things to eat and drink. After the feast, games and races were again indulged in and there was some speechmaking. A handsome bunch of American Beauty roses was presented to Mrs. Lanahan as an expression of the appreciation by the guests of the charming hospitality offered them, and Mr. Lanahan made a graceful response, saying what great pleasure it afforded him to have his place inspected by those who were exponents of skill and taste in ornamental planting, in the production of flowers and choice fruits. He asked his visitors to criticise its arrangements and appointments and to favor him with suggestions for improvements. Since the last similar gathering at this handsome place a new entrance has been created, and fine columns of stone replace the former iron fence and gateway. The lawns and roads are kept in the best of order, and all the surroundings testify to the thorough management of Jacob H. Keplinger, who is manager of the establishment. S. B.

Cincinnati.

TRADE FLUCTUATING.

The past week opened up with a good demand for seasonable flowers, sweet peas predominating. The call for this favorite little flower was something extraordinary and our wideawake wholesalers, anticipating a good demand, immediately notified their growers, but what a difference by Thursday! Sweet peas came along by the thousands, the trade fell off and all the wholesaler could say was "stung again," for Thursday and Friday reminded one of midsummer dullness as far as business was concerned. Roses coming to this market are the best we have seen for this time of the year while carnations seem to be growing smaller every day with the one exception of Tom Windram's Queen. Tom says he has a house full of Queen which did not do much the past winter, but the plants are making up for lost time at present. Lily of the valley has been good property the past few days and the quality exceptionally good, considering the warm spell. Green goods were in fair demand, especially Asparagus plumosus, both in strings and bunches.

T. W. Hardesty & Co. are showing some fine delphiniums in variety. They sent their right hand man Charley McRea up to Ashland, Ky., last Saturday to do the decorations for the Harrison-Hager wedding. From descriptions in the daily press it appears to have been one of the big jobs of the season and was quite a feather in the cap for Mr. McRea, who is quite capable of putting over a big job when wanted.

Park Superintendent Rodgers, while driving to the city last Thursday, was severely hurt in a runaway accident. Although severely injured about the lower limbs it is nothing serious and Mr. Rodgers expects to be about within a week or 10 days.

The Florists' Wire Design Co. is quite busy with wire work, shipping an order to New York the past week. This concern makes good wire work and is deserving of doing a good business, for all connected with the same are up-to-date hustlers.

Miss Edith Kyrk of Avondale had the decorations for the Perkins wedding at Madisonville last Wednesday using large quantities of sweet peas and Asparagus plumosus. This was one of the swell jobs of the season.

Will Murphy is right in it with a nice supply of Lilium longiflorum with which he hit the market about right. S.

Chicago.

TRADE GOOD IN SOME LINES.

Trade has been good the past week in some lines, but very poor in some others. Carnations have not only been off in quality, but the demand for them has suffered from the abundance of good peonies and other stock. The demand has also fallen off for Bride and Bridesmaid roses for the same reason. Kaiserin has been excellent and the supply has moved off very readily. Some excellent Richmond is also seen. The price of Perle rose has gone up sharply, due to the limited supply grown and the heavy call this month for yellow in class colors at commencement exercises and other functions. Mrs. Marshall Field is proving an excellent summer pink and is in good crop. Killarney continues good, in fact, one of the best of summer roses. Carnot is also coming in and meeting with favor. Peonies are very good and meeting with a very good call. Practically all the home-grown stock is now in cold storage and peonies are now coming in freely from Minnesota and other northern points. Lily of the valley, too, belongs to the class on which no complaints are being made, and for bridal bouquets, class emblems and the like is really unexcelled. Sweet peas continue to be standard flowers: prices are low, but the demand is good.

June 17.—The supply of roses has materially shortened this week, due both to the continued cool weather and the fact that most of the growers have thrown out old stock to put in young plants. Prices have also materially stiffened. Perle roses are still in demand, bringing top prices for choice stock.

NO SATURDAY AFTERNOON MAIL DELIVERY.

Most of the wholesale houses were surprised last Saturday by belated notices from the local post office that beginning with June 13 no mail deliveries would be made in this city during the summer on Saturday afternoons after 1 o'clock. Many out-of-town customers, not knowing of the new rule, were thus disappointed in not receiving stock they expected last Sunday morning. To guard against such contingency in the future, late week-end orders should be sent either by special delivery letter, telephone or telegraph.

NOTES.

Mrs. Marshall Field rose is proving an excellent summer variety. That it is unexcelled as a free bloomer may be seen from the fact that at the present time Peter Reinberg's 35,000 plants are producing a daily average cut of 8,000 blooms. All hands that can be spared are busy on the summer repair work, an unusually large number of benches being entirely rebuilt. Two of the boiler sheds are being torn down, and their work will be thrown on the other steam boilers already in.

L. Baumann & Co. have just received a large shipment of florists' fall supplies, this stock going into the firm's new building at 118 E. Chicago avenue. Other stock is also being gradually moved into the same quarters, and Mr. Baumann says the office force will follow on July 1. A supply room will be maintained at the old stand, 76-78 Wabash avenue, for out-of-town visitors who may not have the time to go to the north side store.

Albert T. Hey, now located at Springfield, Ill., and president of the Illinois State Florists' Association, will remove to Western Springs on July 1, taking charge there of the greenhouse establishment of Vaughan's Seed Store. Vaughan's Seed Store received the first shipment of California freesias on June 15.

Geo. Reinberg has just received a new shipment of 1,000 orchids, including Cattleya Mossiae, C. Trianae and C. gigas. Richmond roses continue in excellent crop and are in good demand.

Bassett & Washburn have 15,000 Harissii lilies, grown cool, which are just coming into bloom. C. L. Washburn expects to have these lilies to offer from now on through the summer.

Invitations are out for the wedding of Miss Lena Ludwig, daughter of Gustave Ludwig, of Pittsburg, to Victor Bergman, the popular young decorator of the Ernest Wienhoeber Floral Co.

W. N. Rudd will build a new greenhouse at Mt. Greenwood this season, 38x125 feet. A number of the cemetery men are now in uniform. Mr. Rudd is now in Michigan on a fishing trip.

Albert T. Hey.

J. B. Deamud's son, Wilder, was given a surprise party at his parents' home, 6435 Star avenue, on the occasion of his entering his eighteenth year.

Edward Eisner, for 15 years with C. A. Samuelson at 2129 Michigan avenue, will open a retail store of his own at 5523 Halsted street on Saturday next.

The Kennicott Bros. Co. is now receiving fine auratum lilies; excellent indoor asters are also seen here, as well as fine white and lavender sweet peas.

John Assa, 112 Bowmanville avenue, has just completed two 27x250-foot houses, which are being planted to American Beauty roses.

The fatal accident to E. Lundburg, florist at 616 Wells street, is noted in the obituary column of this issue.

The A. L. Randall Co. is receiving quantities of large, fancy ferns from Michigan.

Wietor Bros. are already cutting from their young American Beauty plants.

Zech & Mann are receiving fine red gladiolus, also Harisii lilies.

Visitors: W. H. Wyman, North Abington, Mass; Thos. Thurston, of the Central Michigan Nursery & Floral Co., Kalamazoo, Mich.; C. E. Heite, of the W. L. Rock Floral Co., Kansas City, Mo.; Daniel T. McCarthy, Lockport, N. Y.; Geo. A. Kuhl, Pekin; J. F. Baker, Fort Worth, Tex.; J. W. Ludwig, Pittsburg, Pa., as delegate to the republican national committee; Elmer D. Smith, Adrian, Mich.; Geo. Vatter, Marinette, Wis.; W. E. Davidson and wife, Holdrege, Neb.; Mrs. W. E. McElwain, Walworth, Wis.; Edward A. Fulle, Richmond, Ind.

TRADE VERY GOOD.

Trade conditions are at present of the very best and though flowers of most varieties are plentiful all find fairly good sale excepting carnations which do not move so readily. This is accounted for by the sale of peonies which is very large. Roses continue of very good quality and are generally worth the $8 per 100 which they command. Killarney holds up its quality and with American Beauty is now the favorite rose. Richmond has shortened in crop but Bridesmaid and Bride are still good and very little mildew is noticed. Carnations are good, very fine flowers still being abundant for the late season. Sweet peas are getting smaller and longiflorum, and other lilies are scarce. Peonies are plentiful and meet with ready sale; only the early varieties are in but from present indications there will be a very heavy crop. Those dealing in bedding stock have had a very good season and many varieties of plants are sold out. Red geraniums have been at a premium for some time. Hydrangeas are so good sellers at this season for outdoor work that it is not easily understood why so few of them are grown here.

M. Wolf, formerly of Chicago and Detroit, has opened up a cut rate flower store on Yonge street. His prices are decidedly low; consignments are received from Chicago and elsewhere, but with the duty, etc., there can be little for the grower.

J. Chambers has the indorsement of the local florists for the vacancy of Park Commissioner at Niagara Falls, Ont. Mr. Chambers is a man who thoroughly understands his work besides having unlimited executive ability.

Chas. Tidy has been showing some very fine cattleyas. Business has been good with him and he has had some very good decorations. H. G. D.

Our Pastimes.

Announcement of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to A. F. Faulkner, 1133 Broadway, New York; Robt. Kift, 1725 Chestnut St., Philadelphia; or to the American Florist Co., Chicago.

At Chicago.

A bowling contest for members of the Florists' Club who wish to qualify for places on the team that will go to the S. A. F. convention will be held at Mussey's next Tuesday evening at 8 o'clock. A ladies' team, also, will be organized. On June 16 some of the bowlers got together at Mussey's. No record of the scores was kept, as it was not a regularly called meeting. Those present included: C. W. McKellar and wife, Geo. Asmus and wife, Chas. Balluff and wife, E. F. Winterson and wife, Mrs. P. J. Hauswirth and Mrs. Walter Kreitling. From the enthusiasm of the crowd, good sport is anticipated at all future meetings.

The "Paper White" Trust.

"These narcissus look nice," said Mrs. Hyde Parker, "but isn't the price rather high?" "Well," replied Fakir, the florist, "the paper trust has advanced the prices awfully." "What has that to do with this case?" "Why, madame, these are genuine Paper White narcissi."

Love Among the Posies.

The Bachelor's Button was haughty and proud,
And the Tulips that smiled at his side he allowed
To go all unkissed. On his stalk he would loll,
And a fair Bleeding Heart could not move him at all.
The flowers winked one at another and said,
"He hasn't the sentiment in him to wed!"
But when rich Miss Marigold—pretty young thing!—
Pressed the Bachelor's Button, he gave her a ring.

SUMMER CONDITIONS.

The passing of Memorial day and the closing of the schools places the floral trade upon the summertime basis, with dull trade and sometimes very poor stock. The season has been very wet, which has hindered rather than helped the outdoor gardening, and growing plants are rather backward. During the commencement season just passed there was an unprecedented call for flowers. The Joy Floral Co. sold for the Ward's school commencement for one day's delivery 500 American Beauty roses. This was much greater than its own cut, and the firm necessarily had to buy. Lilies also were largely used for commencement purposes. Oscar Geny, the grower of the Geny Bros. firm, managed to have a wonderful supply of Easter lilies, very unusual at this time of year. Candidum lilies were also in blossom in all the old gardens around the city and were largely used for commencements. Miss Kitty Sharples, who has been with the Joy Floral Co. ever since it entered the floral trade, has had great experience with the Nashville public and its floral tastes. She says there is a growing demand each year for spring flowers, the old-fashioned garden varieties, and that her patrons tire of the usual supply of carnations and roses, and desire a change. This season the company has grown an unusual supply of phlox, which has been much appreciated by the public. It has been used as funeral bunches, cut flowers and in designs. Gladioli are also in excellent flower just now and are being used for almost every occasion. Sweet peas are also flowering well at this season, and are very popular just now for bridal flowers. June weddings are coming on thick and fast, which helps out the floral trade.

WHOLESALERS COMPLAIN.

Summer dullness has seized the wholesale district. Even the poor boon of a good Saturday is now denied the dealers, as its half holiday takes many to the out-of-town pleasure resorts. During the past week there were quite a number of weddings, as well as funerals, but altogether the demand fell far short of cleaning up the market. There is a ray of hope in the fact that the peonies will soon be gone and pulling up is beginning in the greenhouses. There will then, at least, be less stock to throw away.

June 15.—The demand is very light, and the dullness is aggravated by wet and sultry weather. The outlook for the week is not encouraging.

ROSE SOCIETY'S EXHIBITION.

To the exhibitors who spent their time and incurred expense all credit is due, but it seems remarkable that in this great city, in June, a rose show with two supposedly influential societies behind it could not draw more than eight exhibitors. It has been said that the New York public will not go as far as Bronx park to see a flower show, but it may well be excused for not going when the combined exhibits do not exceed that which may be seen in a single first-class commercial or private place. The writer is not disposed to be captious or fault-finding, but to all who might easily have done something to add to the interest in this show, but who did nothing, he would say that it is sincerely to be hoped that such a fiasco will never again occur.

At the meeting of the American Rose Society business of a purely routine nature was transacted, after which there was an interesting lecture on outdoor roses by Leonard Barron, secretary of the Horticultural Society of New York. The lecture was illustrated by lantern slides. As previously stated, praise is due the few who did exhibit. The collections of Messrs. Pierson, Troy, Manda and Van Fleet were all noteworthy and well staged. The Troy exhibit comprised over 40 varieties of roses, all excepting four being suitable for outdoor culture, the exhibit being very tastefully arranged. The Pierson exhibit, in addition to fine roses, was rich in many of the best varieties of peonies and sweet peas. Both Manda's and Van Fleet's exhibits of Wichuraiana and hybrids of their own production were interesting and instructive. Turner's Malmaison carnations were attractive. The Vincent geraniums, considering hot weather and the long distance which they had come, were splendid specimens.

The following were the exhibitors: F. R. Pierson Co., Tarrytown; J. H. Troy, New Rochelle; W. A. Manda, South Orange, N. J.; Dr. W. Van Fleet, Little Silver, N. J.; Lager & Hurrell, Summit, N. J.; Howard Gould (Harry Turner, gardener), Port Washington; R. Vincent, Jr., & Sons Co., Whitemarsh, Md.; Julius Roehrs Co., Rutherford, N. J.

AWARDS.

For the most representative display of varieties in all sections of garden roses: F. R. Pierson Co., first.

Louis Schmutz.

The veteran grower of Flatbush, N. Y., says he has made so much money sending bedding stock to auction the past few weeks that he doesn't know what to do with it.

Sweepstake prize, silver cup (value $25), offered by F. R. Pierson to exhibitor whose combined exhibits in any and all classes are regarded by two judges as being the most comprehensive and instructive: J. H. Troy.

For cut sprays of Wichuraiana polyantha and multiflora varieties or their hybrids: W. A. Manda, first.

SPECIAL PRIZES.

For peonies and sweet peas: F. R. Pierson Co.

For orchids: Lager & Hurrell.

For Malmaison carnations: Howard Gould (Harry Turner, gardener), silver medal.

NOTES.

Hon. Wm. S. Devery, sometimes called Big Bill, has some ideas that are worthy of the attention of the park superintendents of the country. Recently, Mr. Devery was told that Richard Croker wanted the ruins of Philae brought from an island in the river Nile and set up in Central park. After a few general remarks he said: "I'm not in favor of filling Central park with any ruins myself. * * * There is enough stuff in Central park now that oughtn't to be there. A lot of those statues up there, scaring horses and children ought to be given the run. If they put many more buildings and statues and restaurants and boat houses and band stands and garages in Central park, the only way poor people can get any enjoyment out of it is by walking around the outside and looking over the wall." Devery is not a classical scholar but he hits at an abuse that is becoming far too common.

There is a lady in this city, one of the high thinkers, who is called by her friends the modern Hypatia, who believes she can live to be 160 years old, on a diet of love and roses. If she had begun her missionary work earlier in the season and made converts she might now be an honorary member of the Wholesalers' Association. Eating rose leaves is a fine idea and somebody should have thought of it before.

Mrs. Russell Sage has presented to Central park, rhododendron plants, the estimated cost of which is $50,000. Of the lot, about 6,000 are imported hybrids. The planting has been done on the west side of the east drive, and covers a strip a mile long. The thousands of maximums used were bought from a number of different nurseries in this country.

Henry Luhrs, of Myer's store, Fifty-eighth street and Madison avenue, will be married on June 24 to Miss Arabelle Eisle, a beautiful and accomplished young lady and a belle of the Murray Hill section of this city. He gave a farewell bachelor dinner on June 15, at which his employer and fellow employes were present.

The death of George Linsdale, the Thirty-fourth street retailer, though not unexpected, has brought sadness to his family and friends. He has been long a patient sufferer. Coming to this country from England as a poor boy, he, by perseverance and industry, won a respected place among the members of the craft.

Wm. Elliott & Sons will have a big trade sale next Tuesday, June 23, when

they will offer a grand assortment of palms, ferns, asparagus, rubbers, chrysanthemums, etc., in the best sizes to buy now for growing on. Don't overlook the date, and the place is 42 Vesey street.

M. A. Bowe executed a very fine decoration June 8 at All Angels' church for the McCoulie-Schneider wedding, many lilies being used. Many fine orchids were also used in the numerous bouquets.

The funeral of O. H. P. Belmont was the occasion of many funeral designs, there being about 100 in all, orchids entering largely into the work, much of which was executed at the Thorley stores.

George Johnston, whose serious illness was noted last week, died June 8. He was a brother to William and Joseph Johnston of the Johnston Heating Co.

Calla Canary Bird grown by Dr. Van Fleet is attracting considerable attention in Vaughan's Seed Store.

Auction sales of bedding plants have brought good returns recently.

W. K. Wood, trade journalist, was a recent visitor.

Brooklyn Retail Florists' Association.

ED. AMERICAN FLORIST:

I wish to inform the wholesale and the general florist trade of New York, as well as the readers of your valuable paper, that the so-called Retail Florists' Association of the Borough of Brooklyn, New York, is an association formed for the purpose of bettering the trade, sociability and standard time for closing, and not to harm or cause any bitter feeling to anyone.

Every retailer doing a legitimate florist business in New York, Borough of Brooklyn, is cordially invited to become a member and is assured of a square deal. Our next regular meeting will be held at the rooms of the association in the Imperial, Red Hook Lane and Fulton street, Brooklyn, June 22, at 9 p. m. sharp.

ROSES PLENTIFUL BUT THIN.

The full crop of outdoor sweet peas is now coming in, all the commission houses receiving large consignments. The quality is fine, as only the best varieties seem to be offered. What is now wanted is a large flowered Blanche Ferry, as the color of this fine pink sort is still very popular. Prices range from $2.50 to $5 per 1,000. Roses are very plentiful, with American Beauty leading. Prices are so low that it does not seem the right thing to quote them. The quality is still very good for the season, the flowers holding color and form to a degree not often seen at this time of year. Killarney is much in evidence as the days grow longer, the color is so bright as to be almost red, but the flowers lack substance and should be cut tight these days and brought on in the cool of the cellar or ice box, gradually. Many of the consignments the past week were wide open when the boxes were received. There is much dissatisfaction with Richmond, which develops a very weak neck as soon as the spring growth gets strong and vigorous. The bottom shoots develop into thick canes, but the bud, at the end, opens quickly and has little substance. Liberty is selling better, there being more substance to the flower, and it is in demand for out-of-town orders. Carnations are fast degenerating, and some of the smaller flowered sorts, except white, hardly bring express charges. Some very nice Lords are still seen, this variety and Winsor being about the best of the color. Pink Enchantress also seems to be in demand, it being a better seller now than earlier in the season, when it would scarcely move at any price. Lily of the valley is still so plentiful that very fair stock can be had for $2; $3 to $4 is the price for the carefully selected, on the day it arrives. Green goods, particularly asparagus, are very plentiful. The price remains at 50 cents per bunch of cut sprays. Like the iron and glass list, the price of greens seldom varies, the percentage of discount being determined according to the size of the bunches, which are now most generous. There were several large weddings the past week, at which the decorations were quite elaborate.

NOTES.

Michael Kavanagh died last Sunday night after a lingering illness. He was 50 years of age. Mike, as he was popularly known, was of a most genial disposition. For a number of years he was an assistant foreman at the Robert Craig nurseries, which position he resigned on account of failing health, late last fall. Mr. Kavanagh was a valued assistant, having a thorough knowledge of the business, and one who always took a personal interest in the work of his employers. He had a large circle of acquaintances in the craft who will be pained to hear of his death.

Pennock Bros. are well pleased with their automobile delivery wagon, which was made to their order, being put on the street last fall. It is large and commodious and at the same time ornamental, really better than anything else in the line of delivery wagons in this city. Although more expensive than ordinary horse service, they believe it a paying investment. Their experience is that the motor power should be of the best, of a standard make, and then one is reasonably sure of good and continued service.

The H. A. Dreer Co. has had a quick moving stock in a block of hydrangeas in tubs, large plants carrying quantities of blooms, mostly blue, which were just in time for June wedding decorations. John Rupert, the city salesman, says this firm can not get them in flower fast enough. There is also a good demand for Cibotium Schiedei for summer window decoration. Several houses of this useful fern are grown on each year, but for several seasons here all have been sold before the winter is half over.

Joseph Heacock, who has been an American Beauty rose expert for a long time, in fact, ever since the rose was introduced, has reluctantly said farewell to his old love and will be found the coming season wooing the Irish beauty, the fair Killarney. Mr. Heacock's experience with a limited quantity of this popular variety has been most satisfactory and he will, we are sure, be neck and neck in the race, at the finish, with some of the New England experts at the next meet.

The Leo Niessen Co. says that while business is quiet it is satisfied with the volume of trade for the season. American Beauty roses of good quality are seen here in large quantities. Sweet peas are coming in by the 1,000 and large lots, as many as 35,000 to 40,000, being handled a day.

Charles Fox of Broad and Thompson streets has several large cibotiums in his Broad street windows that are the admiration of all who see them. They have been there for a number of years and are certainly very attractive.

At a church decoration, H. H. Battles used some 300 strings of asparagus and something over 5,000 peonies, as well as other flowers. Decorations at the house were also on an elaborate scale, using quantities of the best flowers.

The Ranstead commission men are certainly very chummy. All three were seen in an automobile in the neighborhood of Fifty-second and Market streets last Saturday, probably looking up growers for next season.

Wm. McKissick is receiving a splendid lot of sweet peas. Some white and pink flowers seen there were of immense size and great substance. He said they were the best he had ever handled.

K.

Pittsburg.

CARNATIONS FAILING.

The summer dullness is now very apparent everywhere and there is very little to report. Carnations are very poor and less of them every day. Roses, excepting Kaiserin and Chatenay, are miserable. Peonies are done for. Lilies sell about the best of anything, they cleaning up nicely.

The Florists' Club met Tuesday night to discuss outdoor flowers. A peony exhibition was scheduled, but the weather advanced the flowers so fast there was very little to this. N. C. Madsen, Sewickley, brought up some very fine strawberries, which were the most interesting things shown. Prizes were awarded for exhibits, but the judges declared none were fit for first place, which was given to no one. The subject of a picnic was brought up and it was decided to hold it at the farm of the Pittsburg Rose & Carnation Co. at Bakerstown, June 25. This will be a basket affair and one to bring the whole family to.

J.

Boston.

FEW WEDDINGS.

There is no general renewal of real business such as is expected in this, the month of weddings. The few decorations have been carried out on an extremely light scale, and the best part of the month is already past. A tremendous influx of all sorts of flowers, both garden and indoor, is swamping the market and the deluge is apparently impossible to check. A fortnight of delightful and very warm June weather has brought out the summer flowers at a remarkable rate; and they are being dumped on the market for what they bring. The summer, so far, has been a singular one, being absolutely free from rain, which is very usual at this time of year. It is badly needed, as plainly shown in the condition of gardens in the suburbs, vegetation being already seriously affected. Thousands of peonies are coming in, and there is absolutely no way of disposing of but a small portion of this stock. Carnations are rapidly going out, greatly relieving the growers, who have persistently held out against odds impossible to overcome. The rose market is pretty well wrecked, it being almost impossible to handle the great quantities forwarded. American Beauty is holding up and a fairly good demand is noticed. In such times as these the superiority of this great rose is easily emphasized. The best grades are at present bringing $2 to $3 per dozen. Richmond is practically over and Killarney is rapidly approaching the same stage. The first outdoor roses are already on sale. Sweet peas of numerous colors are available in great quantities, and fill the major portion of the demand for small flowers. Lily of the valley of indoor production is again in control, and the consumption is fairly heavy. The last of the frame flowers are gone and prices have advanced sharply.

The police department of the city is closely watching flower shops particularly, and several arrests of late have proven sufficient warning that the laws are not to be tampered with regarding the observance of Sunday. Those shopkeepers who persist in keeping open are destined to meet with trouble and they make a grave mistake in antagonizing the police.

Wm. Gilson, for many years in the employ of John T. Butterworth of South Framingham, is now associated with Thomas Roland of Nahant, and without doubt will prove a valuable addition to the large corps of assistants already enrolled.

For the June market, in which lily of the valley is the most important requisite, John McFarland of North Easton is prepared to meet all demands with a large crop of extra quality.

Samuel Neil is distributing the first outdoor Jacqueminot roses of the season from his establishment in Dorchester, from which he is cutting great quantities.

SUMMER PROSPECTS GOOD.

Although for the last few weeks business has been dull, things have taken a decided change, and the prospect for a busy summer seems good.

The fire that destroyed the new Cliffs hotel last week also destroyed the vegetable garden at the Winthrop Chanler place adjoining. This will prove a considerable loss to Wm. Postings, the gardener, as he had a contract to supply vegetables to the family to whom the estate was rented.

The Horticultural Society holds its annual rose and strawberry show in Masonic hall, June 23-24. This should be an interesting and successful show, as a large number of the gardeners have signified their intention of exhibiting.

The W. B. Leeds estate, formerly owned by F. W. Vanderbilt, has been considerably changed and a decided improvement is noticeable.

Spaulding & Hodgson have opened their floral establishment on Bellevue avenue for the summer.

V. A. Vanicek reports a good season in the nursery line.

Samuel Smith had the first sweet peas in bloom here.

Visitors: W. E. Marshall, of W. E. Marshall & Co., New York; J. Rickards, of Rickards Bros., New York. Z.

FUNERAL WORK PLENTIFUL.

Business has been very brisk during the past week. Funeral work takes the lead, as the average number of weddings is considerably lower than in former years. Roses and carnations are of very good quality, and the quantity so far has been sufficient. Sweet peas have proven a very popular flower this season, and the prices have been good, ranging from $1 to $1.50 per 100. The call for lavender has been excessive, being far greater than the supply.

NOTES.

S. F. Stephens, the florist at Green Lawn cemetery, is now pushing work rapidly to completion. As Mr. Stephens has the entire care of the landscape garden work and bedding, it takes him some time to complete the enormous amount of work to be done.

Our city parks are now beginning to look more cheerful, owing to the efforts of their respective superintendents. Jas. Underwood has been doing some nice work at Franklin park, and also the florist at Schiller park.

Chrysanthemums are being planted now and some fine stock can be seen by a visit to the different establishments.

CARL.

Albany, N. Y.

GOOD CALL FOR CUT FLOWERS.

The past week brought with it a number of weddings and commencement exercises of public and private schools, functions that called for the use of flowers in considerable numbers. The events came along so regularly from day to day that the local florists were able to order more than usual quantities of stock and to dispose of them satisfactorily.

Daniel Whittle was re-elected treasurer at the last meeting of the Musical Association, the most important organization of the kind in the city. Mr. Whittle has an excellent tenor voice and is well known in local musical circles.

Amos Balfoort, 121 Northern boulevard, will shortly excavate for and install a new hot water boiler to heat his store.

R. D.

DENVER, COLO.—The Washington Park Floral Co. has been incorporated with capital stock $25,000. John C. and Frank A. Buckman and Newton Anderson are the incorporators.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

Congressional Seedsmen.

PUBLIC PAYS SALARIES AND SUPPLIES SEEDS.

If the current custom of indiscriminate distribution shall indefinitely continue, if this congressional comedy shall drift into a continuous performance, we shall ultimately be driven to the mournful admission that we are not statesmen, but seedsmen; and it will be in order for some distinguished seedsman, some sainted hero of a score of memorable distributions, some legislative knight upon whose shield is blazoned a radish in its glory or a turnip in repose, to arise in his place with becoming gravity and move, Mr. Chairman that the American eagle be taken from the mace and supplanted by a package of vegetable seed as the supreme emblem of the genius, the character, and the principal occupation of American statesmanship.—*Morris Sheppard, of Texas, in House of Representatives.*

DANDELION SEED is reported as a probable short crop in France.

CHAS. P. BRASLAN and wife will sail from New York for Liverpool on the S. S. Cedric June 18.

LAST year the government contract for packeting seeds under free seed distribution required 60,000,000 packets. It is expected this quantity will be reduced 15 per cent in 1909.

"ON my way to Chicago I saw many grass and clover fields in Iowa and Illinois containing mustard; the farmer must be held responsible, if any seed law is to be enacted," says Wm. Kueker of the Farmer Seed Co., of Faribault, Minn.

MUSCATINE, IOWA.—Watermelon and muskmelon are starting off well, but the striped beetle has to be fought. Pepper plants are set out and have been cultivated once. Egg plants have had a hard time of it. Asparagus fields are blooming well. H.

SAN FRANCISCO, CAL., June 13.—C. C. Morse & Co. advise that the California seed crops are still holding their own pretty well, with the exception of sweet peas, which will be light. Continued cool, foggy weather has helped the crops to withstand the long continued drought.

DEALERS in French bulbs expected that by holding back their orders for Narcissus Paper White Grandiflora they could obtain a price of two francs better per 1,000, but the growers did not yield and one of them commenced to buy about the end of May, and that fixed prices definitely for the narcissus.

MILWAUKEE, WIS.—Wm. E. Dallwig, the well known seedsman of this city, celebrates his twenty-fifth business anniversary this year, having started his seed business in 1883. Mr. Dallwig says that notwithstanding the somewhat adverse conditions this season, his business has been considerably above the average.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

CHICAGO.—Dry and cooler weather has stopped the maggot ravages in onion sets in this vicinity.—Grass seed prices on the board of trade June 10 were noted as follows: Prime timothy, $4.15 (nominal); choice white clover, $15.—Chas. Loechner left for the east at 2 p. m., June 13.—Carl Cropp and wife and son are on an automobile trip to Minneapolis by way of Milwaukee.—Visitors: Wm. Kueker, manager Farmer Seed Co., Faribault, Minn.; F. A. Wilson, of L. L. Olds Seed Co., Clinton, Wis.

NEW YORK.—R. J. Irwin of H. H. Berger & Co. is attending to office duties during the absence in Europe of Mrs. and Miss Berger. A. Henderson of Vaughan's seed store, Chicago, has been here, with headquarters at the Barclay street store. Anton C. Zvolanek, the Boundbrook, N. J., sweet pea specialist, is on a California trip. All report business good here. J. M. Thorburn & Co. worked 100 nights and four Sundays. Wm. F. Bruggerhof is now in Vancouver, B. C. Wm. Hagemann sailed for Europe June 9. F. H. Henry, of Henry & Lee, sailed for Bermuda June 16. A number of Hollanders sailed last week on the S. S. Ryndam for home, including P. M. Koster, of Koster & Co., and J. Blaauw, of J. Blaauw & Co., Boskoop; — Ebbinge, Wm. Satter, of Ebbinge & Van Groos, Boskoop, and Wm. Taat, of M. Van Waveren & Sons, Hillegom. They state that the nursery business is away ahead of their expectations and the bulb business about 25 per cent short of that of last year. Florists have reduced their orders about 25 per cent and seed houses 10 to 15 per cent.

Long Island Cabbage Seed.

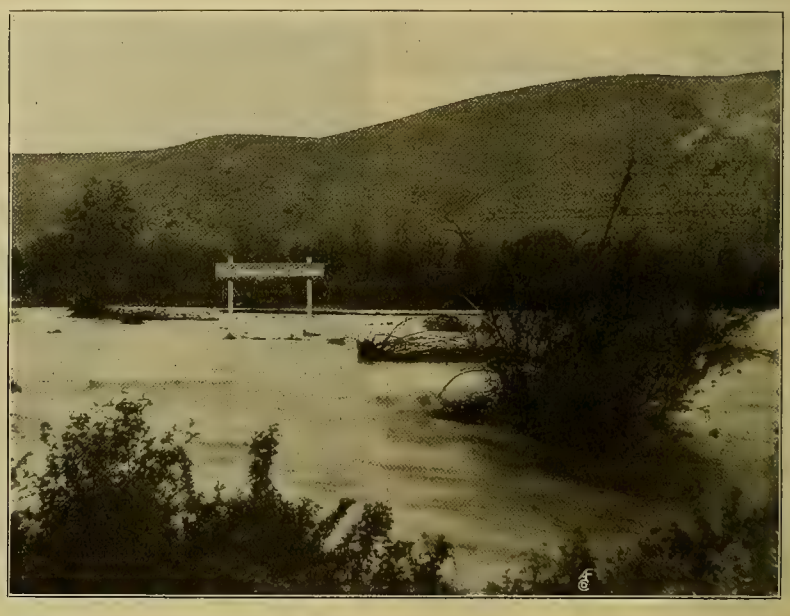
Long Island, June 15.—The cabbage seed crop of Long Island, which in the early part of the season promised an abundant yield, has in the last few days been greatly damaged by the maggot, and as a consequence it now seems probable that the yield will be below an average one, and that growers will be obliged to make short deliveries on a number of leading varieties.

American Seed Trade Association.

DETROIT CONVENTION, JUNE 23-25.

Arrangements have been made by the Wabash Railroad to take members of the American Seed Trade Association and their friends to Detroit on its 11 p. m. train Monday, June 22, arriving in Detroit at 7:30 a. m. Ample sleeping car accommodations will be provided for all who can make it convenient to take this train, as all members who have thus far arranged for their sleeping car accommodations will leave on the above date and train. For those who are unable to take this train or wish to leave earlier in the day the Wabash has trains leaving Chicago at 12:04 p. m. (noon) and 3 p. m., arriving in Detroit at 8:10 p. m. and 10:50 p. m., respectively.

Sleeping car accommodations and railroad tickets can be secured at the Wabash city ticket office, 109 Adams street, or its depot, Dearborn station, Polk and Dearborn streets, By communicating with Leonard H. Vaughan, 84 Randolph street, or the Wabash ticket office, 109 Adams street, sleeping car accommodations will be reserved for all who apply.



THE RECENT FLOODS IN MONTANA.
Grounds of the State Nursery Co., Helena, Submerged.

California Beans.

F. L. Hogue writes as follows, June 11: "Although we had an unusual amount of dry wind and cool weather during the greater part of May, we are now having very favorable weather and seed beans in this and the Lompoc valley are looking very well indeed. Some few fields show rather a light stand on account of the seed being damaged by rain last fall. We expect to make full delivery on nearly all varieties of beans that we grow. We have 2,000 acres devoted to the raising of seed beans this year."

It is expected that a large number will attend the convention from Chicago and other western cities.

Iowa Seed Dealers' Association.

The annual reports of the officers of the Iowa State Seed Dealers' Association, which met at the Chamberlain hotel, Des Moines, June 9, showed great progress in the affairs of the organization. The membership is larger than ever before and the society is in better financial condition. About 300 persons attended the convention, a far larger number than was expected.

In his opening address, President C. N. Page urged co-operation among the members of the society with the object of competing more successfully with dealers of other states. He dwelt upon the advantages of a change in the state seed law and asked the members of the organization to work in conjunction to bring sufficient pressure to bear upon the state legislature to secure a repeal or amendment of the measure. He declared that the law discriminates against dealers in the state in favor of seed men from surrounding territory.

The afternoon meeting was addressed by Professors B. H. Pammel, P. W. Holden and B. W. Crossley, of Ames; H. R. Wright, the state seed commissioner; Jas. Atkinson and Geo. W. Franklin. The following visitors attended: Mel. L. Webster, Independence; H. A. Johns, Sioux City; C. G. Ouren and O. Younkerman, Council Bluffs; E. M. Cole, Pella; Henry Field, J. W. Ratekin and H. E. Eaton, Shenandoah; B. H. Adams and W. C. Adams, Decorah; B. C. Hanssen, Davenport; J. A. Kramer and John T. Hamilton, Cedar Rapids; J. F. Sinn, Clarinda; W. W. Vansant, Farragut; G. L. Bissell, Ottumwa; F. J. Olsan, Ames; N. J. Burt, Burlington; M. Young, Jr., Winterset; William Brown, Mitchellville. The local dealers, E. J. Hohberger, Guthrie Lorenz Co. and the Iowa Seed Co. were also represented.

Seed Trial Grounds Washed Out.

The recent exceptional rains in Montana played havoc with the seed trial grounds of the State Nursery Co. of Helena. Ten Mile creek that flows through the nursery overflowed its banks completely and washed out the seed trial grounds on which a large amount is spent annually. The Northern Pacific track that runs for over a mile through the nursery grounds was washed away for 50 feet—it was this track that saved the 47 greenhouses of the company, acting as it did as a barrier to the flood's progress in that direction. One of the nursery's bridges was carried off and the pretty rustic bridge that leads to the street car station was badly disfigured. Practically the whole of the nursery's staff were engaged in an endeavor to stem the flood but nothing could turn its course. Moving at the rate of nearly 15 miles an hour it carried all before it, boulders being deposited where seeds and plants had just before been. The accompanying illustration, good as it is, does not convey an adequate idea of the wild rush of the waters that drained off the Rockies and rushed through the gulch in which the nursery stands.

STATE SENATOR WALTER CLYDE JONES is being urged by his friends to make the race for congress to succeed J. R. Mann, sponsor of the notorious seed bill.

MARKET GARDENS.

TEXAS BERMUDA ONIONS a year ago were $2.25, Silver Skin and Yellow, and today they are sold at $1 a crate. In Chicago alone 40 cars have been sold for freight this season.

POTATOES are $1.40 a bushel on the Chicago market this week and a year ago they sold for 60 cents a bushel. This condition is said to be due to the cold, backward weather.

Grape Black Alicante in England.

A fine example of good culture we saw last fall, when calling upon Thos. Rochford & Sons, Ltd., at Turnford Hall nurseries, near Broxbourne, England. Two houses, spans 35x500 feet, have been planted four years, the present crop being the third. The vines are grown

Model Bunch of Black Alicante Grape.

on the double rod system, three feet between each rod. The grapes (see illustration) were perfect, both in bunch and berry, color grand.

These grapes were only being cut to order, the firm waiting for the turn of the market, 50 cents per lb not being sufficient for grapes of this quality. We saw five bunches cut weighing 11 pounds, but H. Kelsall, the manager, said that previously four bunches had been cut weighing 14 pounds. In addition they had cut from the same houses bunches between four and five pounds each. Each rod averaged 18 bunches; 75 pounds per vine. The growth of rod above the fruit was well in advance of the cut back mark, the rods only fruiting about two-thirds up the rafter. There is a great thoroughness in all this firm take in hand, and in none is it more shown than in their grape culture. S.

Mulching.

It will soon be time to think of the summer mulch. Where plenty of manure is at hand, or easily obtained, this is not much of a problem. However, there are plenty of cases where this is not readily secured and the only way out is by timely preparation. Either have the manure shipped so it will be on hand when needed or where it can be hauled; it should be regularly looked after. The next point is manure storage. The bulk of manure used is horse manure. Its nature is such that storage is not easy. If at all piled, it will fire quickly and is then of low value. Horse manure is richest in nitrogen and this heating process sets free most of it. Prevent this loss by all means. There are several methods available. One is to have a water tight bottom or manure pit and keep it well soaked. The objection to this is that it is in bad shape to put into the houses.

A better way is to haul in long, very flat piles and add to each layer of manure a layer of dry earth, sand, coal ashes or any other such material that may be desirable in the houses. Then either drive over the piles often or set a team of horses to tramp over the piles daily, for a few minutes, to drive out the air and thus prevent heating. Another method is very good where some stock is at hand, either hogs, cattle or horses. Haul it into their yard and let them do the compacting for you. If exposed to hogs, add a little grain; the hogs will dig and turn the manure over and over and reduce it into a fine mass in short order. MARKETMAN.

WELLINGTON, O.—Thos. G. Yale reports the best business ever experienced on Decoration day, and that trade has been very good all the spring. Cut flowers and plants have sold well and there are not enough of some varieties of plants left for stock.

Address **American Spawn Company, St. Paul, Minn.**

ROCK FALLS, ILL.—Rumor has it that a large greenhouse plant to be devoted to market gardening crops is to be built here shortly.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points June 13 were as follows: New York, tomatoes, 10 cents per pound; mushrooms, 30 cents to 90 cents per pound. Cincinnati, cucumbers, 25 cents to 30 cents per dozen. Mushrooms, 50 cents to 60 cents per pound. Boston, cucumbers, $4.50 to $5 per box. Chicago, mushrooms, 40 cents to 50 cents per pound.

Intensive Vegetable Gardening in England.

Consul-General Robert J. Wynne forwards from London a newspaper account of the successful introduction of French gardening methods into England, by which an acre of ground is made to yield from £500 to £600 ($2,433 to $2,920) annually. Hotbeds and glass bell jars are extensively employed for the production of vegetables all the year round. Some of the crops are lettuce, cauliflower, celery, carrots and melons, the latter being forced by a steady temperature of 90°, generated by manure.

Tomatoes for Export.

Consul John L. Griffiths, of Liverpool, in reporting that there has been a decided falling off in the importation of canned fruits from the United States into England during the last two years, gives the following particulars regarding tomatoes:

"Tomatoes are imported in increasing quantities each year from Italy. The quality of these tomatoes is stated to be good and the prices low. Large quantities of canned tomatoes are also shipped now each season from Italy to the eastern part of the United States, and the American shipments to this market are much smaller than formerly. It is suggested by one of the leading importers in Liverpool that the American tomatoes are frequently packed before they are fully ripe, and that this practice renders them undesirable for use. The Italian tomatoes are carefully selected, and are only packed after they have attained a ripe and rich color. If the American packers desire to increase their shipments of tomatoes to this country, they must exercise the greatest care in their selection and preparation for the English market.

DAHLIAS.

Now is the time to place your order for Bulbs which will insure you getting named varieties in any quantity; delivery to be made this fall or early spring.

European Horticulture.

FROM THE GERMAN TRADE PAPERS.

MALOPE GRANDIFLORA.—The most admired in a finely staged exhibit of various species of flowers in a cut state, it being a collection of over 200 different kinds, at the September show of the Prussian Society of Horticulture at Berlin, were the fiery red blooms of Malope grandiflora and its pure white variety. Both grow to a height of about 40 inches, flower profusely from July until late in autumn and are highly effective when planted in groups of five or more specimens about the lawn or garden as well as when solidly massed in beds and borders. The blooms are long lasting and most desirable material for the decorator, easily produced in astounding abundance throughout the latter part of summer. Seeds of Malope grandiflora are started in a hotbed in April and the seedlings, when large enough to be conveniently handled, are then planted out into the garden, fairly good soil and a freely exposed situation suiting them admirably.

PRESIDENT JESSE E. NORTHRUP of the Minneapolis park board has proposed a gateway for the Minneapolis park district, to begin at Bridge square. This was made public in one of the lantern slides shown in the recent lecture by J. Horace McFarland at Minneapolis.

American Nurserymen's Protective Ass'n.

After many years of agitation the American Retail Nurserymen's Protective Association has been merged with the American Nurserymen's Protective Association under the name of the latter. This is a step in the right direction, curtailing both work and expense, as a large number of those in the trade found it absolutely necessary to be members of both organizations. The officers of the association are: R. C. Berckmans, Augusta, Ga., president; Thos. B. Meehan, Dreshertown, Pa., secretary, and Peter Youngers, Geneva, Neb., treasurer.

President-Elect Brown.

Chas. J. Brown, who was elected president of the American Association of Nurserymen at the Milwaukee convention last week, is the senior member of the firm of the Brown Bros. Co., the well-known nursery firm of Rochester, N. Y., with branch at Welland, Ont. Every form of decorative gardening is given attention by this concern, and the landscape department is made quite a conspicuous feature of the business. Ornamental trees and shrubs, also fruit trees, hardy herbaceous perennials, aquatics, etc., are grown in quantity, and the firm makes a specialty of carefully grown street and park trees. The Brown Bros. Co. had an important part in the introduction of the Crimson Rambler and the Baby Rambler roses, as will be recalled by those who have attended previous conventions, and its well known splendid success in general nursery lines is traceable to the spirit of fairness and square dealing which has always characterized this house. The head of such a concern, who more than any other is responsible for its success, will certainly take the best care of the interests of the association.

American Association of Nurserymen.

Last week's issue of THE FLORIST was the only western trade paper containing a reliable account of the thirty-third annual convention up to the time of going to press, including the names of the new officers and the next place of meeting. It will be recalled that the only new officer elected was President Chas. J. Brown, of the Brown Bros. Co., Rochester, N. Y., and this city was chosen for the next place of meeting of the association. The editor returns thanks for the hearty words of appreciation of our efforts from members of the association.

On reassembling Thursday morning, June 11, C. J. Maloy presented an exhaustive report of the excellent work done by the National Council of Horticulture and later in the day C. L. Watrous moved that an appropriation of $200 be made for the continuance of this work on closer nursery lines through a committee of three members of the association.

Chas. J. Brown. Rochester. N. Y.
President-Elect American Ass'n. of Nurserymen.

H. D. Simpson, Vincennes, Ind., read an excellent paper on "The Pecan."

John S. Kerr, Sherman, Tex., had for his subject "The Great Northwest."

J. B. Pilkington, Portland, Ore., had a paper entitled "Elements of Success in the Nursery Business."

Prof. Worsham, Atlanta, Ga., read an excellent paper on "Peach Yellows," by Prof. J. L. Phillips.

Prof. L. R. Taft, Lansing, Mich., contributed a timely and thorough paper on "The Spraying of Nursery Stock."

J. Horace McFarland, Harrisburg, Pa., made an excellent address on "Civic Improvement," showing how nurserymen could assist in this work.

Captain Watrous presented resolutions on the deaths of the late A. M. Albaugh and E. H. Pratt.

Resolutions were presented favoring parcels post and reduction of foreign postage rates.

The question box brought out a number of excellent discussions, particularly those on taxing nursery stock as personal property and the Kieffer pear.

Final resolutions closed the business of the convention.

On June 12 about 150 of the convention visitors made the journey to Oconomowoc and enjoyed the drives around that beautiful resort and excursions on the lakes in steam launches.

Convention Notes.

John Hall, the veteran secretary-treasurer of the Western New York Horticultural Society, Rochester, N. Y., was much interested in the proceedings.

Prof. Worsham says there are no peach yellows in Georgia and representatives of other southern states claim like immunity.

The railroad orator properly failed to win in his selection of next year's meeting place.

Prof. Taft's paper was notable for the valuable practical information it contained.

President Hill pushed through the work of the meeting with commendable dispatch.

The business of the past season was reported generally good.

It was an informing business meeting all the way through.

Taxing nursery stock remains a grave, unsettled question.

The fair, cool weather proved most enjoyable.

Much interest was taken in the trade exhibits.

The Exhibits.

Another Friend of Shade Trees.

Henry Clay Weeks, who is known throughout Queens and Nassau counties, N. Y., as the champion of shade trees, won a victory in his crusade May 16, when Magistrate Fitch in the Flushing police court fined Foreman Frank Sunderlin and Linemen Charles Olsen and Frank Murphy of the New York and New Jersey Telephone Co. $10 each for disorderly conduct in attempting to string telephone wires in front of Mr. Weeks' country place, Vista Lawn, Bay Side.

Mr. Weeks' victory was more decisive because of the fact that in December, 1904, before Justice Jaycox, the company by condemnation proceedings obtained an easement across Mr. Weeks' property giving it the right to erect and maintain nine poles in front of Vista Lawn and to string wires and cables thereon. The court also awarded Mr. Weeks $50 damages in the matter, but as Mr. Weeks and also his wife, who died three months ago, had avoided acceptance of both the order of the court and the payment of the $50 the order was non-effective.

In addition to protecting shade trees, Mr. Weeks, who is wealthy, is known as one of the champion mosquito fighters of the North Shore. When automobiles first came into use in that section of Queens county he was among the first to organize a crusade against speed maniacs, and he has footed all the expensive litigation which his various actions have brought.

Dickson's New Roses.

Hugh Dickson, the well known rose grower of Belfast, Ire., will offer the following new roses this season, descriptions by the raiser:

Mrs. William Cooper (H. T.).—A superb rose, and a grand addition to the hybrid teas, of vigorous and erect growth, flowers of great size and immense substance, with high pointed center, petals large and shell like, beautifully smooth and nicely finished. This rose is destined to take a commanding place among exhibition roses, and deserves its place in every garden, however small. The beautifully formed flowers are deep rosy flesh color in the center, paling towards the edges of the outer petals to delicate blush. Very sweetly perfumed; a valuable rose for any purpose.

Mrs. James Craig (H. T.).—This is a delightful rose of distinct habit, color and fragrance. The flowers, which are most abundantly and freely produced, are large, full, and of exquisite form, opening freely. The color is salmon rose, flushed pale yellow at the base of the petals, outer petals passing to pale rosy peach. Habit vigorous, erect and very branching, making an ideal variety for

New Rose Wm. R. Smith.

massing in beds. This rose will find a welcome everywhere for its perfume alone, which is unique among roses, being a delicious scent of the ordinary field primrose, in a highly intensified degree.

Wm. R. Smith (Tea).—I have no hesitation in saying this is one of the finest additions to teas sent out for many years. It is of American origin, and having tested its capabilities outdoors here during the past year I can with every confidence recommend it. It is a rose of great size and immense substance, fine form and large smooth petals, and will be one of the leading exhibition teas, and at the same time the finest of all the class for massing in beds. The growth and habit are a distinct advance on Maman Cochet, one of its parents, and in foliage it is much the handsomest of this section. The color is creamy white, flushed and suffused with bright rosy pink, opening freely in all weathers. This is a specially valuable rose for forcing purposes. I have purchased the stock for distribution in Europe this year, and it will be sent out simultaneously in America.

Mrs. Stewart Clark (H. T.).—This is a rose of immense size and great substance, with exquisitely refined petals and very vigorous growth; large, handsome, glossy foliage, which is very persistent—in fact, the foliage is almost evergreen. The color is very difficult to describe, varying from bright cerise pink to brilliant rose or cherry pink, with a distinct zone of white at the base of each petal. The flowers are of splendid form, with high pointed center, and deliciously fragrant. It is destined to take a leading position, both as a garden and exhibition rose. Awarded the gold medal of the National Rose Society.

H. Armytage Moore (H. T.).—This is a garden rose par excellence, free and vigorous in growth, upright in habit, with bold, handsome foliage. The flower is of immense depth, with great shell petals, which are beautifully reflexed at the edges. The color is a delightful shade of rosy pink on the outside of the petals, the inside of the petals being a delicate silvery pink. As a decorative or bedding rose this variety is unsurpassed, flowering in great profusion from the beginning of the season right up to its close.

Garden Roses.

In addition to the simple, hardy roses, the little white Scotch single rose is still well worthy of cultivation, though seldom listed by nurserymen. It is always one of the first to open in my garden; the flowers, though small, have a special freshness and grace of their own, and are borne very freely in wreath-like form along the many slender branches. I remember it as common in New England gardens in my childhood, and in old cemeteries it still flourishes after long years of neglect.

The so-called grass roses may also be classed as survivals. Rarely more than two feet in height, these sturdy little bushes have maintained themselves and extended by suckering to large clumps, marking the sites of old houses long after every vestige of the building, save a half-overgrown cellar hole, has disappeared. The loose, semi-double roses are deliciously fragrant, and their deep, rich pink or rosy red is the true rose color. Occasionally, in an old garden, the striped form is still found, the York and Lancaster rose of old English memories. These roses are worth growing, if only by way of contrast with the newer and finer varieties. They ask only a corner in the garden where they can be left unmolested.

Among single roses, the Japanese rough-leafed or rugosa type has an important place. Its rich, deep green foliage is not subject to the common insect pests that disfigure so many others. It makes a solid growth, very effective as mere shrubbery, and the occasional large, single flowers, appearing in small clusters throughout the season, are very decorative, and so are the large, brilliant hips that succeed them. It is entirely hardy, and thrives with little attention, though all the roses are gross feeders and do best in rich, mellow ground. There are many hybrids now of the rugosa family, but those that I have tried in my own garden are all inferior in foliage, though some have fine, double flowers. Of the single type, the white variety seems a little less vigorous than the red-flowered. Both are easily grown from seed, as well as increased by suckering.—Country Gentleman.

Notes on Nuts.

Indications are favorable for a larger crop of walnuts in California than usual.

The seventh annual convention of the National Nut Growers' Association will be held at Chattanooga, Tenn., October 27-29.

Georgia and Florida nut growers effected a permanent organization at a meeting in Monticello, Fla., May 19 and 20. W. C. Jones, of Cairo, Ga., was elected president; A. A. Rich, of Lamont, Fla., vice-president; Ray C. Simpson, Monticello, Fla., secretary; J. B. Wight, Cairo, Ga., treasurer. The purpose of the organization is to promote the mutual interests of its members and to encourage the planting of nuts as a commercial enterprise.

Plants from 2½-in. Pots at $3.00 per 100

No order for less than 100 accepted.

GEORGE REINBERG

35 Randolph St., CHICAGO.

Cleveland.

CARNATIONS SHORTENING.

Business is much the same as reported last week. The weather continues dry, although not as hot as the previous week. The only noticeable difference in the market is a slight shortening of carnations and the diminishing size of roses. Cold storage peonies are in excellent demand, bringing $6 per 100. The commencements this week will without doubt clean up the greater part of them. Smilax and hardy fern were not over-plentiful last week.

NOTES.

Westman & Getz are showing a series of very attractive window displays, consisting of outdoor flowers artistically arranged in hampers and vases of various shapes. An arrangement of coreopsis and corn flowers deserves special mention.

Some very effective window decorations were seen at The J. M. Gasser Co.'s last week. This firm has a number of good-sized weddings booked for the latter part of this month.

J. M. Strejcek, Broadway, was a very heavy buyer last week. Mr. Strejcek says the bulk of his work consists of funeral orders.

Smith & Fetters report business as being much better than was anticipated the fore part of the season.

A SPECIALTY.

The Dingee & Conard Co.,

WEST GROVE, PA.

CLAYTON, ILL.—Chas. E. Shank is adding about 80 feet to his greenhouse. When completed it will be 125 feet long and equipped with steam heat.

BROOKLYN, N. Y.—James Shanley, owner of several stores here and formerly in business as a florist, died at his home at 272 Twenty-second street, June 5.

PHILADELPHIA, PA.—Boys running amuck among his carnations, roses and lilies have aroused the ire of John G. Ellinger, of Forty-seventh and Locust streets, who recently complained to the board of education of damage done his property by ball players on the newly opened playground on the high school lot in West Philadelphia. "They're more nuisance than a glue factory," Mr. Ellinger stated in a letter read before the board. "They've damaged my crops and vegetables, and last week destroyed $20 worth of young carnations."

A. N. PIERSON, Inc., Cromwell Conn.

GEORGE BISCHOFF

ANN ARBOR. MICH.

Oconomowoc, Wis.

Otto Speidel is now a very busy man at the P. A. Valentine estate, the family having decided to take up residence here again during the summer months. The place has been neglected for a number of years, but it is now rapidly assuming its old-time form under Mr. Speidel's highly efficient treatment.

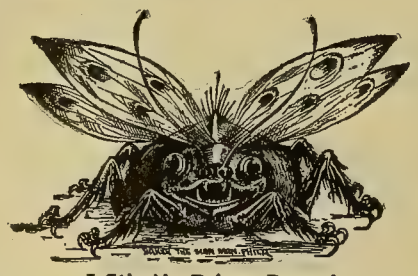
Maurice A. Jorgenson has the sympathy of his numerous trade friends in the death of his wife, who died June 7. Mrs. Jorgenson (Emma Morris Nixon) was born June 5, 1866, at Ironton, O., where she lived until the time of her marriage, April 3, 1894.

Otto Sylvester has had quite a successful season and will again take up the growing of violets on a small scale this fall.

The White Elm Nursery, 5010 Summit street, is a new concern operating about 10 acres.

Chas. H. Jackson reports a good demand for seeds in all his usual lines this season.

LOOK OUT!



I Sting! Prices Down!

ROOM! ROOM!!

We Need Room.

LOOK! LOOK! LOOK!

In order to place our big importation of **Palms, Araucarias,** etc., we are slaughtering prices of **Bedding Plants** down to an almost shameful condition of affairs.

Just think? The best variety of **Scarlet Sage,** Clara Bedman or Bonfire, 4-in. pots, of which we generally never have enough at $12.00, that ugly bee above has now stung the price down to $5.00 per 100, $45.00 per 1000; no less than 100 at this price are sold in one order.

	Per 100
Begonia Vernon and Erfordi, 4-in.	$5.00
Fuchsias, 4-in.	6.00
Cannas, French, best well-known varieties, 4-in.	5.00

Clematis, the true Jackmani, 6-in. pots, 3 feet, 35c to 40c.

Cobea Scandens, 4-in., staked up, 2 ft. high, worth $15.00, cut down to $5.00 per 100.

Don't forget that we lead the world in **Moonvines.** Watch and be careful that you don't buy Morning Glories for Moonvines, 4-in., $12.00 per 100; 2½-in., $5.00 per 100.

GERANIUMS.

S. A. Nutt, John Doyle and some pink, 4-in. pots, $7.00 per 100; and mixed varieties.

Mme. Salleroi for borders, strong plants, 2½ and 3-in., $4.00 per 100.

The following plants are cut down to $2.00 per 100, 2½-in. pots:—Marigold (Eldorado and Gold Ring, 3-in.), Petunias (Inimitable and California Giant), Nasturtiums, Heliotropes, Phlox (Drummondi), Dusty Miller, Lobelia (blue compacta and trailing), Summer Chrysanthemums, Sweet Alyssum (Little Gem), Ageratum (best blue, 3-in.), Verbenas, Torenia Fourneri, Kenilworth Ivy.

Victoria Asters, 2½-in. pots, separate colors, $2.00 per 100.

Now is the time to plant **Cosmos.** We have the best improved strain in three separate colors, red, pink and white, three plants in one pot (3-in. pots) strong plants, raised in cold frames. Price: $5 00 per 100.

Solanum, or Jerusalem Cherries. We carry the best improved strain called the Multiflorum, always laden with big berries. Price: 2½-in. pots, $4.00 per 100.

Boston and Scottii Ferns, 4-in., 20c.

Whitmani Ferns, 4 in., 25c.

Kentia Belmoreana, 5¼ to 5½-in. pots, 22-25-27 in high 50c to 75c; 4-in. 20 to 22 in. high, 35c to 40c. **Forsteriana,** 5 to 5½ in., 50c to 75c. Just received, per steamer Manitou, a consignment of larger **Kentia Forsteriana;** price, $1.00, $1.25, $2.00 to $2.50 each.

Araucaria Excelsa Glauca, spring of 1907 importation, suitable for the lawn and porches, only specimen plants left, 7-in. pots, 6 years old, 5 tiers, 25 to 30 35 to 40 in. high, same in width, $1.50, $1.75, $2.00, $2.50, $3.00 to $4.00 each.

Araucaria Excelsa Glauca, May 1908 importation, 3 tiers, 6-in. pots, $1.00 to $1.25.

Araucaria Robusta Compacta, May 1908 importation, 3 tiers 6-in. pots, beautiful plants, $1.25 to $1.50.

Araucaria Excelsa, May 1908 importation, 3 tiers, 6, 8 and 10-in., 40c; 3 to 4 tiers, 5-in. pots, 5 tiers, 5½ to 6-in. pots, 10, 12, 14 16 to 18 in. high, 50c, 60c, 75c to $1.00 each.

Bay Trees, just received, per steamer Manitou, 6 ft. high from top of tub, 30-in. crowns, $12.00 per pair.

All goods must travel at purchaser's risk only Cash with order, please.

Belgian Plants

AZALEAS, ARAUCARIAS, SWEET BAYS, PALMS, BEGONIAS, GLOXINIAS, ETC.

LOUIS VAN HOUTTE, PERE,
GHENT, BELGIUM.

GERANIUMS.

A CORDIAL INVITATION is extended to all interested in Geraniums to visit us in June, to inspect our new stock houses containing over 60,000 plants, and especially to see our new show house. In it there are over 300 varieties in full bloom, a splendid opportunity to compare the newer introductions with the old standards, and to select stock for next season. We will make very liberal special prices on all orders booked now for December delivery. We are at Cowenton on the B. & O. R. R., and at Chase on the Pennsylvania. We meet all trains.

READY FOR SHIPMENT FROM 2-IN. POTS.

Standard Sorts, at $2.00 per 100 and up. We will send 1000, 50 each of 20 varieties, our selection for $18.50; single or double, all good sorts; a splendid collection to stock up.

Newer Varieties, selected from the finest introductions of 1905-6, at $6.00 to $8.00 per 100.
Novelties, one each of 50 varieties, for $5.00. 1907 introductions from Bruant, Lemoine Rozain-Boucharlat, Cannell, etc.

	Per 100

Pots, red standards, full size and wide bottoms. Detroit Flower Pot Mfy., 490 Harvard St., Detroit, Mich.

Pots, red standard. Paducah Pottery Co., Paducah, Ky.

HAMMOND'S SLUG SHOT

Used in water kills Worms and Caterpillars on the

Elm, Walnut and Catalpa Trees.

The Elm tree beetle is destroyed. The large gray and white caterpillar which defoliates Black walnut. This has been proved for over 25 years of constant service. We use a 5 lb. package to half barrel of water.

(Copy.) Connersville, Ind., June 10, 1908.

MR. BENJAMIN HAMMOND, Fishkill-on-Hudson, N. Y.:

Dear Sir;—I have just returned to Connersville, Ind., having spent several months, since Jan. 1st, in Alabama.

Two years of utter neglect have given the catalpa sphynx full control of the great L. & N. plantations, and I had to watch this terrible destruction from day to day, with no apparatus to apply the remedy.

Your generous supply of Slug Shot, etc., was on hand, but nothing except a small hand spray to work with. On my own place I used this hand machine, one nozzle, and hired a large force of men to hand-pick the worms. From the first the Slug Shot killed all the worms where we used it. The two barrels of Slug Shot, 600 lbs., were soon used up, and I ordered more from the purchasing agent, at Louisville, Ky.: at any rate we are using Slug Shot with most beneficial results this season. We use about 600 lbs. per day.

The leaves have come out, and from appearances no one would imagine that these trees had been entirely defoliated only a fortnight before, looking like dead sticks.

Yours truly, JOHN P. BROWN.

HAMMOND'S SLUG SHOT KILLS ALL KINDS OF INSECTS

Sold by Seed Dealers all over America.

BUSINESS GOOD.

Business last week was good, so good that by Saturday it was a difficult matter to find a presentable showing in any of the stores. The inability of the express companies to make deliveries of incoming flowers added to the unusual demand occasioned by the school commencements, and several prominent funerals brought about this condition. Roses show some improvement; however, the only choice offerings are Killarney and some Pink Beauty. American Beauty is noticeably scarce, and the quality is poor. Carnations are fair and not over-plentiful. Some fine Easter lilies have been seen on the market, as well as a choice lot of gladioli. Sweet peas are very scarce. Hydrangeas are about the only good offering in pot plants. It was thought that last week would mark the end to the rains and floods which have been so destructive this season. So far as it is possible to learn none of the trade has suffered directly from the effects of the floods. The continuous rains have played havoc with all kinds of outdoor flowers. Shippers have had great difficulty in getting out orders, but the volume of country business ordinarily is not large at this time of the year, since country school commencements are some two weeks past. Some merchants appear inclined to think the damage wrought by the flood will affect business in this locality. It was shown, however, that in the disastrous flood of 1903 industry was not affected to any marked degree, and that conditions following the flood were good and things were not slow in adjusting themselves. The previous experience has proved a lesson and the warning was ample, giving those situated in the lower portions a chance to protect their interests.

NOTES.

Arthur Zirkman was seen wading through Harlem with a nice bunch of orders secured on his visit here. Mr. Zirkman, perhaps, thought he would find this a dry town until he arrived here and was marooned for several days.

The next meeting of the Missouri Valley Horticultural Society will occur at Parkville, June 20, providing the high water recedes so that place may be reached.

Samuel Murray reports a very busy week with commencements and funeral work.

Chas. E. Heite and wife have gone to Chicago to spend the week. K. C.

WHAT F. R. PIERSON SAYS:

JOHNSTON HEATING CO., New York City.
Gentlemen:—The internally fired steel boilers which you installed last fall are giving us great satisfaction. They heat very quickly and are very economical. We are exceedingly well pleased with them and they have more than met our expectations. Very truly yours, F. R. PIERSON CO.

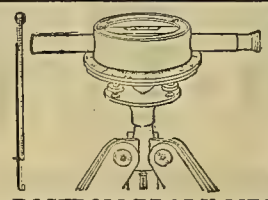
324 Dearborn St., Chicago.

Louisville.

BUSINESS POOR.

Business conditions the past week were very poor. The commencements caused some stock to be used up, but there was so much on the market that they were hardly noticeable. Roses of good quality were in enormous supply, but the demand was not there. Carnations were a glut on the market, and found but little demand. The quality came down considerably. Sweet peas are very plentiful, of good quality, and find a fair demand. Peonies are in fair supply and have a good demand. Fancy greens still remain scarce.



Bostrom's Improved Builders' Levels and Farm Levels
For Parks, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level $25.00. Farm Level $12.50.

PORT HURON, MICH.—Possibly the worst sufferer in the recent storm was Mathias Ullenbruch whose three greenhouses on Lapeer avenue were totally destroyed by the wind. A cement wall, six feet high and 100 feet long, which constituted the base of the building, was picked up and carried away. The loss is estimated at $6,000 with no insurance. The most deplorable feature of the occurrence was the fact that, as soon as the building was blown down, spectators rushed over the place and stole the flowers and plants that had not already been totally destroyed.

BOSTON, MASS.—The Miller Floral Co. has been incorporated with capital stock $100,000.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty, Lasts longer than putty. Easy to apply.

FROM THE FRENCH TRADE PAPERS.

A FLOWER FETE AT THE TUILERIES will be held June 21 in Paris, under the auspices of the Paris Florists' Syndicate and the French Gardeners' Aid Society, for the benefit of the latter society, and for an academic vacation colony, which these clubs have founded. The programme is in two parts: First, a children's fete, consisting of a line of little carriages, driven or occupied by children and decorated with flowers, sedan chairs and Watteau flower girls, and many children's tableaux, in which flowers will play an important role: second, a revival of the ancient procession of St. Fiacre, in which a number of floats will be presented, the work of the organizations and the ten sections of the Association of French gardeners. A general battle of flowers will close the fete; only rose petals will be used and they talk already of 60,000 pounds of roses to be reserved from the growers of Brie and Orleans.

IMPATIENS OLIVERI.—This new impatiens of giant size, flower a soft lilac, shaped like I. Sultani, but much larger, of the same robust growth and profuse habit of bloom, is thought to have a promising future. It blooms the year around, in the greenhouse during the winter months, and in the open ground in summer, where it succeeds very well.

Louisiana Red Cypress

As described by Bassett & Washburn.

CHICAGO, Nov. 20th, 1906.

Dear Sirs:-- Replying to your favor requesting our experience with Pecky Cypress, we will say, we have been using this grade of Cypress in our greenhouses and plant benches for the last **ten or twelve years** and so far **have not found any of this wood that has all rotted out.** We formerly used Hemlock and Pine but found that 2-inch stock only lasted about four years while so far we have had no Pecky Cypress rot out in ten or twelve years. We use clear Cypress for all our roof work, ventilators, etc., and it is very satisfactory. **WE think it is the only kind of lumber for the purpose.**

IT IS THE MOST DURABLE WOOD KNOWN. Ask about it at your local lumber yard or write

LOUISIANA RED CYPRESS CO. HIBERNIA BUILDING, **New Orleans, La.**

The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

Bostrom's Improved Level.

Bostrom's improved builders' level is apparently an extremely useful tool, being very simple and effective and at the same time reasonable in price. It is of the telescope order but without the back and front sights, and it is claimed that it is equally as accurate as the best form of engineer's level. Its uses are manifold where draining, foundation work, machinery or boiler setting is in progress. Many engineers, builders and contractors now using it speak of it in the very highest terms.

New and Original Wirework Designs.

The horticultural supply dealers, Weigel & Ujfalussy, successors to Emil Steffens, who recently located at 136-138 West Twenty-eighth street, New York, are showing many new and original designs for funeral work, all of which are manufactured on their own premises. Very noteworthy are their designs for the Mystic Shrine, Royal Arcanum, Elks and many other organizations. A number of these show pleasing variety and in the hands of competent florists, make up with fine effect. In emblems of the trades, we have never seen a better collection than theirs. Brakemen's and pilots' wheels on stands and folding easels, are prominent in this group. In addition to the great stock of their own manufacture, they carry many novelties and necessities in the business that are in demand in all first class retail stores.

Greenhouse Building.

Nashville, Tenn.—Geny Bros., additional houses; Joy Floral Co., two houses.

Cincinnati, O.—H. L. Sunderbruch, Jr., new greenhouses.

A Great Seed House

Vilmorin-Andrieux & Co. Paris, France.

Part II.—Methods and Equipment.

Seed Growing.

Having given a brief history of the Vilmorins and of their accomplishments in science* we will now make a few comments on the commercial aspects of their business of seed growing. To grow seed is an operation as old as agriculture and an easy matter in itself, but to produce first class seeds is a very difficult task, and to grow pure, high grade seeds on a large scale, under such conditions of price and quality as will allow of their being disposed of easily at remunerative figures is a problem that demands great skill, capital amounting to millions of francs, and a large, well trained staff.

Stock Seed.

One of the first requisites in scientific seed growing is the production of first class stock seed. This is obtained by rigid, long continued selection of standard specimens, in which the required characteristics are well developed. The seed thus saved will have an important bearing upon the future crop. It is therefore not surprising that Vilmorin's stock seeds should all be raised, under their own supervision, at their seed farms at Verrieres, an old, picturesque, quiet village, about one mile from the railroad station of Massy and 10 miles from Paris, which has been the home of the Vilmorins for about 100 years and contains all the historical souvenirs of the family.

The Home Grounds.

Many readers of THE FLORIST who have visited the estate will recall the family mansion admirably set among beautiful trees, most of which have been raised by the Vilmorins themselves. Among the most interesting of these trees we may mention Juglans Vilmoriniana, a hybrid between J. nigra and J. regia, nearly 90 feet high, and probably unique in the world, as is also the Abies Vilmorini raised by the late Henry Vilmorin from a single seed obtained from a cross between A. pinsapo and A. Cephalonica.

The Seed Farms.

The seed farms of Verrieres, about 100 acres in extent, are located in a fertile region, well adapted to present purposes. These 100 acres are not all together, but scattered in various sites, part of the tract being in gardens surrounded by high walls. The farmers or truckers at Verrieres grow for the Paris market large quantities of vegetables and small fruits, such as peas, beans, strawberries, raspberries, currants, etc. They are all well-to-do and hold to their land, which is very valuable and remunerative, father to son, so that it is very difficult to add to the acreage, particularly to extend individual farms. But if the scattered character of the land is objectionable in some ways, it has the advantage of affording a great variety of choice stocks true to name.

The Growers.

To return to the stock seeds: once the seed from the typical specimens, showing the distinctive character of each variety, is saved, the firm sends it to the numerous seed growers all over France. It is a well known fact that the cultivated plants, so varied in character and origin, are much affected by slight variations of soil and climate and in order to produce fruit and fertile seeds they require conditions materially different in many cases. Special care, manures, shelters, artificial heat, irrigation, etc., may ameliorate the natural conditions to some extent, but they will not take the place of the sunshine and rain which certain

*See Vol. XXVI., No. 943, p. 1035, issued June 30, 1906.

climates afford. Hence the desirability of selecting for each kind of plant the natural conditions most propitious to the growing and ripening of high grade seeds. This is the reason that Vilmorin's seeds are their own crop only to a limited extent, rather the produce of the most competent French growers, bound by contract and located in those sections of the country where years of experience have shown local conditions to be best adapted to the production of certain kinds of seed, sunny France affording in small compass a great variety of climate, from the cold north to the mild California-like Riviera, with many intermediate types.

Inspection System.

The most reliable stocks raised on Vilmorin's own farms are supplied to the growers and the crops are inspected repeatedly during the year by a special staff of men who control the whole cultural operations and keep a watchful eye on the entire work. In the leading growing districts permanent inspectors are also kept. Thus while the grower, aided by the climate under which he operates, insures the perfect ripening and economical production of the seed, the firm, on the other hand, warrants the genuineness and good quality of the crop by supplying the cultivator with reliable and carefully selected seeds, and subjecting their production to rigid supervision whenever it is deemed necessary.

Rigid Selection.

The close selection to which the seed-producing plants are subjected at Verrieres, nine-tenths of which are sometimes discarded, raises the price of the stock seeds grown near the city of Paris to a high level, but this is the foundation of the business. The high price of the stock seeds is, however, a very small tax on the total yield of most crops, if we take into consideration that the yield is seldom less than 10 to one, and often exceeds 1,000 to one. Under these circumstances it is always advantageous to use stock seed of the best possible quality. Careful selection and the inspection of the fields are quite large items of expenditure, which accounts for the difference between the Vilmorin prices and those of other dealers who do not incur any such expense.

Contracting and Testing.

Despite all efforts to insure the proper execution of contracts, it is always necessary to watch the operations in order to detect any neglect of the growers or their employes. Such control of the operations is luckily rendered easy enough by taking a sample of each lot of seed, however small, when it is delivered. The samples thus taken are tested for vitality at once, and in due course are also tested in the open ground or under exactly the same conditions as are likely to obtain in the average fields or gardens of customers. All the plants of a given species are grown side by side in plots of a

Philippe Leveque de Vilmorin.
Chevalier of the Legion of Honor.

score or more individuals, according to the importance of the lots, until they are fully developed and a final decision can be reached as to their merits, making a kind of contest between the different lots supplied by the growers and the various sorts grown side by side, a very interesting and instructive feature. These trials particularly help in cases of controversy with customers to identify the quality of the seed supplied and also to ascertain the skill of the grower. On Vilmorin's seed farms at Verrieres are also tested the novelties introduced by other seedsmen and such tests often enable the firm to detect synonyms. The tests occupy every year over 25,000 plots, the results of which are carefully recorded in special trial books of which the firm possesses a set covering over 100 years.

Staple Varieties.

Besides the stock seeds, tests, etc., the firm also cultivates at Verrieres special collections of staple and standard varieties for comparison in the work of keeping them true to name. These collections form a kind of living museum to define varietal differences and the data gleaned therefrom by years of experience have always formed the best material for the different works issued by the successive generations of the Vilmorins. Complete collections of potatoes, wheat, strawberries, grasses, etc., from all parts of the world, have thus been maintained for nearly a century at Verrieres, where they are classified, and compared for characteristics that may prove useful in breeding. But as no memory can be relied on to remember all the types and their characteristics of the thousands of kinds of cultivated plants grown every season, the firm has taken every precaution to make complete collections either by assembling under frames, dried spikes of the various cereals, plaster casts from nature, models of roots—very accurate as regards size, shape, color and weight of those plants which lend themselves to that sort of reproduction—or by making colored pictures or lithographs of such plants as cannot be reproduced in any other way. These collections constitute a permanent exhibition particularly serviceable to the inspectors of the firm in the matter of conventional standards or types, enabling them to direct their attention at once to the most important questions concerning the growing crop.

The Laboratory.

Verrieres has also at its disposal an up-to-date laboratory with the latest scientific instruments, a studio, and all the accessories of a well equipped seed house, as greenhouses, drying and cleaning sheds, etc. Every few years some additions have to be made to the structures. We reproduce herewith some pictures of the leading buildings, including the farms of Massy-Palaiseau. The large store rooms at

A GREAT SEED HOUSE.
The Massy Seed Farm of Vilmorin-Andrieux & Co., Paris, France.

this place are located near an important railroad center, to which it is connected by a private track, and thus large shipments of seeds can be sent to the various Paris railroad stations at a very short notice.

Antibes.

Antibes, on the Riviera, is a southern annex to Verrieres for the growth of tender and sub-tropical plants which cannot withstand the northern winters. Chinese primulas are raised here by the 100,000 and, according to the most critical experts, are as fine as any grown in Europe. Cyclamens, large-flowering cannas, Asparagus plumosus nanus, etc., are also raised in large quantities. As bearing on the remarkable work done at Verrieres, we may say that in plants as well as in live stock the primordial characteristics of the individuals or races are transmitted in a more or less evident manner by heredity, and that it is quite possible by constant, close selection to infuse given properties into a race and render them stable. But this is a tedious and delicate operation, requiring an immense amount of patient and intelligent labor and an untiring supervision, extending sometimes over many years.

A GREAT SEED HOUSE.

Warehouses of Vilmorin-Andrieux & Co., Paris, France.

Fixing Types.

Some seedsmen often send to the firm stock seed saved from a single root or plant which has been picked out in a field or among a number of seedlings. These seedsmen are very much surprised to find that the product from the seed of that root or plant does not reproduce the type desired, but a great variety of types, and think that the necessary care has not been bestowed upon their stock seed. A knowledge of the fact that such an individual has to be grown for several generations before the special characteristics required of it are fixed would inspire greater confidence.

The City Store and Offices.

The prosperity of any establishment depends in a great measure upon its successful management and good organization. The headquarters of Vilmorin's extensive business is located at 4 Quai de la Megisserie, in the heart of the city of Paris, on the very spot on which the business was conducted early in the eighteenth century. The block was rebuilt in 1855 and planned upon a large scale to contain the various departments of the firm, but although two additional building lots had been added it became quite inadequate 20 years later. All departments connected with the freight and greater part of the retail orders had to be transferred to Reuilly, where there is nothing to prevent future development.

The offices at the Quai de la Megisserie accommodate over 200 permanent employes, having the active management of the entire enterprise. It may surprise Americans to learn that not a single girl is employed in the offices and that the typewriters are all men. Here is conducted the executive business of the firm, instructions issued to its various departments and growers, mail received, recorded and despatched. The shop with its small frontage on the Quai is well known to many of our readers, but it may surprise them to learn that its cash transactions during the busy season amount often to over $1,000 a day, which represents an enormous counter trade in seeds. On the first floor is located the ledger department with a staff of 30 employes, whose business, besides routine work, is to issue the necessary papers for collecting, through the postoffice, the retail accounts averaging $50,000 every month during the busy season. On the first floor is also located the mailing department.

Four Thousand Letters Daily.

The second floor is devoted to the partners' private office, domestic and foreign correspondence, with about 50 permanent clerks, sending out in the height of the season an average of 4,000 letters and invoices daily. Here small boys also open the immense quantity of mail received each day, paste the envelopes on the letters, for reference, if need be, and number each piece of mail. The latter is then read by a number of employes, who mention in the left corner of each letter, for future billing, etc., whether the writer is a seedsman, a market gardener or retail customer. Close to the sign used for each class of customers the employes also enumerate in a few adopted characters the contents of the whole letter, enabling any clerk by a single glance and without knowing the language in which the letter is written, to ascertain its contents, whether a seed, bulb or other order, a request for information or quotations, concerning the ledger department, etc. The letters are then recorded in large books and, knowing the numbers and characters just alluded to, it is very easy to learn in a minute in which department may be found the order or letter and at what date it was received. After recording all important mail (marked V) read by the partners themselves, the letters are distributed to the various departments. As nearly all orders are sent to the warehouses in the suburbs to be filled, such an elaborate system is quite necessary, and in fact all the details referred to take less time than to describe them.

Printing and Engraving.

Near the correspondence quarters, on the same floor, is the growing department, with a dozen inspectors, which, as already explained, is of the greatest importance. Close by is the publishing and exposition department. On the third floor are the offices of the warehouse and invoice chiefs with 68 assistants. Near by is the tree-seeds department, with seeds of the leading trees and shrubs of the world. From six to eight men in an adjoining room are kept busy, copying and recording the enormous mail daily sent out. The fourth floor serves as store

A GREAT SEED HOUSE.

Verrieres Warehouses of Vilmorin-Andrieux & Co., Paris, France.

rooms, from which the shop supplies are replenished. Above these, locked up, are kept the stock seeds to be sent to the growers, and next to that room is the printing office, with a dozen men printing millions of labels, paper bags, etc., required by the firm. On the sixth floor are located the colored seed packet and electrotype departments. The latter furnishes the large number of illustrations required for the different catalogues and various works issued by the firm and supplies also to the firm's customers any cuts they may need. Ever since the house published its first illustrated catalogue in 1869, the illustrations, about 4,000 in number, have nearly all been drawn by the same artist, Mr. Godard, and it will be conceded that for accuracy of detail they are not easily matched. For more than 50 years the firm has also issued hundreds of pictures, hand painted, of the most noteworthy flowers and vegetables. Number 6 Quai de la Megisserie has lately been acquired for the extension of the offices.

Reuilly.

If the Quai de la Megisserie may be called the head that issues all orders, Reuilly is the body that executes them. The gardens here have been owned by the Vilmorins for a little over 50 years. Toward the end of the eighteenth century the firm already owned an experimental ground on Reuilly street, but in 1830 it was appropriated by the city and replaced by a garden on Lorillon street. The latter in its turn had to be surrendered in 1848, when the present large tract of land at 115 Reuilly, about two miles from the offices, was luckily secured in its stead.

Experiment Grounds.

The land was originally intended for experiment purposes, for testing seeds and for raising some stock seeds of flowers. Subsequently large business premises had to be erected there. These premises, now nearly in the heart of the city, cover about three acres, but have many more acres of floor space. They are entered from a spacious central court with which the leading departments are connected. On the ground floor are the offices, the reception rooms, the freight order, flower seed and packing departments, admirably arranged to fill thousands of orders daily without useless fatigue to the staff. On the first floor of one of the structures is located the inland retail department, which is said to be the most practical extant.

Filling Orders.

The labor of this department is greatly simplified by numbering each catalogue item, so that only numbers and quantities appear on the order sheets. This also renders the filling of orders very easy to persons without special training, mostly women. A system of movable drawers allows of a novelty being inserted between two numbers without having to change the whole arrangement. Each box or drawer has as many duplicates ready filled during the dull season as the demand is likely to warrant, so that an empty box can be replaced by a full one at a moment's notice without the slightest interruption of the work. The tract of land in Reuilly street contains about seven acres, and the place is connected with the offices of the Quai de la Megisserie by a private telephone which was one of the first established in Paris.

Cleaning Machinery.

The machinery used in the warehouses is the most modern and approved for cleaning seeds and removing all useless foreign matter. Many patterns have been improved by the firm itself to suit particular varieties of seeds and attain the highest degree of perfection, as all seedsmen can attest from the goods received. Long before most of the official control stations were established in Europe, the Vilmorins were already fully equipped to make systematic purity tests of grasses, forage and such seeds which cannot easily be inspected in the fields and are always more or less mixed with chaff or impurities. As soon as the control stations had undertaken the seed tests under special, officially adopted rules, the firm paid particular attention to the subject, sent the chief of the laboratory to some of the leading official control stations in order to study their organization, adopt their official methods, best apparatus and conduct the firm's purity tests on the most modern, scientific principles.

A Great Seed House.
Old Shop as It Was Over Half a Century Ago.

Growth of the Business.

Before closing these notes a few words may be said of the growth of the business. In the year of 1846 the firm received 2,410 letters, while the total number of letters received now is over 350,000 per year. The permanent staff has increased in the same proportion from 42 in the year of 1855 to about 600 at the present time. Fifty years ago the total weight of goods shipped during the year was 629 tons, while the firm now sends out in one year over 1,000 tons of only three varieties of mangold seeds, Giant Yellow Intermediate, Yellow Ovoid and Half Sugar White. Some varieties of beets, radishes and turnips are grown by the 100 tons. The firm has booked in one year for the United States 441 tons of turnip and swede seeds, 220 tons radish, 200 tons garden beets, 131 tons mangel, 80 tons carrot, 43 tons onion, etc., and the American is only a part of the firm's foreign business.

Flower Seeds.

The Vilmorins are headquarters for flower seeds as well as vegetable seeds. Many of the latter seeds sold by European firms are grown under the favorable climate conditions of France, and Vilmorin grows candytuft, convolvulus, mignonette, dianthus, sweet peas and nasturtiums by the ton; petunias, zinnias, phloxes, verbenas by the 1,000 and all other flower seeds in very large quantities. The growing of these seeds extends over France and Algeria, and it is not very easy to give an adequate idea of their importance. We may, however, safely say that the area of land under cultivation, that is, the area devoted annually to the production of seeds, must be over 12,000 acres. In 1855 it amounted to only 1,670 acres. Such a growth of business may not be without parallel in a new country like North America, but we do not think it has an equal in the old world.

The Employes.

Not a small part of the success to which we have alluded must be ascribed to the perfect understanding and excellent feeling existing between the heads of the firm and their employes. Clerks having had from 40 to 50 years' experience in the firm are of common occurrence, and men with 30 years of active service may be counted by the score. Many of the clerks have been employed by the firm from grandfather to grandson without a break. In conclusion let us say with Professor Bailey (Garden & Forest, 1893) that "Vilmorin is the best example of a firm which combines in successful proportions the scientific and commercial impulses, and is the only seed firm whose opinions upon scientific questions are accepted by professional botanists." PARISIAN.

Nebraska Vine and Corn Seed Crops.

Waterloo, June 19.—J. C. Robinson writes as follows: Four weeks of wet weather has been rather discouraging for our crops. Many fields of cucumbers have not been planted and cannot be for a few days. Earlier planted vine crops have made little progress and are getting very weedy. Corn on the hill land looks good and is fairly clean, but many fields on the bottom lands have been seriously injured by too much rain and lack of work. At this writing the weather has apparently cleared up and most farmers are able to start work again. It is not too late for a fair crop, but prospects might be better."

Theoretical and Practical Seed Breeding

Paper by Dr. W. W. Tracy, Department of Agriculture, Washington, D. C., read at Annual Convention of the American Seed Trade Association, Detroit, Mich., June 23-25, 1908.

The fundamental object of all cultivation is uniformity of product. The jungle often, even generally, carries a greater burden of vegetation than the best cultivated field; we may even find there some most perfectly developed plants of very desirable types, but they are not uniformly of the particular sort we need, so we clear them away, and aim, in the cultivated field, to have all of the plants, and all of the product of the kind we most desire. The more perfectly this is accomplished the better we feel paid for our efforts. One of the most important means of securing this result is the use of seed which is certain to develop into plants of the exact character wanted, and the production of such seed lies at the very foundation of all successful agriculture, and is well worthy of most careful study.

A GREAT SEED HOUSE.

Warehouse of Vilmorin-Andrieux & Co., at Reuilly, Paris, France.

HISTORY OF VARIETIES.

I do not think that a long discussion, even if it were a very learned one, of the scientific theories on which the production of pure seed is based would at this time be of much interest or value, and I will only refer to a few of them very briefly as an introduction to what I have to say on the more practical phase of the subject: Previous to Darwin's time scientists paid little attention to garden varieties or considered them of much importance. It was generally thought that they developed gradually and slowly as a result of long continued selection through natural or artificial conditions, and earlier efforts in seed breeding were founded on this supposition. Later scientists have come to recognize more clearly that every plant contains within itself a multitude of potential variations, some of which, though quite as distinct as those which distinguish species, may lie dormant without any apparent influence over the external form of the plant, which is wholly determined by combinations in certain definite proportions of other tendencies, yet these potential variations do not cease to exist but through the influence of the pollen of some other plant, changed external conditions, or other cause may at any time in some individual seed or bud become active and dominant, and bring about in it a new combination and balance of influences resulting in a radical change in the external varietal character, and the new form thus developed may by selection become as definite and fixed as the older one, and thus originate a new variety, or even new species. Each generation of exactly the same combination or balance of varient tendencies, and consequently identical external character, lessens the probability of a new combination and consequent external change.

RARITY OF TRUE TYPES.

On the other hand, considering the difficulty of finding two plants, or even two flowers of the same plant, which are exactly alike, even in external form, we must recognize the probability that those in which the active and potential varient tendencies exist in exactly the same proportionate strength are equally rare, and we can see ever present possibility of a change in the combination, and consequent change in the character of the seed. Scientists also assert that, at least in some cases, these different varient tendencies exist in balanced pairs, the relative dominant and recessive influence of each of the pair being controlled by definite laws through which the breeder can secure, as far as these pairs are concerned, definite results, but no one has as yet dared to claim that all the potential variations are so paired, or that the exact combination and resultant balance of influence between them can be easily controlled. There are many other theories as to the laws underlying breeding, but without farther discussion of them we will turn to the consideration of some of the known facts and conditions of plant life which determine the character of the plant which any particular seed will develop into.

The general proposition that a seed will develop into a plant like the one that produced it is so well known that we have such common sayings as "like produces like," etc., and with most gardeners the sight of a plant of special merit creates a desire for some of its seed, but there are many conditions which may result in a seed developing into a plant very different from that which produced it. First, there is always the possibility even with plants whose flowers are generally self-fertilant, that any particular seed may have developed as the result of cross fertilization, and in this way inherit quite different varient tendencies or in very different proportionate power from those of the plant upon which it was developed. This may be true even if the staminate plant is of the same species and variety, and externally seems practically identical with the seed producing one, for in it there may be a difference in the balance of varient influence having its origin in differences in earlier generations, possibly through the flowers of some "rogue" plant all the evil effect of which the seed grower thought he had got rid of when he pulled it from the crop. Second, there is the possibility that the producing plant itself may have resulted from cross fertilization of two quite distinct plants, though it may not itself show the effect of such crossing, which will not appear until the next generation.

TIME REQUIRED.

It is a well established fact, and one of the greatest importance in seed breeding, that the balance between the multitude of varient tendencies inherited from different ancestors, and the consequent character of the plant itself is very seldom established, often it is not even hinted at in the first generation after the combination. It usually requires a number of generations before this is accomplished to such an extent that the real result of the crossing is evident, as the slightest difference in the relative strength of any single varient may, and often does, so effect the balance so as to result in a material change in the character of the seed. We can only predict with certainty the exact character of the plant which any seed will develop into in proportion as we know not only that the seed itself has not been influenced through pollen from some other plants, but that all of the ancestors of the producing plants, both staminate and pistilate, back for many generations, have been of precisely the

A GREAT SEED HOUSE.

Verrieres Warehouses and Greenhouses of Vilmorin-Andrieux & Co., Paris, France.

same combination and balance of varient tendencies. We think the fact that the effect of an accidental or intended crossing often, we may even say generally, does not show, at least in its full force, until the second or third generation is of the utmost importance, but it is often overlooked, and we imagine we have a pure plant of a distinct type when in reality it is a cross, and certain to show its mixed origin in later generations.

DISAPPOINTMENTS.

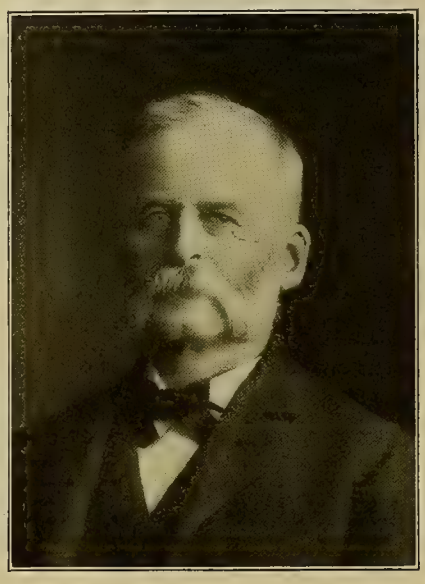
In common practice men save seed of some especially pleasing and perfect plant with little regard to the surrounding ones, if they are only of the same sort, and when they sow this by itself and get plants like the parent plant they are delighted, and think they have a pure strain only to be disappointed the next year. This is the history of many a novelty which was introduced in good faith, and with high hopes that at last we have something really good, for was not the original plant almost perfect, did we not most carefully save and plant its seed so there was no probability of mixing, were not the plants thus produced uniformly good? How, then, comes this most disappointing mixture and variation from the seed this year? On the other hand, many a breeder has thrown away crosses he has produced because they did not show the variation he was seeking, when, if he had planted them another year, he would have found just what he was after.

WORK OF THE SEEDSMEN.

The most important work of the seedsmen, however, is not the production of novelties or new and distinct strains, but the growing of stocks which shall be as nearly as possible absolutely uniform in type. There has already been developed in the case of most of our cultivated vegetables distinct varieties well adapted to different cultural conditions and market requirements, and the success and profit of the planter is very largely dependent upon a wise choice of the variety best adapted to his own conditions and requirements, and the use of seed which will uniformly develop into plants of that exact varietal character. The importance as a factor upon which profit is largely dependent on absolute uniformity of all the plants of any particular culture being of exactly the same varietal character, or, to express it in another way, of the use of pure and true seed of the sort, can hardly be overstated. We think we do not exaggerate in the least when we say that in the case of a majority of the fields of vegetables grown in this country, if all or even 95 per cent of the plants were as nearly like the ideal varietal type of the sort used as are the best 20 to 50 per cent of them, the profit from the field would be greatly increased, often actually doubled.

UNIFORMITY DESIRABLE.

Uniformity of type lessens the cost of cultivation, since it permits the different operations to be done at the exact time when most beneficial to all the plants. It lessens the cost of harvesting for similar reasons, and increases the value of the product because of its uniformity. In any of our markets, uniformity in the character of the contents of a package is always one of, often the most, important factor in determining the relative price it will command. The addition of different, even if distinctly superior specimens, will materially lessen its value. As we have said, we now have varietal forms well adapted to all common cultural conditions and market requirements, and the most important problem before the seedsman is not the creation of new and distinct variations, but the development of purer and truer stocks of sorts we now have, by the use of which the planter can be reasonably sure that all the plants in his field will be of practically identical varietal character. As seedsmen we may claim that he can do this now, and that the seed offered by American seedsmen is the best it is practical to handle, but I think they are a long way from it, and that I am speaking truly and fairly when I say that were we to test, in garden trials, samples of each and every variety of vegetable seed offered by even our best seedsmen, we would find more cases where less than 50 per cent of the plants grown were all typical of the variety, than we would samples where as many as 50 per cent could be said to be fully typical of the sort, and such as we would want to use for stock seed; yet there would be samples enough of this or even greater uniformity and purity of type to show that their production was not an impossibility. Nor is the argument that the public do not care for pure stocks, and would not pay for them, a valid one, for not a year passes but what seedsmen offer and sell in large quantities at high prices new stocks or strains to planters who eagerly



Dr. W. W. Tracy.

buy them in the hope of getting purer and truer seed than they have used.

VALUE OF TRUE STOCKS.

Again and again I have asked gardeners and truckers what they would give for seed, 99 per cent of which they were sure would develop into plants like that, pointing to some nearly perfect sample of the sort of which the field contained a good many, and received such answers as, "Oh, any price they asked," or "The price would cut no figure. I would buy enough for several years, for I never could hope to get it again." Nor is the production of such seed an impossibility, for it has been done again and again. We may not be able to fully accomplish it in all cases, but I am very certain that it is not only possible but entirely practical to produce stocks which shall be a great deal better than those now in common use, and that, too, without adding inordinately to the cost of production.

LINES OF WORK.

The first step in the development of such a stock is to form a very clear and definite conception of the exact varietal form we desire. I think it is essential that this be written out and be frequently referred to in order to avoid the indefiniteness and change in the type selected which I think is the cause of much of the variability now so common. I am well aware that it is a practical impossibility to write out a description which will enable the reader to select with certainty the exact type of plant the writer has in mind, but I also know by experience that the attempt to write such a description will always tend to sharpen the writer's conception of the exact type he is after, and be of great assistance to him in holding to that exact type from year to year.

The second step is to select a few plants which shall all come as near the conception of the type as possible, and save all the seed of each selected plant separately.

The third is to plant a sample of each of these selections, and carefully study their development and, selecting the lot or lots in which the plants are most perfectly and uniformly of the desired type, save from each of these a sample made up of a few seeds from each plant of the lot or sample.

The fourth step is to plant these samples; we probably will be surprised at the result, for we are likely to find that in this second generation the product of some of the plants we thought the best will show great variation, but we may hope that there will be at least one which will hold true and all the plants be of the desired type, thus showing that in their grandparent of the first year's selection we have a pure plant of the sort desired, and its seed, or at least that of it which we tested, had escaped contamination from other plants.

LOOK FOR PURE FOUNDATION.

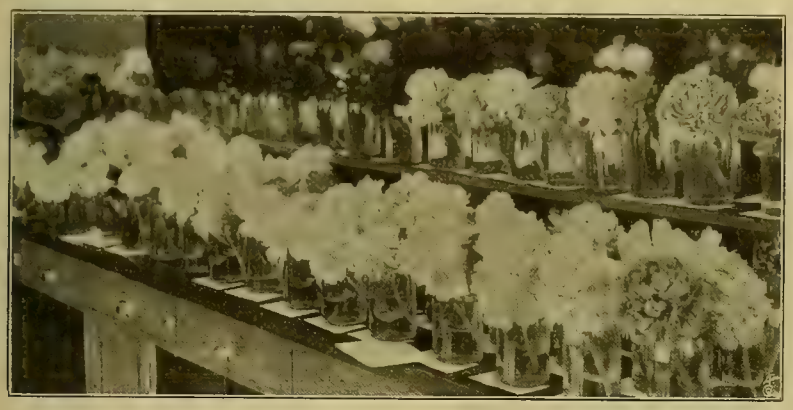
If the seed of all the plants first selected show variation in the second generation either in the test or in the subsequent planting for stock, all we can do is resume our search for a pure foundation plant, for our hope of a pure stock all rests on our securing this as a starting point; when we find it the battle is practically won, for all that is then necessary is to multiply the descendents of this pure plant without their being contaminated through pollen from inferior plants. This we can do by planting the seed of the original foundation plant by itself. It is, of course, true that human control of conditions is imperfect, and that it was possible that some of the seed of our foundation plant were crossed, and that is impracticable to entirely avoid all possibility of crossing in the future generations, and so, sooner or later, we shall probably lose this absolutely pure strain through the influence of other plants, but, in the case of most vegetables, we can usually grow a good stock before this occurs, and in the meantime we should have developed in the same way another and equally good strain to take its place. Seed breeders often fail in their efforts and lose faith in line breeding, first through the want of a clear conception of and rigid adherence to an exact varietal type, and second through failure to appreciate the importance of first making sure, by testing for two generations, the absolute purity of their foundation plant. A stream cannot rise higher than its source, and we cannot make a thing pure by simply removing the evidences of impurity which is all we really accomplish by even the most careful rogueing of a seed crop.

COST OF TRIALS.

Many doubtless think that all of this is quite impracticable, that no one can afford to test and retest in the way suggested, but please remember all this work is on small lots and for the sake of absolutely pure and true stock seed, and given this, it costs no more to grow an absolutely pure and true stock than it does one as impure and variable as many of those which are now, alas, too common. Indeed, the immediate cost of growing the crop actually sold would be less, as, with pure stock seed, there would be no need of rogueing, and much of the loss in harvesting and the necessity for hand picking because of uneven ripening would be saved. I am quite certain that in many cases if the cost of rogueing had been expended in improving, in the way suggested, the quality of the stock seed used, far better seed would have been obtained, and at less actual cost.

Finally we wish to refer again to the

practical impossibility of establishing a pure strain simply through the removal, no matter how carefully and thoroughly it is done, of rogues or plants which show variation. In nine cases out of ten the rogue simply reveals a damage done probably two years before, and the plant which produced it and the rogue itself had done irremediable injury to surrounding plants before it was discovered and removed. If what I have said has served to point out the impossibility of developing a pure and true stock simply through rogueing out the inferior plants, I have not talked in vain.



AMERICAN PEONY SOCIETY'S MEETING, ITHACA, N. Y., JUNE 19-20.
Exhibit of Prof. A. P. Saunders, Clinton N. Y.

THE PEONY.

American Peony Society Meeting.

The American Peony Society held its sixth annual meeting at Ithaca, N. Y., June 19-20. The meeting was held at this late date in order that President C. W. Ward might be present. An important business trip, however, kept him away. The exhibition of flowers was rather small because of the lateness of the season. T. C. Thurlow & Co. of Newbury, Mass., and Prof. A. P. Saunders of Clinton, N. Y., sent large consignments. The blooms were shown in the Agricultural building, some of the rooms belonging to the Horticultural Department being set aside for this purpose. The morning of the first day was spent at the peony plots, which are under the care of the Horticultural Department. In spite of the lateness of the season the field was one mass of blooms.

Business Meeting.

The regular business meeting of the society was called at 3 p. m., June 19, in the horticultural lecture room, by Secretary Fewkes; President Ward and Vice-President Peterson being absent. E. A. Reeves was appointed chairman and the minutes of the last meeting were read and approved.

The motion was made and carried to change the price of the check list from $5 to $2. A letter from Prof. Whetzel was read, saying that, because of conditions over which he had no control, he found it impossible to attend the meeting. He outlined the work he is doing on peony diseases and said he expected to publish results soon. A general discussion of the present trial plot was taken up. Many of the members favored making an appropriation to properly drain the plot on which the roots were planted. All agreed that the plants could not do well if the plot was left in the present condition. The members finally decided to confer with the college authorities to see if some arrangements could not be made whereby the plot could be properly drained or the roots removed to a better piece of ground. No further action was taken.

A letter from the Minnesota Horticultural Society was read, asking the association to hold the exhibition at the Minnesota State Fair grounds in 1909. R. T. Brown, representing C. W. Ward, asked the association to hold the next meeting at the Cottage Gardens, Queens. It was unanimously voted to accept Mr. Ward's invitation.

The members decided to have the secretary send out circular letters next year, about May 15, to learn from the growers when their peonies would be at the height of their flowering period. In this way the time of the meeting could be fixed to suit the majority of the growers.

Report of the Secretary.

The present membership of the society is 49, not including four honorary members. It is gratifying to note that the membership is steadily increasing, slowly, to be sure, but in a substantial manner. Those who have dropped are few and greatly overbalanced by the new members who are annually admitted.

Since the last meeting the work of the society has been steadily progressing. The committee on diseases has sent out a large number of inquiries, which have brought out much information, but which has not yet been reduced to an orderly condition. The nomenclature committee has the result of the work done by Prof. Coit, last summer, in press, in the form of a bulletin, which will be issued shortly. The secretary has the proceedings of the society for the five years from 1903-1907, inclusive, in the hands of the printer. In response to the circulars sent out by Prof. Craig last July in regard to forming a supplementary test collection, a large number of roots were sent in and were planted in accordance with the expressed wishes of the society. These, as well as the older collection, were top dressed with stable manure last fall, which served as a mulch last winter.

The exhibition held during the meeting last June was somewhat disappointing, owing principally to the lack of growers in the immediate vicinity of Ithaca, and the date being unfavorable to those at a distance. However, the Cottage Gardens Co., Queens, made a very creditable display. There were also displays from Ellwanger & Barry, S. G. Harris, Geo. Hollis, Prof. A. P. Saunders and F. C. Walcott. These were not so extensive as the first, but added materially to the show.

In regard to the diseases of the peony, we cannot be too watchful or too persistent in our endeavor to learn all that can be found out about their nature and means of prevention. To the commercial man the matter is not of a directly serious nature, but to the amateur and, indirectly, to the commercial man, it is most serious. I have in mind a peony garden near Boston which was stocked with many rare and choice varieties. Many of the plants had reached their third and fourth years and were fine, large plants. During last summer the wilt and black rot attacked many of them, causing much loss and distress to the owners. In the fall large roots were dug up which were completely destroyed. This is but one instance. There are many others who are suffering and so situated that they cannot change their plants to new ground, but must either give up growing the peony or find some means of checking or preventing the spread of the diseases.

AMERICAN PEONY SOCIETY'S MEETING, ITHACA, N. Y., JUNE 19-20.
Part of the Exhibit by the Cornell Department of Horticulture.

Election of Officers.

The following officers were elected: C. W. Ward, president; C. J. Maloy, vice-president; A. H. Fewkes, secretary; J. H. Humphreys, treasurer; E. A. Reeves, director. The following were elected to membership: C. Harman Payne, 141 Wellmeadow road, London, Eng.; Wm. Miller, Bar Harbor, Me.; John Cavers, Oakville, N. Y.; F. R. Pierson, Tarrytown, N. Y.; E. V. Hallock, Queens, N. Y.; John Merkel, Mentor, O. The following committee on awards was elected: A. H. Fewkes, B. H. Farr, R. T. Brown.

PORTION OF THE DEPARTMENT OF HORTICULTURE PEONY PLOT AT ITHACA, N. Y.

Awards.

OPEN CLASSES.

Largest and best collection of varieties, one flower of each—T. C. Thurlow & Co., West Newbury, Mass., first.

Fifty blooms, dark pink or rose—T. C. Thurlow & Co., second.

Fifty blooms, flesh or salmon pink—T. C. Thurlow & Co., second, with Baroness Schroeder.

Fifty blooms, crimson—T. C. Thurlow & Co., first, with Marshal Valliant.

AMATEUR CLASSES.

Collection of not less than 12 varieties, one of each—Prof. A. P. Saunders, second.

Best and largest collection of white varieties, one bloom of each variety—A. P. Saunders, second.

Best collection of rose pink varieties, one bloom of each—A. P. Saunders, second.

Best collection of crimson varieties, one bloom of each—A. P. Saunders, first.

Best six blooms of any variety—A. P. Saunders, first.

Hail Damage at Port Huron, Mich.

As briefly described in our last issue, a destructive cyclone struck Port Huron, Mich., in the afternoon of June 8, doing much damage to several buildings, including the entire demolition of one of M. Ullenbruch's largest and most recently constructed greenhouses, 150 feet long by 22 feet wide. The violence of the wind was so strong that even the heavy outer wall, constructed with large cement blocks, was leveled to the ground, while the upper work, including every light of glass, was totally destroyed and the steam pipes twisted and bent so as to render most of them unfit for future use. The house was planted with carnations in full bloom, all of which were destroyed. About half of the glass on the remaining houses of 12,000 feet area was also broken and the stock in them much damaged. A heavy downpour of rain accompanied the storm and destroyed about half of his stock of 10,000 carnation plants in the field. Mr. Ullenbruch reports spring trade as being pretty good, but collection of accounts most difficult. He will rebuild his greenhouse and repair the damage to his other houses at once and will not allow the incident to deter him in the least.

Hail at Denver, Colo.

We had one of the heaviest hailstorms in Denver, Colo., that we have experienced in 15 years, and it did more damage than ever before to the greenhouses. The Park Floral Co. sustained a loss of about 15,000 panes, probably costing in the neighborhood of $5,000 to $7,000. Mrs. Mauff had about one-half loss; Elitch's Gardens the same; N. A. Benson, 4450 Lowell boulevard, the same, and Mahler, on West Twenty-ninth street, about one-third loss; Ben Boldt, on West Twenty-ninth street, the same. It not only did a great deal of damage to the glass, but also stripped a good many of the plants, especially the carnations outside. There was about two inches of hail on the ground one-half hour after the hailstorm. Some of the hail was bigger than new potatoes. It also broke many of the windows throughout the city, especially in the business district.

PLATTE.

EFFECT OF CYCLONE AT PORT HURON, MICH., JUNE 8, 1908.
Wreck of Martin Ullenbruch's Greenhouse.

OBITUARY.

John Cammack.

John Cammack, of Washington, D. C., and who formerly conducted a florist business at Brightwood avenue, died suddenly June 15. Mr. Cammack had not been ill and expired from a hemorrhage just as he was leaving his home for a carriage ride. He was a native of Washington and 75 years of age and filled many important business posts in the city.

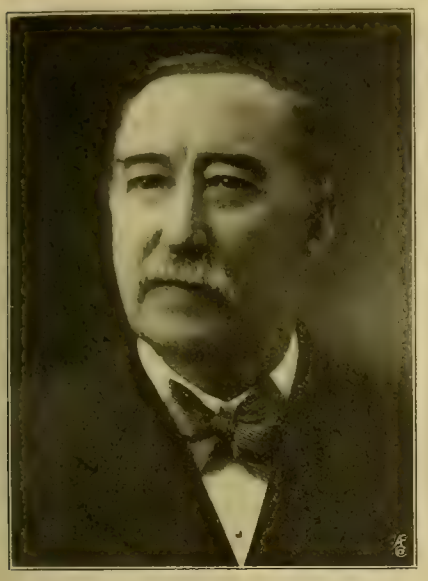
William Barr.

William Barr, of Llewellyn Park, Orange, N. J., a noted fancier and amateur, died June 17 of old age. Mr. Barr had large business interests in St. Louis, Mo., but Orange has been his home for many years. He was particularly interested in the old-fashioned flowers, which were extensively grown on his place. Chrysanthemums were also among his favorites, and he gave an annual free exhibition to the public.

Allister David Rose.

Allister David Rose, a well-known and popular florist of Montclair, N. J., died at his home in that city June 16. An attack of pneumonia, over a year ago, was the beginning of his decline in health, and all that medical skill and loving care could devise was unavailing. He spent a part of last winter in the south, but the benefit derived was but temporary. Mr. Rose was born in Inverness, Scotland, April 7, 1864. He came to this country when 18 years old and a number of his youthful years were spent as a gardener on private estates. He was for some time with E. G. Hill of Richmond, Ind., going from there to what was then the firm of Pitcher & Manda, Short Hills, N. J., where he had charge of the chrysanthemum houses.

After his retirement from that position



The Late E. Hippard.

he engaged in business for himself at West side avenue, Jersey City, being for a time in partnership with a Mr. Garrett. Nine years ago he purchased the business of Alex. Michie of Montclair and has since continued to do a thriving retail business, having added considerably to his glass area. He was prominently identified with various clubs and societies, being a member of the New Jersey Floricultural Society and the New York Florists' Club. He was also a member of the Masonic and Elk fraternities. Mr. Rose was highly esteemed by his fellow craftsmen and the general public for his ability and uprightness of character. He originated the noted chrysanthemum "Polly Rose," and it bears the name of one of his daughters. His funeral was held on June 18 and the floral offerings were numerous and beautiful.

Emanuel Hippard.

Emanuel Hippard, the well-known and highly respected florist of Youngstown, O., and maker of the standard ventilating apparatus, steam trap, duplex gutter and other well-known and useful appliances for florists' use, died at his home, West Rayen avenue and Phelps street, June 16, from paralysis, his illness having lasted over a year.

Mr. Hippard was born in Elizabethtown, Pa., August 6, 1845, and served his country in the civil war, both in the army and navy. After this he was connected with the Pennsylvania railroad as fireman and engineer, afterwards starting in the florist business at Lebanon, Pa. In 1866 he was married to Miss Katherine Auchenbach, who, with one daughter, survives him. He came to Youngstown in February, 1882, where he erected several greenhouses and carried on a general florists' business, but recently he has given more attention to his ventilating and other apparatus, much of which was his own invention, and on which he held patents. About a year ago he suffered a severe stroke of paralysis and, despite various journeys taken in search of health and pleasure, he was again stricken in Jacksonville, Fla., and two weeks before his death his condition was so serious that no hope was entertained of his recovery. So passes away another of our veterans, a man highly respected by all and deeply mourned.

Mr. Hippard has for years been a member of the Society of American Florists and the American Carnation Society and a regular exhibitor at their conventions. The funeral services, which were held Thursday, June 18, were largely attended by his many friends in this section. The large number of beautiful floral tokens of sympathy showed the general esteem in which he was held by all who knew him. The manufacture and sale of the ventilators, gutter and trap will be continued under the old name by his grandson, R. H. Little, who has had considerable experience in the shop with the deceased.

Alexander Wallace.

Alexander Wallace, who for nearly 20 years has been editor of the Florists' Exchange, died suddenly at his home in Brooklyn, N. Y., June 17, at 5 p. m. Though Mr. Wallace had been in poor health for some time, it was not generally known that his condition was serious. He had been absent from his desk for 10 days, but returned to his duties on June 15. He was again at his post the following day, but in the evening a more severe recurrence of the heart trouble with which he was afflicted terminated his admirable and useful life.

Mr. Wallace was born November 21, 1859, in the village of Lawrencekirke, Kincardinshire, Scotland, whence he emi-

The Late Alexander Wallace.

grated to America. Immediately on his arrival in New York he became identified with the Florists' Exchange in an editorial capacity; and in succeeding years his life has been so interwoven with that journal that his complete biography would also be, in a large measure, its history. Conscientious, able, fearless and untiring in his devotion to his chosen profession, he has at all times commanded the respect and esteem of the best minds of the horticultural trade. He was a member and past director and state vice-president of the Society of American Florists, and a member of both the American Rose and American Carnation societies. With very few exceptions, he always attended the annual conventions of these societies and participated in and reported their proceedings.

Of his voluminous writings, doubtless the most enduring will be his book, "The Heather in Lore, Lyric and Lay," published in 1903. This work, which has received widespread commendation as a most valuable contribution to the literature of plant life, has many passages that show that to the author it was a labor of love. As a journalist he treated all subjects pertaining to the good of the craft in a forceful and broad-minded manner. The funeral services took place in the parlor of the Summerfield Methodist church, corner of Greene and Washington avenues, Brooklyn, on June 20, at 3 p. m., and the interment was in Greenwood cemetery. His only surviving relative in this country is his wife, who, previous to her marriage, was Miss Rachel Marion Banta.

RESOLUTIONS.

At a special meeting of the directors of the A. T. De La Mare Printing & Publishing Co., Ltd., publishers of The Florists' Exchange, held noon Saturday, June 20, 1908, the following resolutions were adopted:

Whereas, Most vividly the uncertainty of the tenure of life has been demonstrated through the sudden removal from our midst of our friend and fellow-worker, Alexander Wallace, who went for rest from pain and earthly cares, with a smile of perfect peace on his face, to the arms of our Heavenly Father, on Wednesday, June 17, 1908, and

Whereas, We desire to place on record our testimony to his long and faithful career in the office of this company, and to bear testimony to his zeal, diligence and unswerving loyalty in all things which made for our common good; therefore, be it

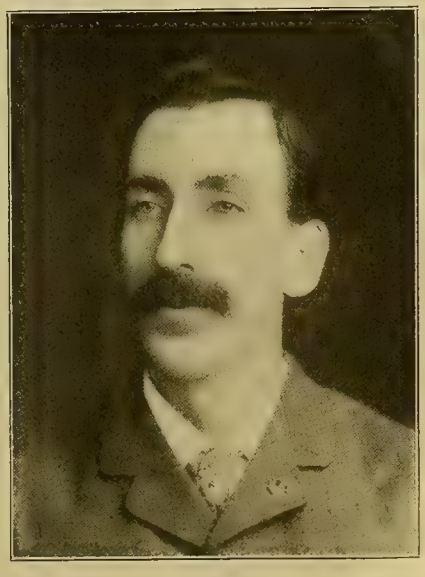
Resolved, That in the death of Alexander Wallace we have lost a brother whom we mourn with all our heart, a tried and true coadjutor, a manly man, a faithful friend, a valuable citizen, and we do hereby express our profound and sincere grief at his untimely death in the hour of his matured mental vigor and manhood; and be it further

Resolved, That these resolutions be expressed in full upon the minutes of this company, and a copy thereof sent to the bereaved widow of the deceased.

CARD FROM J. C. VAUGHAN.

The S. A. F. has lost one of its foremost members. A true patriot in the cause, always loyal, careful, sane, watchful, bold when necessary, but not aggressive, modest and unassuming to a fault; it will be long indeed before we can fill his place, and he was one who was ever in his place. He should have been made president of the S. A. F. long ago, and would have been but for his modesty.

MERIDEN, CONN.—The Blatchley Co. is now in possession of the store at 36 West Main street formerly owned by Mrs. Lillian Savage. The company consists of C. W. Blatchley of Plantsville and his son and daughter, who own extensive greenhouses at Plantsville.



The Late Allister David Rose.

LOOK out for temporary shading after heavy rain.

THE NATIONAL Council of Horticulture committee on school gardens held a meeting at Ithaca, N. Y., this week, Dr. True, E. V. Hallock and F. R. Pierson in attendance.

CLEAR cold water is one of the best insecticides if used right.

GREAT damage by storm is reported from the neighborhood of Newark, N. J.

PINK and red flowers are notably more likely to be attacked by thrips than other colors.

MARTIN CAHUZAC is one of the rarest and probably the deepest colored herbaceous peony in existence.

SUFFICIENT care is not usually taken in marking the best varieties of different plants for stock purposes.

EDWIN A. SEIDEWITZ, the perennial candidate for the secretaryship of the S. A. F., is again in the field.

THAT good old rose, Homer, is recommended as an especially good variety for California and other western points.

REPORTS from many Canadian points show that the increase in the demand for herbaceous plants has extended over the border.

PURCHASE young stock now of any plants that are short. They are cheaper and cost less for freight than when procured later.

RUGOSA ROSE Blanc Double de Coubert, pure white and very fragrant, has been recommended as a forcing plant for pot culture.

ALWAYS have some protection to the plants when painting the houses inside. This work is best carried out when the houses are empty if possible.

TELESCOPIC window boxes made of sheet metal with sliding flanges are on the market. The idea is that they fit any width window within their capacity.

THE Japanese government is said to be importing large quantities of yuccas from Chili. These plants contain picric acid, used in the manufacture of high explosives.

A COVERED structure for manure would be a useful addition to many places and it need not be an expensive one. All manure heaps should be drained to a tank to catch the seepage.

THE opinion is expressed in Europe that American glass works will, in a few years, supply the entire home demand and sharply compete in the markets of the world against continental manufacturers.

THE Texas Farmers' Congress convenes in twelfth annual session July 7. Many important organizations including the Corn Growers' Association, the Horticultural Society, the Nurserymen's Association, the Nut Growers' Association and the Seed Breeders' Association form part of the congress. The meeting is to be held at College Station, a very suitable venue, as this is the home of the Agricultural and Mechanical College.

National Council of Horticulture.

We have received the fifteenth instalment of the press service of the National Council of Horticulture. The articles are, as usual, timely and interesting, and everyone in the trade should endeavor to get the editors of their local papers to send for and use them. They may be obtained free from J. H. Burdett, 1720 West One Hundred and Fourth place, Chicago. The following are the titles of the present installment: "Hardy Phlox"; "Rhubarb"; "Polyantha Roses"; "The Sweet Potato."

Luther Burbank.

Those, and there are many, who would know facts about Luther Burbank should read "Luther Burbank and His New Environment," by Prof. E. J. Wickson, dean of the college of agriculture, University of California, in the June Sunset. Prof. Wickson had something to say in the same magazine of May, 1905, under the title "The Real Luther Burbank," and this new article is along the same line. Carefully written, pointed and condensed, it should do much to clear up the continued publication of unreliable, fake information and absurdities which are running constantly through the public press. Prof. Wickson says: "Every thought is charged with philanthropy, the furnishing of greater beauty or richer sustenance to the human race, but he descries opportunity for wealth production with the full heart and telescopic eye of the most optimistic promoter."

Cincinnati First Convention City.

MAY ASK FOR IT AGAIN NEXT AUGUST.

On invitation of J. A. Peterson a special meeting of the Cincinnati Florists' Society will be held at his home on McHenry avenue, Westwood, Friday, June 26, at 3 p. m. Nomination and election of officers for the ensuing year and the proposed invitation to the Society of American Florists to hold its twenty-fifth annual convention at Cincinnati in 1909 will be discussed, also the annual outing of the Cincinnati Florists' Society.

It will be recalled that the first convention of the Society of American Florists was held in Cincinnati, August 12-14, 1885. John Thorpe was then president; the late J. M. Jordan, vice-president; E. G. Hill, secretary, and the late M. A. Hunt, treasurer. The number of paid-up members at this meeting, according to the treasurer's report, was 221. THE FLORIST, pioneer trade journal, which has had so many imitators, first saw the light at the Cincinnati meeting. The local hospitalities included a trip to the Soldiers' Home at Dayton on invitation of the C., H. & D. R. R. and the local committee of florists.

All interested in the 1909 invitation are cordially invited to attend the meeting at Mr. Peterson's June 26 and it is hoped there will be a full representative meeting of the trade of Cincinnati and vicinity. S.

Raising Old Fashioned Flowers.

ED. AMERICAN FLORIST:—

How can I raise old fashioned flowers like asters, dahlias, mignonette, centaurea and others? M.

Asters are raised from seed sown in early spring. Dahlias are also raised from seed, but more frequently from cuttings and pot roots, as recently described in our columns. Mignonette is raised from seed sown in August for winter flowering, and at other times, according to demand. Centaurea may be raised from seed sown now and again in spring. As you will notice, your query is a little out of date to give extended particulars, but these will all be given as they become due and are interesting to other florists. G.

Meetings Next Week.

Dayton, O., July 2.—Dayton Florists' Club, 37 E. Fifth street.

Detroit, Mich., July 1, 8 p. m.—Detroit Florists' Club, 38 Broadway.

Lake Geneva, Wis., July 4, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

Milwaukee, Wis., July 2, 8 p. m.—Milwaukee Florists' Club, Quiet House, corner Broadway and Mason street.

Minneapolis, Minn., July 3, 8 p. m.—Minneapolis Florists' Club, Latham's conservatory, 83 South Tenth street.

New Orleans, La., July 1, 8 p. m.—German Gardeners' Club, 624 Common street.

Newport, R. I., July 1.—Newport Horticultural Society.

Pasadena, Calif., July 3, 8 p. m.—Pasadena Gardeners' Association, G. A. R. hall, East Colorado street.

San Francisco, Calif., July 4.—Pacific Coast Horticultural Society.

Utica, N. Y., July 2, 8 p. m.—Utica Florists' Club, Hotel Martin.

Florists' Club Outings.

Chicago, July 19.—Annual picnic of Florists' Club at Morton Grove, Ill.

Montreal, Que., July 29.—Annual picnic of Gardeners' and Florists' Club.

15 Province St. and 9 Chapman Place, BOSTON, MASS.

LEGAL NOTES.

Proposed Law Affecting Insecticides.

On June 18, beginning at 10 a. m., there was an all-day session held in the American Institute building, New York, between manufacturers, representatives of the entomologists, and some of the leading chemists who have charge of the state control of the insecticide laws, for the discussion of Senate Bill 6515 and House of Representatives Bill 21316, entitled "A bill for preventing the manufacture, sale or importation of adulterated or misbranded fungicides, Paris greens, lead arsenates and other insecticides, and for regulating traffic therein, and for other purposes." There were about 40 persons present, and business commenced promptly.

The senate bill and the house of representatives bill are identical, excepting that in section 7 there is a fourth clause added to the latter. Section by section was taken up. The first section provides that any violation is a misdemeanor, punishable by a fine not to exceed $500 or one year's imprisonment. This section was adopted, also sections 3 and 4. Under section 4 a motion was made to insert the word wilfully (wilfully violated), but the entomologists and representatives of the Department of Agriculture voted against that, and in section 5 a discussion arose as to who should have the authority to start prosecutions, and a clause "Under authority of the Secretary of Agriculture" was inserted. Sections 6 and 7 caused the most discussion. The intent of the promoters of the bill seems to be to concentrate unquestioned authority of oversight in the hands of the Department of Agriculture, and the manufacturers brought up various questions, all of which were fairly and frankly considered.

In section 6 the words "man or other animals" were stricken out. There was also a definition added, that the term "miscible oils" shall include all preparations of petroleum to be used in water. In section 7, after some discussion in which the actual work of the manufacturing chemist is compared with the laboratory chemists' small tests, the amount of arsenious oxide (As 205) was made 50 per cent instead of 55 per cent. The standard of lead arsenates is one of the things which are indefinite, and the real workaday conditions, which all commercial articles are subject to, were talked over, the result being the expression of opinion by the professional entomologists that no construction was wished by putting into the bill or to be made a part of it, anything which could in any way hamper fair trade.

The fourth division of the house bill reads: "Any article which is intended for use on vegetation and shall contain any substance or substances which, although destroying, repelling or mitigating insects, shall be injurious to such vegetation." This clause, which is not in the senate bill, was taken up, as it is a trap which might be used to the great annoyance and harm of anyone, for there are no substances commonly used but what, if a small overdose is used, will destroy vegetation, and as the paragraph read there was no explanation of its construction. To qualify this paragraph the sentence "By following the directions expressed upon the package" was added. A motion was made that the bill as amended according to the secretary's notes be adopted and the same was carried. A resolution was offered on the part of the manufacturers to the effect that they thank the gentlemen in charge of this meeting, E. Dwight Sanderson of Durham, N. H., and Prof. Smith of New Brunswick, N. J., for inviting them to be present.

English Nurserymen Sued by Dutch Firm.

J. S. Fisher of Wells road, Nottingham, Eng., has been sued in the county court in that city by W. R. Alkemade & Co., of Holland for £49, 3s. 6d. balance of an account of £69, 3s. 6d. for bulbs, etc. Defendant counterclaimed for £54, 19s. on the ground that some of the bulbs were diseased and some untrue to name. He complained of the quality of goods supplied in 1905 but gave an order in 1906 on the representation that the goods would be more satisfactory. There were sundry transactions in which defendant complains he was not well treated and when called on for the money defendant's son tendered a check for £20, the plaintiffs offering only to reduce the bill by £8, 14s. After hearing evidence the judge held that the hyacinths supplied were not tip-top quality and that the narcissi were unsalable but that defendant had not made out his claim for loss of trade. Judgment was given for the plaintiffs on the claim for the full amount and for defendant on the counter claim for £18, 10s.—Horticultural Trades Journal, May 20.

ROCK ISLAND, ILL.—The greenhouses and fixtures owned by the Long View Park Floral Co. have been leased by Henry H. Hensley as manager of the Rock Island Floral Co. This company is building greenhouses near the entrance of Chippiannock cemetery and will have control of them. The one on Fifteenth street and the other on Twelfth street, together with the original houses owned by this company brings three entire and separate establishments into the hands of this growing and progressive concern.

Summer Flowers.

Our Hot Weather Specials That Ship Well and Keep Well.

Giganteum Easter Lilies

Just commencing to bloom. They stand any amount of hot weather. Price $6.00 per 100.

American Beauties

Grown in solid benches with roots down deep in cool soil. They produce stronger flowers in hot weather than stock grown on raised benches.

Kaiserin, Carnot, Killarney, Richmonds and Perles

These are the best summer roses. We grow them in solid benches and grafted plants. They produce by far the best flowers.

Asparagus, Smilax, Sprengeri, Adiantum, Common Ferns

All other seasonable stock at lowest market prices.

BUY YOUR FLOWERS DIRECT FROM THE GROWERS, and get the freshest possible stock. Our cooling rooms and shipping facilities are unexcelled.

BASSETT & WASHBURN,

GREENHOUSES: HINSDALE, ILL. **Office and Wholesale Store: 76 Wabash Ave., CHICAGO.**

To Be Done Now.

IN THE GREENHOUSES.

Remove the glass from the sides of houses it is desired to keep very cool.

Thrips will be getting busy among the roses unless these are well sprayed and fumigated occasionally.

Water newly planted roses just around the plants, not soaking the whole of the bench.

Pot up poinsettias as they are ready and before they begin to draw.

Odontoglossum citrosmum must have abundance of root moisture now.

Shading is necessary now almost everywhere, but avoid overdoing it, especially in the houses devoted to young stock.

Remove the flowers constantly on the young bouvardias to ensure a free growth.

After stopping chrysanthemums, or after the June bud, do not take the first shoot. Rub this out and take the next.

Cleanliness in all departments is of the utmost importance now.

IN THE STORE.

Killarney is one of the best roses to keep its color in hot weather.

Avoid the use of very heavily scented flowers such as mignonette in hot weather.

Much outdoor and wild foliage may be used at this time of year, saving expense in large decorations.

Whatever designs are made be careful to make a good outline with flowers of a different color to those in the body.

When the bedding season is over clear out all traces of boxes and plants used for the purpose.

White and pale pink flowers are more suggestive of coolness than blues, reds and yellows.

OUTDOORS.

Spray frequently around the plants that have been placed outside from the greenhouses until they get over the change.

Mulch sweet peas with a few inches of littery manure in preference to watering.

For fine flowers mulch the asters and thin the buds somewhat freely.

Watch the seed beds of English wallflowers and others and keep them well weeded.

Put away all spare sash carefully for the season. Much glass is broken in sash left lying around all summer.

Seedling trees are often choked out by weeds or crippled by insects owing to neglect of cleaning in the early stages.

Watch the small statured herbaceous plants and see they are not smothered by those of larger growth.

The long shoots that spring up from the bottom of rambler and similar roses must be encouraged.

Granite Dust Intensifies Flower Colors.

We see a note in THE FLORIST to the effect that granite chippings are said to cause high color in flowers if used in pots or borders. We have been trying an experiment in this line ourselves with narcissi, using the granite dust, which is like coarse sand, and which would, we think, be much better than chippings, owing to its more divided state. The present season has been such a disastrous one for narcissi, that it is impossible to speak with any certainty as to results; but certainly the early blooms of all the varieties with red eyes came with a higher color than we have had them in previous years, although a few days later, when the temperature changed so suddenly, they had scarcely any color at all. We shall try it again, and hope to have good results. We presume that the potash which is present in the granite, and which is so favorable for (grape) vine culture, is the valuable element.—Horticultural Advertiser.

Prices in Germany.

According to a European contemporary efforts are being made by the nurserymen, florists and others interested in German horticultural produce to bring about something like uniformity of prices by establishing a tariff that shall be recognized as binding to the dealers. The keenness of competition leads to under selling and over-production, which has such a disastrous influence on prices and spoils the market. It is not only in Germany nor in horticultural industries that this condition of affairs is brought about by competition. The cure for it hitherto has been the trust or combine, but we rather fancy that what is done for such commodities as beer, bread, etc., might well be practised in other markets without injury to the consumer. The Germans' aim is to fix a minimum price for every article, and to induce all traders to refuse to sell below that minimum. They also hope to be able to fix a minimum price for services or labor, which is only what is done by the trade unions for numerous classes of workers. Hitherto the gardener has worked in Germany, as in other countries, including England, for low wages—lower than appear to be reasonable. He has also sold his produce in the competitive market wth the too frequent result of obtaining lower prices than would yield anything like a profit; often, too, they meant a loss. It will be interesting to watch this move on the part of the German horticulturists. In this country, whilst garden produce may be returning miserably low prices to the growers, it may at the same time be realizing high prices from the consumers, in which case the dealers have the best of it.

HASTINGS, NEB.—C. W. Sidles is just completing a new and up-to-date range of houses which will double the size of his plant.

Chicago.

TRADE ONLY FAIR.

Trade was fairly active last week, in fact, somewhat more satisfactory than anticipated. Prices were low, but a great deal of stock was moved. This week the extreme hot weather has affected the local demand to a marked degree. The shipping trade is somewhat better. Carnations are a very inferior article, the intense heat under glass having played havoc with the quality of all varieties. Asters are beginning to come in, white and lavender of very good grade and fairly good length of stem being seen in limited quantities. Kaiserin and Killarney are the best varieties in roses. Good Bride is also seen, but Bridesmaid is poor. Very little good Richmond is seen. American Beauty naturally is not up to its former quality, the heat giving the buds little time in which to develop, but is very good for the time of year. Sweet peas continue to come in abundance. Cool-grown Giganteum lilies are also seen in sufficient quantities. All houses are now receiving good lots of candidum lilies, but the demand for them is rather light. Some exceptionally fine lily of the valley is seen, but the supply of really fancy stock is limited and prices consequently hold up very firmly at from $3 to $4 per 100, with $5 per 100 being asked for the extra fancy. This is daisy week, this being the flower so largely used for school closings and other entertainments. Retailers, too, find it a good flower for window decoration on account of its keeping qualities in hot quarters. Nearly all windows, too, are showing water lilies.

NOTES.

F. R. Hills and wife, with their three youngest children, left Friday to make their home in Los Angeles, Calif. This was made necessary on account of Mrs. Hills' poor health. Miss Margaret Hills, the eldest daughter and well known because of having for a number of years conducted a stand on the Flower Growers' Market, assumes the management of the greenhouses and retail store at Maywood.

H. S. Morton, who recently bought the store and showhouse of the late A. Hildred at 3030 Indiana avenue, has sold that place to J. P. Opitz, who already has stores at 3626 Cottage Grove avenue and 6643 Cottage Grove avenue. Mr. Morton will continue to make his headquarters at his store, 90 E. Thirty-first street, although he will spend much of his time at his Rockford greenhouses.

J. Schoepfle, 1431 Belmont avenue, had an interesting plant box order last week. The Northwestern Terra Cotta Co., on Clybourn avenue, constructed 10 long terra cotta boxes which Mr. Schoepfle filled with cobœas, ivies, vincas, Nutt geraniums and Asparagus Sprengeri.

The Kroeschell Bros. Co. reports that its business to date this season is ahead of that of the similar period last year. A very heavy demand has come from the east, where Kroeschell boilers are being tried out where considerable additions of new glass have been made.

Geo. Manos, who conducts a flower stand in the Union depot of this city, and also of Pittsburg, has extended his operations to Washington, D. C., and he will, on July 1, open a stand in the Union station of that city.

Weiland & Risch are getting some fine blooms from their new red seedling rose, which they confidently believe will be a great commercial success. This firm is also handling some fine Kaiserin.

Burglars last week entered the store of C. S. Griffith, 160 E. North avenue. They broke open the cash register and the nickel telephone box, but fortunately secured only a few dollars.

The sign over the retail store at 14 Colorado avenue has been changed from Mrs. E. A. Anderson to Mrs. Geo. Wells on account of the recent marriage of the proprietress.

"THE BUSIEST HOUSE IN CHICAGO."

Peonies,
Carnations,
Roses.

Assorted stock in quantity.

J. B. DEAMUD CO.
51 Wabash Ave., CHICAGO.

The local branch office of A. H. Hews & Co. has offered to replace free of charge all pots carrying plants for the National Flower Show that are broken in transit.

J. V. Pfander, of the Clarinda (Ia.) Greenhouses, was in the city last week and bought 105 boxes of glass for new construction work.

Mrs. H. Lowe is now located at 1102 North Forty-third avenue and is erecting a large greenhouse with John C. Moninger's material.

Andrew Hegg, aged 72, and for the past 15 years employed as a decorator by the Geo. Wittbold Co., died on June 10.

Watch the bowling scores printed elsewhere in this issue and see the making of the S. A. F. championship team.

The E. F. Winterson Co. on Tuesday was showing some very fine white and lavender asters grown outdoors.

J. C. Bruchner and Thos. McAllister are furnishing Vaughan & Sperry with large quantities of wild daisies.

Sidney Wiffin, in the Flower Growers' Market, is showing fine Shasta daisies.

The J. B. Deamud Co. is receiving some exceptionally fine American Beauty roses.

Bassett & Washburn are in the midst of their summer cut of giganteum lilies.

Visitors: H. Glen Fleming, Fairmont, W. Va.; J. D. Carmody, Evansville, Ind.; C. W. Eichling, New Orleans, La.; Mrs. M. E. Finkler, Streator.

Port Huron, Mich.

C. W. Asman, Huron avenue, is building one house 16x100 feet and will plant it with chrysanthemums. This firm reports a good spring trade. It has added vegetable seeds to its stock this spring and has supplied many of the gardeners of the vicinity with their whole requirements in that line. The firm's store is large, with a conservatory in the rear. The modern show window affords a splendid opportunity for most elaborate and unique displays, which are a strong feature of the firm's enterprise. The last arrangement for Memorial week was most successful in this line and attracted much attention from the public.

J. F. S.

DES MOINES, IA.—Articles of incorporation of Loziers were filed with the county recorder June 15. The capital stock is listed at $25,000. Alfred G. Lozier, H. E. Lozier and M. I. Lozier are the incorporators. The new company will engage in the nursery and floral business.

Cut Flowers and Greens

that you may want if anybody has it, at Chicago market prices on day of shipment.

JANESVILLE, WIS.—Three-fourths of the planting for Dr. Dwight's new greenhouses located between Jackman and East streets has already been completed. There are to be 11,000 rose and 9,000 carnation plants. Rose culture for the present will be confined to Bride, Bridesmaid, Richmond, Chatenay and Killarney.

SAN DIEGO, CALIF.—At the regular annual meeting of the Floral Association, June 10, at 949 Ninth street, the matter of holding a floral exhibition in the fall was broached by President Alfred D. Robinson and received enthusiastic endorsement from the members present. Officers of the association for the ensuing year were also elected.

St. Louis.

MARKET HOLDS FIRM.

Trade is keeping up fairly well, weddings and closing exercises of the universities and schools have helped to maintain demand. There is now quite a demand for white carnations and roses and Sunday's market held up well. Carnations, however, show weather conditions plainly and it is hard to procure good stock. There are quite a few long stemmed American Beauty roses on the market, but short stemmed flowers are scarce. Sweet peas are of very poor quality, the heavy rains having hurt them considerably, but with better weather conditions it is hoped they will improve. Asters are in, but not very plentiful. There is quite a demand for good stock and shippers can be assured of fair returns if the quality is good.

NOTES.

Chas. Schoenle is very busy with the arrangements and programme for the picnic. The wholesalers are advertising the picnic, every package of flowers being stamped with the date and location of picnic. Both teams, wholesalers and retailers, expect to work in a surprise at the baseball game. Some new faces will be seen in both teams and a close contest is expected. The retailers will leave no stone unturned and are determined to beat the wholesalers.

The St. Louis Seed Co. has kept busy right along. This firm will enter largely this season into the green and holly business for Christmas and is already around taking advance orders, Mr. Retzer being especially active.

The Ayers Floral Co. was very busy last week, with bouquets for closing exercises, and some fine floral work for funerals was sent out by this firm. Mrs. Ayers has a reputation as a great artist in this line.

Wm. H. Ossick, of Wm. C. Smith & Co., was married last Wednesday to Miss Lillie Windt, daughter of J. F. Windt. They left for New York and other eastern resorts to spend their honeymoon.

D. Bova, of the Red Bud Floral Co., is a believer in advertising. He is mailing fancy postal cards daily, advertising his Franklin avenue store. He was very busy last week with wedding orders.

At H. G. Berning's, some extra good carnations and roses are to be seen. This firm handles a very large amount of stock and almost any variety of flower can be found there in season.

John Burke will shortly close his store for the summer. John last year took a trip to the coast. He states that trade was very good during the season.

The C. Young & Sons Co. are very busy these warm days. Last week this firm had several large orders for closing exercises.

Heller Bros., of New Castle, Ind., are shipping some good, long stemmed American Beauty roses to this market.

Some extra fine lily of the valley was seen at Geo. H. Angermueller's the past week and found ready sale.

Ed. Buechel, of the Reeser Floral Co., has been attending the sangerfest at Indianapolis.

Wm. C. Smith & Co. have filed incorporation papers, capital $5,000, fully paid up.

At the parks the planting out is now finished and the floral display is at its best.

W. J. & M. S. Vesey are shipping in some good Bride roses, which find ready sale.

The Foster Floral Co. is advertising one-half of its store to rent.

W. F.

FAIRMONT, W. VA.—H. Glenn Fleming, who reports an excellent business in bedding stock this season, is spending a few weeks' vacation at Illinois and Michigan resorts.

Montreal.

KILLARNEY ROSE POPULAR.

The retail trade is very active and what are left of the bedding plants are selling very fast. There was the usual shortage of geraniums this year, but the western growers supplied all that were needed. Outdoor roses promise to be very good this year and will be in the market in a few days. Indoor roses will mostly be carried over another year. Very little drying off is practiced now. Among the young roses planted this year there will be no Bridesmaid; Killarney will entirely take its place. Peonies are plentiful now but are profitably used up in the frequent wedding decorations, Festiva Maxima, which is largely grown, being the most desirable for this purpose.

Great enthusiasm is displayed by the members of the Gardeners' and Florists' Club regarding the coming convention of the Canadian Horticultural Society to be held at Niagara Falls the same date as the Society of American Florists holds its convention across the river. A number of the members signified their intention to attend and everybody knows that this will be the chance of his life to meet and gain experience. John Walsh, our worthy president, is confident of having the largest delegation in the history of the association to accompany him to Niagara Falls.

The bedding out season is just about finished; the Mount Royal park this season has planted this year an unusually fine lot of stock. The lettering, Mount Royal park, is very distinct. John Pidduck, the head gardener, through long experience, has acquired the ability to execute the different designs very artistically—for instance, the Maltese cross or the Union Jack.

At Joyce's the beds look very well indeed; their geraniums, mostly novelties, should turn out very effective. LUCK.

Cincinnati.

DEMAND BETTER.

Conditions this week are much better than those of last, and a good demand for flowers of all kinds made buyers hustle for stock. The wholesale men had easy sailing to unload the better grades of stock, which were practically cleaned up by 10 a. m. This, no doubt, can be attributed to the cool weather experienced the fore part of the week, which retarded flowers to some extent, while a good many growers are throwing out their roses and carnations, which keeps the supply limited and raises the price. Some very good American Beauty roses are being sent to this market and are very good property, the prices remaining firm at $2 to $3 per dozen. Bride and Bridesmaid are fine in quality and not over-plentiful and bring $2, $4 and even $5 per 100. The best Enchantress carnations brought $3 per 100; the majority of the sales, however, were at $1 to $2 per 100. Sweet peas are equal to the demand and the same may be said of Shasta daisies. Lilium longiflorum had to be ordered in advance, while numerous wedding orders kept the lily of the valley market in a healthy state.

NOTES.

With much regret we read in the Florists' Exchange of the death of Alexander Wallace and David Rose. One after another the boys are passing away, for week after week we pick up the trade papers and notice the obituary of some good friend or acquaintance. The writer knew both of the above named gentlemen and voices the sentiment of their friends in this city when stating that the cause of horticulture has lost the services of two able and true men.

Albert McCullough, president of the J. M. McCullough's Sons Co., left Sunday evening for Detroit to attend the seedsmen's convention, and from there he goes to Quebec and boards a steamer for Europe, to be gone for about two months.

Frank Benson, Newport, Ky., has sold his business to M. Monter, who has been in his employ for quite a period. Mr. Benson will leave shortly for California, to be gone until his health is fully restored.

The Lake Shore Ferneries are keeping the market well supplied with Asparagus plumosus and A. Sprengeri.

Joe Goldman, of Middletown, is sending in some excellent smilax.

STOCK DIMINISHING.

There is a marked decrease in the supply of stock arriving and it is hoped that for some time to come we will be spared the pain of explaining away a surplus. The hot weather has put much of the greenhouse stock that was hanging on completely out of business. The peonies are out, and the market must now fall back to a considerable extent on summer flowers. It is true that there is good greenhouse stock yet coming in, but it is of the varieties that stand heat and, on account of pulling up and planting, there is now little danger of a heavy surplus. American Beauty roses no longer arrive in large quantities and the price has stiffened up. Kaiserin and other summer roses are in fairly good quality, though Killarney is about the only pink that is really serviceable. Carnations are growing scarce, though some fair stock is yet to be seen. The field crop of sweet peas is now coming in good shape and is a good standby for the designers. The persistent street vendors have now largely forsaken the city on Sunday, to follow the crowds to the beaches and other resorts. For the remainder of the summer, with both branches of the trade, it will be a case of "catch as catch can" for all the stray trade that is going, for, aside from funeral work, there will be little that can be depended on. While June trade has not been up to expectations, there is reason for thankfulness that it was no worse. There has been some very good wedding work, and altogether a cheerful feeling prevails.

FUNERAL OF ALEX. WALLACE.

The floral designs at the funeral of Alexander Wallace, June 20, were very noteworthy. From his associates in the office of the Florists' Exchange and the men of the composing and press rooms there was a large standing wreath of cattleyas and lily of the valley; from Traendly & Schenck, a large wreath of cattleyas and sweet peas; from James McManus, a large wreath of cattleyas. Fine designs were also sent from the stores of John Young, John I. Raynor and other wholesalers. One very beautiful wreath was the tribute of Young & Nugent, and was the personal work of John B. Nugent, Jr. It was composed of cattleyas and centaureas and was an elaborate piece of work. Other fine designs were executed on order by this firm. A large delegation of members of the New York Florists' Club, of which Mr. Wallace had long been a prominent member, attended the funeral. Among those present were: President Traendly of the S. A. F., Patrick O'Mara, Chas. H. Totty, Walter F. Sheridan, J. K. Allen, W. E. Marshall, John Birnie, John Donaldson, John Scott, Paul and Henry Dailledonze, A. F. Faulkner (THE FLORIST), J. A. Shaw, W. R. Du Rie and Robt. Berry. There was a large representation of the employes of the A. T. De La Mare Publishing Co., the pall bearers being young men who are employed by that company. In the parlor of the Summerfield Methodist Church at Washington and Greene avennes, Brooklyn, a very touching funeral service was held. There the bereaved widow and the large gathering of devoted friends looked for the last time on the peaceful face, and then the mortal remains of Alexander Wallace were borne away to beautiful Greenwood cemetery, which holds the dust of a multitude of the good and great.

NOTES.

Edwin A. Seidewitz, a leading florist of Baltimore, Md., with branches at Annapolis and other points, was in this city June 16. Mr. Seidewitz is a close personal friend of President Traendly of the S. A. F. and never fails to visit him when here. He says that the Baltimore florists are jealous of their good name, and that an item which recently appeared concerning an overcharge purporting to have been made by one of them against a New York dealer had no foundation in fact, being the result of a misunderstanding on the part of the Baltimore man.

Myers executed a very pretty house decoration June 16 for the Harned-Elsbach wedding. The decorator, being given carte blanche, turned the house into a veritable bower of bloom, while the bouquets of the bride and bridesmaids were very elaborate. The groom is private secretary to Frank J. Gould.

E. E. Burque, for 27 years manager with Chas. A. Dards, was married to Miss Anna Caslin at Yonkers, June 10. The happy couple spent their honeymoon at Atlantic City, N. J.

Elmer Greatfield, formerly salesman for J. S. Fenrich, now occupies a similar position with J. K. Allen.

Geo. F. Struck, of Knight & Struck, has just returned from an extended eastern trip.

Buffalo.

WIND WORKS HAVOC.

Trade conditions are about the same as in previous years. Wedding decorations are still numerous, while school closing is scheduled for this week. The terrific storm that visited this city on Friday evening did not skip the florists. It partly destroyed one of the greenhouses of H. Keitsch & Son and while Chas. Schoenhut was speeding in his automobile a tree was blown over and landed on the machine. Fortunately no one was injured, but I am informed that it cost Charlie $5 to have the tree cut down to release the machine. It is an ill wind that blows no good, for Andy Adams had a tree on his premises that was past redemption and the wind cut it down for him. The destruction to the trees in the parks cannot be estimated at present.

Beginning Monday, July 6, the stores will see the first of the vacations with the exception of W. J. Palmer & Son, who have been dividing the hours of their employes on Saturdays since June 1. This firm, I understand, is to do some enlarging of its Lancaster plant.

The safe of the Wm. Scott Co. was touched for $150 on Saturday night, June 20, and there is no clue to the robbers.

A number of seedsmen passed through the city early in the week bound for the Detroit convention.

W. F. Kasting is thinking of going to Denver to help Bryan.

S. A. Anderson was in Rock City last week prospecting.

Recent visitors: Wm. Bell, Franklin, Pa., enroute to England; A. Ringier, Chicago; Wm. Dilger, of the Michigan Cut Flower Exchange, Detroit, Mich.

BISON.

Tarrytown, N. Y.

The annual June exhibition of the Horticultural Society held in the music hall on June 12 eclipsed all previous ones. A magnificent display of roses in perfect shape and color was staged on five large tables, one exhibitor alone having over 100 varieties of hybrid perpetuals and teas, the majority of them truly named. Frau Karl Druschki was very much in evidence, having been entered in many classes, and carried the honor wherever perfect. Competition was very keen in every class and judging difficult. Strawberries were fine, large and well finished, every class heavily entered. Shrubs were lacking, only two exhibits staged, with common varieties. Perennials were fine, two exhibitors having over 50 varieties, each well labeled. The F. R. Pierson Co. had some large exhibits of miscellaneous plants and cut flowers, not for competition, but very interesting. An innovation which has proved very successful and interesting was the giving of two prizes for bouquets of wild flowers, open only to school children under 14 years of age. This brought 24 contestants. The judging was eagerly watched by the young contingent.

AWARDS.

Collection of flowers cut from hardy perennials—F. L. Milne, gardener to E. H. Weatherbee, Mamaroneck.

Vase, 25 hybrid perpetual roses—John Woodcock, gardener to Gen. E. A. McAlpin, Ossining.

Collection of outdoor roses (silver cup)—John Woodcock.

Six varieties outdoor roses—John Woodcock.

Three varieties roses, three of each—John Elliott, gardener to George Legg, Tarrytown.

Twelve roses, any one variety—H. Nichols, gardener to Mrs. J. B. Trevor, Yonkers.

Best vase roses—John Elliott, Tarrytown.

Best display climbing roses—John Brunger, gardener to I. N. Seligman, Irvington.

Collection flowers from hardy shrubs—W. H. Waite, Yonkers.

Collection of sweet peas—H. Nichols.

Best vase roses (amateurs only)—Alfred L. Squire, Tarrytown.

Best bouquet wild flowers—Agnes Hughes, first; Isaac Regna, Jr., second.

Certificates of merit were awarded F. R. Pierson Co., for miscellaneous exhibits; Matthew J. Murtha, gardener to Mrs. W. L. Bull, Irvington, for shrubs, hardy perennials and roses.

Cultural certificates were awarded George Whitlinger, gardener to Miss Blanche Potter, Ossining, for collection of vegetables; John Elliott, gardener to Geo. Legg, Tarrytown, for rose Frau Karl Druschki.

Honorable mention—Wm. Jameson, gardener to Emil Berolzheimer, Tarrytown, for melon Blenheim and tomatoes Lorillard; Francis Gibson, gardener to Mrs. J. B. Hall, Tarrytown, for shrubs, hardy perennials and roses. L. A. M.

GOOD ROSES SCARCE.

Business keeps up to its usual June standard and, as is customary with the season, good roses and lily of the valley have been scarce. A few cool days shortened the crop of roses considerably and, as many of the houses are being replanted, the space devoted is not as large as usual. Most weddings call for these flowers, so that the shortage was felt in many places. Kaiserin, Bride, Bridesmaid and American Beauty roses are still of very good quality, while Richmond and Killarney are poor. Other varieties of stock are mostly plentiful, with an abundance of fine peonies.

The annual rose show of the St. Catharine's Horticultural Society was a decided success; large numbers of visitors attended. The contingent from this city, going by boat, had a splendid outing. The show of roses was probably the best ever displayed in Ontario, the crop being about two weeks earlier this season than last.

James Wilson, the new city park superintendent, was entertained by the Horticultural Society in St. George's hall on Wednesday evening; a splendid programme of addresses, music and refreshment occupied the evening. H. R. Frankland, president of the society, acted as chairman.

The Dale Estate, Brampton, is sending in some fine orchids; each season this firm is proving more successful with these. Lily of the valley has been scarce here for a few days, but another fine lot is coming along. H. G. D.

Montclair, N. J.

The funeral of A. D. Rose was the occasion for a number of very fine designs, most of which were made up by local florists. The esteem in which Mr. Rose was held by his fellow townsmen and craftsmen was well exemplified.

Mrs. A. D. Rose and daughters will continue the business of the late A. D. Rose, and, all being thoroughly familiar with it and having a competent force of assistants, they will doubtless carry it on successfully.

F. W. Massman will soon erect a new building 42x72 and two stories in height. Part of it he will occupy as a retail store, with a conservatory in the rear.

Last week was a busy one for A. S. Wallace. He had the decoration for the high school closing and much bunch and design work.

BORDENTON, N. J.—Augustus Kellar, flower pot manufacturer of this city, who was painfully injured at the Pennsylvania Railroad station recently, is much improved.

DANBURY, CONN.—T. H. Judd and Wm. Butt, his landscape gardener, are engaged in landscape work and the floral decorations of the grounds about Mark Twain's new villa in Redding.

WEST CHESTER, PA.—Walter Biddle is erecting three greenhouses for his son near the links of the Delaware County Country club. Some of the material has arrived on the ground. There is some talk of organizing a stock company to conduct the business.

LIGHT SUPPLY AND DEMAND.

The very hot weather of the past few days has had a disastrous effect on the greenhouse output. Roses, particularly the teas, have felt the intense heat and either are seen very tight or wide open, in neither of which conditions are they presentable. American Beauty roses are also fast retrograding and the eastern stock will soon have the market to itself until the local summer stock is ready. Carnations are also getting very small. Sweet peas are very fine, but if this weather keeps up for another week there will be a great change in quality. While this account of the quality of the stock is not very encouraging, the truth about the demand for what there is offered is that it is not at all equal to disposing of even the little that is offered. With the facts of the case in mind, many of the growers are clearing out their houses and making repairs, so that early planting will give the stock for next season a good start, with the hope that there will be a boom after the election that will keep the boys busy for years to come. There are still a few good peonies, cold storage stock, which have kept very well indeed; prices, however, are not high, ranging from 4 to 6 cents.

NOTES.

A very enjoyable week-end holiday was spent by a number of the craft with Commodore Westcott at his Waretown clubhouse, on the shores of Barnegat bay, Friday and Saturday, June 19 and 20. Five ex-presidents and two vice-presidents of the S. A. F. were of the party, which consisted of Edwin Lonsdale, John Burton, John N. May, Robert Craig, John Dunham, R. Lynex, Geo. C. Watson, Chas. Eimerman, Daniel Donoghue, J. Lynch, G. Redford, David Rust, Geo. Anderson, Geo. Craig, A. Patterson, W. J. Stewart, Wm. Westcott, S. S. Pennock, Col. Castle and Robt. Kift. The weather was fine and all enjoyed themselves to the full, wandering over the extensive farm of some 400 acres or fishing and sailing on the beautiful bay. On departing, Col. Castle voiced the thanks of the visitors in a neat speech, which was responded to by Mr. Westcott, who said he was glad they had had a good time, and that he was never happier than when he could have his friends of the craft about, spending with him a few days of their leisure time.

Wm. Folck, of Pennock Bros.' force, sailed for his fatherland June 25. He expects to return in the early fall.

Richard Umstead sailed from Baltimore June 24 for Germany, where he will spend his summer vacation.

K.

Boston.

A SLIGHT IMPROVEMENT.

The week just passed has been a slight improvement over the previous fortnight, but offers no comparison with an ordinary June business. Graduations and weddings have been principally responsible for the business transacted, and the season practically ended with the close of business Saturday night. Good roses are extremely scarce and the collection of varieties is limited. American Beauty and Kaiserin are of exceptional quality for this period of the year; Killarney has deteriorated and Richmond is poor, but a light crop is ample to meet all present demands. American Beauty is bringing $2 to $3 per dozen; Kaiserin $6 to $16 per 100. Carnations are gradually passing out and prices have become more firmly standardized. Two dollars per 100 buys the best.

NOTES.

The monthly meeting of the Gardeners' and Florists' Club was held at Horticultural Hall, June 16. The speaker of the evening was Prof. A. H. Kirkland, who has become famous because of his success in fighting gypsy and brown tail moths. That the members fully realized the exceptional opportunity offered them was plainly evidenced by the large attendance greeting the speaker. The subject of the evening was "The Gypsy Moth and Other Shade Tree Insects," and was splendidly handled by the speaker, who overlooked no details and greatly added to the educational feature by his extensive collection of views of practical subjects and tests.

Boyle Bros., who for the last three years have operated from the old and well-known plant of Peter Ball in Malden, have dissolved. P. Boyle, the senior member, has entered the growing field again at Brockton and will also maintain a retail store in the city. Neil Boyle, the remaining partner, will continue at the old stand and ship his goods, as usual, to this market.

John Loomis, well known among the growers for many years, has established himself at the J. A. Clark place in Weymouth, engaging in growing a line of general stock for the market. Mr. Loomis came to this country 14 years ago and has since been located around Boston and vicinity.

B.

Sidney Hoffman, Jr., Boston, Mass.

Sydney Hoffman, Jr.

The photographer caught this budding florist in his father's pansy beds. He was evidently undecided as to whether there was sufficient flowers to meet the Memorial day demands or not.

B.

Massachusetts Horticultural Society.

The following is a partial list of the awards at the rose and strawberry show held June 20-21: Hardy roses, collection, named, not less than 12 varieties—Miss Sarah B. Fay, first; W. J. Clemson, second; Miss Sarah B. Fay, third. Campanula Medium, collection, not less than 15 bottles—Mrs. J. L. Gardner, first; Wm. Whitman, second. Delphiniums, 12 spikes, distinct, named—Wm. Whitman, first; Mrs. J. L. Gardner, second. Hardy herbaceous flowers, 30 bottles, distinct species and varieties—Blue Hill Nurseries, first and second.

Gratuities—Miss Sarah B. Fay, rose display; Wm. Riggs, rose display; J. G. Wright, rose display; Col. Frederick Mason, rose display; W. J. Clemson, rose display; Harvard Botanic Garden, water lily display; E. J. Milton, orchid display; Wm. Whitman, sweet williams and delphiniums; W. A. L. Bazeley, sweet williams; Bellevue Greenhouses, herbaceous flowers: Frederic J. Rea, herbaceous flowers; Mrs. Frederick Ayer, display; Mrs. E. M. Gill, display.

Bronze medal—R. & J. Farquhar & Co., for display of Spanish Iris. First-class certificate of merit—Blue Hill Nurseries, for Campanula humosa. Honorable mention—T. C. Thurlow & Co., peony display; George Hollis, peony display; R. & J. Farquhar & Co., display of herbaceous flowers; Frederic J. Rea, rose, Ruby King.

H. L. Crane, H. A. Clarke, G. V. Fletcher, Mrs. J. C. Phillips, S. H. Warren, Wilfrid Wheeler and A. W. Clarke were the principal prize winners for strawberries. The varieties shown included Marshall, Barrymore, Golden Gate, Ashton and Hundred Dollar. The vegetable classes were well filled and the produce shown was excellent.

Providence.

Monday last was the occasion of an outing of the Florists' Club that has never been excelled in worth and pleasure. Upon the invitation of Brother Hartstra, who is superintendent of the grounds of the Rhode Island hospital, the club took the Eddy street car at 3 p. m. and, after being escorted over the paths and through the groves, had an opportunity to see a modern private greenhouse plant which, while not large, was thoroughly equipped and built of the best materials. A variety of unusual plants and a large collection of herbaceous stock was next viewed, the same furnishing the members a chance to dilate at considerable length upon Latin names and rare species. Perhaps the most amazing thing of the day was the X-ray exhibit and laboratory tests shown the club while going through the institution a little later. Dr. Peters graciously furnished the members with a splendid lunch and accompanied his guests to every part of the building, rendering an enjoyable sketch of the purpose and uses of things medical and surgical. Instead of producing a haunting feeling the doctor awakened the sense of query and had his time fully taken up by many profitable questions. The club immediately voted Dr. Peters and Brother Hartstra their sincere thanks. An ensemble photograph on the lawn ended the day's visit.

Pittsburg.

LILIES SELL WELL.

The demand for all stock is keeping up as well as can be expected for June; carnations are quite scarce, as so many plants have been thrown out. There has been a good run on tea and American Beauty roses. Lily of the valley has also been very much in demand. It is surprising how well lilies move at satisfactory prices. Asters will receive a warm welcome when they arrive, and they have been promised very early this year. The growers are all busy planting and predict a very good season.

The vacation season has started and many are leaving for the north and east.

Wm. Loew has leased the second floor of 231 Diamond street, which he will use for a workshop.

The South View Floral Co. is sending the Pittsburg Florists' Exchange some of the best Chatenay roses seen for some time.

A son was born to Joseph Thomas, Greensburg, June 21.

J.

Newport.

BEDDING PLANTS SOLD WELL.

Business was very good last week, finishing up with the graduation exercises, which called for a great number of bouquets, made mostly of roses and carnations There has been a very large call for bedding plants, and everything in this line is pretty well sold out. There has been a great demand for bay trees, and also for palms to rent for the summer. The outside roses are just coming in fine shape for the rose show this week, and a good show is expected.

Preservation of Wild Flowers.

The Wild Flower Preservation Society of America was founded six years ago with the object implied in its name, and has distributed leaflets, conducted lecture tours and in other ways done all that was possible with limited means to educate the people to the importance of the subject. Not less than 100 of our most attractive wild flowers are threatened with speedy extinction unless public sentiment takes a turn. Legislation similar to that secured by the Audubon Society with regard to song birds would be an advantage, but such laws would be difficult to enforce. What is needed is an active appeal to the public through the press and the raising of an adequate fund to provide for more lectures, etc. Membership in the association is only 50 cents a year and every lover of flowers and nature should be a member. The secretary-treasurer of the association is Chas. Louis Pollard, Staten Island Association of Arts and Sciences, New Brighton, Borough of Richmond, New York.

Texas Plants for Germany.

Orders have been received at Galveston, Tex., from Berlin for the shipment of 2,000,000 tuberoses from the Texas coast country to Germany. Another order calls for 500,000 Cape jasmines, which the German importers declare are becoming extremely popular in Germany. All of the Cape jasmines will be used in Berlin, while the tuberoses will be shipped to nearby provinces.—Long Branch Record.

NOTHING DOING.

This city is fast depopulating itself just now, as all who can afford it are seeking cooler climes than here. The weather is extremely hot and in consequence there is absolutely nothing doing except a few weddings and funerals now and then. The growers are busy now with their chrysanthemums, and restocking their houses and nurseries.

NOTES.

J. St. Mard, Saratoga and Delachaise streets, had the misfortune June 10 to have his residence and nursery completely destroyed by fire. He will soon start rebuilding and will be ready for the fall business.

C. W. Eichling has purchased his place of business, the Avenue Floral Co., St. Charles and Olive streets, and intends to make extensive improvements in the near future.

Francois Gruaz has purchased his place of business, Carondelet and Washington streets, and will erect two greenhouses, 20x100 feet each.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

THIS is corn weather—and needed.

WATERLOO, NEB.—Chauncey P. Coy is on the sick list.

AFTER the convention at Detroit Albert McCullough, of the J. M. McCullough's Sons Co., Cincinnati, O., leaves for Europe, via Quebec, and expects to be gone about two months.

QUEENS, N. Y.—E. V. Hallock has returned from Cuba.—John Lewis Childs, Floral Park, has returned from Nebraska, where he spent several weeks making additions to his ornithological collection.

KEOKUK, IA.—The Gate City Seed Co. has a number of men at work in the Hubinger building, corner Third and Main streets, and the interior is fast being put into shape for the opening of business.

NEW YORK.—The following members of the New York Produce Exchange have just been appointed by the president to serve on the committee on seeds for the ensuing year: Wm. Jacot, Marshall H. Duryea, Ernest Wehncke, O. W. F. Randolph and Chas. Wimmer.

DR. TRACY'S valuable paper on "Theoretical and Practical Seed Breeding" will be found on page 1125, and the preceding pages contain another installment of the interesting illustrated account of the establishment of Vilmorin-Andrieux & Co., Paris, France, which was begun in an earlier issue.

SPRINGFIELD, MO., June 15.—The stockholders of the Springfield Seed Co. met today and elected the following officers for the coming year: R. R. Ricketts, president; L. H. Murray, vice-president; A. S. E. Sanders, secretary, and W. D. Murray, M. D. Ricketts, A. E. Sanders, M. C. Baker and Joseph Rountree, trustees. The business of the past year was reviewed and it was found that it had been very satisfactory.

CHICAGO.—Grass seed prices on the board of trade June 24 were noted as follows: Prime timothy, $4.15 (nominal); choice white clover, $15.—Among those who passed through the city enroute to the Detroit convention were C. H. Coy, Valley, Neb.; J. C. Robinson, Waterloo, Neb.; E. B. Northrup, Minneapolis, Minn.; C. R. Chesmore, St. Joseph, Mo.; A. Luck, Germany Nursery & Seed House, Beatrice, Neb.; — Mangelsdorf, Atchison, Kans., and Chas. N. Page and son, Des Moines, Iowa, who will go from the convention to the northern lakes on a fishing trip.—Anton C. Zvolaneck, the sweet pea specialist of Boundbrook, N. J., and Burnet Landreth, Bristol, Pa., both of whom have been on a trip to the coast, were callers this week.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

W. ATLEE BURPEE will sail from Queenstown, Ire., on the S. S. Baltic, homeward bound, June 26.

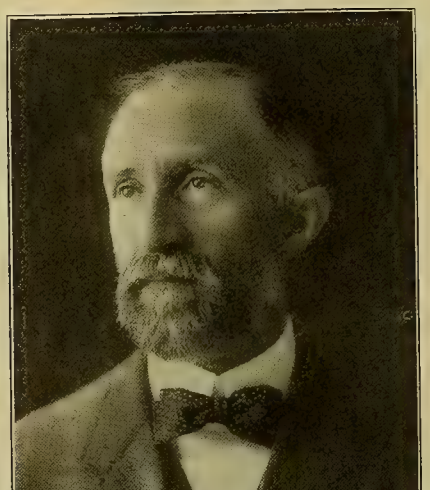
PHILIPPE DE VILMORIN, of Vilmorin-Andrieux & Co., Paris, France, has been appointed a chevalier of the legion of honor.

Michigan Seed Crops-

June 12.—Seed crops here (those that are planted) are doing very well, writes S. M. Isbell & Co., Jackson. They are now busy planting vine seeds and beans. The acreage of garden beans is light in Jackson county owing to the very high price of the common field beans. Not much to report at the present time.

Connecticut Seed Crops.

June 10.—On the small seeds such as beet, carrot, onion, turnip, we have a very fair prospect up to the present time, writes the Everett B. Clark Seed Co., Milford. With a few exceptions, there is a good even stand and a satisfactory growth, fairly well advanced for this time in the season, possibly not as far along as might be called average, but still much better advanced than a year ago. Acreage on none of these items, however, is large and some of them quite restricted. On sweet corn we have a better acreage than a year ago, but still not the acreage that is customarily planted in this section, taking the section as a whole. Our seed has surprised us in the excellence of the stand it has given. We have a very good stand of corn indeed and it is making a very nice start these days, as we had a fair amount of moisture up to June 1. It is now getting somewhat dry. Corn will need, however, to make good headway all the way through the season and develop a mighty good crop in order to bring us out even, as the demand and our sales on future contracts have been unusually heavy. This seems to be the common experience of all growers of seed corn this season as far as we have communicated one with another. Our crops are more backward in Michigan and Wisconsin than here in Connecticut. They were something like two weeks late in getting into the ground out west, but the conditions have been fairly favorable since seeding and our crops are making as good headway up to this time of the season as could be expected.



Geo. S. Green.
President American Seed Trade Association.

American Seed Trade Association.

THE ANNUAL CONVENTION.

The twenty-sixth annual convention of the American Seed Trade Association opened in the parlors of the Hotel Pontchartrain, Detroit, Mich., Tuesday morning, June 23, with President Geo. S. Green in the chair and about 80 members present. City Controller Frank E. Doremus welcomed the visitors to the City of the Straits and S. F. Willard responded for the association. President Green presented his address, which was followed by the annual report of Secretary-Treasurer C. E. Kendel. Then followed the reading by C. N. Page of the report of committee on postal laws, followed by the reports of delegates to the National Irrigation Congress and the committee on experiment stations, both read by Secretary Kendel.

Report of the work of the National Council of Horticulture was read by Secretary Kendel, and at his suggestion the sum of $200 was appropriated for the continuance of the press service during the ensuing year. The report of the National Council of Horticulture, on suggestion of Secretary Kendel, was ordered printed in the annual report of the American Seed Trade Association.

Dr. W. W. Tracy presented his paper on "Theoretical and Practical Seed Breeding." This was followed by the paper on the "Effect of Low Prices on the Production of High-Grade Stocks," by C. N. Keeney.

Albert McCullough had not prepared a paper on the subject assigned him, "Fire Insurance," because of illness, but he was present and addressed the meeting on the subject. He complained of the excessive rates charged the seedsmen by a dual classification. He said the present rates were about double what they were five years ago, and claimed the insured were very negligent in the matter and sought to overcome the extra expense by making great effort to increase the volume of their business.

Mr. McCullough recommended that the association pledge to the fire underwriters the assistance of competent men in any locality where losses by fire occur, to assist in adjusting the actual damage and result by this co-operation in a reduction of total losses to the insurance companies and a consequent low rate to the insured. A motion was carried giving the president the appointment of a committee to consider the suggestion and recommendation, committee to report later.

C. B. Smith presented the paper on "Farm Practice Investigations in Clover Seed Production." After the reading of his paper Mr. Smith was made the target of many questioners, developing an interesting and at times amusing discussion on the subject. He said it was often very difficult to distinguish between Mammoth clover and the medium in the growing crop, owing chiefly to soil conditions.

A resolution was adopted recommending the passage by congress of parcels post laws that would be reasonable in their conditions and favorable to the transmission of seeds in greater weight than is now permitted.

An invitation was extended by the D. M. Ferry Co. to the members and their friends to visit the firm's trial grounds

Wednesday morning and to be its guests on a boat ride Thursday afternoon.

The afternoon session lost the attendance of several of the members who attended the ball game to escape the excessive heat of the meeting quarters in the hotel.

Before adjournment the president announced an executive session for 8 o'clock Tuesday evening.

Wednesday's Proceedings.

On resuming business Wednesday the following new members were elected: Southern Fruit Co., Charleston, S. C.; American Seed Co., Inc., Detroit, Mich.; R. C. Reeves Co., New York; Stumpp & Walter Co., New York; Western Seed & Irrigation Co., Fremont, Neb.; James J. H. Gregory & Son, Marblehead, Mass.; German Nursery & Seed House, Beatrice, Neb.; Ross Seed Co., Puyallup, Wash.; O. J. Barnes, Malone, N. Y.; Agnew Seed Co., Greeley, Colo.; Bromfield, Colvin, Ries Co., Bay City, Mich., and J. Howard Heiss.

Resolutions were offered on the deaths of Alfred Plant, Everett B. Clark and D. M. Ferry, members who died during the year, and were unanimously adopted.

Albert McCullough, M. H. Duryea and J. C. Vaughan were appointed a committee on fire insurance.

The auditing committee approved the accounts of the secretary-treasurer.

D. J. Crosby, of the Department of Agriculture, presented a plan for "Practical Education in Horticulture."

Jesse E. Northrup read a paper on "The Use of Forage Plants as Soil Improvers in the North."

Henry W. Wood discussed the subject of "Forage Plants as Soil Improvers in the South."

E. L. Dungan presented a paper on "The Effect of Commercial Depression on the Garden Seed Business."

Resolutions were adopted reaffirming the use of the official disclaimer by every loyal member as strengthening the position of each and all.

About 100 members are scheduled to attend the banquet at the Ponchartrain hotel Wednesday evening.

Nebraska Seed Crops.

June 10.—The weather has been very wet lately and the local river is now high and threatening to break over, writes J. P. Coy & Son, Waterloo. We presume there will be some replanting as soon as the weather settles. It is too early to say as to the crop probabilities.

June 12.—Since our last report, writes the Western Seed & Irrigation Co., we have had some additional heavy rains, but have also had a few days of bright sunshine, so that the growers in most localities have had some opportunities of cultivating their crops. The low lands are still flooded and replanting will have to be done in some cases. The conditions, therefore, in eastern Nebraska remain about the same, without much change.

We are now receiving reports from the melon district in western Kansas and Oklahoma to the effect that they have been having rains, and the growers are feeling greatly encouraged.

Kentucky Blue Grass Seed.

J. Chas. McCullough, Cincinnati, O., writes as follows, June 19: "We have just completed a thorough examination of the 1908 crop of Kentucky blue grass seed, covering the entire producing sections in Kentucky. We find the present crop to be the largest produced in many years, in fact, it is probable that it will exceed the largest previous crop on record (750,000 bushels cured seed). The seed is well matured and has been harvested under favorable conditions. Good weather for curing is all that is now required to produce seed of excellent quality as to color, weight and germination.

"Under these conditions, we advise against buying large stocks early in the season, and when placing orders insist on delivery of 1908 crop seed, as there is still on the market a large part of the 1906 and 1907 crops. Present indications are favorable to moderately low prices later in the season, therefore it is useless to quote prices at this time."

Allan's Extra Early Peas

While the growing of peas is a simple matter, to maintain a strain of Extra Earlys that keeps its place at the head of the line for earliness, hardiness, productiveness and uniformity, requires constant and intelligent care and watchfullness; and Allan's Early Dexter, introduced years ago and followed later by Allan's Maud S. and Sunol, have ever been and are now in the front rank and acknowledged as such throughout the world where extra early peas are grown.

Allan's Sunol, last on the list but first in quality, is the result of many years of careful propagation by Mr. Allan according to a system entirely his own, for earliness and purity and now stands without a rival. Vines vigorous, sometimes throwing laterals from the base of the stalk, bearing from four to seven pods of good size and shape, containing five to six peas of good flavor. Mr. Allan's special method of culture, possesses an extraordinary degree of vitality, having matured a full crop in some sections where before frost had ruined other sorts, thus proving extremely valuable for Market Gardeners in southern states who plant for early market in a season when frosts frequently occur after growth has begun. Undoubtedly the most popular early pea for market gardeners yet introduced.

The John H. Allan Seed Co.
SHEBOYGAN, WIS.

PLANT IMPORTATIONS INTO GERMANY. —All plants, shrubs, etc., not belonging to the category of the grape vine, which have been grown in nurseries, gardens and plant houses, may, for the future, only be sent via the Grand Ducal Mecklenberg chief custom house at Rostock.

British Seed Crops.

James Carter & Co. report, May 20, that the abnormal weather has affected all standing crops at Worsley and all the brassica tribe, turnips, Swedes, cabbages, etc., have suffered a great deal and many crops are being plowed up. Again peas and mangels have suffered and they hardly know of a crop which has had to stand the winter of which they can speak well. As regards the annuals, which were sown this spring for next harvest, such as peas and all kinds of flower seeds, these have made a bad start owing to the very late spring, and it remains to be seen whether they will have a continuance of suitable weather to enable them to overtake the ground they have lost.

Watkins & Simpson report, May 21, that it is rather early to give any definite information regarding the seed crops. They find that seeds sown in the spring are very late owing to the cold weather, and many have had to be sown again. Crops that have stood the winter are reported as follows:

Peas.—Growing fairly well and now looking better after the recent fine weather.

Swede.—Poor, many acres plowed up.

Beets.—Looking well.

Celery.—Very bad.

Mangel.—Medium.

Cabbage.—Poor.

Wisconsin Seed Crops.

June 10.—We have been getting our reports from quite a large section of the country, writes the Allan Seed Co., Sheboygan, and while some considerable damage is reported it is not greater than we frequently get in our early reports. One difficulty to tell the condition of pea crops at this time is the fact that some of them went in before the rains, and others afterwards. The very early sown were hurt considerably, and the late sown have not advanced far enough for us to form very much of an opinion, but up to the present time we are not aware of any serious damage. We cannot expect to get a full crop this year after so much of cold, wet weather, which must inevitably do considerable harm to the growing crops. A little later we may be able to give something more definite to show the real condition of the crop, but cannot at this writing.

For the "Pure Eggs Law" Congressman.

"A fresh egg is an egg which on being tested is found not to have suffered in any way from evaporation, and which shows no trace of decomposition."

Imports.

During the week ending June 13 imports were received at New York as follows:

Peter Henderson & Co., five cases plants.

Brown Bros. & Co., 150 bags seed.

J. M. Thorburn & Co., eight bls. garden seed.

To others: 78 cases plants, 13 pkgs. plants, 26 cases bulbs, 21 cases orchids, 425 bags sunflower seed, 237 bags clover seed, 292 bags millet seed, 100 bags poppy seed, 26 bls. garden seed, 726 bags seed, 55 pkgs. seed.

During the week ending June 20 imports were received at New York as follows:

A. T. Boddington, one case plants.

J. M. Thorburn & Co., 18 bls, grass seed.

To others, 29 pkgs. plants, five cases plants, 150 bls. grass seed, 691 bags seed.

Allan's Admiral Dewey

We wish to call especial attention to our Admiral Dewey Pea which has already taken the front rank in all the list of large podded, long-vined peas, and is today recognized as the best in its class by the leading trade in America and we have never yet been able to supply the quanity demanded. Remarkably healthy, vigorous and productive, it is almost entirely free from sports and in that respect is far ahead of any other large podded pea we have ever grown. Pods of the largest size frequently six inches in length, straight, rounded at the point, deep green in color, and most beautifully shaped, well filled with large peas that are a deep green color and of the richest flavor. We unhesitatingly claim this to be the best pea of all its class. Seed large, green, wrinkled; height, 3½-ft.

No wholesale or retail dealer can well afford to leave this pea out of their list.

The John H. Allan Seed Co.

The Nursery Trade

American Association of Nurserymen

J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C. Seager, Rochester, N. Y.. Sec'y. Thirty-fourth annual convention to be held at Rochester, N. Y., June, 1909.

THE American Peony Society's annual convention and exhibition report will be found on page 1127.

THE annual meeting of the Pacific Coast Association of Nurserymen will be held at North Yakima, Wash., July 8 and 9.

JOHN W. ADAMS, senior member of the firm of John W. Adams & Co., Springfield, Mass., celebrated his eightieth birthday June 20.

HUGH LOW & Co., the well known English nurserymen, advise us that in all probability the finest lot of new roses distributed in Europe in the last two or three decades will be sent out this season.

Clematis Paniculata.

ED. AMERICAN FLORIST:

It may interest you to know that the Clematis paniculata which was exhibited at Milwaukee during the annual convention of the American Association of Nurserymen were plants dug last fall, cellar-stored over winter and put in cold storage at the approach of warm weather this spring, and they were put on exhibition in Milwaukee in perfect condition June 10 after being out of the ground not quite seven months. These plants have since been set out and are growing nicely.

JACKSON & PERKINS CO.

Bridgeport, Ind.

C. M. Hobbs & Son write under date of June 6. "Our business, both last fall and this spring, has been very satisfactory; in fact, above what we had expected. We had a comparatively small brush pile this season to what we sometimes have. Collections are coming in better than usual. The rainy season delayed us some, but we are beginning to see the end now. We do not know that we ever saw young stock put on growth more rapidly than it is at the present time.

"Prospects appear good for the future. Sales for fall up to this time are very good, and think we will find ourselves short on many varieties before the coming packing season is over, owing to the scarcity of stock, especially in apple. We think there is a great future for the nursery business in this section, especially for the next two or three years."

Western Association of Nurserymen.

The semi-annual meeting of the Western Association of Nurserymen will be held at the Coates House, Kansas City, Mo., July 8 and 9, when the following papers will be presented: "Can Commercial Fertilizers Be Used Profitably in Our Western Nurseries?" by Geo. H. Johnson; "Would a National Inspection Law Be a Benefit to the Wholesale Nurseryman?" by W. P. Stark; "Budding from Scions of Previous Season's Growth Held in Cold Storage: Can It Be Successfully Done?" by Herbert Chase; "Aphis Resistant Stocks," by D. S. Lake; "Should Shipments of Nursery Stock Be Packed Wet or Dry to Escape Damage from Freezing?" by E. S. Welch; "What I Learned at the Milwaukee Meeting That Is of Interest to the Western Association," by E. H. Sherman; "Effect of the Long Rainy Season on Nursery Stock," by R. J. Bagby; "Scarcity of Apple and Cherry," by A. Willis; "Can We Decrease the Labor Cost Doing More with Horses and Improved Tools and Less with Hand Labor?" by G. A. Marshall; "Does the Tariff Sufficiently Protect the American Nurseryman?" by E. Moncrief; "Are the Laws for the Destruction of Insect Enemies Meeting or Likely to Meet the Hoped-for Results?" by F. H. Stannard; "The Seedling Outlook," by A. L. Brooke.

National Inspection Law.

Orlando Harrison, Berlin, Md., committee on above, presented the following report at the convention of the American Association of Nurserymen, Milwaukee, June 10-12.

The subject of a national inspection law is one that should receive the attention of every nurseryman. It has been said that a poor law is better than none, and I think we all agree that it is better to have a law enforcing inspection for the benefit of all the fruit growers, entomologists and the nurserymen. The question now is: Do you want two laws—one operated by the state, and the other operated by the government from Washington, like the pure food and seed laws are now enforced? Who is to be supreme, the state or the government, in enforcing them?

At the recent conference of the governors of the various states at Washington, D. C., it was made clear that the states, so far as their governors were concerned, are scrupulously opposed to relinquishing to the federal government any of the powers reserved to them under the constitution. Practically every governor present went on record in favor of the states exercising their power to the fullest degree, but in doing this they also made it clear that they, likewise, favored the exercise by the federal government in the fullest sense of all the powers delegated to it by the states through the constitution. The consensus of opinion seems to be that the states must do their work—the nation its work.

WHEN FEDERAL POWER SHOULD PREVAIL.

President Roosevelt has gone on record as recognizing the rights of the states, and says in matters that relate only to the people within the state, then the state is to be sovereign and it should have the power to act. If the matter is such that the state itself cannot act, then he pleads on behalf of all the states that the national government should act.

EACH MUST EXERCISE ITS POWER.

Wm. Jennings Bryan says he is jealous of any encroachment upon the rights of the state, believing that the states are indestructible, as the union is indissoluble, and it is just as imperative that the general government shall discharge the duties delegated to it as it is that the states should exercise the powers reserved to them. He further says: "Nothing that is necessary is impossible." Without state rights we would have no government. Eliminate state rights and you have nothing.

ADVANTAGES OF A NATIONAL LAW.

One thing that could be gained in a national law is to outline a standard law and ask that all the states amend their laws to conform to that as far as practicable. We must remember that the United States government has no power except that which is given to it by the states. Now, it must be taken for granted that the American nurserymen thought it necessary that something should be done or this committee would not have been named. I have diligently tried to work out some plan whereby we could all work under one law and all states share alike.

STATE LAWS WILL REMAIN IN FORCE.

If we have a national law it is quite evident that the state laws will remain in force, but it is possible that the Secretary of Agriculture conduct the inspection of nurseries through the present state officials, thus allowing only one inspection of our nurseries, which is desirable; on the other hand, it is not desirable that we have two inspections by separate parties.

MEETING OF THE COMMITTEE.

I attended the meeting of the American Association of Horticultural Inspectors and Economic Entomologists held in Chicago, December 27-28. Before going to the meeting I sent out 88 letters to the largest growers of nursery stock in the association and received 60 replies, the majority of which favored a national law. You are all familiar with the resolutions passed by the inspectors and entomologists, which have been published by the trade papers:

RESOLVED: (A.) That the Secretary of Agriculture should be empowered to make regulations governing importations liable to harbor insect pests or plant diseases; to be accompanied by a certificate of a duly accredited entomologist of the country, in which said shipments originate, or in the absence of such certificate to make inspection of such shipments by competent agents at point of destination and that sufficient appropriation be made for this purpose by congress.

(B.) That congress be asked to enact a law empowering the Secretary of Agriculture to issue certificates of nursery inspection as nearly uniform as possible to all nurseries in the United States engaging in interstate trade, upon proper inspection of such nurseries by duly authorized representatives of the United States Department of Agriculture for that purpose, and that sufficient appropriation be made therefor. That all states or territorial officials in charge of nursery inspection be urged to accept the certificates at their face value, and that in states where laws are now enforced which will not allow the acceptance of such certificates, the inspection department be requested to endeavor to secure such state legislation as will make this possible.

(C.) That congress authorize the Secretary of Agriculture to proceed to exterminate or control imported insect or plant diseases or any insects previously native to a restricted locality, but which may become migratory and threaten the whole country, whenever in his judgment it is practicable, and that an appropriation be made for this purpose as a reserve fund for emergency use against any such pests which may arise.

(D.) The Joint Committee proposes to have two bills prepared for introduction in congress. One of these, "Embracing the subject matter of section A and B and the other only embracing the subject matter of section C; and that if the passage of both measures be found impracticable or impossible, then all efforts be concentrated in the attempt to secure the passage of the bill involving the certification and inspection of imports and the control of nursery stock shipments entering into inter-state trade as above outlined."

THE NURSERYMAN'S SIDE.

I said: "The nurserymen are anxious to co-operate with you in combating, controlling and stamping out, if possible, the insect pests and diseases which are liable to be found in the nursery. We realize that it is our duty to our customers and to the man in authority who issues the certificate that they be placed in the proper light with each other and with the grower in issuing the certificate from one state to another. Yet it does seem to us that more stress should be laid by the inspectors upon the neglected orchards near a nursery."

ENTOMOLOGISTS.

I wish it clearly understood after being with the horticultural inspectors and economic entomologists twice at different meetings I find they are a class of high-grade men and are endeavoring to the best of their ability to bring about uniformity in their inspection work as far as possible. They have their troubles as well as the nurservmen and are trying to solve the problem now before us.

On my return from Chicago I found several letters from influential nurserymen denouncing most emphatically that any action should be taken without further consideration, and presenting the whole matter before the nurserymen at

this meeting. I consulted several leading nurserymen and their advice was that every member of the association should be heard.

On May 12 I sent out 460 letters and have received replies from 225, of which 170 have asked for a national or uniform law, 12 against and five neutral. Of the entomologists or inspectors, 31 are favorable and two are opposed. While many want a uniform law, they want only one law, and some do not want a national law. But few who ask for a national law offer any suggestions. I give you a few hints from some of the letters received.

FROM NURSERYMEN WHO FAVOR IT.

"I have for years thought that there ought to be inspectors at every port of entry to the United States. Of course they could not carefully inspect the contents of every case unless there were strong suspicions, but think they could do a great deal to awaken people elsewhere.

"Then I believe there should be other inspectors to inspect the stock at the nurserymen's place before it is distributed all over the country. Just think what a benefit it would have been to the country if there had been such an inspector in California before the scale was carried all over the country."

"I favor a national uniform inspection law. I think the gains would be impartiality and uniformity of inspection. This I think would soon bring about modification of the practices in different states, rendering it easier and safer to do inter-state nursery business."

"I favor a national law because this will place all nurserymen upon an equal basis and do away with the endless delays and troubles on account of the various state laws."

AGAINST A NATIONAL INSPECTION LAW.

"If national inspection is desired it should include not only nurseries, but orchards, and compel all to keep clear of all kinds of pests."

"We favor a law that would be equally as stringent upon the fruit grower as well as the nurserymen and all others who own trees of any kind."

"The writer has recently had a hearing in Washington in regard to a proposed seed law and is none too strong for legislating any industry into federal restrictions or penitentiary penalties and bureaus. The only use for a national law is as a guide for state law makers, and if it is to be such, the same should be most conservatively and carefully considered. Every person interested commercially should be given an opportunity to be heard.

"The present idea of pernicious activity in federal legislation which will soon put every business man in many unprotected and defenseless industries into the position of working under the possibilities of a prison sentence is not an ideal occupation, in my judgment, for our congressmen."

"We certainly are not in favor of the nurserymen spending any time or money in trying to procure a national uniform inspection law.

"Congress has no power whatever to change the different state laws and all shipments made would be subject to the different state laws just as soon as they crossed the state line.

"If we could have had a national law passed years ago before all the states had passed their own different laws, we think it would have been a good thing, but so far as we can now see, it would be simply putting one more burden upon the shippers, with no corresponding benefits. We would simply have the provision of a national law to comply with in addition to the provision of every state into which we may be shipping.

"We do not know that we have any objection to a national uniform law only as stated above, and we should be very much afraid that there would not be an appropriation made so that all nurserymen could have their nurseries inspected. We think at the stage to which the matter has now arrived, it would be a good deal better to devote our energies to getting the state laws somewhat more uniform than to try to have a national bill passed."

"If all the state laws were abolished or amended to conform to the national law that would be all right, but they will not amend or abolish because that would be looked upon as interference with that time honored proposition of 'states' rights.'

"If we could have a good national law to cover the whole business and all state laws out of the way, it would be a great gain, but as it appears to me, it would make further complications just now to try to have a national bill passed; we might have a national law to cover importations from foreign countries, provided it could be made to harmonize with the present state laws. As the matter stands, I do not feel that there is much to gain in the proposed legislation."

Summing up the whole matter, the last letter puts it in a nutshell, and it is now for you to decide:

First. If all state laws were abolished or amended to conform to a national law that would be all right.

Second. They will not amend or abolish.

Third. What are we to gain by adding another law?

Fourth. Will it help the entomologists and inspectors in doing more efficient work or help the fruit growers by adding another inspection?

DREER'S SPECIAL OFFER OF

Hardy Herbaceous Peonies.

We are now booking orders for delivery during the latter part of September and October for the following select list of

Double Peonies

of which we have an exceptionally large stock of our own growing, strictly true to name, all in strong divisions, with from 3 to 5 eyes each.
